

Duke Energy Carolinas, LLC & Duke Energy Progress, LLC
Docket NO. M-100, Sub 163
PSDR No. 2-17 Actual Hourly Load
Period: December 23, 2022 through December 28, 2022

Below is the timeline depiction of the actual loads with load forecasts. Please see attached spreadsheets for raw data for actuals and forecasts. The company does balancing area load forecasting for its demand, it does not separate out different customer profiles or perform short-term forecasting for different customer profiles for load because loads are mixed on different feeders and it is physically impossible to distinguish which electrons go to a certain customer class.

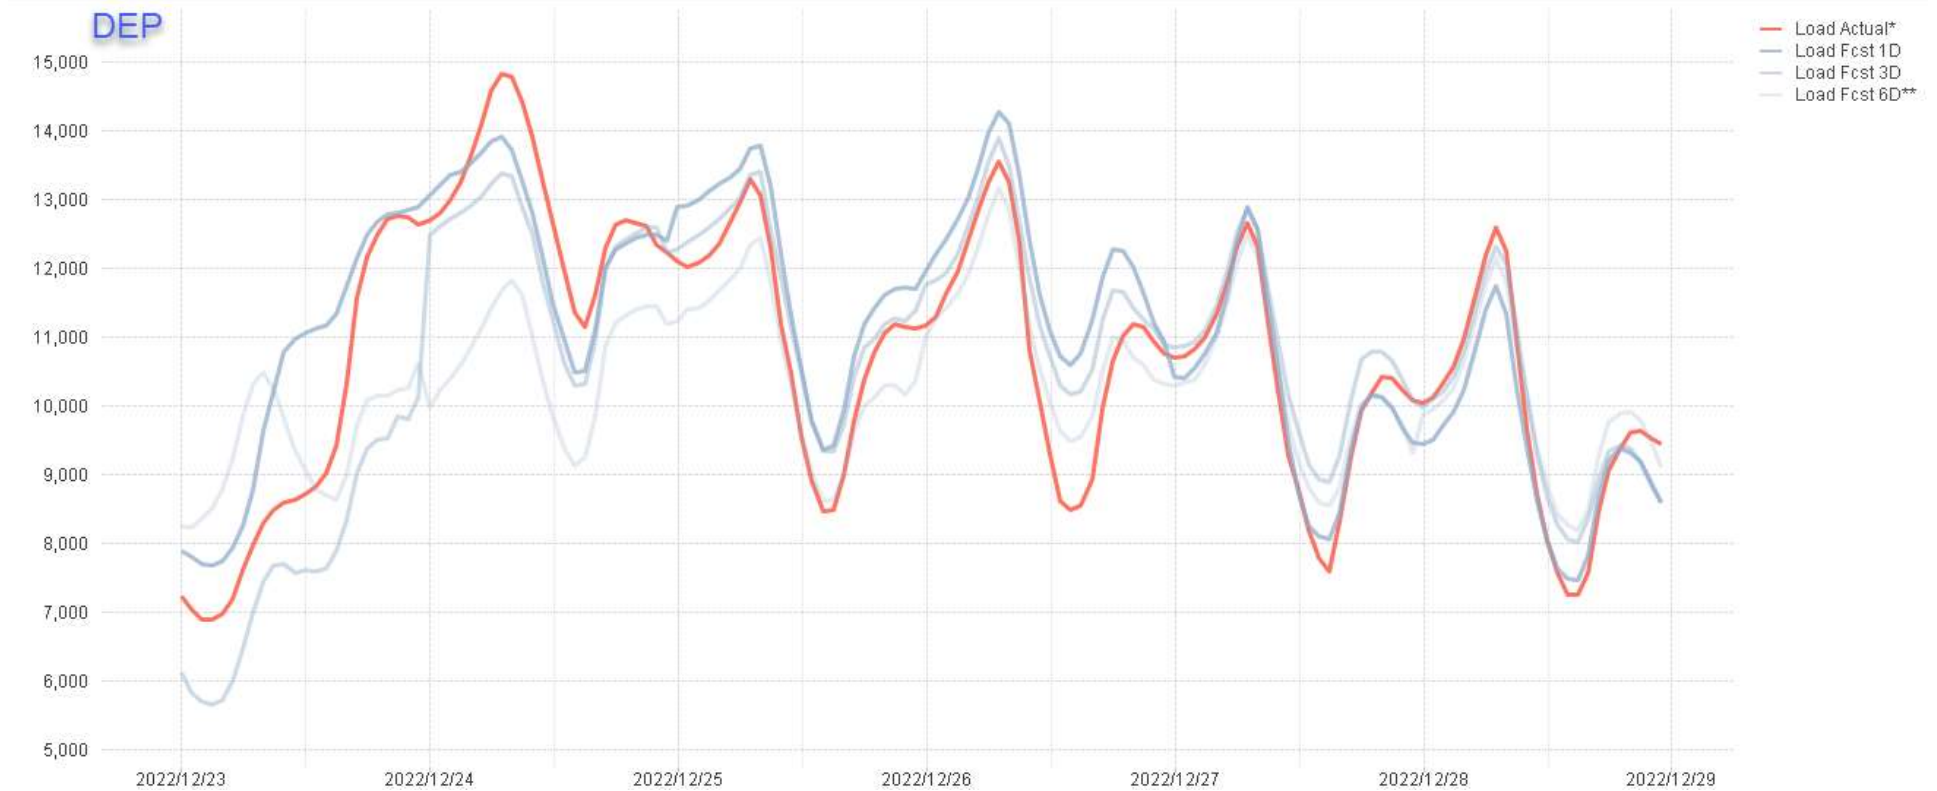

*Load Actual includes the estimated demand response and load shed added back.

**Load Forecasts are archived only to a 6-day ahead horizon, not the 7-day ahead horizon requested

Duke Energy Carolinas, LLC & Duke Energy Progress, LLC
Docket NO. M-100, Sub 163
PSDR No. 2-17 Actual Hourly Load
Period: December 23, 2022 through December 28, 2022
