Dear Commission,

You are in a position to protect the residents of NC from the harmful effects of climate change. I appeal to you to consider ways you can promote clean air & water, ~~some~~ things every citizen wants. The Carbon Plan presents an opportunity to promote clean, renewable energy.

Pls do the right thing for all of us!
Sincerely, Mary Ann Roser, 5 Dudley Ave.

Re: Carbon Plan Docket #: 100 Sub 190

To All concerned - You + ME,
I know you focused on responsible management
so I am compelled to say that elements of
a strong carbon plan include:

Restrict future investments in new gas, nuclear, oil,
or coal powered plants + infrastructure

Do not set limits on solar or other clean energy
installations

- Utilize NC's full offshore wind potential
- Require real, authentic and intentional community
engagement + involvement in the planning process.

Re: Carbon Plan Docket #: 100 Sub 190

As a Duke customer, I am concerned about the continued investment in fossil fuels. We need a plan that puts an emphasis on solar and wind energy. I have a zero energy home and give back hundreds of kWh of energy back to the grid at a loss. As managers, you can do better.

Being a senior I am keenly aware of the changes in my planet's environmental crisis. I hope we are not too late to save the environment. And I know that you are responsible managers who as residents are also concerned about the expense of the world's depleting oil supplies, the endangerment of coastal area ecosystems and increasing heat and harsh weather.

Please eliminate investments in new gas and oil plants. Thank you.

Re: Carbon Plan Docket #: 100 Sub 190

Dear Commission,

Thank you for your service to our state and its residents, and for giving citizens the opportunity to comment. Even though I am in my 7th decade, I care deeply about our climate. I am concerned that Duke Energy's plan is influenced by financial incentives that favor capital expenditures, rather than building transmission lines. I favor community solar. We have installed solar panels, but the upfront cost is out of reach for some residents. Further, the many economic impacts of the effects of climate events touches so many sectors, including insurance.
