Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Christopher Bell

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Deborah Poulos

Dear NC Utilities Commission,

I have read this and agree.

It is disgustingly amazing that Duke Energy did not build their coal ash ponds for our safety and when there was a spill here in N. C., they went into litigation rather than doing the right thing; yet again. I understand that they did the same thing in Tennessee & that spill is even worse.

And they want to make it harder for folks to have solar energy? Of course they want to do all they can to support their greedy way of doing business at any cost to the consumer and the environment.

They are a prime example of what is wrong in our country and our world; do what you can to make your money no matter what it cost in human life and environmental damage.

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Dena Christine

Subject: Net Metering in NC

My name is Kent Price. My wife and I currently Netmeter w/ Duke Power. We have a 10KW system that we installed on our new home in 2013. .

I do not support changes to net metering. Please oppose the changes to net metering.

Net Metering strengthens Utility Grid: The benefits of rooftop solar outweigh costs by 30% due to increased efficiency, avoided utility investments, and availability at peak times. Source: 2013 Crossborder Study

Drives Economic Growth: In 2013, there were over 2,400 solar jobs that contributed over \$1 billion to North Carolina's economy. NC leaders should applaud solar success.

Gives Consumers Choice: The utilities say they support solar, but only if all competition is eliminated and they are the only provider.

Encourages Healthy Competition: Rooftop solar is similar to a charter school ? it provides a competitive alternative to the monopoly. Monopoly utilities are not known for reducing costs or driving business innovation, but the solar industry is!

Subject: Rooftop solar and net metering

To the Chief Clerk of the Commission,

My name is Sean DiMaria and I invested in rooftop solar panels with net metering two years ago. One of the reasons for purchasing the type of solar panels/battery backup was the option to have net metering. This was at great expense on my part due to the complexity of my solar panel/battery backup system.

I do not support changes to net metering that will kill rooftop solar in North Carolina and I ask you to oppose changes to net metering.

Thank you for your consideration.
