Message

I am one of approximately 1206 customers of the Carteret County that is apparently being sold by our county commissioners. I believe this is so wrong. Many on the system are low income, hence, the word rural water system is appropriate. We have asked the commissioners to give us the opportunity to form a coop as in West Carteret county, but they refused to listen to the citizens. We have already incurred price increases and cannot afford more. It make no sense to sell a public utility out from under the people who use it. At this time my water makes spots on all dishes and the glasses feel chalky. I would appreciate some help in this matter. Thanks for reading.
