Docket

E-7 Sub 1304 ?

Message

I have contacted Duke Energy asking for them to explain why every month this year I've seen a significantly higher increase in price per kilowatt than their claimed increase hike that they had approved. I repeatedly asked for an explanation and they refused. I hope that our state government can help in some way. Over the past year my power usage has decreased but my bills are higher. Below are some of my statistics: May 2024/2023 price per kwh - \$0.149/\$0.112 or an increase of 33%. Usage - 848/1016 kwh or 16.5% less April 2024/2023 price per kwh - \$0.152/\$0.114 or an increase of 33%. Usage - 769/920 kwh or 16.4% less March 2024/2023 price per kwh - \$0.157/\$0.115 or an increase of 36%. Usage - 617/879 kwh or 29.8% less
