E-7 Sub 1276 and E-2 Sub 1300

Message

WRAL reports that Duke's net income last year was 3 billion dollars, but they need 9 billion dollars more? Were the 3 billion dollars citizen utility payments and how much of the 9 billion dollars will actually go to upgrades and not shareholder pockets? At a time when we are trying to stabilize from the pandemic, years and years of quality job loss, rising rental rates, constant property tax increases and unyielding insurance both car and home increases, for this request to be approved as is, is a disservice to NC citizens. Require Duke to use that 3 billion dollars they already collected from citizens first then establish increases over the next three years. Tell the citizens what will go to upgrades and what will go into shareholder pockets. Let the citizens know when the upgrades are finished and when they can expect rates to go down.

I am writing you to rethink Duke Energy's net metering proposal. Duke energy should be supporting rooftop solar customers as allies to help us reach the set goals for clean energy in North Carolina, not penalizing them.
