1
2 COMMISSIONER BROWN-BLAND: Good morning.
3 Let's come on the record. I'm Commissioner ToNola D.
4 Brown-Bland with the North Carolina Utilities
5 Commission, presiding Commissioner for this hearing.
6 With me this morning are Chairman Edward S. Finley,
7 Jr.; Commissioners Jerry C. Dockham, James G.
8 Patterson, Lyons Gray, Daniel G. Clodfelter, and
9 Charlotte A. Mitchell.

10 I now call for hearing Docket Number E-22,
11 Sub 556, In the Matter of Application by Virginia
12 Electric and Power Company, d/b/a Dominion Energy
13 North Carolina for Approval of Demand-Side Management
14 and Energy Efficiency Cost Recovery Rider pursuant to
15 G.S. § 62-133.9 and Commission Rule R8-69.

16 G.S. § 62-133.9 establishes the procedure
17 for cost recovery of Demand-Side Management, hereafter
18 DSM, and Energy Efficiency, hereafter EE, expenditures
19 and provides for an annual DSM/EE Rider for each
20 electric public utility to recover all reasonable and
21 prudent costs incurred, and appropriate incentives for
22 adoption and implementation of new DSM and new EE
23 measures.

24 Commission Rule R8-69(b) provides for the

NORTH CAROLINA UTILITIES COMMISSION

1 establishment of a DSM/EE Experience Modification
2 Factor Rider to allow the electric public utility to
3 collect the difference between reasonable and
4 prudently incurred costs and the revenues that were
5 actually realized during the test period under the
6 DSM/EE Rider then in effect.

7 Rule R8-69(f) provides that each electric
8 public utility shall publish notice of the annual
9 hearing at least 30 days prior to the hearing.

10 On August 21, 2018, Dominion Energy North
11 Carolina, hereafter Dominion, filed its annual
12 Application for approval of DSM/EE Cost Recovery
13 Rider. Filed with the Application were the direct
14 testimony and exhibits of Witnesses Michael T.
15 Hubbard, Deanna R. Kesler, Jarvis E. Bates, Alan J.
16 Moore, J. Clayton Crouch, and Debra A. Stephens.

17 On September 7, 2018, the Commission issued
18 an Order Scheduling Hearing, Establishing Discovery
19 Guidelines, and Requiring Public Notice. The Order
20 set the hearing in the docket for Monday, November 5,
21 2018.

22 The participation in this docket by the
23 Public Staff - North Carolina Utilities Commission is
24 recognized pursuant to G.S. § 62-15.

1 On October 2, 2018, in response to a motion
2 filed by the Public Staff, the Commission issued an
3 Order changing dates for intervention, direct and
4 rebuttal prefiled testimony, and rescheduled the
5 expert witness hearing to be held on Thursday, today,
6 November 8th at 9:30 a.m.

7 The public hearing was held as initially
8 scheduled and as initially noticed on November 5th.

9 On October 8, 2018, Dominion filed the
10 corrected Schedules 1, 2, 4 and 7 of Company Witness
11 Deanna R. Kesler.

12 On October 15, 2018, Carolina Industrial
13 Group for Fair Utility Rates I filed a Petition to
14 Intervene which was granted by Commission Order dated
15 October 24, 2018.

16 Also on October 24, 2018, Dominion filed
17 Corrected Schedule 1 of Company Witness Alan J. Moore,
18 and also filed the required Affidavits of Publication
19 of Notice.

20 On October 25, 2018, the Public Staff filed
21 the testimony of Michael C. Maness and David M.
22 Williamson.

23 In compliance with the requirement of
24 Chapter 138A of the State Government Ethics Act, I

1 remind the members of the Commission of our
2 responsibility to avoid conflicts of interest, and I
3 inquire whether any member has a conflict of interest
4 with respect to the matter before us this morning?

5 (No response)

6 Let the record reflect that no conflicts
7 were identified.

8 And I will now call for opinions
9 beginning -- for appearances beginning with the
10 Applicant.

11 MS. KELLS: Good morning, Presiding
12 Commissioner Brown-Bland and Commissioners; Andrea
13 Kells with the Law Firm of McGuireWoods appearing on
14 behalf of Dominion Energy North Carolina. Also
15 appearing on behalf of the Company is Mr. Brett
16 Breitschwerdt, also of McGuireWoods. And with us
17 today are Mr. Horace Payne and Ms. Teirra Everette,
18 in-house counsel with the Company.

19 COMMISSIONER BROWN-BLAND: Good morning.

20 MR. McDONALD: Good morning. I'm Ralph
21 McDonald with Bailey and Dixon appearing for Carolina
22 Industrial Group for Fair Utility Rates. And I'd also
23 like to note please that after all these years I still
24 laugh politely at the Chairman's jokes.

1 (Laughter)

2 COMMISSIONER BROWN-BLAND: Well, we thank

3 you for that, Mr. McDonald.

4 MS. FENNEL: Good morning. Heather Fennell

5 the Public Staff on behalf of the Using and Consuming

6 Public.

7 COMMISSIONER BROWN-BLAND: And good morning.

8 So are there any preliminary matters before we begin?

9 MS. KELLS: No.

10 COMMISSIONER BROWN-BLAND: If not, we'll

11 start with the introduction of the evidence.

12 MS. KELLS: Thank you, Commissioner

13 Brown-Bland. I would first like to identify the

14 Company's Application filed August 21, 2018, as DENC

15 Exhibit 1, and request that it be included in the

16 record in this case and received into evidence.

17 COMMISSIONER BROWN-BLAND: That motion will

18 be allowed and the Application will be marked DENC

19 Exhibit 1.

20 MS. KELLS: Thank you.

21 (WHEREUPON, DENC Exhibit 1 was

22 marked for identification and

23 received into evidence.)

24 MS. KELLS: And now I would like to go

1 through the testimonies and exhibits of the Company's
2 witnesses who have been excused from appearing today
3 and will ask that the testimonies and appendices be
4 copied into the record as if given orally from the
5 stand, and that the exhibits filed in support of the
6 testimony be identified as premarked and received into
7 evidence.

8 So, first, in support of the Application,
9 the Company prefiled the direct testimony of Michael
10 T. Hubbard consisting of 17 typed pages of questions
11 and answers and an Appendix A.

12 Also, the direct testimony of Deanna R.
13 Kesler with nine typed pages of questions and answers
14 and an Appendix A and seven schedules. Schedule 5 was
15 identified as confidential and filed under seal.

16 Next, the direct testimony of Jarvis E.
17 Bates with 11 typed pages of questions and answers and
18 an Appendix A, and seven schedules, all of which were
19 identified as confidential.

20 The direct testimony of Alan J. Moore
21 consisting of 17 typed pages of questions and answers
22 and an Appendix A, and three schedules. Schedules 1
23 and 2 were identified as confidential.

24 And, finally, the direct testimony of J.

1 Clayton Crouch consisting of 10 typed pages of
2 questions and answers and an Appendix A and four
3 schedules. Schedules 1 and 3 were identified as
4 confidential.

5 Excuse me. Now finally, the direct
6 testimony of Debra A. Stephens consisting of eight
7 typed pages of questions and answers and an Appendix
8 A, and 16 schedules, all of which were public.

9 Also on October 8, 2018, the Company filed
10 corrected Schedules 1, 2, 4 and 7 to Witness Kesler's
11 direct testimony, all of which were public, as well as
12 a correction to page 8, line 9 of her direct
13 testimony.

14 On October 24, 2018, the Company filed the
15 corrected Schedule 1 to Witness Moore's direct
16 testimony which was identified as confidential.

17 I would ask that the Company's letter in
18 lieu of rebuttal testimony filed on November 2, 2018,
19 be identified as DENC Exhibit 2, included in the
20 record, and received into evidence. And that all of
21 the testimony and Appendices be copied into the record
22 and all of the supporting -- move that all of the
23 supporting exhibits be received into evidence at this
24 time.

1 COMMISSIONER BROWN-BLAND: All right. The
2 motion that the letter of no rebuttal testimony be
3 received and admitted into evidence will be allowed
4 and it will be identified as DENC Exhibit 2 as
5 requested.

6 (WHEREUPON, DENC Exhibit 2 was
7 marked for identification and
8 received into evidence.)

9 COMMISSIONER BROWN-BLAND: And the direct
10 testimony of the witnesses - Hubbard, Kesler, Bates,
11 Moore, Crouch and Stephens - will all be received into
12 evidence, treated as if given orally from the witness
13 stand. Their Appendices will also be received into
14 evidence. And the exhibits will be identified as they
15 were marked when prefiled and received into evidence.

16 Those exhibits or portions of exhibits or
17 schedules, which will also be identified as they were
18 filed -- as they were marked when filed, those that
19 were marked confidential and that still remain
20 confidential according to the Company's filing will
21 remain confidential in the record.

22 Is that -- so all is received into evidence.

23 (WHEREUPON, the prefiled direct
24 testimony and Appendix A of

MICHAEL T. HUBBARD is copied into
the record as if given orally from
the stand.)

**DIRECT TESTIMONY
 OF
 MICHAEL T. HUBBARD
 ON BEHALF OF
 DOMINION ENERGY NORTH CAROLINA
 BEFORE THE
 NORTH CAROLINA UTILITIES COMMISSION
 DOCKET NO. E-22, SUB 556**

1 **Q. Please state your name, business address, and position with Virginia**
 2 **Electric and Power Company (“Dominion Energy North Carolina” or the**
 3 **“Company”).**

4 **A. My name is Michael T. Hubbard, and I am Manager-Energy Conservation for**
 5 **the Company. My business address is 701 East Cary Street, Richmond,**
 6 **Virginia 23219. A statement of my background and qualifications is attached**
 7 **as Appendix A.**

8 **Q. Please describe your area of responsibility with the Company.**

9 **A. I am responsible for overseeing the Company’s Energy Conservation (“EC”)**
 10 **department, which manages the Company’s demand-side management**
 11 **(“DSM”) and energy efficiency (“EE”) programs (“DSM/EE Programs” or**
 12 **“Programs”).**

13 **Q. What is the purpose of your testimony in this proceeding?**

14 **A. My testimony supports the Company’s request to recover all reasonable and**
 15 **prudent costs incurred in adopting and implementing the Company’s**
 16 **authorized portfolio of North Carolina DSM/EE programs, as well as utility**
 17 **incentives, through updated Rider C and the test period experience**
 18 **modification factor (“EMF”) rider, Rider CE (“Application”). The purpose of**

1 my testimony is to: (1) provide an update on the status of the Company's
 2 current DSM/EE Programs in North Carolina; and (2) present the Company's
 3 cost recovery request in this proceeding to the North Carolina Utilities
 4 Commission ("NCUC" or "Commission").

5 I. UPDATE ON DSM/EE PROGRAMS

6 Q. Please provide a brief overview of the Company's approved DSM/EE
 7 Programs in North Carolina.

8 A. In February 2011, the Commission approved five DSM/EE Programs, which
 9 the Company began offering to customers in the spring of 2011.¹ These
 10 "Phase I" DSM/EE Programs included the Company's:

- 11 • Residential Low Income Program;
- 12 • Residential Air Conditioner Cycling Program;
- 13 • Residential Lighting Program;
- 14 • Commercial HVAC Upgrade Program; and
- 15 • Commercial Lighting Program.

16 On December 31, 2011, the Company concluded the implementation phase of
 17 its Residential Lighting Program. Further, the Company concluded its
 18 Commercial Lighting Program and Commercial HVAC Upgrade Program on
 19 December 31, 2014.²

¹ Orders approving these Programs were issued on February 22, 2011, in Docket Nos. E-22, Sub 463 (Low Income Program), Sub 465 (Air Conditioner Cycling Program), Sub 467 (Commercial HVAC Upgrade Program), Sub 468 (Residential Lighting Program), and Sub 469 (Commercial Lighting Program).

² On December 16, 2013, the Commission approved the Company's request to transition the Phase I Commercial HVAC Upgrade Program (Sub 467) and the Commercial Lighting Program (Sub 469) from system-wide Programs to North Carolina-only Programs. By Order issued August 8, 2014, the

1 In August 2013, the Company requested Commission approval to implement
2 the following “Phase II” DSM/EE Programs:

- 3 • Non-residential Energy Audit Program;
- 4 • Non-residential Duct Testing and Sealing Program;
- 5 • Residential Home Energy Check-Up Program;
- 6 • Residential Duct Sealing Program;
- 7 • Residential Heat Pump Tune-Up Program; and
- 8 • Residential Heat Pump Upgrade Program.

9 The Commission approved the six Phase II Programs in December 2013, and
10 the Company began accepting new customers in these Programs beginning on
11 January 1, 2014.³ On August 16, 2016, as amended on October 19, 2016, the
12 Company filed a Motion for Commission Approval to close the Phase II
13 programs to new applications as of February 7, 2017, contemporaneous with
14 their closure to new participants in Virginia, with the exception of the
15 Residential Heat Pump Upgrade Program, which the Company asked to
16 suspend as of February 7, 2017. The Commission granted those requests by
17 order issued on November 29, 2016.⁴ On July 28, 2017, the Company filed a
18 Motion to close the Residential Heat Pump Upgrade Program, which the
19 Commission approved by order issued on September 5, 2017.⁵

Commission subsequently approved the Company’s request to close these North Carolina-only Programs as of December 31, 2014.

³ Orders approving these Programs were issued on December 16, 2013, in Docket Nos. E-22, Sub 495 (Non-Residential Energy Audit Program), Sub 496 (Non-Residential Duct Testing and Sealing Program), Sub 497 (Residential Duct Testing and Sealing Program), Sub 498 (Residential Home Energy Check Up Program), Sub 499 (Residential Heat Pump Tune Up Program), and Sub 500 (Residential Heat Pump Upgrade Program).

⁴ *Order on Motion to Close or Suspend Programs*, Docket No. E-22, Subs 495, 496, 497, 498, 499, and 500 (Nov. 29, 2016).

⁵ *Order Cancelling Program*, Docket No. E-22, Sub 500 (Sept. 5, 2017).

1 In June 2014, the Company requested Commission approval to implement the
2 following “Phase III” DSM/EE Programs:

- 3 • Non-residential Heating and Cooling Efficiency Program;
- 4 • Non-residential Lighting Systems and Controls Program; and
- 5 • Non-residential Window Film Program.

6 The Commission approved the three Phase III Programs in October 2014, and
7 the Company began accepting new customers in these Programs beginning on
8 January 1, 2015.⁶ On August 16, 2018, the Company filed a Motion to close
9 the Phase III Non-Residential Window Film Program to new participants as
10 of December 31, 2018.⁷ Also on August 16, 2018, the Company requested
11 Commission approval to transition the Phase III Non-residential Heating and
12 Cooling Efficiency Program and the Non-residential Lighting Systems and
13 Controls Program to be offered on a North Carolina-only basis.⁸

14 In July 2015, the Company requested Commission approval to implement the
15 “Phase IV” Residential Income and Age Qualifying Home Improvement
16 (RIAQHI) Program. After Commission approval in October 2015, this new
17 Program opened to North Carolina customers on January 1, 2016.⁹ The Phase
18 IV RIAQHI Program replaced the Phase I North Carolina-only Low Income

⁶ Orders approving these Programs were issued on October 27, 2014, in Docket Nos. E-22, Sub 507 (Non-Residential Heating and Cooling Efficiency Program), Sub 508 (Non-Residential Lighting Systems and Controls Program), and Sub 509 (Non-Residential Window Film Program).

⁷ Motion to Close Non-Residential Window Film Program and Residential Retail LED Lighting Program, Docket No. E-22, Subs 509, 539 (Aug. 16, 2018) (“Motion to Close”).

⁸ Application of Dominion Energy North Carolina for Approval of Non-Residential Heating and Cooling Efficiency Program, Docket No. E-22, Sub 507 (Aug. 16, 2018); Application of Dominion Energy North Carolina for Approval of Non-residential Lighting Systems and Controls Program, Docket No. E-22, Sub 508 (Aug. 16, 2018).

⁹ *Order Approving Program*, Docket No. E-22, Sub 523 (Oct. 6, 2015).

1 Program, which concluded on December 31, 2015.¹⁰ On November 6, 2017,
2 the Commission approved the Company's request to suspend the RIAQHI
3 Program since the Program was set to expire in Virginia in early 2018.¹¹ The
4 Company stated that if the Virginia State Corporation Commission ("VSCC")
5 granted an extension, it would file a request seeking to reopen the Program in
6 North Carolina in accordance with the Program's system-wide design. On
7 May 31, 2018, the Company filed a motion with the Commission to reopen
8 the RIAQHI Program to customer participation beginning July 1, 2018.¹² On
9 June 26, 2018, the Commission approved reopening the RIAQHI Program.¹³

10 In July 2016, the Company requested Commission approval to implement the
11 "Phase V" Non-residential Small Business Improvement Program. After
12 Commission approval in October 2016,¹⁴ the Company launched the Program
13 beginning on January 1, 2017.

14 In October 2016, the Company requested Commission approval to implement
15 an instant discount type of Residential Retail LED Lighting Program on a
16 North Carolina-only basis during 2017 and 2018. The Commission approved
17 the Residential Retail LED Lighting Program in December 2016.¹⁵ On

¹⁰ On September 9, 2014, the Commission approved the Company's request to transition the Phase I Residential Low Income Program from a system-wide Program to a North Carolina-only Program. *Order Granting Motion to Offer North Carolina-only Low Income Program*, Docket No. E-22, Sub 463 (Sept. 9, 2014).

¹¹ *Order Suspending Program*, Docket No. E-22, Sub 523 (Nov. 6, 2017).

¹² *Motion to Reopen Program*, Docket No. E-22, Sub 523 (May 31, 2018).

¹³ *Order Approving Reopening Program*, Docket No. E-22, Sub 523 (June 26, 2018).

¹⁴ *Order Approving Program*, Docket No. E-22, Sub 538 (Oct. 26, 2016).

¹⁵ *Order Approving Program*, Docket No. E-22, Sub 539 (Dec. 20, 2016).

1 August 16, 2018, the Company filed a Motion to close the Program effective
2 with the end of its contemplated two-year duration.¹⁶

3 In July 2017, the Company requested Commission approval to implement the
4 "Phase VI" Non-residential Prescriptive Program. After Commission
5 approval in October 2017,¹⁷ the Company launched the Program in North
6 Carolina beginning on January 1, 2018.

7 **Q. Please provide a brief update on the Company's implementation of the**
8 **approved DSM/EE Programs in North Carolina.**

9 **A.** The approved DSM/EE Programs have been successful in North Carolina.
10 The Company launched the Phase I Residential Lighting Program in May
11 2011, and over 37,000 bulbs were sold through December 31, 2011, when the
12 program was completed. Through the Low Income Program, the Company
13 has performed approximately 930 low income audits and repairs in North
14 Carolina during the period June 2011 through June 30, 2015. Through the Air
15 Conditioner Cycling Program, the Company began installing air conditioner
16 cycling devices in August 2011, and approximately 3,407 customers are
17 participating in the Program as of June 30, 2018.

18 The Phase II Programs launched in North Carolina in January 2014. Since
19 Program launch through suspension and closure of the Phase II Programs in
20 February 2017, approximately 5,294 units have been serviced as part of the

¹⁶ See Motion to Close, *supra* n. 7.

¹⁷ Order Approving Program, Docket No. E-22, Sub 543 (Oct. 16, 2017).

1 Residential Heat Pump Tune-Up Program and 1,349 units have been upgraded
2 in North Carolina to more efficient models as part of the Residential Heat
3 Pump Upgrade Program. The Residential Duct Testing and Sealing Program
4 has resulted in testing and repair of duct work associated with approximately
5 554 heat pump units. Approximately 1,049 residential customers have
6 received customized energy audit reports and direct install measures as part of
7 the Residential Home Energy Check-Up Program.

8 Examples of direct install measures include installing compact fluorescent
9 light bulbs, faucet aerators, and door weather-stripping. The Non-residential
10 Energy Audit Program has provided approximately 115 audits to North
11 Carolina customers since Program launch through Program closure in
12 February 2017. Of these 115 audits, 108 customers have installed approved
13 measures and obtained a rebate as part of the Program. The Non-residential
14 Duct Testing and Sealing Program has had approximately 250 participants in
15 North Carolina since Program launch.

16 The Non-residential Phase III Programs launched in North Carolina in January
17 2015. As of June 30, 2018, 186 customers have participated in the
18 Company's Phase III Programs.

19 The Phase IV Residential Income and Age Qualifying Home Improvement
20 Program launched in North Carolina in January 2016. As of June 30, 2018,
21 289 customers have participated in the Company's Phase IV Program.

1 The Phase V Non-residential Small Business Improvement Program became
2 available to qualifying customers in January 2017. As of June 30, 2018, 28
3 customers have participated in the Company's Phase V Program.

4 The Phase VI Non-residential Prescriptive Program became available to
5 qualifying customers in January 2018. The Company's implementation
6 vendor has been working diligently with trade allies promoting the Program
7 and building customer pipelines for future Program participants, as well as
8 installing new program management software. The implementation vendor
9 has participating contractors on board and these contractors are actively
10 reaching out to customers. Based on the strong program activity thus far in
11 Virginia for this Program, we remain confident that the 2018 annual goal of
12 29 participants and \$292,000 of incentives will be achieved.

13 The Company's Residential Retail LED Lighting Program became available
14 in 2017. As of June 30, 2018, there are 82 active stores that have sold over
15 172,000 bulbs as part of this Program.

16 As of June 30, 2018, the Company has 68 participating contractors for its
17 North Carolina customers.

18 **Q. Has the Company proposed additional Programs for Commission**
19 **approval in North Carolina?**

20 **A.** No. At this time, the Company is not requesting Commission approval for
21 any new DSM programs in North Carolina.

1 **Q. Has the Company evaluated extending the DSM Phase III Non-**
2 **residential Programs on a North Carolina-only basis?**

3 A. Yes. Consistent with prior direction by this Commission, the Company
4 recently evaluated the possibility of implementing the DSM Phase III
5 Programs on a North Carolina-only basis. After receiving input from the
6 Company's program design consultant regarding the feasibility of North
7 Carolina-only versions of these Program designs and evaluating their cost-
8 effectiveness, the Company has determined that continuing to offer two of the
9 Phase III Programs, the Non-residential Heating and Cooling Efficiency and
10 Lighting Systems and Controls Programs, only in North Carolina would be
11 reasonably cost-effective under the Mechanism and beneficial to the
12 Companies' North Carolina non-residential customers. As noted above, the
13 Company has requested Commission approval to close the Phase III Non-
14 residential Window Film Program, as the Company determined that extremely
15 limited past North Carolina customer participation did not support continuing
16 to offer that Program.

17 **Q. Does the Company have any additional plans to evaluate future DSM**
18 **Programs?**

19 A. Yes. The EC group is currently evaluating bids submitted in response to a
20 request for proposals ("RFP") issued in March 2018 for new DSM program
21 design ideas for development into potential future system-wide Programs. As
22 the Commission is aware, the Company's EC group develops the Company's
23 DSM/EE program portfolio to be deployed in "phases," with program

1 approval first being sought in Virginia and, if approved in Virginia, then
2 sought in North Carolina. The Company is currently evaluating the results of
3 the 2018 Program design RFP, and anticipates seeking approval by the VSCC
4 of a number of new residential and non-residential DSM/EE Program designs,
5 which, if approved in Virginia, would then be brought to North Carolina to be
6 offered on a system-wide basis.

7 II. OVERVIEW OF APPLICATION

8 **Q. What is the purpose of the Company's Application in this proceeding?**

9 A. In this Application, the Company is filing its annual update and requesting
10 approval of an updated Rider C revenue requirement to be recovered during
11 February 1, 2019, through January 31, 2020, the proposed rate period ("Rate
12 Period"), as well as seeking true-up of January 1, 2017, through December
13 31, 2017 ("Test Period"), costs through the Company's EMF rider, Rider CE.

14 **Q. Why is the Rate Period being used for this proceeding different than in
15 previous years?**

16 A. As addressed in the Application and further explained by Company Witness
17 Alan J. Moore, Commission Rule R8-69(a) provides that the Rate Period for
18 DSM/EE cost recovery is the same as the period during which the rider
19 established under Commission Rule R8-55, the Company's fuel factor, is in
20 effect. In previous years, the Company has proposed Rider C rates to be
21 effective for a calendar year Rate Period, consistent with the rate period
22 previously used for fuel factor riders under Rule R8-55. Based on discussions

1 with the Public Staff following the conclusion of the Company's 2017 rider
2 proceedings, the Company is proposing that updated Rider C be effective for a
3 February 1, 2019, through January 31, 2020, Rate Period, and is proposing the
4 same adjustment in its cost recovery rider applications filed pursuant to Rules
5 R8-55 and R8-67. The Company is requesting this adjustment to the annual
6 Rate Period in order to extend the time for the Commission to issue orders in
7 the Company's three annual rider proceedings filed pursuant to NCUC Rules
8 R8-55, R8-67, and R8-69, respectively, and to then allow the Company
9 additional time to finalize rates and customer notices (including allowing
10 reasonable time for Public Staff review) prior to the updated annual riders'
11 effective date. The Company intends to continue to use a February 1 through
12 January 31 rate period in future rider cases. As discussed further by Company
13 Witness Deanna R. Kesler, because the Company's system for modeling
14 projected costs and benefits is based on the calendar year, in this proceeding
15 the Company is applying the projected costs for calendar year 2019 to the
16 proposed February 1, 2019 – January 31, 2020 Rate Period.

17 **Q. What rates does the Company propose to charge for the month of**
18 **January 2019?**

19 **A.** For the month of January 2019, the Company proposes to maintain Rider C as
20 approved by the Commission in the Company's previous DSM/EE cost
21 recovery proceeding, and to reduce Rider CE for all classes to zero. Company
22 Witness Debra A. Stephens provides additional detail regarding this proposed
23 one-time interim adjustment to Rider CE for the month of January 2019.

- 1 Q. Please provide a brief overview of the Company's approach to cost
2 recovery for its North Carolina DSM/EE Programs as set forth in the
3 Application.
- 4 A. The costs of the Company's approved DSM/EE Programs have been
5 recovered during each annual Rule R8-69 cost recovery proceeding in
6 accordance with the Agreement and Stipulation of Settlement agreed to
7 between the Public Staff and the Company in the Company's initial 2010 cost
8 recovery proceeding ("Stipulation"), as well as the Cost Recovery and
9 Incentive Mechanism attached as Stipulation Exhibit 1 to the Stipulation.¹⁸ In
10 the fall of 2014, in accordance with provisions of the original Stipulation, the
11 Commission undertook a review of the Stipulation and Cost Recovery and
12 Incentive Mechanism. On May 7, 2015, after receiving comments from the
13 Company and the Public Staff, the Commission approved a revised Cost
14 Recovery and Incentive Mechanism that governed cost recovery in the 2015
15 and 2016 annual proceedings.¹⁹ The 2015 Mechanism Order also required the
16 Company and the Public Staff to file by March 1, 2017, as extended, an
17 updated performance incentive proposal for Commission review and
18 approval. On April 20, 2017, the Company and the Public Staff filed a Joint
19 Proposal for New PPI, with a revised Mechanism attached as Appendix A
20 (the "Mechanism"). The Commission issued an Order approving the revised
21 Mechanism on May 22, 2017, which governs cost recovery for the instant

¹⁸ *Order Approving Agreement and Stipulation of Settlement, Approving DSM/EE Rider, and Requiring Compliance Filing*, Docket No. E-22, Sub 464 (Oct. 14, 2011).

¹⁹ *Order Approving Revised Cost Recovery and Incentive Mechanism and Granting Waiver*, Docket No. E-22, Sub 464 (May 7, 2015) ("2015 Mechanism Order").

1 Application.²⁰ The revised Mechanism amends the PPI to a “portfolio
2 performance incentive” applicable to measures installed beginning with
3 Vintage Year 2017. The Company has developed its Application and pre-
4 filed testimony in accordance with the procedures set forth in the Mechanism.

5 **Q. Will the Company present other witnesses in this proceeding?**

6 A. Yes. Deanna R. Kesler, Regulatory Consultant, Demand-Side Planning, will
7 provide certain information required by NCUC Rule R8-69(f)(1)(ii)(a), (b),
8 (d), and (e), as well as the Utility Cost Test (“UCT”), and supporting
9 documentation for the PPI Test Period and projected Vintage Year
10 calculations made pursuant to the Mechanism. Company Witness Kesler will
11 also present the Company’s evaluation, measurement and verification
12 (“EM&V”) cost projections, and lost energy sales from EE Programs during
13 the EMF Test Period. Jarvis E. Bates, Energy Conservation Compliance
14 Manager, will support the projected calendar year 2019 costs associated with
15 the Company’s DSM/EE Programs to be recovered during the Rate Period,
16 actual costs associated with the Company’s DSM/EE Programs during the
17 Test Period, as well as provide information on the Company’s event
18 sponsorship and consumer education initiatives during the Test Period and
19 customer opt-outs pursuant to Commission Rule R8-69(d)(2). Alan J. Moore,
20 Regulatory Analyst III, will present the revenue requirements associated with
21 the DSM/EE Programs for the Rate Period as well as the EMF revenue

²⁰ *Order Approving Revised Cost Recovery and Incentive Mechanism*, Docket No. E-22, Sub 464 (May 22, 2017).

1 requirements associated with the DSM/EE Programs to be recovered during
2 the Test Period. J. Clayton Crouch, Regulatory Performance Consultant, will
3 explain the proposed assignment and allocation of costs to the North Carolina
4 jurisdiction for the DSM/EE Programs. Debra A. Stephens, Regulatory
5 Advisor, will present the calculation of the proposed updated Rider C and
6 EMF Rider CE.

7 **Q. Are the Company's North Carolina DSM/EE Programs consistent with**
8 **the Company's system-wide integrated resource plan ("Plan")?**

9 A. Yes. The Company has developed its Plan using a least cost modeling
10 methodology of reliable supply-side and demand-side options, pursuant to
11 North Carolina statutory and Commission policies. The Company's
12 operational DSM/EE Programs were included in the Company's 2018 Plan, as
13 filed on May 1, 2018, in Docket No. E-100, Sub 157.

14 **Q. Please discuss the utility incentive the Company proposes for inclusion in**
15 **the DSM/EE Rider.**

16 A. The Company requests to recover a Rate Period PPI representing, as
17 introduced above, a projected portfolio performance incentive as approved in
18 the revised Mechanism. The Company also requests recovery of the Test
19 Period PPI for Vintage Year 2017 and prior years. The Vintage Year 2017
20 PPI has been calculated under the new portfolio performance incentive
21 approach, while the PPI for prior Vintage Years has been derived based upon
22 the traditional individualized program-based approach, and is being calculated
23 consistent with the 2015 Mechanism Order and the methodology approved by

1 the Commission in the Company's previous annual cost recovery proceedings.
2 Company Witness Bates supports calculation of a streamlined projected PPI,
3 as allowed in Paragraph 56 of the Mechanism, as well as the true up of the PPI
4 based upon actual installed measurement units during Vintage Year 2017, as
5 required by Paragraph 60 of the Mechanism.

6 **Q. Has the Company projected Rate Period net lost revenues in the utility**
7 **incentives to be recovered during the Rate Period?**

8 A. Not at this time in this proceeding. Consistent with the approach taken in the
9 Company's 2014, 2015, 2016, and 2017 cost recovery applications, the
10 Company has not projected lost revenues and proposes to include \$0 as the
11 projected Rate Period net lost revenue utility incentive for this proceeding.

12 The current Rider CE will true up the Company's recovery of net lost
13 revenues during the Test Period, as supported by Company Witness Moore's
14 testimony.²¹

15 **Q. Has the Company identified any found revenues to offset its request to**
16 **recover net lost revenues?**

17 A. No. Consistent with Paragraph 47 of the Mechanism, the Company has
18 evaluated its North Carolina activities for potential found revenues using the
19 decision tree set forth in Attachment A of the Mechanism. Specifically, the
20 Company's EC, Rates, and Customer Solutions departments (which

²¹ Should the Company's projection of net lost revenues again become significant, it could choose to request projected cost recovery in a future proceeding, as provided for in the Mechanism.

1 collectively oversee Dominion Energy North Carolina's tariffs, Programs, and
2 utility-funded activities) evaluated the Company's North Carolina activities
3 during the Test Period to determine whether its activities may be causing
4 customers to increase demand or energy consumption, resulting in found
5 revenues. The Company's review of its North Carolina activities under the
6 decision tree has not identified any activities that resulted in found revenues
7 during the Test Period and has not identified any activities that would result in
8 projected found revenues during the Rate Period.

9 III. OVERVIEW OF COST RECOVERY REQUEST

10 **Q. Please summarize the components of updated Rider C and Rider CE and**
11 **resulting revenue requirements proposed to be recovered in this**
12 **proceeding.**

13 **A.** In accordance with Rule R8-69 and the Mechanism, updated Rider C will
14 recover the Company's North Carolina allocated share (including 100%
15 assigned cost of the North Carolina-only Programs) of the following
16 components during the Rate Period: (i) the Company's projected costs of
17 implementing the approved DSM/EE Programs during the February 1, 2019 –
18 January 31, 2020 Rate Period; (ii) the Company's projected Common Costs to
19 be incurred during the Rate Period; and (iii) the Company's streamlined
20 projected PPI. The Company's updated Rider C revenue requirement for the
21 Rate Period is \$2,510,301, as further detailed in Schedule 1 of Company
22 Witness Moore's testimony.

1 In accordance with Rule R8-69 and the Mechanism, the Company's EMF
2 Rider CE will true up and recover any under-recovery or refund any over-
3 recovery of the Company's North Carolina allocated share (including 100%
4 assigned cost of the North Carolina-only Programs) of the following
5 components: (i) the Company's Test Period costs of implementing the
6 approved DSM/EE Programs; (ii) the Company's Test Period Common Costs;
7 (iii) the Company's Test Period Net Lost Revenues; and (iv) the Company's
8 Test Period PPI. The Company's Rider CE revenue requirement for the Rate
9 Period is \$1,839,922 as further detailed in Schedule 2 of Company Witness
10 Moore's testimony.

11 **Q. Does that conclude your prefiled direct testimony?**

12 **A. Yes, it does.**

**BACKGROUND AND QUALIFICATIONS
OF
MICHAEL T. HUBBARD**

Michael T. Hubbard is Manager – Energy Conservation for Dominion Energy North Carolina. Since 2008, his responsibilities have included oversight of the design and implementation of new Demand Side Management programs, including vendor retention and oversight. In 2010, he served on the Virginia Governor’s Operational Review Taskforce to reduce costs and improve efficiencies for state government and also served on the board of the Richmond Region Energy Alliance, working with stakeholders on key energy efficiency issues. He is a certified Six Sigma Green Belt.

Mr. Hubbard joined Dominion Virginia Power in 1996 and has served in a number of regulatory and customer service-related leadership roles in the Delivery and Service Company organizations.

While in the position of Underground Damage Prevention Manager, he was appointed to serve on the State Corporation Commission of Virginia’s Advisory Committee for matters concerning the enforcement of the Virginia Underground Utility Line Damage Prevention Act, and also served on the board of directors that formed a new statewide Miss Utility call center.

Mr. Hubbard has a B.S. in History from Hampden-Sydney College and M.S.L.S. (Masters in Library Sciences) from the University of Kentucky, and is a member of the Phi Beta Kappa National Honor Society.

Mr. Hubbard has previously presented testimony before the North Carolina Utilities Commission and the State Corporation Commission of Virginia.

(WHEREUPON, Company Exhibit DRK-1, Revised Schedules 1, 2, 4 and 7 and Schedules 3, 5 and 6, is marked for identification as prefiled and received into evidence.)

(Confidential pages filed under seal.)

(WHEREUPON, the prefiled direct testimony and Appendix A of DEANNA R. KESLER is copied into the record as if given orally from the stand.)

**DIRECT TESTIMONY
OF
DEANNA R. KESLER
ON BEHALF OF
DOMINION ENERGY NORTH CAROLINA
BEFORE THE
NORTH CAROLINA UTILITIES COMMISSION
DOCKET NO. E-22, SUB 556**

- 1 **Q.** Please state your name, business address, and position with Virginia
2 Electric and Power Company (“Dominion Energy North Carolina” or the
3 “Company”).
- 4 **A.** My name is Deanna R. Kesler and I am a Regulatory Consultant in Demand-
5 Side Planning, which is part of the Company’s Integrated Resource Planning
6 organization. My business address is 120 Tredegar Street, Richmond,
7 Virginia 23219. A statement of my background and qualifications is attached
8 as Appendix A.
- 9 **Q.** Please describe your area of responsibility with the Company.
- 10 **A.** I am responsible for the evaluation of Dominion Energy North Carolina’s
11 demand-side management (“DSM”) and energy efficiency (“EE”) programs
12 (“DSM/EE Programs” or “Programs”). This includes detailed analyses of
13 approved and proposed DSM/EE Programs and the incorporation of DSM and
14 EE measures into the Company’s integrated resource planning (“IRP”)
15 process and long-term integrated resource plan (the “Plan”). My
16 responsibilities also include planning, organizing, and coordinating
17 evaluation, measurement, and verification (“EM&V”) work for all DSM/EE
18 Programs through an independent third-party EM&V contractor, DNV GL.

1 This responsibility includes ensuring EM&V data is collected and made
2 available to DNV GL for review and analysis, reviewing EM&V processes
3 and reports, and coordinating all pertinent EM&V activities.

4 **Q. What is the purpose of your testimony in this proceeding?**

5 A. My testimony supports Dominion Energy North Carolina's request to recover
6 all reasonable and prudent costs incurred in adopting and implementing the
7 Company's portfolio of DSM/EE Programs as well as utility incentives,
8 through its updated Rider C, as well as the Company's experience
9 modification factor ("EMF") rider, Rider CE ("Application"). The purpose of
10 my testimony is to support the true up of lost revenues and the Company's
11 EM&V cost projections, as well as to provide certain information required by
12 North Carolina Utilities Commission ("NCUC" or "Commission") Rule
13 R8-69(f)(1)(ii)(a), (b), (d), and (e), with respect to the Company's DSM/EE
14 Programs. Regarding EM&V, my testimony will: (i) show the energy
15 savings for the previously-approved EE Programs over the EMF period
16 January 1, 2017, through December 31, 2017 ("Test Period"), for purposes of
17 calculating the Company's EMF; (ii) support the Company's EM&V costs
18 over the January 1, 2019, through December 31, 2019, calendar year
19 ("Calendar Year 2019") for the North Carolina jurisdiction, as well as the Test
20 Period; and (iii) provide information on Air Conditioner Cycling Program
21 activation events that occurred during the Test Period as required by Rule
22 R8-69(f)(1)(iii)(g). My testimony will also provide the Utility Cost Test
23 ("UCT") and supporting documentation for the Portfolio Performance

1 Incentive (“PPI”) calculations for the Test Period and the upcoming Calendar
2 Year 2019.

3 My testimony has been developed in accordance with the revised Cost
4 Recovery and Incentive Mechanism (“Mechanism”) approved by the
5 Commission on May 22, 2017, in Docket No. E-22, Sub 464.

6 **Q. Ms. Kesler, are you sponsoring any exhibits or schedules in connection**
7 **with your testimony?**

8 **A.** Yes. Company Exhibit DRK-1, consisting of Schedules 1-7 (Schedule 5
9 provided in public and confidential versions filed under seal), was prepared
10 under my supervision and is accurate and complete to the best of my
11 knowledge and belief. The Schedules I am sponsoring provide the following
12 information in support of the Company’s Application:

- 13 1. Schedule 1 of my pre-filed direct testimony provides the Company’s
14 total revenue requirement, avoided costs, and Calendar Year 2019
15 summer and winter peak and energy savings per unit measure for the
16 Company’s DSM/EE Programs, as required by Rule R8-69(f)(1)(ii)(a),
17 (b), (d), and (e) and calculated consistent with the Mechanism.
- 18 2. Schedule 2 provides a UCT calculation for each Program and the
19 portfolio of Programs for the projected Vintage Year 2019, as defined
20 in Paragraph 14 of the Mechanism.
- 21 3. Schedule 3 provides a comparison of the forecasted energy and
22 summer and winter capacity reductions for the Company’s ongoing

- 1 Phase I Air Conditioner Cycling Program and Phase III, IV, V, and VI
2 DSM/EE Programs, as required by Rule R8-69(f)(1)(iii)(h).
- 3 4. Schedule 4 provides the cost-effectiveness test evaluations required by
4 Paragraph 41 of the Mechanism.
- 5 5. Schedule 5 provides the Company's actually-incurred EM&V costs
6 during the Test Period, as well as projected EM&V costs during the
7 Calendar Year 2019.
- 8 6. Schedule 6 supports the calculation of estimated energy savings for all
9 DSM/EE Phase I, II, III, IV, and V programs, and the Residential
10 Retail LED Lighting Program, over the Test Period for the EMF Rider,
11 which is based on actual EM&V data collected and analyzed by DNV
12 GL.
- 13 7. Schedule 7 presents the date, weather conditions, event trigger, and
14 customer enrollment and activation data for the Air Conditioner
15 Cycling Program during the Test Period.

16 **Q. Please explain the information you have provided in your Schedule 1.**

17 **A.** My Schedule 1 first presents the system-level revenue requirement per
18 appropriate capacity, energy, and measure unit metric, for each ongoing Phase
19 I,¹ Phase III,² Phase IV,³ Phase V,⁴ and Phase VI⁵ DSM/EE Program. This

¹ The Company's ongoing Phase I DSM/EE Program is the Residential Air Conditioner Cycling Program (Docket No. E-22, Sub 465).

² The Company's ongoing Phase III programs are the Non-residential Heating and Cooling Efficiency Program (Docket No. E-22, Sub 507) and the Non-Residential Lighting Systems and Controls Program (Docket No. E-22, Sub 508). On August 16, 2018, the Company filed a motion in Docket No. E-22, Sub 509 to close the Non-residential Window Film Program, and filed applications in Docket No.

1 table was developed using the revenue requirement amounts requested for
 2 recovery during the upcoming Rate Period, as provided in Company Witness
 3 Alan J. Moore’s Schedule 1. Next, my Schedule 1 provides the system-level
 4 avoided costs per appropriate capacity, energy, and measure unit metric, for
 5 each of the approved going-forward Phase I, Phase III, Phase IV, Phase V,
 6 and Phase VI Programs. The proposed jurisdictional allocation factors, as
 7 required by Rule R8-69(f)(1)(ii)(b), are provided in Company Witness
 8 J. Clayton Crouch’s Schedule 4. Finally, my Schedule 1 shows the total
 9 expected system-level energy and summer and winter capacity reductions for
 10 each Program in the aggregate and per appropriate capacity, energy, and
 11 measure unit metric for Calendar Year 2019. The per unit cost for the Air
 12 Conditioning Cycling Program is based on summer demand reductions
 13 because the Company is a summer peaking utility.

14 **Q. By the terms of the Mechanism, how was the UCT developed in support**
 15 **of the Calendar Year 2019 PPI calculation?**

16 **A.** The UCT used to support the calculation of the Calendar Year 2019 PPI for
 17 each Vintage Year was developed in accordance with Paragraphs 13-14 of the
 18 Mechanism. The Strategist model, a computer modeling and resource
 19 optimization tool, was used to calculate a projected UCT based on the 2019

E-22, Subs 507 and 508 for Commission approval to transition the Non-residential Heating and Cooling Efficiency Program and the Non-residential Lighting Systems and Controls Program to be offered on a North Carolina-only basis.

³ The Company’s Phase IV Program is the Income and Age Qualifying Home Improvement Program (Docket No. E-22, Sub 523).

⁴ The Company’s Phase V program is the Small Business Improvement Program (Docket No. E-22, Sub 538).

⁵ The Company’s Phase VI program is the Non-residential Prescriptive Program (Docket No. E-22, Sub 543).

1 Vintage Year (as defined in Paragraph 14 of the Mechanism), using the base
2 case assumptions consistent with the Company's most recent 2018 Integrated
3 Resource Plan, as filed with the Commission on May 1, 2018, in Docket No.
4 E-100, Sub 157 ("2018 Plan"). Because the Company's system for modeling
5 projected costs and benefits is based on the calendar year, in this proceeding
6 the Company is applying the projected costs for Calendar Year 2019 to the
7 proposed February 1, 2019 – January 31, 2020 Rate Period, which is
8 discussed in the direct testimony of Company Witnesses Michael T. Hubbard
9 and Moore.

10 **Q. Please explain the role of the Total Resource Cost ("TRC") Test in**
11 **calculating PPI under the Mechanism.**

12 **A.** The Commission approved amendments to the Mechanism on May 22, 2017,⁶
13 which transitioned the PPI to a portfolio-based incentive calculation beginning
14 with Vintage Year 2017. The TRC is one of the four cost/benefit tests
15 required by the Mechanism to be applied in evaluating DSM/EE Programs,
16 and is used in calculating the PPI under the portfolio-based approach
17 applicable to the Test Period and Calendar Year 2019. Strategist values are
18 calculated based on Calendar Year. Pursuant to Paragraph 51 of the pre-
19 existing Mechanism, each individual DSM/EE program is required to have a
20 Vintage Year TRC above 1.00 or that program is presumed ineligible for a
21 PPI. Each of the Company's Program's Vintage Year TRC test results
22 recoverable during the Test Period had a TRC value above 1.00 except for the

⁶ *Order Approving Revised Cost Recovery and Incentive Mechanism*, Docket No. E-22, Sub 464 (May 22, 2017).

1 Residential Income and Age Qualifying Home Improvement Program, which
2 is a program that is in the public interest. The Company is not seeking a PPI
3 for this Program.

4 **Q. Please explain the role of the UCT Test in calculating PPI under the**
5 **Mechanism for Vintage Year 2019 for recovery during the Rate Period.**

6 **A.** In accordance with Paragraph 53 of the Mechanism, the PPI shall be based on
7 the net dollar savings of the Company's DSM/EE portfolio, as calculated
8 using the UCT. Pursuant to Paragraph 52 of the Mechanism, Low-Income
9 Programs or other programs explicitly approved with expected UCT results
10 less than 1.00 shall not be included in the portfolio for purposes of the PPI
11 calculation. However, for purposes of PPI determination, Low Income
12 Programs shall be included, as appropriate, in dispatch calculations to
13 determine avoided kW and kWh associated with Programs eligible for a PPI.

14 My Schedule 2 presents the 2019 Vintage Year UCT and TRC cost/benefit
15 portfolio scores, as well as the individual program scores pursuant to
16 Paragraphs 52-53 of the Mechanism.

17 **Q. Please explain the information you have provided in your Schedule 3.**

18 **A.** My Schedule 3 presents forecasted energy and summer and winter capacity
19 reductions at the generator for the Company's ongoing Phase I, Phase III,
20 Phase IV, Phase V, and Phase VI DSM/EE Programs during the Calendar
21 Year 2019. Specifically, Schedule 3 provides a comparison of the Phase I,
22 Phase III, Phase IV, Phase V, and Phase VI Programs forecasted in the

1 Company's 2017 Plan Update and 2018 Plan. Generally, differences in the
 2 forecasted energy and capacity reductions can be explained by differences in
 3 program modeling assumptions, such as penetrations and load shapes. These
 4 differences arise in part from data collected through the EM&V process,
 5 changes to implementation schedules, and jurisdictional requirements.

6 **Q. Did the Company perform going-forward cost/benefit results for existing**
 7 **Programs as required by Paragraph 41 of the Mechanism?**

8 A. Yes. Going-forward cost/benefit results were performed for the Phase I AC
 9 Cycling Program, ~~Phase III North Carolina only~~, Phase IV, and Phase V
 10 Programs, and are included in my Schedule 4.

*KTH
 Per 10-8-18
 letter filed
 in docket*

11 In accordance with Paragraph 41, the Company has not developed going-
 12 forward cost/benefit analyses for the Company's Phase VI Non-Residential
 13 Prescriptive Program, which has not been implemented for at least 12 months.

14 **Q. What are the Company's objectives for EM&V?**

15 A. The objectives of the Company's EM&V are to provide an assessment of each
 16 Program's progress toward its goals, including tracking actual cumulative
 17 indicators over time versus the planning assumptions, such as the number of
 18 participants, estimated energy (kWh) and demand (kW) savings, and Program
 19 costs. EM&V tracking also provides average peak kW reduction per
 20 participant, average kWh savings per participant, if appropriate, and average
 21 incentive per participant for each Program.

1 **Q. Have you provided the Company's estimated EM&V cost for Calendar**
2 **Year 2019 and actual EM&V costs during the Test Period?**

3 A. Yes. My Schedule 5 provides the Company's projected EM&V costs during
4 Calendar Year 2019, as well as the Company's actual EM&V costs during the
5 Test Period for the North Carolina jurisdiction. The Company intends to
6 continue to file its annual EM&V Report with the Commission on May 1 each
7 year.

8 **Q. Can you please describe the information provided in your Schedule 6?**

9 A. Yes. My Schedule 6 supports the calculation of estimated energy savings for
10 all DSM/EE Phases I, II, III, IV, and V Programs, and the Residential Retail
11 LED Lighting Program, over the Test Period for the EMF Rider, which is
12 based on actual EM&V data collected and analyzed by DNV GL. The lost
13 sales (kWh) reflected in this schedule will be used by Company Witness
14 Moore in the calculation of lost revenues in this proceeding.

15 **Q. Have you provided information on the Air Conditioner Cycling Program**
16 **activation events that occurred during the Test Period, as required by**
17 **Rule R8-69(f)(1)(iii)(g)?**

18 A. Yes. My Schedule 7 reflects event-based data for the Air Conditioner Cycling
19 Program during the Test Period, including the date, weather conditions, event
20 trigger, and customer enrollment and switch activation data.

21 **Q. Does this conclude your pre-filed direct testimony?**

22 A. Yes, it does.

**BACKGROUND AND QUALIFICATIONS
OF
DEANNA R. KESLER**

Ms. Kesler has held various positions with Dominion Virginia Power in the Power Operations Management Services, Generation and System Planning, Production Costing, Energy Efficiency, and Integrated Resource Planning areas. She originally joined Dominion Virginia Power in 1984 and returned in 2008. She has also had a variety of leadership roles prior to rejoining the Company both as a consultant and as an internal employee for several major corporations.

Ms. Kesler has a Masters in Business Administration from Virginia Commonwealth University. She also studied Business Administration at Virginia Commonwealth University and Chemical Engineering and Finance at Virginia Polytechnic Institute and State University.

DIRECT TESTIMONY
OF
JARVIS E. BATES
ON BEHALF OF
DOMINION ENERGY NORTH CAROLINA
BEFORE THE
NORTH CAROLINA UTILITIES COMMISSION
DOCKET NO. E-22, SUB 556

1 Q. Please state your name, business address, and position with Virginia
2 Electric and Power Company ("Dominion Energy North Carolina" or the
3 "Company").

4 A. My name is Jarvis E. Bates, and my title is Energy Conservation Compliance
5 Consultant for Dominion Energy North Carolina. My business address is 701
6 East Cary Street, Richmond, Virginia 23219. My educational background and
7 experience are detailed in Appendix A.

8 Q. Please describe your area of responsibility with the Company.

9 A. I am responsible for cost and reporting compliance matters in the Company's
10 Energy Conservation ("EC") department including: (1) cost preparation and
11 cost oversight associated with the demand-side management ("DSM") and
12 energy efficiency ("EE") programs ("DSM/EE Programs" or "Programs");
13 (2) cost compliance with DSM/EE Program related rider requirements; and
14 (3) EC department internal and external regulatory and managerial cost
15 reporting.

1 Q. What is the purpose of your testimony in this proceeding?

2 A. My testimony supports the Company's request to recover all reasonable and
3 prudent costs incurred in adopting and implementing the Company's portfolio
4 of DSM/EE Programs and utility incentives, through its updated Rider C, as
5 well as the Company's experience modification factor ("EMF") rider, Rider
6 CE ("Application"). In my testimony, I provide cost projections, including
7 Common Costs, for the Company's DSM/EE Programs during January 1,
8 2019, through December 31, 2019, that have been used as a proxy for the
9 projected February 1, 2019, through January 31, 2020, period (the "Rate
10 Period"), as well as actual costs incurred during the EMF period January 1,
11 2017, through December 31, 2017 ("Test Period"). My testimony also
12 presents the Portfolio Performance Incentive ("PPI") for each Program in
13 accordance with the revised Cost Recovery and Incentive Mechanism
14 ("Mechanism") approved by the North Carolina Utilities Commission
15 ("NCUC" or the "Commission") on May 22, 2017, in Docket No. E-22, Sub
16 464. I also calculate the PPI EMF true-up for Vintage Year 2017 in
17 accordance with the terms of the Mechanism. Additionally, my testimony
18 lists the commercial and industrial customers that have elected to "opt out" of
19 the Company's DSM/EE Programs as required by NCUC Rule R8-69(d)(2).

20 Q. Mr. Bates, are you sponsoring any exhibits or schedules in connection
21 with your testimony?

22 A. Yes. Company Exhibit JEB-1, consisting of Schedules 1-7 (with all schedules
23 provided in public and confidential versions filed under seal), was prepared

1 under my direction and supervision and is accurate and complete to the best of
 2 my knowledge and belief. My Schedules 1-5 support the development of the
 3 projected Rate Period revenue requirement: Schedule 1 provides summary
 4 system-level Program and system-level Common Costs; Schedule 2 provides
 5 details for system-level Program Costs; Schedule 3 provides details for
 6 system-level Common Costs; Schedule 4 provides DSM Projected Program
 7 Costs, which are used by Company Witness J. Clayton Crouch for purposes of
 8 allocating Common Costs; and Schedule 5 provides the streamlined
 9 calculation of the Projected PPI for qualifying Programs. Schedule 6 provides
 10 actual cost information in support of the PPI true-up. Schedule 7 provides
 11 actual cost information in support of the Test Period EMF revenue
 12 requirement developed by Company Witness Alan J. Moore and includes
 13 actual system-level Program and system-level Common Costs incurred during
 14 the Test Period.

15 **Q. Please identify the Company's DSM/EE Programs for which cost**
 16 **recovery is sought in this proceeding.**

17 **A.** The Company is seeking cost recovery for adopting and implementing:
 18 (a) the previously approved Phase I DSM/EE program: Residential Air
 19 Conditioner Cycling Program;¹ (b) the previously approved Phase III
 20 DSM/EE programs: Non-Residential Lighting Systems and Controls, Non-
 21 residential Heating and Cooling Efficiency and Non-residential Window

¹ Docket No. E-22, Sub 465. All other Phase I programs except the Residential Air Conditioner Cycling Program have previously been concluded.

1 Film;² (c) the previously approved Phase IV Income and Age Qualifying
2 Home Improvement Program;³ (d) the previously approved Phase V Non-
3 Residential Small Business Improvement Program;⁴ (e) the previously
4 approved Residential Retail LED Lighting program;⁵ and (f) the previously
5 approved Phase VI Non-Residential Prescriptive Program.⁶ Due to the
6 Company's proposed closures of its Phase III Non-residential Window Film
7 Program and Residential Retail LED Lighting Program, only limited wind
8 down and evaluation, measurement and verification ("EM&V") costs are
9 projected to be incurred during the Rate Period for these programs.

10 **Q. What is the nature of the costs for the DSM/EE Programs?**

11 A. The costs are primarily categorized as direct "Program Costs" and indirect
12 "Common Costs." These Program Costs and Common Costs are those solely
13 associated with the EC department, which was assigned the responsibility to
14 separately identify and track DSM/EE costs related to the proposed Programs.
15 The projected Program Costs are those costs that are directly attributable to
16 individual Programs and primarily include costs based on signed vendor
17 contracts. Program Costs include design, implementation, marketing,
18 information technology hardware and software, call center, customer

² Docket No. E-22, Subs 507, 508, and 509. On August 16, 2018, the Company filed a motion in Docket No. E-22, Sub 509 to close the Non-residential Window Film Program, and filed applications in Docket No. E-22, Subs 507 and 508 for Commission approval to transition the Non-residential Heating and Cooling Efficiency Program and the Non-residential Lighting Systems and Controls Program to be offered on a North Carolina-only basis.

³ Docket No. E-22, Sub 523.

⁴ Docket No. E-22, Sub 538.

⁵ Docket No. E-22, Sub 539.

⁶ Docket No. E-22, Sub 543.

1 incentives, equipment, startup costs, vendor margins, data collection and
2 reporting, promotional events, management and field operations, EM&V
3 costs, and similar vendor and/or internal costs. The majority of these Program
4 Costs are based on contracts with the Company's four main Program vendors,
5 Comverge, Inc., Ecova, Honeywell, and Nexant. The Company will also
6 incur certain indirect Common Costs that are part of implementation of the
7 DSM/EE Programs, which are not specifically associated with any individual
8 DSM Program. These costs include certain customer communication costs,
9 department labor costs, dues and association costs, and external vendor costs.
10 Company Witness Moore further addresses deferral of DSM/EE Program
11 costs in his direct testimony.

12 **Q. How is the information that you provide related to projected Rate Period**
13 **Program Costs and Common Costs used by the other witnesses in this**
14 **proceeding?**

15 A. The Company is seeking to recover reasonable and prudent costs that are
16 projected for implementation of the DSM/EE Programs during the Rate
17 Period. As discussed above, such costs include the Program Costs and
18 Common Costs. Schedule 1 of my prefiled direct testimony shows both
19 Program Costs and Common Costs, at the system level, associated with
20 implementation of the Phase I, Phase III, Phase IV, Phase V, Phase VI, and
21 Residential Retail LED Lighting DSM/EE Programs for the Rate Period.
22 Company Witness Moore uses these costs to develop the revenue requirement
23 in support of this Application. Company Witness Crouch then explains the

1 assignment and allocation of these costs to the North Carolina jurisdictional
 2 customers, using penetration and participant percentages from my Schedule 4,
 3 which are provided pursuant to NCUC Rule R8-9(f)(1)(ii)(a). Finally,
 4 Company Witness Debra A. Stephens develops the DSM/EE Rider, Rider C,
 5 for recovery of the projected costs.

6 **Q. How is the information you provide in Schedules 6 and 7 related to actual**
 7 **Test Period Program and Common Costs used by the other witnesses in**
 8 **this proceeding?**

9 A. Through Rider CE, the Company is seeking to true up all DSM/EE Program
 10 and Common Costs incurred during the Test Period with the revenues
 11 received through Rider C during the Test Period. Company Witness Moore
 12 uses the actually incurred Test Period DSM/EE Program and Common Costs
 13 set forth in my Schedules 6 and 7 to develop the EMF revenue requirement to
 14 be recovered through Rider CE. Company Witness Crouch then explains the
 15 assignment and allocation of these costs to the North Carolina jurisdictional
 16 customers. Finally, Company Witness Stephens calculates Rider CE to
 17 recover these costs.

18 **Q. Please describe the PPI provisions in the Mechanism.**

19 A. The Mechanism has historically provided for a PPI based upon the
 20 performance of each individual program, which would be eligible for an
 21 incentive if the Program achieved a utility cost test ("UCT") score above 1.0.
 22 Through the revisions to the Mechanism agreed to between the Company and
 23 the Public Staff and approved by the Commission on May 22, 2017, the

1 Mechanism now provides for a “portfolio performance incentive” applicable
2 to measures installed beginning with Vintage Year 2017. Paragraphs 49 – 61
3 of the Mechanism govern calculation and recovery of the PPI.

4 **Q. Please describe Schedule 5 of your prefiled direct testimony, which**
5 **calculates the projected PPI to be recovered during the Rate Period**
6 **consistent with the Mechanism.**

7 A. My Schedule 5 calculates the projected PPI to be recovered during the Rate
8 Period in a manner consistent with Paragraphs 49-61 of the revised
9 Mechanism, and consistent with the Company’s approach approved in the
10 2017 cost recovery proceeding, Docket No. E-22, Sub 545 (“2017 DSM
11 Case”). Specifically, my Schedule 5 utilizes two PPI components.

12 First, PPI actual results from pertinent Vintage Years (2016 and prior) were
13 calculated using the methodology identical to past DSM cases. Starting with
14 the 2017 Vintage Year, PPI actual results are calculated using the new
15 portfolio methodology.

16 Second, Projected PPI estimates for Vintage Year 2019, and for Vintage Year
17 2018, are calculated in accordance with Paragraph 55(b) of the Mechanism.

18 **Q. Please explain the Company’s approach for calculating the projected**
19 **Rate Period PPI.**

20 A. Paragraph 55(b) of the Mechanism provides that the Company may utilize a
21 reasonable, simplified approach to estimate net dollar savings associated with
22 measurement units installed in future Vintage Years for purposes of projecting

1 the PPI to be recovered during the Rate Period. The Company's approach for
2 producing the projected PPI relies on the two components of the calculation.
3 For the first component, the Company uses the data supporting its PPI
4 calculation in the prior year's DSM cost recovery proceeding to isolate the
5 actual PPI dollar amount for the prior Vintage Year and then continues to use
6 that amount in this current case as the first component of the projected PPI
7 total revenue requirement. Consistent with the Company's approach in the
8 2017 DSM Case, the second component of the PPI estimate is calculated
9 using the current case's operating expense revenue requirement times 1% to
10 produce a dollar amount for estimated PPI. Adding the actual PPI dollar
11 amount to the estimated PPI dollar amount for the Rate Period thus produces a
12 streamlined and reasonably conservative estimate of the projected PPI for
13 each Program. This data would naturally refresh with every new DSM/EE
14 cost recovery proceeding.

15 **Q. Please describe Schedule 6 of your prefiled direct testimony, which**
16 **calculates the PPI EMF true-up consistent with the Mechanism.**

17 **A.** My Schedule 6 calculates the EMF true-up in a manner consistent with
18 Paragraph 59 of the revised Mechanism. I have obtained the number of actual
19 installed measurement units and the verified kW and kWh savings associated
20 with each Program for Vintage Year 2017 from the Company's most recently
21 filed EM&V Report, as filed May 1, 2018, in Docket No. E-22, Sub 545.
22 Coupled with the Company's actual costs for Vintage Year 2017, this
23 information is used to calculate the actual net cost/benefit results for each

1 Program. I then developed a comparison of actual results versus projected
2 cost/benefit results that are used to derive a true-up PPI. Once a PPI true-up
3 for a given Vintage Year has been completed based upon final EM&V data
4 filed with the Commission, the Company finalizes its PPI true-up for that
5 Vintage Year.

6 **Q. Are you providing any updates to the 2016 Vintage Year True Up?**

7 A. Yes, due to updates in the 2018 EM&V Report for 2016 kWh savings for the
8 Non-residential Duct Testing and Sealing, Non-residential HVAC, and Non-
9 residential Lighting Systems and Controls programs. Revised PPI true up
10 calculations have been included in my Schedule 6.

11 **Q. Are you also providing information regarding the Company's event
12 sponsorship and consumer education and awareness initiatives during the
13 Test Period?**

14 A. Yes. As directed by the Commission, the Company provides the following
15 information regarding its event sponsorship and consumer education and
16 awareness initiatives during the Test Period. The EC department actively ties
17 its communication and outreach activities directly to a specific DSM/EE
18 Program, so actual general education and awareness costs are limited.

19 The EC Department also relies heavily on the Dominion Energy, Inc.
20 ("Dominion Energy") website to provide general education to our customers
21 through tips, videos, and online energy audit tools, among other channels.
22 The EC program pages have garnered approximately 89,000 visits in the

1 current Test Period. In addition, the Company's DSM Phase II, III, V, and VI
2 implementation vendor, Honeywell, has created its own program web pages
3 for detailed tracking on marketing efforts. Honeywell's program pages have
4 garnered over 99,000 hits during the Test Period. In addition, the EC
5 department took advantage of other high-coverage, low-cost channels, such as
6 social media. Dominion Energy is continually growing social media presence
7 on both Facebook and Twitter gaining, since creation, over 74,000 fans and
8 58,000 followers, respectively. Whenever possible, the EC department
9 attempts to utilize low-cost options to communicate general education to our
10 customers.

11 **Q. Please elaborate on the status of DSM/EE opt-out customers.**

12 **A.** As required to be listed by NCUC Rule R8-69(d)(2), the following customers
13 have elected to opt out of the Company's DSM/EE Programs pursuant to
14 North Carolina General Statutes § 62-133.9(f) and NCUC Rule R8-69(d):
15 Weyerhaeuser (1 account); Nucor Steel-Hertford (1 account); KapStone Paper
16 and Packaging Company (2 accounts); KABA Ilco (1 account); Consolidated
17 Diesel (1 account); Domtar Paper Company LLC (1 account); Enviva Pellets
18 (2 accounts); Flambeau Products Corp. (1 account); Lowes Home Center, Inc.
19 (5 accounts); Hospira, Inc. (1 account); Parkdale America LLC (1 account);
20 and WalMart Stores (6 accounts). Company Witness Stephens' direct
21 testimony provides projected North Carolina total retail monthly sales for the
22 Calendar Year for accounts who have chosen to opt out of the DSM/EE Rider,
23 as required by Rule R8-69(f)(1)(vii).

- 1 Q. Does that conclude your prefiled direct testimony?
- 2 A. Yes, it does.

**BACKGROUND AND QUALIFICATIONS
OF
JARVIS E. BATES**

Mr. Bates is the Energy Conservation Compliance Consultant for Dominion Energy Virginia / Dominion Energy North Carolina. His responsibilities include demand-side management and energy efficiency (“DSM/EE”) program cost oversight, compliance, and DSM/EE internal and external reporting. He has provided testimony in prior DSM filings in Virginia and North Carolina.

Mr. Bates has a Bachelor of Business Administration degree in Finance from James Madison University. Prior to joining the company in 2007, he had over 14 years of experience in finance, operations management, and leadership in the Telecom, Healthcare, and Retail industries. Since joining Dominion, he has held finance positions supporting the Services Company as well as supporting Energy Conservation.

(Confidential pages filed under seal.)

(WHEREUPON, the prefiled direct testimony and Appendix A of ALAN J. MOORE is copied into the record as if given orally from the stand.)

DIRECT TESTIMONY
OF
ALAN J. MOORE
ON BEHALF OF
DOMINION ENERGY NORTH CAROLINA
BEFORE THE
NORTH CAROLINA UTILITIES COMMISSION
DOCKET NO. E-22, SUB 556

1 **Q.** Please state your name, business address, and position with Virginia
2 Electric and Power Company (“Dominion Energy North Carolina” or the
3 “Company”).

4 **A.** My name is Alan J. Moore. I am a Regulatory Analyst III in the Regulatory
5 Accounting Department for Dominion Energy North Carolina. My business
6 address is 701 East Cary Street, Richmond, Virginia 23219. A statement of
7 my background and qualifications is attached as Appendix A.

8 **Q.** Please describe your area of responsibility with the Company.

9 **A.** I am responsible for analyzing and calculating revenue requirements for
10 Dominion Energy North Carolina.

11 **Q.** What is the purpose of your testimony in this proceeding?

12 **A.** My testimony supports the Company’s request to recover all reasonable and
13 prudent costs incurred in adopting and implementing the Company’s portfolio
14 of North Carolina demand-side management (“DSM”) and energy efficiency
15 (“EE”) programs (“DSM/EE Programs” or “Programs”) and utility incentives,
16 through its updated Rider C, as well as the Company’s experience
17 modification factor (“EMF”) rider, Rider CE (“Application”).

1 The purpose of my testimony is to address the development of the updated
2 Rider C and Rider CE revenue requirements in support of the Application.
3 Pursuant to North Carolina Utilities Commission (“NCUC” or the
4 “Commission”) Rule R8-69, the Company’s Rider C revenue requirement
5 includes projected costs associated with: (a) the previously-approved Phase I
6 Air Conditioner Cycling Program;¹ (b) the previously-approved Phase III
7 DSM/EE programs: Non-residential Lighting Systems and Controls Program,
8 Non-residential Heating and Cooling Efficiency Program, and Non-residential
9 Window Film Program;² (c) the previously-approved Phase IV Residential
10 Income and Age Qualifying Home Improvement Program;³ (d) the
11 previously-approved Phase V Small Business Improvement Program;⁴ (e) the
12 previously-approved Residential Retail LED Lighting program;⁵ and (f) the
13 previously-approved Phase VI Non-Residential Prescriptive Program.⁶

14 Pursuant to Paragraph 28 of the revised Cost Recovery and Incentive
15 Mechanism (“Mechanism”) approved by the Commission’s May 22, 2017
16 Order issued in Docket No. E-22, Sub 464, the Rider CE revenue requirement
17 includes a true-up of the Company’s DSM/EE Rider C rates in effect for the

¹ Docket No. E-22, Sub 465. All other Phase I programs except the Residential Air Conditioner Cycling Program have previously been concluded.

² Docket No. E-22, Subs 507, 508, and 509. On August 16, 2018, the Company filed a motion in Docket No. E-22, Sub 509 requesting Commission approval to close the Non-residential Window Film Program. On August 16, 2018, the Company applied in Docket No. E-22, Subs 507 and 508 for Commission approval to transition the Non-residential Heating and Cooling Efficiency Program and the Non-residential Lighting Systems and Controls Program to be offered on a North Carolina-only basis.

³ Docket No. E-22, Sub 523.

⁴ Docket No. E-22, Sub 538.

⁵ Docket No. E-22, Sub 539. On August 16, 2018, the Company filed a motion in Docket No. E-22, Sub 539 requesting Commission approval to close the Residential Retail LED Lighting Program.

⁶ Docket No. E-22, Sub 543.

1 Phase I, Phase II, Phase III, Phase IV, Phase V, and Phase VI Programs, and
2 the Residential Retail LED Lighting Program, during the 12-month period of
3 January 1, 2017, through December 31, 2017 (“Test Period”).

4 The Rider C and Rider CE revenue requirements presented in this filing are
5 developed in accordance with the revised Mechanism. Development of these
6 revenue requirements is also consistent with development of the revenue
7 requirements approved in the Company’s 2012 – 2017 DSM/EE cost recovery
8 proceedings, except as modified to comply with the new Mechanism.

9 **Q. Mr. Moore, are you sponsoring any exhibits or schedules in connection**
10 **with your testimony?**

11 A. Yes. Company Exhibit AJM-1, consisting of Schedules 1 – 3 (Schedules 1
12 and 2 provided in public and confidential versions filed under seal), was
13 prepared under my supervision and direction and is accurate and complete to
14 the best of my knowledge and belief. My Schedule 1 supports the projected
15 rate period revenue requirement for Rider C, and Schedule 2 presents the
16 revenue requirement for EMF Rider CE. Schedule 3 contains my supporting
17 workpapers pursuant to NCUC Rule R8-69(f)(1)(viii).

18 **Q. Please summarize the key components of the two revenue requirements**
19 **presented in this case.**

20 A. The pre-filed direct testimony of Company Witness Jarvis E. Bates provides
21 the projected costs and Portfolio Performance Incentive (“PPI”) related to
22 each of the previously-identified DSM/EE Programs. I have used those cost

1 projections pursuant to NCUC Rule R8-69 to calculate the expected revenue
2 requirement to be recovered through Rider C, from February 1, 2019, through
3 January 31, 2020, the proposed rate period (the "Rate Period") in this case. In
4 particular, in order to calculate the projected revenue requirement for Rider C,
5 I incorporated the following cost components: (1) operating expenses
6 projected to be incurred during the Rate Period; (2) capital costs (including
7 related depreciation expense) projected to be incurred during the Rate Period;
8 and (3) PPI projected for the Rate Period pursuant to the revised Mechanism.
9 As noted by Company Witness Michael T. Hubbard, and consistent with the
10 Company's last four cost recovery proceedings,⁷ the Company is not
11 projecting net lost revenues for the Rate Period in this proceeding. Each of
12 these other cost components will be discussed in more detail later in my
13 testimony.

14 For the DSM/EE EMF Rider CE, I have incorporated actual costs (both
15 capital and O&M components) and PPI as provided by Company Witness
16 Bates for the 12-month period of January 1, 2017, through December 31, 2017
17 ("Test Period"). I have also included measured net lost revenues in the Rider
18 CE revenue requirement for the Test Period as described in more detail later
19 in my testimony.

⁷ Docket No. E-22, Subs 513, 524, 536, and 545.

1 Q. How did you determine what the Rate Period and Test Period should be
2 for this proceeding?

3 A. Pursuant to NCUC Rule R8-69(a), the Rate Period is the same as the period
4 during which the rider established under Commission Rule R8-55, the
5 Company's fuel factor, is in effect. As explained by Company Witness
6 Hubbard, in previous years, the Company has proposed Rider C rates to be
7 effective for a calendar year Rate Period, consistent with the rate period
8 previously used for fuel factor riders under Rule R8-55. Based on discussions
9 with the Public Staff following the conclusion of the Company's 2017 rider
10 proceedings, the Company is proposing for updated Rider C to be effective for
11 a February 1, 2019, through January 31, 2020, Rate Period. The Company is
12 requesting this adjustment to the annual Rate Period in order to extend the
13 time for the Commission to issue orders in the Company's three annual rider
14 proceedings filed pursuant to NCUC Rules R8-55, R8-67, and R8-69,
15 respectively, and to then allow the Company additional time to finalize rates
16 and customer notices (including allowing reasonable time for Public Staff
17 review) prior to the updated annual riders' effective date. The Company
18 intends to continue to use a February 1 through January 31 rate period in
19 future rider cases.

20 The Test Period for this proceeding will be the 12-month period ending
21 December 31, 2017, as provided for in Paragraph 28 of the Mechanism.

1 **Q. What capital structure and rate of return on common equity has the**
2 **Company used to calculate the capital related costs for the Test Period**
3 **and Rate Period in this proceeding?**

4 A. Consistent with Paragraph 40 of the Mechanism, the Company has calculated
5 the capital-related costs for the Test Period using the actual capital structure
6 and cost of capital for the 12-month period ended December 31, 2017,
7 incorporating a 9.90% return on common equity ("ROE") that was approved
8 in the Company's most recent general rate case on December 22, 2016, in
9 Docket No. E-22, Sub 532.⁸ For calculating the projected Rate Period in this
10 proceeding, the Company has utilized the most recently filed NCUC ES-1
11 capital structure and cost of capital for the period ending June 30, 2018,
12 incorporating the 9.90% ROE.

13 **Q. Do the Rider C and Rider CE revenue requirements include recovery of**
14 **net lost revenues?**

15 A. As addressed by Company Witness Hubbard, only Rider CE includes a
16 request to recover measured net lost revenues, as allowed by Commission
17 Rule R8-69(c)(1) and the Mechanism. As noted above, the Company has not
18 projected Rate Period net lost revenues for recovery in this proceeding. Going
19 forward, all net Vintage Year 2019 lost revenues will be appropriately
20 recovered through a future EMF Rider CE true-up cost recovery factor. As I
21 will discuss in greater detail below, Rider CE provides for the recovery of

⁸ See *Order Granting General Rate Increase*, Docket No. E-22, Sub 532 (Dec. 22, 2016).

1 actual incremental North Carolina jurisdictional kWh energy reductions for
2 the Test Period.

3 **Q. Are there any other limitations on the eligibility of energy savings as a**
4 **result of the Company's approved EE programs to count towards**
5 **recovery of net lost revenues?**

6 **A.** Paragraph 43 of the Mechanism provides that kWh sales reductions achieved
7 by a measurement unit installed in a given Vintage Year are eligible for use in
8 calculating lost revenues for only the first 36 months after installation of the
9 measurement unit. Further, Paragraph 46 of the Mechanism provides that
10 notwithstanding this 36-month period of kWh sales reductions, any installed
11 measurement unit shall cease being eligible for use in calculating net lost
12 revenues as of the effective date of (a) a Commission-approved alternative
13 cost recovery mechanism that accounts for the eligible recoverable net lost
14 revenues associated with eligible kWh sales reductions, or (b) the
15 implementation of new base rates approved in a general rate case or
16 comparable proceeding to the extent that the rates set in that proceeding are
17 set to explicitly or implicitly recover the net lost revenues associated with an
18 installed measurement unit's kWh sales reductions.

1 Q. Did the installation of the measurement units used to calculate the actual
2 net lost revenues for the Test Period in this filing fall within the 36-month
3 limitation provided for under Paragraph 43 of the Mechanism?

4 A. Yes. As part of the DSM/EE EMF Rider CE, the Company is seeking to
5 recover net lost revenues resulting from measures installed up through the end
6 of the 2017 Test Period.

7 Q. Has a portion of kWh energy savings associated with previously-installed
8 measures already been captured in the Company's non-fuel base rates?

9 A. Yes. The rates approved in the Company's 2016 general rate case were
10 designed to include the cumulative kWh sales reductions recognized in the net
11 lost revenues related to EE measurement units installed through June 30,
12 2016, to be recovered through base rates beginning on November 1, 2016.
13 Therefore, consistent with Paragraph 46 of the Mechanism, beginning
14 November 1, 2016, the Company excludes from total kWh energy savings, the
15 June 30, 2016 total cumulative monthly level of kWh sales reductions that
16 were incorporated into base rates effective November 1, 2016. The net lost
17 revenues proposed for recovery in this filing for January 1, 2017, through
18 December 31, 2017, include only incremental kWh energy savings resulting
19 from energy efficiency measures installed subsequent to June 30, 2016.

1 Q. Mr. Moore, can you describe in more detail the projected Rate Period
2 revenue requirement to be recovered through Rider C requested in this
3 case?

4 A. Yes. The projected revenue requirement begins with the projected operating
5 expense revenue requirement as reflected on line 1 of page 1 of my
6 Schedule 1. The projected operating expenses for the Rate Period, as
7 supported in the pre-filed direct testimony of Company Witness Bates, are
8 presented for current recovery by program on line 1 of page 2 of my
9 Schedule 1. Line 2 of page 2 of my Schedule 1 presents the system level
10 common costs that are allocated to each program in accordance with the
11 methodology described by Company Witness J. Clayton Crouch. The
12 projected operating expenses and proportionate share of common costs for
13 each program are then allocated to the North Carolina jurisdiction using the
14 jurisdictional allocation factors supported by Company Witness Crouch, to
15 derive the projected North Carolina jurisdictional operating expense revenue
16 requirement presented on line 5 of page 3 of my Schedule 1.

17 The second component of the projected Rate Period revenue requirement is
18 the projected capital costs revenue requirement as presented on line 2 of page
19 1 of my Schedule 1. Lines 6 through 8 of page 3 of my Schedule 1 present the
20 projected North Carolina jurisdictional depreciation expense, property taxes,
21 and rate base costs, respectively, related to the Air Conditioner Cycling
22 Program. The projected rate base for the Rate Period as depicted on page 4 of
23 my Schedule 1 includes the actual system level net plant balances as of June

1 30, 2018, and projected monthly system level capital expenditures as
2 supported by Company Witness Bates. The Air Conditioner Cycling Program
3 is the only DSM/EE program with capital expenditures being presented for
4 recovery in this current filing. The capital expenditures, projected to be
5 closed to plant-in-service each month, are added to the actual June 30, 2018
6 plant balance, and accumulated throughout the Rate Period. The projected
7 monthly depreciation expense is projected using a 7.15% annual depreciation
8 factor from the Company's most recent depreciation study. This projected
9 annual depreciation rate factor assumes an estimated depreciable life of 15
10 years with 0% net salvage and includes interim retirement assumptions. The
11 resulting depreciation expenses projected to be incurred during the Rate
12 Period are included for current recovery as shown on line 5 of page 4 of my
13 Schedule 1, and the projected accumulated depreciation balances are shown as
14 a reduction to average rate base as reflected on line 6 of page 4. The monthly
15 accumulated deferred income taxes, as supported by my Schedule 3, also
16 serve as monthly reductions to the projected rate base for the Rate Period as
17 reflected on line 8 of page 4 of my Schedule 1. These system level projected
18 amounts are then allocated to the North Carolina jurisdiction as explained by
19 Company Witness Crouch in his direct testimony in this proceeding.

20 The projected North Carolina jurisdiction rate base financing costs are
21 determined by multiplying each two-month average rate base for the Rate
22 Period by the Company's cost of capital as presented on line 4 of page 5 of
23 my Schedule 1. As discussed above, for purposes of this Application, the

1 Company has used the capital structure and cost of capital as provided in its
2 June 30, 2018 NCUC ES-1 Report, incorporating a rate of return on common
3 equity of 9.90%, which resulted in a weighted average cost of capital of
4 7.328% as presented on page 5 of my Schedule 1. The equity component for
5 purposes of determining the return on rate base is grossed up to a revenue
6 level in developing the common equity including income taxes revenue
7 requirement on rate base as presented on line 20 of page 4 of my Schedule 1.

8 The final component of my Rate Period revenue requirement is the projected
9 PPI revenue requirement shown on line 4 of page 1 of my Schedule 1.

10 Company Witness Bates provides the PPI calculation, which is incorporated
11 into the revenue requirement and reflected on line 10 of page 3 of my
12 Schedule 1.

13 **Q. Please provide an overview of the DSM/EE EMF Rider CE revenue**
14 **requirement.**

15 **A.** Consistent with Paragraph 37 of the Mechanism, this DSM/EE EMF requests
16 recovery of the “difference between the reasonable and prudent Costs incurred
17 or amortized during the applicable test period and the revenues actually
18 realized during such test period under the DSM/EE rider then in effect.” The
19 DSM/EE EMF Rider CE also includes a true-up of the PPI and net lost
20 revenues components for this same Test Period. Finally, the DSM/EE EMF
21 Rider CE includes a return on the over- or under-recovery balance up and
22 until the effective date of the Rate Period on February 1, 2019, calculated at
23 the rate of return approved in the Company’s most recent general rate case in

1 Docket No. E-22, Sub 532. Commission Rule R8-69(e)(3) provides that the
2 EMF will remain in effect for a fixed 12-month period and will continue as a
3 rider to rates established in any intervening general rate case.

4 **Q. Mr. Moore, can you now describe the details of the DSM/EE EMF Rider**
5 **CE revenue requirement calculation presented on page 1 of your**
6 **Schedule 2?**

7 A. Yes. Page 1 of my Schedule 2 presents the DSM/EE EMF Rider CE revenue
8 requirement requested for recovery during the Rate Period. The monthly
9 revenue requirement on line 1 of page 1 of my Schedule 2 reflects the
10 reasonable and prudent costs actually incurred during the Test Period in this
11 proceeding. This actual monthly revenue requirement is calculated on pages 2
12 and 3 of my Schedule 2 and will be discussed in greater detail below. The
13 actual monthly Rider C revenues included on line 4 of page 1 of my
14 Schedule 2 were obtained from the Company's Accounting Department. As
15 first established in the Company's 2013 DSM/EE cost recovery proceeding,
16 pursuant to NCUC Rule R8-69(c)(3), lines 2 and 5 eliminate utility incentives
17 from the calculation of carrying costs on the EMF Test Period over/under-
18 recovery deferral. The net monthly over- or under-recovered amount as
19 presented on line 7 of page 1 of my Schedule 2 will be refunded or collected
20 over the Rate Period. In addition, as prescribed by Rule R8-69(b)(6), carrying
21 costs are calculated on the over- or under-recovered deferral amounts net of
22 utility incentives at the rate of return approved in the Company's most recent
23 general rate case in Docket No. E-22, Sub 532. Also pursuant to Commission

1 Rule R8-69(b)(6), the equity component has been grossed up to reflect the
 2 necessary recovery of income taxes. The total carrying costs calculated on the
 3 monthly over- or under-recovered amounts net of utility incentives for the
 4 Test Period are presented on line 13 of page 1 of my Schedule 2.

5 Also pursuant to Rule R8-69(b)(6), financing costs are calculated for the
 6 current EMF Test Period over-recovery amount, exclusive of utility
 7 incentives, as presented on line 8 of page 1 of my Schedule 2. Line 15 reflects
 8 these carrying costs which are calculated on line 5 of page 6 of my Schedule 2
 9 for the deferral period of January 2018 through January 2019 at the net-of-tax
 10 rate of return approved in the Company's most recent general rate case in
 11 accordance with Rule R8-69(b)(6).

12 The carrying costs net of utility incentives to be refunded on line 13 of page 1,
 13 combined with the related 2017 financing costs on line 15, are offset by the
 14 net monthly under-recovered amounts calculated on line 7, to reflect the total
 15 DSM/EE EMF Rider CE revenue requirement amount to be recovered over
 16 the Rate Period.

17 **Q. Please describe the remaining pages of Schedule 2 that support the**
 18 **DSM/EE EMF Rider CE revenue requirement presented on page 1 of**
 19 **your Schedule 2.**

20 **A.** Pages 2 and 3 of my Schedule 2 present the monthly revenue requirement for
 21 the reasonable and prudent costs actually incurred during the Test Period. The
 22 actual operating expenses provided by Company Witness Bates for each

1 Program include a proportionate share of Common Costs allocated according
2 to the methodology described by Company Witness Crouch, and are included
3 on line 2 of page 2 of my Schedule 2. This Common Cost allocation
4 methodology is in compliance with the Mechanism and is also consistent with
5 the methodology employed in the Company's previous DSM filings. The
6 resulting system level amounts are then allocated to the North Carolina
7 jurisdiction as explained by Company Witness Crouch to derive the North
8 Carolina jurisdictional operating expenses including Common Costs presented
9 on line 5 of page 3 of my Schedule 2. Line 6 of page 3 of my Schedule 2
10 presents the monthly property taxes related to the air conditioner cycling
11 program assets, while lines 7 and 8 present the actual North Carolina
12 jurisdictional depreciation expense and return on rate base as calculated on
13 page 4 of my Schedule 2, and will be discussed in more detail below. Next,
14 the North Carolina jurisdictional net lost revenues calculated on page 5 of my
15 Schedule 2 are included on line 9 of page 3 of my Schedule 2. Finally, the
16 actual PPI amounts for the Test Period, as calculated by Company Witness
17 Bates, are included on line 10 of page 3 of my Schedule 2. The resulting
18 monthly revenue requirement by program calculated on line 11 and totaled on
19 line 12 of page 3 of my Schedule 2 reflects the reasonable and prudent costs
20 actually incurred during the Test Period.

21 The revenue requirement on Rate Base Costs for the Test Period is calculated
22 on page 4 of my Schedule 2. Actual monthly Net Plant balances and
23 Accumulated Deferred Income Taxes were provided by the Fixed Assets

1 Department and Tax Department, respectively. Depreciation expenses
2 incurred during the Test Period are included in the actual costs, and the
3 accumulated balances are shown as a reduction to plant-in-service to derive
4 cumulative system level of net plant as presented on line 4 of page 4 of my
5 Schedule 2. The monthly accumulated deferred income taxes on line 5 of
6 page 4, as supported by my Schedule 3, also serve as monthly reductions to
7 the rate base for the Test Period. These system level amounts are then
8 allocated to the North Carolina jurisdiction as explained by Company Witness
9 Crouch to derive the monthly North Carolina jurisdictional AC Cycling rate
10 base amounts as included on line 8.

11 The 2-month average North Carolina jurisdictional rate base over the Test
12 Period is presented on line 9 of page 4. As described earlier in my testimony,
13 to determine the return on rate base for the Test Period, the 2-month rate base
14 averages on line 9 of page 4 were multiplied by the Company's cost of capital
15 based on the capital structure and cost of capital for the 12-month period
16 ended December 31, 2017. The Company utilized the Commission-approved
17 ROE of 9.90% which resulted in a weighted average cost of capital of
18 7.345%, as presented on lines 8 of page 7 of my Schedule 2. The equity
19 component is grossed up to a revenue level for purposes of calculating the
20 revenue requirement on rate base costs during the Test Period as presented on
21 line 17 of page 4 of my Schedule 2.

22 Page 5 of my Schedule 2 presents the calculation of the actual net lost
23 revenues for the Test Period, based upon the actual North Carolina

1 jurisdictional energy reductions as presented by Company Witness Deanna R.
 2 Kesler. Company Witness Debra A. Stephens provides the billing rates
 3 applied to these North Carolina jurisdictional net kWh energy savings as
 4 presented on line 2 of page 5 of my Schedule 2. The actual net lost revenues
 5 are then reduced for variable O&M savings and found revenues. The variable
 6 O&M savings presented on line 4 of page 5 were provided by the Company's
 7 Integrated Resource Planning Department. As discussed by Company
 8 Witness Hubbard, there were no actual found revenues for the Test Period as
 9 indicated on line 5 of page 5 of my Schedule 2. Line 6 of page 5 provides the
 10 net lost revenues by program for the Test Period.

11 As previously mentioned, page 6 of my Schedule 2 presents the calculation of
 12 financing costs on the Rider CE net of utility incentives over-recovery to be
 13 refunded over the Rate Period, pursuant to NCUC Rules R8-69(b)(3) and (6),
 14 and Paragraph 39 of the Mechanism.

15 **Q. Mr. Moore, do you have anything else you would like to discuss regarding**
 16 **the DSM/EE EMF Rider CE revenue requirement?**

17 **A.** Yes. The DSM/EE EMF Rider CE revenue requirement is materially larger
 18 for this filing than it has been previously. A significant majority of the true-
 19 up amount is the result of the Phase V Small Business Improvement Program
 20 and the Residential Retail LED Lighting program being excluded from the
 21 2016 Rider C projection that set rates for the January 1, 2017 through
 22 December 31, 2017 rate year.

1 **Q. What is the total revenue requirement for Riders C and CE?**

2 A. As summarized on page 1 of my Schedule 1, the Company is requesting
3 recovery of projected operating expenses of \$2,071,198, and projected capital
4 cost revenue requirement of \$136,168. These amounts combined with the
5 projected PPI of \$302,935 provide for a total Rider C revenue requirement of
6 \$2,510,301.

7 As depicted on page 1 of my Schedule 2, the Rider CE revenue requirement
8 presents the amount of \$1,839,922, which will be recovered by the Company
9 over the Rate Period. The combined revenue requirements for the two riders,
10 Rider C and Rider CE, for the Rate Period totals \$4,350,223, representing a
11 \$606,298 increase over the rates currently in effect.

12 **Q. Does this conclude your pre-filed direct testimony?**

13 A. Yes, it does.

**BACKGROUND AND QUALIFICATIONS
OF
ALAN J. MOORE**

Alan J. Moore received his undergraduate degree from Longwood University with a Bachelor of Science in Business Administration with an Accounting concentration in 2007. Mr. Moore received his Masters of Business Administration degree from Longwood University in 2015. Mr. Moore was hired by the Company in 2007 as an Internal Auditor prior to joining the Regulatory Accounting Department in April 2014. His current position of Regulatory Analyst III in the Regulatory Accounting Department includes responsibility for analyzing and calculating revenue requirements for Dominion Energy North Carolina rate proceedings.

**DIRECT TESTIMONY
OF
J. CLAYTON CROUCH
ON BEHALF OF
DOMINION ENERGY NORTH CAROLINA
BEFORE THE
NORTH CAROLINA UTILITIES COMMISSION
DOCKET NO. E-22, SUB 556**

- 1 **Q.** Please state your name, business address, and position with Virginia
2 Electric and Power Company (“Dominion Energy North Carolina” or the
3 “Company”).
- 4 **A.** My name is J. Clayton Crouch and I am a Regulatory Consultant for
5 Dominion Energy North Carolina. My business address is 701 East Cary
6 Street, Richmond, Virginia 23219. A statement of my background and
7 qualifications is attached as Appendix A.
- 8 **Q.** Please describe your area of responsibility with the Company.
- 9 **A.** I am responsible for analyzing and calculating Company data used to create
10 the allocation factors used in the cost of service studies and other applications
11 for the Customer Rates Department.
- 12 **Q.** What is the purpose of your testimony in this proceeding?
- 13 **A.** My testimony supports the Company’s request to recover all reasonable and
14 prudent costs incurred in adopting and implementing the Company’s portfolio
15 of North Carolina demand-side management (“DSM”) and energy efficiency
16 (“EE”) programs (“DSM/EE Programs” or “Programs”) and utility incentives,
17 through its updated Rider C, as well as the Company’s experience
18 modification factor (“EMF”) rider, Rider CE (“Application”). The purpose of

1 my testimony is to explain the jurisdiction and customer class responsibility of
2 costs for the approved and proposed DSM/EE Programs for which the
3 Company seeks approval for cost recovery in this proceeding.

4 **Q. Mr. Crouch, are you sponsoring any exhibits or schedules in connection**
5 **with your testimony?**

6 **A.** Yes. Company Exhibit JCC-1, consisting of Schedules 1-4 (Schedules 1 and
7 3 provided in public and confidential versions filed under seal) has been
8 prepared under my direction and supervision, and is accurate and complete to
9 the best of my knowledge and belief. My Schedules 1-4 support the
10 jurisdictional allocation and customer class allocation of DSM/EE costs for
11 the development of Rider C and Rider CE, as follows:

- 12 • Schedule 1 shows the allocation or assignment of system-level Common
13 Costs to each individual DSM and EE Program and the determination of
14 jurisdictional responsibility of system costs for approved Programs,
15 including allocated Common Costs.
- 16 • Schedule 2 shows the factors for allocating total Program revenue
17 requirements to customer classes.
- 18 • Schedule 3 shows how total Program revenue requirements are allocated
19 to customer classes.
- 20 • Schedule 4 provides the documents to be filed in accordance with North
21 Carolina Utilities Commission (“NCUC” or the “Commission”) Rule R8-
22 69(f)(1)(ii)(b) and NCUC Rule R8-69(f)(1)(viii).

1 **Q. Before describing how you propose to determine the jurisdictional and**
 2 **customer class responsibility for DSM/EE costs, is the manner you**
 3 **propose consistent with the allocation approach approved in last year’s**
 4 **DSM/EE rider proceeding, Docket No. E-22, Sub 545?**

5 **A.** Yes. The methodology that I will describe is consistent with the methodology
 6 approved by the Commission’s December 21, 2017 Order in the Company’s
 7 most recent cost recovery proceeding in Docket No. E-22, Sub 545. This
 8 methodology is also consistent with the updated Cost Recovery and Incentive
 9 Mechanism (“Mechanism”) approved by the Commission’s May 22, 2017
 10 Order issued in Docket No. E-22, Sub 464.

11 **I. ALLOCATION OF COMMON COSTS TO**
 12 **DSM/EE PROGRAMS**

13 **Q. Please explain Common Costs and how such costs are allocated to the**
 14 **DSM and EE Programs.**

15 **A.** Certain costs including internal labor and related costs, program marketing
 16 costs, and information gathering costs are not directly attributable to specific
 17 Programs. The Company characterizes these costs as “Common Costs,”
 18 which are needed to design, implement, and operate the Programs. The DSM
 19 and EE Programs are administered in the Company’s Virginia and North
 20 Carolina service territories that compose the PJM designated DOM Zone.
 21 Therefore, these costs will be incurred and recovered on the DOM Zone
 22 system-level basis.

1 According to Paragraphs 29 – 30 of the revised Mechanism, system-level
 2 Common Costs are to be allocated to each DSM/EE Program on the basis of
 3 the estimated relative operating costs of each individual program including
 4 O&M, depreciation, property taxes, and insurance expenses.

5 My Schedule 1, Page 1 provides a general description of how system-level
 6 Common Costs are allocated to each Program. Page 2 provides the allocation
 7 of these costs to the Programs for the January 1, 2017, to December 31, 2017,
 8 test period (“Test Period”) through the EMF for recovery through Rider CE.
 9 Page 3 provides the allocation of these costs for the projected February 1,
 10 2019, to January 31, 2020, rate period (“Rate Period”) through Rider C.

11 **II. JURISDICTIONAL ALLOCATION OF**
 12 **PROGRAM COSTS**

13 **Q. Please describe how the system costs for approved DSM/EE Programs,**
 14 **including allocated Common Costs, will be allocated to the North**
 15 **Carolina jurisdiction according to the Mechanism.**

16 **A.** System-level costs for the approved DSM/EE Programs, including allocated
 17 Common Costs, are allocated or assigned to the North Carolina jurisdiction
 18 according to Paragraph 30 of the Mechanism. Paragraph 30 provides for the
 19 cost of DSM programs to be allocated on the basis of the Company’s
 20 coincident peak and for the cost of EE programs to be allocated on the basis of
 21 energy. In the case of both the DSM and EE allocation factors, the following
 22 retail jurisdictions are included in the development of each factor: (i) the
 23 North Carolina retail jurisdiction; (ii) the Virginia retail jurisdiction; and

1 (iii) Virginia non-jurisdictional customers excluding contract classes that have
2 elected not to participate, customers in participating contract classes that have
3 elected not to participate, and customers in participating contract classes that
4 are exempt or have opted out.

5 My Schedule 1, Page 1 provides a general description of how DSM/EE costs
6 are allocated or assigned to the North Carolina jurisdiction. My Schedule 1,
7 Page 4 provides the development of jurisdictional allocation factors for DSM
8 and EE Programs. Coincident peak and energy allocation factors are
9 calculated as described above to allocate costs from the system to the North
10 Carolina retail jurisdiction. For the updated EMF Test Period, the allocation
11 factors for determining jurisdictional costs are based on the 12 months ended
12 December 31, 2017, and are shown on Schedule 1, Page 4. For the Rate
13 Period, the allocation factors are also based on the 12 months ended
14 December 31, 2017, and are shown on Schedule 2, Page 2.

15 **III. ASSIGNMENT AND ALLOCATION OF**
16 **JURISDICTIONAL COSTS TO CUSTOMER CLASSES**

17 **Q. Once costs have been determined for the North Carolina jurisdiction,**
18 **how will the revenue requirements be assigned or allocated to the**
19 **customer classes according to the Mechanism?**

20 **A.** Retail jurisdictional costs for the Company's DSM/EE Program portfolio,
21 including allocated Common Costs, shall be assigned or allocated to North
22 Carolina retail customer classes based on the particular classes at which each
23 program is targeted according to Paragraph 33 of the Mechanism. The cost of

1 residential Programs is assigned to the residential class as shown in my
2 Schedule 2, Page 1. The costs of non-residential Programs are allocated to
3 targeted non-residential customer classes using an energy-based allocation
4 factor as shown in my Schedule 2, Page 1.

5 My Schedule 2, Page 2 provides the development of the coincident peak and
6 energy allocation factors for the non-residential Programs. I have developed
7 class allocation factors for the non-residential programs for both the true-up
8 through the EMF and the projected Rate Period consistent with the time
9 periods used to allocate costs from the system to the jurisdiction. For the
10 updated EMF, the allocation factors for determining customer class
11 responsibility for jurisdictional costs are based on the 12 months ended
12 December 31, 2017, and are shown on Schedule 2, Page 2. I have developed
13 class allocation factors for these same programs. For the projected Rate
14 Period, the allocation factors for determining customer class responsibility for
15 jurisdictional costs are also based on the 12 months ended December 31,
16 2017, and are shown on Schedule 2, Page 2.

17 **Q. How will the Test Period and Rate Period revenue requirements to be**
18 **recovered through the EMF Rider CE and Rider C be assigned or**
19 **allocated for the residential Programs to the customer classes?**

20 **A.** The total amount to be recovered through the DSM/EE EMF Rider CE for the
21 residential Programs will be assigned to the residential class. The total
22 revenue requirement for DSM/EE Programs Rider C for the residential
23 Programs will also be assigned to the residential class for cost recovery

1 purposes. Please refer to my Schedule 2, Page 1 for further explanation of this
2 assignment.

3 **Q. How will the Test Period and Rate Period revenue requirements to be**
4 **recovered through the EMF Rider CE and Rider C be assigned or**
5 **allocated for the non-residential Programs to the customer classes?**

6 **A.** The total amount to be recovered through the DSM/EE EMF Rider CE for the
7 non-residential Programs will be allocated to the non-residential customer
8 classes eligible to participate in such Programs. The total revenue
9 requirement for DSM/EE Programs Rider C for the non-residential Programs
10 will also be allocated to the non-residential customer classes eligible to
11 participate in such Programs.

12 Regarding the development of allocation factors, these Programs are not
13 limited to commercial customers, since other non-residential customers,
14 including industrial customers, are eligible to participate. The allocation
15 factors used to allocate these revenue requirements will be adjusted for
16 customers who elect to opt out as provided for under N.C.G.S. § 62-133.9(f).
17 In addition, no costs will be allocated to the Street and Outdoor Lighting class
18 or the Traffic Lighting class since such classes will not be targeted by these
19 Programs. Neither class will experience a reduction in energy consumption or
20 demand resulting from these Programs and will, therefore, not experience a
21 benefit due to a change in their production demand allocation factor if all
22 other things remain the same. Other non-residential customer classes that do
23 participate in the Programs will experience reductions in energy consumption

1 and/or demand and may receive a benefit due to a change in their production
2 demand allocation factor. It is appropriate to not allocate any costs to
3 customer classes that will not benefit from participation in a program or
4 programs.

5 Page 1 of my Schedule 2 summarizes the factor used to allocate the costs of
6 the DSM/EE commercial Programs to the customer classes.

7 **Q. Do you have a schedule that shows the allocation to the customer classes**
8 **of the amounts to be recovered through the DSM/EE EMF Rider CE and**
9 **DSM/EE Programs Rider C?**

10 A. Yes. My Schedule 3, Pages 1 and 2 provide the allocation to the customer
11 classes of the amount that needs to be collected for the Test Period true-up
12 through the DSM/EE EMF Rider CE. My Schedule 3, Pages 3 and 4 provide
13 the allocation of the revenue requirement to the customer classes for recovery
14 during the Rate Period through DSM/EE Programs Rider C. These total
15 revenue requirements are obtained from Company Witness Alan J. Moore's
16 Schedule 1 and Schedule 2 for Rider CE and Rider C, respectively.

17 **Q. To summarize, what is the total revenue requirement for DSM/EE**
18 **Programs by customer class for recovery under the proposed DSM/EE**
19 **EMF Rider CE and DSM/EE Rider C?**

20 A. My Schedule 3, Page 2, line 9 provides the amount to be recovered by each
21 customer class under the proposed DSM/EE EMF Rider CE. My Schedule 3,

1 Page 4, line 2 provides the total revenue requirement by customer class under
2 the proposed DSM/EE Rider C.

3 **Q. Please outline what is included in Schedule 4 of your testimony.**

4 A. In accordance with NCUC Rule R8-69(f)(1)(ii)(b), the total cost that the
5 utility does not expect to incur during the Rate Period as a direct result of the
6 DSM/EE measures in the aggregate to the North Carolina jurisdiction are
7 shown on Pages 1 and 2 of my Schedule 4. Expenses not expected to be
8 incurred are provided by Company Witness Deanna R. Kesler. In this
9 Schedule, I provide the North Carolina jurisdictional allocation factors that
10 were produced in the Company's most recent SWP&A year ending December
11 31, 2017 cost of service study, as filed on June 15, 2018, in Docket No. E-22,
12 Sub 532 that would be used to allocate these costs had they been incurred. As
13 can be seen on Schedule 4, Pages 1 and 2 of my testimony, separate demand
14 and energy weighted factors should be used to allocate the demand-related
15 expenses not expected to be incurred and the energy-related expenses not
16 expected to be incurred, respectively. These factors are Factor 1 (demand-
17 weighted) and Factor 3 (energy).

18 Also included in Schedule 4 are Pages 3 through 5, which are workpapers
19 filed in accordance with NCUC Rule R8-69(f)(1)(viii). These pages show the
20 development of allocation factors used to allocate system expenses not
21 expected to be incurred during the Rate Period (Pages 4 and 5).

1 Q. Does this conclude your direct testimony?

2 A. Yes, it does.

**BACKGROUND AND QUALIFICATIONS
OF
J. CLAYTON CROUCH**

J. Clayton Crouch began his career as a field technician for Enviroplan, Inc. while working on his B.S. degree at Point Park University. Mr. Crouch accepted an engineering position with Westinghouse Electric Corp. following graduation. He worked on nuclear power plant control systems at a number of domestic and international locations. Mr. Crouch took an educational leave of absence to finish his M.S. degree as a Graduate Student Researcher at the University of Pittsburgh. He moved to Wilmington, Delaware upon graduation and worked as a System Manager for Public Service Electric and Gas Company supporting the Salem and Hope Creek power stations.

Mr. Crouch began working for Dominion Energy Virginia in 1997 as a Senior Staff Engineer at the Surry Power Station. He transferred to the Fossil and Hydro Engineering Department and obtained a Six Sigma Master Black Belt certification while working on a number of system design improvements and environmental cost savings projects. In 2005, Mr. Crouch became the Energy Asset Advisor for the Dominion Clearinghouse. The following year, he took a promotion to Manager-Regulation and oversaw wholesale account processing, load research, and the PJM Interconnection L.L.C. ("PJM") load serving entity settlements for the Dominion Zone. He now serves as a regulatory consultant on matters pertaining to cost allocation and cost of service in the Customer Rates Department.

Mr. Crouch has previously presented testimony before the State Corporation Commission of Virginia and the North Carolina Utilities Commission.

(WHEREUPON, Company Exhibit DAS-1, Schedules 1 - 16, is marked for identification as prefiled and received into evidence.)

(WHEREUPON, the prefiled direct testimony and Appendix A of DEBRA A. STEPHENS is copied into the record as if given orally from the stand.)

**DIRECT TESTIMONY
OF
DEBRA A. STEPHENS
ON BEHALF OF
DOMINION ENERGY NORTH CAROLINA
BEFORE THE
NORTH CAROLINA UTILITIES COMMISSION
DOCKET NO. E-22, SUB 556**

1 **Q.** Please state your name, business address, and your position with Virginia
2 Electric and Power Company (“Dominion Energy North Carolina” or the
3 “Company”).

4 **A.** My name is Debra A. Stephens, and I am a Regulatory Specialist for
5 Dominion Energy North Carolina. My business address is 701 East Cary
6 Street, Richmond, Virginia 23219.

7 **Q.** Please describe your area of responsibility with the Company.

8 **A.** I provide support and analysis for base rate schedules and Demand Side
9 Planning Riders for the Company’s retail jurisdictions. A statement of my
10 background and qualifications is attached as Appendix A.

11 **Q.** What is the purpose of your testimony in this case?

12 **A.** My testimony supports the Company’s request to recover all reasonable and
13 prudent costs incurred in adopting and implementing the Company’s portfolio
14 of North Carolina demand-side management (“DSM”) and energy efficiency
15 (“EE”) Programs (“DSM/EE programs” or “Programs”), and utility
16 incentives, through its updated Rider C, as well as the Company’s experience
17 modification factor (“EMF”) rider, Rider CE (“Application”). The purpose of
18 my testimony is to present the calculation of the updated DSM/EE Rider,

1 Rider C, and the EMF rider, Rider CE. Rider C is designed to recover during
2 the February 1, 2019, through January 31, 2020, period ("Rate Period") the
3 Company's reasonable and prudent costs incurred for the adoption and
4 implementation of the Company's DSM/EE Programs during the Rate Period.
5 Rider CE will true up any over- or under-recovery for the period January 1,
6 2017, through December 31, 2017 ("Test Period"). The Company is
7 requesting the proposed riders, Rider C and Rider CE, become effective for
8 usage on and after February 1, 2019, and I explain below the Company's
9 proposal regarding the Rider C and Rider CE rates to be in effect for January
10 2019. Additionally, I provide the calculations for the monthly residential and
11 non-residential non-fuel average base rates that have been used by Company
12 Witness Alan J. Moore in determining gross lost revenues.

13 **Q. Ms. Stephens, are you sponsoring any exhibits or schedules in connection**
14 **with your testimony?**

15 **A.** Yes. Company Exhibit DAS-1, consisting of Schedules 1 through 16, was
16 prepared under my supervision and is accurate and complete to the best of my
17 knowledge and belief. I also provide my supporting workpapers as required
18 by Commission Rule R8-69(f)(i)(viii).

19 **Q. Would you please discuss the calculation of Rider C?**

20 **A.** Yes. The Company has calculated the Rider C rates in accordance with the
21 following methodology. To develop the Rider C rate applicable to each of the
22 Company's customer classes, we must first determine forecasted kWh sales
23 for each customer class. For the North Carolina jurisdiction, the Company

1 only forecasts kWh sales and customers by “revenue class” (*i.e.*, Residential,
2 Commercial, Industrial, Public Authority, and Outdoor Street Lighting/Traffic
3 Signals), and this revenue class kWh sales forecast is shown on pages 1
4 through 3 of Schedule 1, as required by Rule R8-69(f)(1)(i). However, these
5 revenue classes are not perfectly aligned with the Company’s customer
6 classes. Therefore, the Company must allocate the revenue classes’ February
7 2019 through January 2020 forecasted kWh sales down to the customer class
8 level. This allocation was performed using 2015 through 2017 historical
9 monthly customer and kWh usage for each customer class to capture the
10 recent trends of kWh sales and the numbers of customers within each
11 customer class. This allocation by revenue class (and within revenue class by
12 rate schedule) is shown on pages 4 and 5 of my Schedule 1. The summary on
13 page 6 shows the allocation of the 12 months ended January 31, 2020,
14 forecasted kWh sales for each rate schedule, less the kWh sales for the
15 industrial and large commercial customers who have “opted out” under North
16 Carolina General Statutes § 62-133.9(f), to produce a net forecast. Pages 7
17 and 8 categorize the net forecasted rate schedule kWh sales into the seven
18 customer classes (*i.e.*, Residential, SGS, NS, LGS, 6VP, Outdoor/Street
19 Lighting, and Traffic Lighting customer classes).

20 The rates for Rider C have been derived based upon these net forecasted kWh
21 sales by customer class. Pages 9 and 10 of Schedule 1 detail the development
22 of the Rider C rate.

1 Page 9 of Schedule 1 shows the customer class allocated revenue
2 requirements associated with DSM/EE program costs that were provided by
3 Company Witness J. Clayton Crouch. By dividing these class revenue
4 requirements by their respective customer class forecasted kWh sales, we
5 have calculated customer class rates, which are then adjusted for the North
6 Carolina Regulatory Fee. Page 10 shows the rate schedules within their
7 associated customer class and provides their respective Rider C rate.

8 **Q. Have you provided projected North Carolina total retail monthly sales**
9 **for the Rate Period for the commercial and industrial customers who**
10 **have chosen to opt out of the DSM/EE Rider, as required by Rule**
11 **R8-69(f)(1)(vii)?**

12 A. Since the Company generally does not forecast kWh sales for individual
13 customers, we have used actual kWh sales, from January 1, 2017, to
14 December 31, 2017, as a proxy for the projected opt-out kWh sales for the
15 Rate Period for customers that have opted out as of June 30, 2018. Schedule 2
16 of my pre-filed direct testimony contains the aggregated opt-out customer
17 sales by month.

18 **Q. Have you included the Company's proposed Rider C in Schedule 3 of**
19 **your pre-filed direct testimony?**

20 A. Yes. Schedule 3 is comprised of the tariff sheet showing the proposed
21 Rider C as required by Rule R8-69(f)(1)(vi), which, if approved as proposed,
22 would be applicable for usage on and after February 1, 2019.

- 1 **Q. Would you please discuss the calculation of Rider CE?**
- 2 A. Yes. The Company has calculated the Rider CE rates in accordance with the
3 same methodology as previously approved for calculating Rider C. The
4 allocated class Rider CE revenue requirements used in these calculations are
5 provided in Company Witness Crouch's Schedule 3. The forecasted kWh by
6 class and rate schedule for use in developing the Rider CE rates are the same
7 as described in the calculation of the Rider C rates. The results of these
8 calculations are shown in my Schedule 4. The corresponding tariff sheet for
9 the period February 1, 2019, to January 31, 2020, providing the Rider CE
10 rates is shown on page 1 of my Schedule 5.
- 11 **Q. Are you submitting any proposed revised tariffs to be effective during**
12 **January 2019?**
- 13 A. Yes. In order to effectuate the transition to a February 1 – January 31 Rate
14 Period, as further discussed in the direct testimony of Company Witnesses
15 Michael T. Hubbard and Moore, the Company is proposing to maintain
16 Rider C as approved by the Commission in the Company's previous DSM/EE
17 cost recovery proceeding, and to reduce Rider CE for all classes to zero during
18 the period January 1, 2019, to January 31, 2019. While this proposal does not
19 require any revision to the currently effective Rider C tariff sheet, it does
20 require that Rider CE be revised to show a rate of zero. A tariff sheet showing
21 that proposed change for the month of January 2019 is shown at page 2 of my
22 Schedule 5.

1 **Q. Would you explain how the proposed Riders C and CE will impact**
2 **customers' bills?**

3 A. For this comparison, the Company has used the base rates that went into effect
4 January 1, 2017, in Docket No. E-22 Sub 532, and the fuel rates that went into
5 effect February 1, 2018, in the Company's last fuel case, Docket No. E-22,
6 Sub 546, to calculate the customers' "current bill." For Rate Schedule 1
7 (residential), based on the proposed February 1, 2019 effective date for Riders
8 C and CE, for a customer using 1,000 kWh per month, the weighted monthly
9 residential bill (4 summer months and 8 base months) would increase from
10 \$113.19 to \$113.20, or by 0.009%. For Rate Schedule 5 (small general
11 service), based on the proposed February 1, 2019 effective date for Riders C
12 and CE, for a customer using 12,500 kWh per month and 50 kW of demand,
13 the weighted monthly bill (4 summer months and 8 base months) would
14 increase from \$1,111.36 to \$1,119.87, or by 0.77%. For Rate Schedule 6P
15 (large general service), based on the proposed February 1, 2019 effective date
16 for Riders C and CE, for a customer using 259,200 kWh on-peak and 316,800
17 kWh off-peak per month and 1,000 kW of demand, the monthly bill would
18 increase from \$38,964.65 to \$39,627.05, or by 1.70%.

19 **Q. For purposes of truing up lost revenues for the Test Period, would you**
20 **describe how the non-fuel average base rates were determined?**

21 A. Yes. We have calculated monthly non-fuel average base rates for the Test
22 Period for each DSM program. These monthly non-fuel average base rates
23 are provided to Company Witness Moore, who in turn applies these rates to

1 the measured and verified kWh reductions that occurred during the Test
2 Period, as determined and provided by Company Witness Deanna R. Kesler.

3 In truing up gross lost revenues for the Residential Heat Pump Tune Up
4 Program, the Residential Heat Pump Upgrade Program, the Residential Duct
5 Testing and Sealing Program, the Residential Home Energy Check-Up
6 Program, and the Residential Income and Age Qualifying Program, we used
7 the actual participants' non-fuel base revenues and their kilowatt-hour
8 consumption for the period of January 1, 2017, to December 31, 2017, to
9 develop monthly average non-fuel base rates. These calculations are shown in
10 my Schedules 6 through 10. To calculate the average rates for the Residential
11 Retail LED Lighting program, we used the average non-fuel base rates for all
12 customers on Rate Schedules 1, 1P, and 1T and the kilowatt-hour
13 consumption for the period of January 1, 2017, to December 31, 2017, shown
14 in Schedule 11.

15 **Q. Did you use the same methodology for the Non-Residential Programs in**
16 **truing up lost revenues for the Test Period?**

17 **A.** Yes. We used the actual participants' non-fuel base revenues and their
18 kilowatt-hour consumption for the applicable true-up period to develop
19 monthly average non-fuel base rates. This analysis used the kWh
20 consumption for those customers who participated in the Non-Residential
21 Energy Audit, the Non-Residential Duct Testing and Sealing Program, the
22 Non-Residential Heating & Cooling Efficiency Program, the Non-Residential
23 Lighting Systems & Controls Program, and the Commercial Small Business

1 Improvement Program shown in Schedules 12 through 16 during the period of
2 January 1, 2017, to December 31, 2017. No rates were calculated for the
3 Non-Residential Window Film Program since there were no North Carolina
4 participants in the program during 2017.

5 **Q. Does this conclude your prefled direct testimony?**

6 **A. Yes, it does.**

**BACKGROUND AND QUALIFICATIONS
OF
DEBRA A. STEPHENS**

Debra A. Stephens graduated from the Virginia Polytechnic Institute and State University in 1978 with a B.S. in Marketing. She continued her education, completing a Masters in Business Administration from Virginia Polytechnic Institute and State University in 1979. In 1985, after spending five years as a Research Analyst for the Virginia Department of Planning and Budget, Ms. Stephens joined Virginia Electric and Power Company as a Statistical Analyst in the Insurance and Loss Prevention Department. In that capacity, she conducted statistical analyses related to insurance and claims, and participated in a Company-wide assessment of Corporate Risk.

In 1995, Ms. Stephens moved to the Energy Efficiency Department and became part of the Market Research Group. In that position, she worked primarily analyzing non-residential customer data to create a segmentation strategy for these customers. In January 2001, Ms. Stephens joined the Regulatory and Pricing Department as analyst supporting interval customer data. This function was moved to the Metering Department in 2002, along with the supporting staff.

Ms. Stephens returned to the State Regulation Group in 2007 as a Regulatory Analyst III. In 2015, Ms. Stephens was promoted to her current position as a Regulatory Specialist. Her responsibilities include providing support and analysis for the Company's regulatory filings in Virginia and North Carolina. Ms. Stephens has previously presented testimony before the State Corporation Commission of Virginia and the North Carolina Utilities Commission.

1 COMMISSIONER BROWN-BLAND: Is there anything
2 else from the Company?

3 MS. KELLS: No, ma'am. Thank you. That
4 concludes our case.

5 COMMISSIONER BROWN-BLAND: Thank you.

6 MS. FENNEL: The Public Staff would ask
7 that the testimony prefiled on October 25th consisting
8 of David Williamson consisting of 12 pages and an
9 Appendix A, and the prefiled testimony of Michael
10 Maness consisting of 16 pages and an Appendix A be
11 copied into the record as if given orally from the
12 stand.

13 COMMISSIONER BROWN-BLAND: There being no
14 objection, that motion will also be allowed and the
15 prefiled testimony of Witnesses Maness and Williamson
16 both will be received into evidence, treated as if
17 given orally from the witness stand, and their
18 Appendices are also received into evidence.

19 (WHEREUPON, the prefiled direct
20 testimony and Appendix A of DAVID
21 M. WILLIAMSON is copied into the
22 record as if given orally from the
23 stand.)

24

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

DOCKET NO. E-22, SUB 556

OFFICIAL COPY

In the Matter of)	TESTIMONY OF
Application by Virginia Electric and)	DAVID M. WILLIAMSON
Power Company, d/b/a Dominion)	On Behalf of the Public
Energy North Carolina, for Approval of)	Staff – North Carolina
Demand-Side Management and)	Utilities Commission
Energy Efficiency Cost Recovery Rider)	
under N.C. Gen. Stat. § 62-133.9 and)	
Commission Rule R8-69)	

Oct 25 2018
Nov 28 2018

October 25, 2018

1 Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND
2 PRESENT POSITION.

3 A. My name is David M. Williamson. My business address is 430 North
4 Salisbury Street, Dobbs Building, Raleigh, North Carolina. I am a
5 Utilities Engineer with the Electric Division of the Public Staff, North
6 Carolina Utilities Commission.

7 Q. BRIEFLY STATE YOUR QUALIFICATIONS AND DUTIES.

8 A. My qualifications and duties are included in Appendix A.

9 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

10 A. The purpose of my testimony is to offer recommendations
11 concerning: (1) the portfolio of demand side management (DSM)
12 and energy efficiency (EE) programs for which Virginia Electric and
13 Power Company (VEPCO), d/b/a Dominion Energy North Carolina
14 (DENC or the Company) is seeking cost recovery through the
15 DSM/EE rider; (2) the cost effectiveness of each DSM and EE
16 program; and (3) the evaluation, measurement, and verification
17 (EM&V) support data for the approved DSM and EE programs.
18

1 Q. WHAT STATUTES, COMMISSION RULES, OR ORDERS HAVE
 2 YOU REVIEWED IN YOUR INVESTIGATION OF DENC'S
 3 PROPOSED DSM/EE RIDER?

4 A. In preparing my testimony, I reviewed the application, testimony, and
 5 exhibits for approval of cost recovery for DSM and EE measures filed
 6 by DENC pursuant to N.C. Gen .Stat. § 62-133.9 and Commission
 7 Rule R8-69 on August 21, 2018, the DSM/EE cost recovery
 8 mechanism approved by the Commission on May 27, 2015 (2015
 9 Mechanism), the DSM/EE cost recovery mechanism approved by
 10 the Commission on May 22, 2017 (2017 Mechanism), and responses
 11 to Public Staff data requests. I also reviewed the 2018 EM&V
 12 Report¹ and previous Commission orders related to the Company's
 13 DSM and EE programs and cost recovery rider proceedings.
 14 Additionally, I assisted Public Staff witness Michael C. Maness with
 15 his review of the rider calculations and inputs underlying the riders
 16 proposed by DENC in this proceeding.

¹ "Evaluation, Measurement, and Verification Report for Dominion Virginia Power," dated April 1, 2018, filed in Docket No. E-22, Sub 545 (EM&V Report). The report provides the participation and program savings related to the DSM/EE programs for Dominion Virginia Power (DVP) and DENC through December 31, 2017. DVP and DENC are both business operating names of VEPCO.

1 Q. PLEASE IDENTIFY THE DSM AND EE PROGRAMS FOR WHICH
2 DENC IS SEEKING COST RECOVERY THROUGH THE DSM/EE
3 RIDER IN THIS PROCEEDING.

4 A. The Company is seeking recovery of costs and/or utility incentives
5 incurred for the following DSM and EE programs:

- 6 • Residential Air Conditioner (AC) Cycling Program (Sub 465)
- 7 • Residential Lighting Program (Sub 468)
- 8 • Residential Home Energy Check Up Program (Sub 498)
- 9 • Residential Duct Testing and Sealing Program (Sub 497)
- 10 • Residential Heat Pump Tune-Up Program (Sub 499)
- 11 • Residential Heat Pump Upgrade Program (Sub 500)
- 12 • Residential Income and Age Qualifying Program (Sub 523)
- 13 • Residential Retail LED Lighting Program (Sub 539)
- 14 • Commercial Lighting Program (Sub 469)
- 15 • Commercial HVAC Upgrade Program (Sub 467)
- 16 • Non-Residential Energy Audit Program (Sub 495)
- 17 • Non-Residential Duct Testing and Sealing Program (Sub 496)
- 18 • Non-Residential Heating and Cooling Efficiency Program (Sub
19 507)
- 20 • Non-Residential Lighting Systems and Controls Program (Sub
21 508)
- 22 • Non-Residential Window Film Program (Sub 509)
- 23 • Small Business Improvement Program (Sub 538)
- 24 • Non-Residential Prescriptive Program (Sub 543)

25 Q. HAVE THERE BEEN ANY NEW OR DISCONTINUED PROGRAMS
26 IN THE DENC PORTFOLIO SINCE THE LAST RIDER FILING?

27 A. Yes. On June 26, 2018, the Commission approved the Company's
28 request to reopen the Residential Income and Age Qualifying Home
29 Improvement Program, effective July 1, 2018.

30 On October 16, 2018, the Commission approved the Company's
31 requests to close the Non-Residential Window Film Program and the

1 Residential Retail LED (light emitting diode) Lighting Program,
2 effective December 31, 2018.

3 On the same day, the Commission approved the Company's
4 requests to operate the Non-Residential Heating and Cooling
5 Efficiency and the Non-Residential Lighting Systems and Controls
6 Programs on a North Carolina-only basis, effective January 1, 2019.

7 **Q. HAS THE COMPANY WORKED WITH THE PUBLIC STAFF TO**
8 **EVALUATE THE POSSIBILITY OF OFFERING DSM AND EE**
9 **PROGRAMS ON A NORTH CAROLINA-ONLY BASIS WHEN IT**
10 **PLANS TO CANCEL THEM IN VIRGINIA?**

11 A. Yes.

12 **Q. HAS THE COMPANY PROPOSED ANY NEW DSM AND EE**
13 **PROGRAMS?**

14 A. The Company has not proposed any new programs other than those
15 programs approved by the Commission on October 16, 2018.
16 However, on October 3, 2018, the Company filed in its Virginia
17 service territory its annual application for approval of 11 new
18 DSM/EE programs. If approved in Virginia, the Company has
19 indicated that it would petition for approval of these 11 programs² in
20 its North Carolina service territory.³

² A portion of the proposed 11 programs are already being offered in the Company's North Carolina service territory.

³ Case No. PUR-2018-00168 filed with the Virginia State Corporation Commission.
<http://www.scc.virginia.gov/docketsearch#/caseDetails/139129>

1 Q. PLEASE DISCUSS THE AVOIDED COSTS USED TO DETERMINE
2 COST EFFECTIVENESS OF THE PORTFOLIO OF PROGRAMS.

3 A. The Company attests that that underlying avoided cost sources for
4 the eligible programs are consistent with the most currently approved
5 cost recovery and incentive mechanism dated May 22, 2017, in
6 Docket No. E-22, Sub 464 (Mechanism). Paragraph 19 of the
7 Mechanism states that:

8 "For purposes of program approval (new programs or
9 modifications of existing programs submitted pursuant
10 to Commission Rule R8-68), the per kW avoided
11 capacity costs used to calculate cost effectiveness of
12 programs and/or measures shall be determined at the
13 time of DNCP's files its petition for annual cost recovery
14 pursuant to Rule R8-69 and this Mechanism, using
15 comparable methodologies to those used in the most
16 recently approved biennial avoided cost proceeding.
17 The per kWh avoided energy costs shall be those from
18 the recommended or preferred plan reflected in or
19 underlying the most recently filed integrated resource
20 plan."

21 Through discovery, I was able to identify that the Company used Plan
22 E – Federal CO₂ from its 2018 Integrated Resource Plan (IRP)⁴ and
23 2016 biennial avoided cost proceeding.⁵ The Public Staff agrees
24 with the Company's underlying assumptions used to determine the
25 applicable avoided cost rates for energy and capacity and finds that

⁴ Docket No. E-100 Sub 157.

⁵ Docket No. E-100 Sub 148.

1 they are consistent with the language of the Mechanism and are
2 appropriate for use in this proceeding.

3 **Q. PLEASE DISCUSS THE COST EFFECTIVENESS OF THE**
4 **PORTFOLIO OF PROGRAMS.**

5 A. The testimony and exhibits of DENC witness Deanna Kesler present
6 the Company's analysis of cost effectiveness for each program.
7 Company Exhibit DRK-1, Schedule 2, represents the programs
8 eligible for inclusion in the calculation of the Portfolio Performance
9 Incentive (PPI) in the Vintage 2019 rider, and includes the
10 Company's calculations of the Utility Cost (UC) and the Total
11 Resource Cost (TRC) tests. These data points provide a snapshot
12 of program performance that is expected over the rate period. The
13 data also provide a good comparison of the changes in cost
14 effectiveness from year to year. Schedule 2 also provides the UC
15 test benefits, which are used in the determination of the PPI
16 component of rider rates.

17 On October 8, 2018, the Company filed revised-schedules 1, 2, 4,
18 and 7 to Witness Kesler's testimony to correct an error in its analysis.
19 This correction adjusted the Strategist model runs, which are used
20 to calculate on-going cost-effectiveness, to reflect the accurate
21 reserve margin number filed in the 2018 IRP. The correction also
22 adjusted the expenses used on the Company's Air Condition Cycling
23 Program in its 2018 EM&V Report.

1 With the exception of the Income and Age-Qualifying Program, each
2 program included in revised Schedule 2 is estimated to be cost
3 effective in 2019 under the TRC and UC tests.

4 Witness Kesler's revised Exhibit DRK-1, Schedule 4, represents the
5 ongoing cost-effectiveness of DSM and EE programs as modeled in
6 the 2018 IRP over the remaining life of each program. This
7 perspective provides the basis for determining which programs
8 should continue to be approved as a DSM or EE program eligible for
9 cost recovery pursuant to the Company's DSM/EE Mechanism. The
10 Company's revised Exhibit DRK-1, Schedule 4, indicates that all
11 programs except for the Income and Age Qualified Home
12 Improvement Program and the Air Conditioner Cycling Program are
13 projected to be cost effective under both the TRC and UC tests.

14 My review of witness Kesler's calculations of cost-effectiveness
15 indicate that the calculations for Company's revised Exhibit DRK-1,
16 Schedules 2 and 4, have been performed in accordance with the
17 Mechanism.

18 **Q. WHY IS THE AIR CONDITIONING CYCLING PROGRAM NOT**
19 **COST-EFFECTIVE?**

20 A. Witness Kesler's revised calculations for cost-effectiveness show
21 that the Air Conditioning cycling program is cost-effective under the
22 TRC test, but not under the UC test. The benefits related to the Air
23 Conditioning Cycling program are primarily capacity-related benefits.

1 These benefits have been significantly impacted by the decreases in
2 the value (dollar per kW) of avoided capacity costs experienced by
3 the Company and other investor-owned utilities in North Carolina.
4 The Public Staff continues to be concerned with the impact of
5 changes in avoided costs on DSM and EE programs, and continues
6 to discuss ways the Company's programs can be modified to
7 compensate for the reduced benefits.

8 **Q. HAVE YOU REVIEWED THE 2018 EM&V REPORT FILED BY**
9 **DENC?**

10 A. Yes. The Public Staff contracted the services of GDS Associates,
11 Inc. (GDS), to assist it with review of EM&V. With GDS's assistance,
12 I have reviewed the 2018 EM&V Report. This report evaluated the
13 participation and savings for each DSM and EE program approved
14 in both Virginia and North Carolina through December 31, 2017.

15 I also reviewed previous Commission orders to determine if DENC
16 complied with provisions regarding EM&V contained in those orders.

17 **Q. DID DENC AND ITS EM&V CONSULTANT ADOPT OR**
18 **INCORPORATE THE PUBLIC STAFFS PREVIOUS EM&V**
19 **RECOMMENDATIONS?**

20 A. Yes. In the Sub 545 proceeding, the Commission accepted the
21 Public Staff's EM&V-related recommendations and required the
22 Company to make the appropriate changes and corrections to the

1 Vintage 2016 savings for several programs. Those actions were
2 related to the input data used by the Company's EM&V evaluator to
3 calculate savings. Once the correct savings are calculated, the
4 Company typically adds those corrected savings to the next Vintage,
5 which in this case is Vintage 2017. My review of the savings for
6 Vintage 2017 in this proceeding confirm that the changes and
7 corrections identified by the Public Staff in the Sub 545 proceeding
8 have been incorporated into the Vintage 2017 savings as identified
9 in the 2018 EM&V Report.

10 **Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING THE**
11 **COMPANY'S 2018 EM&V REPORT?**

12 **A.** Yes. Based on our review of the 2018 EM&V Report, I propose two
13 adjustments to the Company's Residential Retail LED Lighting
14 program.

15 The first adjustment is to be made to the Hours-of-Use (HOU) used
16 in the calculation of the Gross Deemed Savings. The Company and
17 the Public Staff have agreed that since various other data
18 assumptions for this program were applied from the Mid-Atlantic
19 Technical Reference Manual (TRM), then the HOU should also be
20 from the Mid-Atlantic TRM. This adjustment will reduce the applied
21 HOU from 2.92 to 2.52.

22 The second adjustment is to correct the Net-to-Gross (NTG)
23 percentage used in the report. While we were reviewing the report,

1 we noticed that even though the report designates a NTG of 85%,
2 the calculations of the impacts on the underlying data reflected a
3 NTG of 93%. The Company and Public Staff have agreed that it is
4 appropriate to adjust the NTG to 85%.

5 Therefore, I recommend that the Company update both the HOU and
6 the NTG percentage for this program and apply the impacts to the
7 Experience Modification Factor (EMF) for Vintages 2017 and 2018.

8 **Q. WHAT ARE THE IMPACTS OF YOUR EM&V**
9 **RECOMMENDATIONS?**

10 A. The impacts of the two recommendations discussed above will
11 reduce the Net Adjusted Savings for the Residential Retail LED
12 Lighting program for Vintages 2017 and 2018. To the extent the
13 changes impact the Vintage 2017 and 2018 savings for the
14 Residential LED Lighting program, those changes should be
15 addressed by the Company in its next DSM/EE rider proceeding in a
16 manner consistent with the Company's practice of adjusting EM&V
17 Vintage savings.

18 **Q. HAS THE COMPANY MADE CORRECTIONS TO THEIR 2018**
19 **EM&V REPORT TO INCORPORATE THESE**
20 **RECOMMENDATIONS?**

21 A. Yes. On October 25, 2018, the Company filed corrections to their
22 May 1, 2018 EM&V report to incorporate our recommendations. With

1 the assistance of GDS, we believe that the Company has adequately
2 applied our recommendations to the 2018 EM&V report.

3 **Q. HAVE YOU CONFIRMED THAT THE COMPANY'S**
4 **CALCULATIONS INCORPORATE THE VERIFIED SAVINGS OF**
5 **THE 2018 EM&V REPORT?**

6 A. Yes. As in previous cost recovery proceedings, the 2018 EM&V
7 Report provided gross and net savings from the portfolio of programs
8 for the Virginia and North Carolina jurisdictions separately. However,
9 the methodologies and assumptions used in the evaluations of the
10 programs were consistently applied to both jurisdictions. I was able,
11 through sampling, to confirm that the information in the 2018 EM&V
12 Report flows into the PPI calculations of both Riders C and CE, and
13 the net lost revenue calculations included in Rider CE. Based on this
14 information and my observations I believe DENC is appropriately
15 incorporating the results of its EM&V efforts into the DSM/EE rider
16 calculations.

17 For purposes of this and previous DSM/EE cost recovery
18 proceedings for DENC, the 2018 EM&V Report data used to true up
19 program savings and participation for Vintage Year 2017 and earlier
20 Vintages are sufficient to consider those Vintage years to be
21 complete for all programs operating in those years.

Q2 DOES THIS CONCLUDE YOUR TESTIMONY?

A23 Yes.

APPENDIX A

DAVID M. WILLIAMSON

I am a 2014 graduate of North Carolina State University with a Bachelor of Science Degree in Electrical Engineering. I began my employment with the Public Staff's Electric Division in March of 2015. My current responsibilities within the Electric Division include reviewing applications and making recommendations for certificates of public convenience and necessity of small power producers, master meters, and resale of electric service; reviewing applications and making recommendations on transmission proposals for certificates of environmental compatibility and public convenience and necessity; and interpreting and applying utility service rules and regulations.

My primary responsibility within the Public Staff is reviewing and making recommendations on DSM/EE filings for initial program approval, program modifications, EM&V evaluations, and on-going program performance of the portfolio of programs of Duke Energy Carolinas, LLC (DEC), Duke Energy Progress, LLC (DEP), and DENC. I filed an affidavit in DEP's 2016 DSM/EE rider proceeding in Docket No. E-2, Sub 1108, and testimony in DEP's DSM/EE rider proceedings in Docket Nos. E-2, Sub 1145 and E-2, Sub 1174, as well as in DEC's 2018 DSM/EE rider proceeding in Docket No. E-7, Sub 1164.

(WHEREUPON, the prefiled direct testimony and Appendix A of MICHAEL C. MANESS is copied into the record as if given orally from the stand.)

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

DOCKET NO. E-22, SUB 556

In the Matter of
 Application by Virginia Electric and)
 Power Company, d/b/a Dominion)
 Energy North Carolina, for Approval of)
 Demand-Side Management and Energy)
 Efficiency Cost Recovery Rider under)
 N.C. Gen. Stat. § 62-133.9 and)
 Commission Rule R8-69

TESTIMONY OF
 MICHAEL C. MANESS
 Public Staff – North
 Carolina Utilities
 Commission

OFFICIAL COPY
OFFICIAL COPY

Oct 25 2018
Nov 28 2018

October 25, 2018

1 Q. PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND
2 PRESENT POSITION.

3 A. My name is Michael C. Maness. My business address is 430 North
4 Salisbury Street, Dobbs Building, Raleigh, North Carolina. I am the
5 Director of the Accounting Division of the Public Staff – North
6 Carolina Utilities Commission (Public Staff).

7 Q. BRIEFLY STATE YOUR QUALIFICATIONS AND DUTIES.

8 A. A summary of my qualifications and duties is set forth in Appendix A
9 of this testimony.

10 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

11 A. The purpose of my testimony is to present my recommendations
12 regarding (1) the prospective Demand-Side Management / Energy
13 Efficiency rider (DSM/EE rider or Rider C) and (2) the DSM/EE
14 Experience Modification Factor rider (DSM/EE EMF rider or Rider
15 CE) proposed by Virginia Electric and Power Company d/b/a
16 Dominion Energy North Carolina (DENC or the Company) in its
17 Application filed in this docket on August 21, 2018.¹ In addition to
18 my filing of this testimony, Public Staff witness David M. Williamson
19 has filed testimony in this proceeding regarding DENC's DSM/EE
20 portfolio (including certain new program approvals and program

¹ Riders C and CE are each comprised of various class-based billing rates.

1 terminations), the cost-effectiveness of each program, and the 2018
2 Evaluation, Measurement, and Verification (EM&V) Report, which
3 reported on the results of DENC's programs through December 31,
4 2017. The DSM/EE and DSM/EE EMF Riders are authorized by
5 N.C. Gen. Stat. § 62-133.9 and implemented pursuant to
6 Commission Rule R8-69.

7 **Q. HOW IS YOUR TESTIMONY ORGANIZED?**

8 A. My testimony begins with a review of the regulatory framework for
9 DSM/EE cost recovery by electric utilities and the historical
10 background of DENC's Application in this docket. I then discuss the
11 Company's proposed billing rates and other aspects of its filing.
12 Following a summary of my investigation, I present my conclusions
13 and recommendations regarding approval of the proposed billing
14 rates making up Riders C and CE.

15 **THE PROCESS FOR SETTING DENC'S**
16 **DSM/EE REVENUE REQUIREMENTS**

17 **Q. PLEASE DESCRIBE THE BASIS FOR THE COMPANY'S FILING.**

18 A. N.C. Gen. Stat. § 62-133.9(d) allows a utility to petition the
19 Commission for approval of an annual rider to recover (1) the
20 reasonable and prudent costs of new DSM and EE measures and
21 (2) other incentives to the utility (utility incentives) for adopting and
22 implementing new DSM and EE measures. However, N.C. Gen.

1 Stat. § 62-133.9(f) allows industrial and certain large commercial
2 customers to opt out of participating in the power supplier's DSM/EE
3 programs or paying the DSM/EE rider, if an eligible customer notifies
4 its electric power supplier that it has implemented or will implement,
5 at its own expense, alternative DSM and EE measures. Commission
6 Rule R8-69 sets forth the general parameters and procedures
7 governing approval of the annual rider.

8 In this proceeding, DENC has calculated its proposed Riders C and
9 CE using the Cost Recovery and Incentive Mechanism for Demand-
10 Side Management and Energy Efficiency Programs approved by the
11 Commission in its *Order Approving Revised Cost Recovery and*
12 *Incentive Mechanism*, issued in Docket No. E-22, Sub 464, on May
13 22, 2017 (2017 Mechanism). The 2017 Mechanism became
14 effective as of May 22, 2017, for projected costs and utility incentives
15 beginning January 1, 2018, and for true-ups of costs and utility
16 incentives beginning January 1, 2017.² The 2017 Mechanism
17 changed the calculation of the bonus incentive approved for inclusion
18 in its DSM/EE and DSM/EE EMF riders from a Program Performance
19 Incentive to a Portfolio Performance Incentive (PPI), as further
20 explained below.

² For the levelization run-out of the trued-up bonus incentives for measures installed or implemented prior to 2017, the Company carried forward those incentives as calculated pursuant mechanisms approved by the Commission in 2015 and 2011.

1 Q. PLEASE DESCRIBE THE 2017 MECHANISM AND ITS MAJOR
2 COMPONENTS.

3 A. The overall purpose of the 2017 Mechanism is to (1) allow DENC to
4 recover all reasonable and prudent costs incurred for adopting and
5 implementing new DSM and new EE measures; (2) establish the
6 terms, conditions, and methodology for the recovery of certain utility
7 incentives – Net Lost Revenues (NLR) and the PPI - to reward DENC
8 for adopting and implementing DSM and EE measures and
9 programs; (3) provide for an additional incentive to further encourage
10 kilowatt-hour (kWh) savings achievements; and (4) establish certain
11 requirements and guidelines for requests by DENC for approval,
12 monitoring, and management of DSM and EE programs. The 2017
13 Mechanism includes many provisions that indirectly influence the
14 ratemaking process for DSM and EE costs and utility incentives,
15 including provisions that address program approval and tests of
16 continuing cost-effectiveness, various procedural matters, reporting
17 requirements, and future review of the 2017 Mechanism itself.
18 Additionally, the provisions of the 2017 Mechanism that most directly
19 address the determination of the annual DSM/EE and DSM/EE EMF
20 riders include the following:

21 1. Special jurisdictional allocation procedures will be evaluated
22 for programs that operate in only either the Virginia or North
23 Carolina retail jurisdictions, or that are limited in their
24 operation in either jurisdiction.

- 1 2. In general, DENC shall be allowed to recover, through the
2 DSM/EE and the DSM/EE EMF riders, all reasonable and
3 prudent costs of Commission-approved DSM/EE programs.
4 However, any of the Stipulating Parties may propose a
5 procedure for the deferral and amortization of all or a portion
6 of DENC's non-capital program costs to the extent those costs
7 are intended to produce future benefits. For program costs
8 not deferred for amortization in future DSM/EE riders, the
9 accrual of a return on any under-recoveries or over-recoveries
10 of cost will follow the requirements of Commission Rule R8-
11 69(b), subparagraphs (3) and (6), unless the Commission
12 determines otherwise.
- 13 3. DENC shall be allowed to recover net lost revenues (NLR) as
14 a utility incentive (with the exception of those amounts related
15 to research and development or the promotion of general
16 awareness and education of EE and DSM activities), but shall
17 be limited for each measurement unit installed in a given
18 vintage year to those dollar amounts resulting from kilowatt-
19 hour (kWh) sales reductions experienced during the first 36
20 months after the installation of the measurement unit. NLR
21 related to pilot programs are subject to additional qualifying
22 criteria. Recoverable NLR shall ultimately be based on kWh
23 sales reductions and kilowatt (kW) savings verified through
24 the evaluation, measurement, and verification (EM&V)
25 process and approved by the Commission.
- 26 4. The eligibility of kWh sales reductions to generate recoverable
27 NLR during the applicable 36-month period will cease upon
28 the implementation of a Commission-approved alternative
29 recovery mechanism that accounts for the otherwise eligible
30 NLR, or new rates approved by the Commission in a general
31 rate case or comparable proceeding that account for the NLR.
- 32 5. NLR will be reduced by net found revenues, as defined in the
33 2017 Mechanism, that occur in the same 36-month period.
34 Net found revenues will be determined according to the
35 "Decision Tree" process included in the 2017 Mechanism.
- 36 6. Subject to certain exceptions, DENC shall be allowed to
37 collect a bonus utility incentive, the Portfolio Performance
38 Incentive, for each DSM or EE program approved and in effect
39 during a given vintage year. The Portfolio Performance
40 Incentive is based on the net savings of each program or
41 measure as calculated using the UCT, and is equal to 9.08%
42 of the present value of net savings for DSM programs and
43 measures and 14.76% of the present value of net savings for

- 1 EE programs and measures. The 9.08% and 14.76% factors
2 shall be subject to review in each annual rider proceeding to
3 ensure the continued reasonableness of the Portfolio
4 Performance Incentive as a whole. The Portfolio
5 Performance Incentive shall be converted into a stream of no
6 more than 10 levelized annual payments. In determining the
7 initial estimate of the Portfolio Performance Incentive to be
8 included in the DSM/EE rider, DENC may utilize a reasonable
9 and appropriate estimation accomplished by a simpler and
10 conservative method.
- 11 7. The per kilowatt (kW) avoided capacity benefits used to
12 calculate net savings for each Program and Vintage Year shall
13 be determined annually by DENC using comparable
14 methodologies to those used in the most recently approved
15 biennial avoided cost proceeding. The per kWh avoided energy
16 benefits used shall be those reflected in or underlying the most
17 recently filed integrated resource plan (IRP). DENC's
18 assumptions used in these methodologies, as well as the
19 methodologies, are subject to the Public Staff's review and
20 acceptance at the time DENC files its petition for annual cost
21 recovery pursuant to Rule R8-69 and this Mechanism. Unless
22 DENC and the Public Staff agree otherwise, DENC shall not be
23 allowed to update its avoided capacity costs and avoided energy
24 costs after filing its petition for its annual cost recovery
25 proceeding pursuant to Rule R8-69 and this Mechanism and
26 prior to the Commission's order establishing the rider for that rate
27 period for purposes of calculating the PPI.
- 28 8. The per kW avoided transmission and avoided distribution
29 (avoided T&D) costs used to calculate net savings for a Vintage
30 Year shall be based on a study updated at least every five years,
31 or as appropriate and agreed to by the Company and the Public
32 Staff.

33 **THE COMPANY'S PROPOSED BILLING RATES**

- 34 **Q. PLEASE DESCRIBE THE BILLING FACTORS, VINTAGE YEARS,**
35 **RATE PERIOD, AND TEST PERIOD BEING CONSIDERED IN**
36 **THIS PROCEEDING.**
- 37 **A. The rate period proposed by DENC for this proceeding is the twelve-**
38 **month period from February 1, 2019, through January 31, 2020.**

1 This is the proposed period over which the DSM/EE and DSM/EE
2 EMF riders set herein will be charged. In his testimony, Company
3 witness Hubbard explains that subsequent to the Company's 2017
4 DSM/EE Rider proceeding, the Company and the Public Staff
5 engaged in discussions that resulted in the Company proposing that
6 the rate periods for the DSM/EE, fuel, and REPS rider proceedings
7 all be changed from beginning each January 1 to beginning one
8 month later. The reason for this change is to lengthen the time in
9 each case for the Commission to issue its final orders and for the
10 Company to finalize the rates approved in the orders. However, in
11 this proceeding, because of the manner in which the Company
12 models annual projected costs, the proposed period for which the
13 estimated costs supporting the DSM/EE rider are determined will
14 remain calendar year 2019.

15 In order to span the gap between the end of the rate period approved
16 in the 2017 DSM/EE Rider case (December 31, 2018) and the
17 beginning of the rate period proposed in this proceeding (February
18 1, 2020), for the month of January 2019 DENC is proposing to keep
19 existing Rider C in place (subject to future true-up) and to reduce
20 Rider CE to zero.

21 The test period applicable to this proceeding (the presumptive period
22 for which the under- or overrecoveries of DSM/EE costs and NLR

1 are measured) is the twelve months ended December 31, 2017.³
2 Vintage Years, used for tracking PPI and NLR related to DSM/EE
3 measures installed in those years, correspond to calendar years. In
4 this proceeding, prospective rates are being set for Vintage Year
5 2019, while Vintage Year 2017 is being trued up.

6 In its Application, DENC requested approval of class-specific
7 DSM/EE billing rates (Rider C) based on a North Carolina retail
8 revenue requirement of \$2,510,301 (excluding any revenue adder
9 for the North Carolina Regulatory Fee (NCRF)). Likewise, the
10 Company requested approval of class-specific decrement DSM/EE
11 EMF billing rates (Rider CE) based on a North Carolina retail true-
12 up revenue requirement increment of \$1,839,922, excluding the
13 NCRF. These revenue requirements are made up of the following
14 components, as set forth in the testimony of the DENC witnesses
15 and their accompanying exhibits:
16

³ DENC has not requested in this proceeding to incorporate in its DSM/EE EMF rider calculations the under- or overrecovery of DSM/EE costs experienced up to 30 days prior to the hearing, as would be permitted by Commission Rule R8-69(b)(2).

1	<u>RIDER C</u>	
2	Program costs (including common costs)	\$2,207,366
3	PPI	<u>302,935</u>
4	Total Rider C revenue requirement	<u>\$2,510,301</u>
5		
6		
7	<u>RIDER CE</u>	
8	Program costs (including common costs)	\$ 2,707,087
9	NLR	375,822
10	PPI	257,971
11	Test period Rider C revenues	<u>(1,611,659)</u>
12	Net rev. req. before carrying costs and int.	1,729,221
13	Carrying costs	110,700
14	Interest on EMF refund	<u>0</u>
15	Total Rider CE revenue requirement	<u>\$ 1,839,921⁴</u>
16		

17 As in the 2014-2017 proceedings, DENC did not request NLR as part
 18 of Rider C. Also, consistent with the 2017 Mechanism, the Company
 19 calculated the PPI amount included in Rider C using a simplified
 20 approach. As explained in the testimony of Company witness Bates
 21 and set forth in his exhibits, the Company calculated the estimated
 22 PPI for Vintage Year 2019 by adding (a) the verified levelized
 23 amounts related to Vintage Years 2017 and prior that are due to be
 24 collected in 2019 to (b) a conservative estimate of the levelized PPI
 25 amounts related to Vintage Years 2018 and 2019 (2018 is included
 26 because the EM&V process for that year has not yet been
 27 completed). The 2018 estimate is based on the amount calculated
 28 by the Company in the 2017 proceeding for the 2018 rate year. The

⁴ Immaterial rounding difference of \$1 on Rider CE from amounts shown in witness Stephens' exhibits are due to internal rounding in Company exhibits.

1 2019 estimate is based on 1.00% (the ratio used in the 2017
2 proceeding) of the Company's estimates of 2019 DSM/EE operating
3 expenses, with certain programs excluded altogether.

4 The components of the Company's proposed Rider C and Rider CE
5 revenue requirements were largely calculated by DENC witnesses
6 Bates and Moore, using jurisdictional allocation factors provided by
7 DENC witness Crouch in accordance with the 2017 Mechanism.
8 Witness Crouch indicated in his testimony that he took the
9 jurisdictional revenue requirements and assigned or allocated them
10 to the various North Carolina retail rate classes consistent with the
11 Mechanism.

12 In her testimony, DENC witness Stephens indicated that she took the
13 class-specific Rider C and Rider CE revenue requirements
14 developed by witness Crouch and converted them into per-kWh
15 billing rates, using projected rate period kWh sales for each customer
16 class, excluding estimated kWh sales related to opted-out
17 customers. The specific billing rates proposed by the Company in
18 its Application are set forth in witness Stephens' exhibits.

19 **INVESTIGATION AND CONCLUSIONS**

20 **Q. PLEASE DESCRIBE YOUR INVESTIGATION OF DENC'S FILING.**

21 **A.** My investigation of DENC's filing in this proceeding focused on
22 determining whether the proposed DSM/EE and DSM/EE EMF

1 billing rates were (a) calculated in accordance with the 2017
2 Mechanism, and (b) otherwise adhered to sound ratemaking
3 concepts and principles. The procedures I and other members of the
4 Public Staff's Accounting Division acting under my supervision
5 utilized included a review of the Company's filing, relevant prior
6 Commission proceedings and orders, and workpapers and source
7 documentation used by the Company to develop the proposed billing
8 rates. Performing the investigation required the review of responses
9 to written and verbal data requests, as well as discussions with
10 Company personnel. The investigation also included a review of the
11 actual DSM/EE program costs incurred by DENC during the 12-
12 month period ended December 31, 2017. To accomplish this, the
13 Accounting Division selected and reviewed samples of source
14 documentation for test year costs included by the Company for
15 recovery through the DSM/EE Rider. Review of these samples is
16 intended to test whether the actual costs included by the Company
17 in the DSM and EE billing rates are either valid costs of approved
18 DSM and EE programs or administrative (common) costs supporting
19 those programs.

20 The investigation, including the sampling of source documentation,
21 concentrated primarily on costs and NLR related to the test period,
22 and verified PPIs related to the 2011-2017 period, all of which are to
23 be included in the true-up DSM/EE EMF billing rates approved in this

1 proceeding. A more general review was conducted of the
2 prospective billing rates proposed to be charged for Vintage Year
3 2017, which are subject to true-up in future proceedings.

4 **Q. WHAT ARE YOUR FINDINGS AND CONCLUSIONS?**

5 A. Based on my investigation, I am of the opinion that the Company has
6 generally calculated its proposed DSM/EE billing rates (included in
7 Rider C) and DSM/EE EMF billing rates (included in Rider CE) in a
8 manner consistent with N.C. Gen. Stat. § 62-133.9, Commission
9 Rule R8-69, and the 2017 Mechanism. The review of sampled
10 program and common costs resulted in no exceptions.

11 I would like to note the following regarding the Public Staff's
12 investigation:

13 (1) EM&V Adjustment to Residential Light-Emitting Diode
14 Program (LED Program) – In his testimony, Public Staff
15 witness Williamson has recommended reductions to the
16 Vintage 2017 and Vintage 2018 kWh savings associated with
17 the LED Program, as a result of the Public Staff's review of
18 the Company's 2018 EM&V Report. The adjustment to the
19 Vintage 2018 PPI related to the Vintage 2018 kWh
20 adjustments will be reflected in the 2019 DSM/EE Rider
21 proceeding, as would normally be expected. With regard to
22 the adjustment to the Vintage 2017 PPI, usually the Public

1 Staff would have the option of recommending this adjustment
2 in the current proceeding, if necessary and appropriate due to
3 materiality, since the initial true-up of the overall 2017 PPI
4 takes place in this proceeding. However (according to
5 Company personnel), due to the specific characteristics of the
6 LED Program, no initial PPI true-up was proposed for that
7 program in this proceeding, and is instead planned to be
8 included in next year's proceeding. Given the relative
9 immateriality of the annual impact on the DSM/EE rider of the
10 PPI associated with the LED Program and the fact that it
11 would result in a rate increase, the Public Staff does not object
12 to the initial true-up of the Vintage 2017 PPI for the LED
13 Program being included in next year's DSM/EE proceeding
14 (with the Public Staff's recommended adjustments).

15 (2) Internal Audit of Controls over DSM/EE Activities – During the
16 course of the review of program costs, the Public Staff
17 became aware of and reviewed the report on a 2017 internal
18 audit of controls surrounding DENC's DSM/EE rebate and
19 incentive activities, ordered by the Virginia State Corporation
20 Commission (VSCC). The VSCC has ordered that the same
21 type of audit be performed on a biennial basis in the future. I
22 consider such an audit to be a valuable and informative

1 exercise, and the Public Staff plans to monitor the future
2 audits.

3 **Q. WHAT IS THE IMPACT OF RECOMMENDATIONS MADE BY**
4 **PUBLIC STAFF WITNESS WILLIAMSON IN HIS TESTIMONY ON**
5 **YOUR CONCLUSIONS REGARDING THE DSM/EE REVENUE**
6 **REQUIREMENTS IN THIS PROCEEDING?**

7 A. Public Staff witness Williamson has filed testimony in this proceeding
8 discussing several topics and issues related to the Company's filing.
9 None of these topics and issues necessitates an adjustment in this
10 particular proceeding to the Company's billing factor calculations,
11 although some of the recommendations made by Mr. Williamson may
12 affect the revenue requirements in future proceedings, including the
13 EM&V adjustment discussed previously in my testimony.

14 **Q. PLEASE SUMMARIZE YOUR CONCLUSIONS REGARDING**
15 **DENC'S BILLING RATES.**

16 A. In summary, the Public Staff has found no errors or other issues
17 necessitating an adjustment to DENC's proposed billing rates in this
18 proceeding.

1 **RECOMMENDATION**

2 **Q. WHAT IS YOUR RECOMMENDATION IN THIS PROCEEDING?**

3 A. Based on the results of the Public Staff's investigation, I recommend
4 approval of the Rider C and CE rates as proposed by DENC in its
5 August 21, 2018 Application. The recommended billing rates should
6 be approved subject to any true-ups in future cost recovery
7 proceedings consistent with the 2017 Mechanism, N.C. Gen. Stat. §
8 62-133.9, Commission Rule R8-69, and future Commission orders.
9 The Public Staff notes that reviewing the calculation of the DSM/EE
10 and DSM/EE EMF riders is a process that involves reviewing
11 numerous assumptions, inputs, and calculations, and its
12 recommendation with regard to this proposed rider is not intended to
13 indicate that the Public Staff will not raise questions in future
14 proceedings regarding the same or similar assumptions, inputs, and
15 calculations.

16 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

17 A. Yes, it does.

APPENDIX A

MICHAEL C. MANESS

I am a graduate of the University of North Carolina at Chapel Hill with a Bachelor of Science degree in Business Administration with Accounting. I am a Certified Public Accountant and a member of both the North Carolina Association of Certified Public Accountants and the American Institute of Certified Public Accountants.

As Director of the Accounting Division of the Public Staff, I am responsible for the performance, supervision, and management of the following activities: (1) the examination and analysis of testimony, exhibits, books and records, and other data presented by utilities and other parties under the jurisdiction of the Commission or involved in Commission proceedings; and (2) the preparation and presentation to the Commission of testimony, exhibits, and other documents in those proceedings. I have been employed by the Public Staff since July 12, 1982.

Since joining the Public Staff, I have filed testimony or affidavits in a number of general, fuel, and demand-side management/energy efficiency rate cases of the utilities currently organized as Duke Energy Carolinas, LLC, Duke Energy Progress, LLC., and Virginia Electric and Power Company (Dominion Energy North Carolina), as well as in several water and sewer general rate cases. I have also filed testimony or affidavits in other proceedings, including applications for certificates of public convenience and necessity for the construction of generating

facilities, approval of self-generation deferral rates, approval of cost and incentive recovery mechanisms for electric utility demand-side management and energy efficiency (DSM/EE) efforts, and approval of cost and incentive recovery pursuant to those mechanisms.

I have also been involved in several other matters that have come before this Commission, including the investigation undertaken by the Public Staff into the operations of the Brunswick Nuclear Plant as part of the 1993 Carolina Power & Light Company fuel rate case (Docket No. E-2, Sub 644), the Public Staff's investigation of Duke Power's relationship with its affiliates (Docket No. E-7, Sub 557), and several applications for business combinations involving electric utilities regulated by this Commission. Additionally, I was responsible for performing an examination of Carolina Power & Light Company's accounting for the cost of Harris Unit 1 in conjunction with the prudence audit performed by the Public Staff and its consultants in 1986 and 1987.

I have had supervisory or management responsibility over the Electric Section of the Accounting Division since 1986, and also was assigned management duties over the Water Section of the Accounting Division during the 2009-2012 time frame. I was promoted to Director of the Accounting Division in late December 2016.

COMMISSIONER BROWN-BLAND: Is there anything else?

(No response)

The post-hearing filings/proposed orders, is that good, 30 days from today?

MS. KELLS: Yes.

MR. McDONALD: (Nods head in agreement).

MS. FENNELL: Yes.

MR. BREITSCHWERDT: Yes.

COMMISSIONER BROWN-BLAND: Then so ordered. And, if there's nothing else to come before the Commission this morning, everyone's appearances are looking just fine, and we will be adjourned.

(WHEREUPON, the proceedings were adjourned.)
