Clerk's Office
N.C. Utilities Commission

I want to go on record as being amazed and upset by the NCUC allowing Utilities Inc approximate 15 percent increases in the base charges for both residential water and wastewater services.

While I am not familiar with the hearings regarding Docket W-354, Sub 344, as a customer for the past several years, I and many of my neighbors can attest to the average at best service.

What could possibly justify such dramatic increases in such low inflationary times if you believe what the politicians tell us? Oh, that's right....the pol' tell us such stories! Apparently they don't pay utility bills and go grocery shopping!

Shame on the NCUC commissioners!

If anyone would like to share the HONEST truth about these hearings, I would be fascinated to hear!

Bill Rempe. 14108 Yachtsman Harbor Dr. Charlotte, N.C.
