Please reject Duke Energy's proposed plan which limits solar energy and instead relies heavily on natural gas. Natural gas is devastating to the environment. It ruins water supplies, causes earthquakes and methane leaks during the whole process are a more potent climate warming gas than carbon dioxide. Please reject Duke's plan and demand that they revise it with more solar and renewables. Thank you for your time, Jack Unruh 5709 Bashford Crest Ln. Raleigh, NC 27606 919-623-1518

E-100 Sub 190

Message

It is past time to stop giving Duke Energy / Progress Energy carte blanche. They ask for incessant rate increases...you grant them. They pass on clean up costs for things that are THEIR fault...you allow it. They post enormous profits...you give them tax cuts. They are in charge of doling out state tax credits for installing solar...and they do it as a lottery system and deny giving money to individuals. And with solar...they want to give less than market prices for paying for electric overages to pass on more cost to people who have installed solar panels. WHEN WILL YOU STOP LETTING DUKE ENERGY PROFIT BY SCREWING OVER CUSTOMERS? Duke Energy will do anything to increase their profits by costing taxpayers money, abusing tax credits, abusing tax cuts and trying to squeeze money out of solar to make profits for themselves. They even offer people the ability to pay MORE on their energy bills to just say that they are using energy that is the OFFSET THAT PEOPLE THAT INSTALL SOLAR PANELS GENERATE! Duke Energy needs to be regulated more strictly instead of loosely in order to gain votes and lobbyist monies. Seriously, stop working for corporations and rich people and do your job...work for the public good, not your pockets.
