North Carolina Utilities Commission
4325 Mail Service Center
Raleigh, North Carolina 27699-4300

Re: Docket No. E-100 Sub 190

Dear Commissioners,

Please see the attached petition signed by 529 North Carolina residents urging the Commission to reject the draft Carbon Plan proposed by Duke Energy, and instead establish a Carbon Plan that prioritizes clean energy infrastructure such as offshore wind, solar, and storage over outdated fossil fuel energy sources.

It is critical that the Commission implement a Carbon Plan that equitably reduces carbon emissions to protect public health in North Carolina and meet the goals of H.B. 951. To achieve this, we, the undersigned, urge the Commission to prioritize the speedy retirement of fossil fuel plants in overburdened communities and, equally important, not replace them with new carbon-emitting facilities. We also urge the Commission to utilize existing policies and resources (both state and federal) to encourage investment in clean energy resources.

We respectfully ask the Commission to reject Duke Energy's draft plan and issue one prioritizing clean energy resources and environmental justice. Thank you for considering our petition.

Thank you,

Brittany L. Griffin, J.D.
Advocacy Manager
CleanAIRE NC

Petition: Please Support a Strong Equitable Carbon Plan for North Carolina

We, the undersigned, strongly urge the NC Utilities Commission to establish a robust NC Carbon Plan that rapidly transitions our state to a clean energy economy. Given the urgent state of the climate emergency, the Commission must investigate and choose the best ways to reduce carbon emissions as fast as possible, while also minimizing cost and ensuring equity.

We believe the Commission must create a plan that:

- Meets the goals laid out in the Energy Solutions for North Carolina (HB 951) law; specifically, the plan must reduce electric sector carbon emissions 70% by 2030 (relative to 2005 levels), and achieve carbon neutrality by 2050;
- Incorporates sufficient resources that both increase renewable energy supply and reduces demand by utilizing all available low-carbon technologies and mechanisms that abate costs.

Signed by:
