NC Utilities Commission:

P-100, SUB 137 C

Thank you for letting us know that a new plan for our telephone system has be proposed and allowing us to comment upon it. Having had our area codes changed several times since living in NC, I am reluctant to grant approval to its happening yet again. But the idea that we will be dialing 10 digits on every phone call is abominable. Hell, give me a new area code if you have to, but not this. Also, do we throw in a "1" each time, or just those outside the designated area, to add to the chaos? Is this a problem that has been solved by less draconian measures elsewhere? You might check on Raleigh-they never seem to change their area code, yet grow ever larger.
