I fully support this proposal for cleaner sustainable energy that the antiquated plan of Duke Energy. We need to be pro active in creating Solar power for the future of our planet. Not the climate wrecking plans of the Duke Energy monopoly. Maureen Linneman

NC WARN to state leaders: Stop suppression of local solar; ALL customers can benefit by sharing solar costs just as we pay for dirty power – through the rate system

Duke Energy leaders and state officials simply must, finally, break out of the years of appalling pretense that North Carolina is 'making a clean transition'. The climate situation is desperate, this state is failing its duty, and local solar could quickly begin to change that

We support the sharing solar proposal. Duke power is working for its shareholders, not the people of NC.

The NCUC should promote and pass legislation that works toward a "shared" solution of Solar energy production, and storage, between citizens/consumers and customers of Duke Energy and current and potential producers of clean solar energy. Make this a win-win solution! Respectfully, Tim and Tammi Mengel Randleman, NC

PLEASE reject Duke Energy's climate-wrecking plans and pursue climate solutions that work! Our state needs solar and wind power, not fossil fuel-based energy that is not sustainable. Stop polluting and create a vision of clean energy for the people, not corporations.

NCUC members: Change is always a difficult step to make, however sometimes it imperative! Yes Duke and Dominion are monopolies supplying NC with energy but at the end of the day they were created to "serve the residents of NC". NOW is the time to take that step. Solar plus storage at the local level (our homes and businesses) is simply a no brainer! It eliminates SO much expense not to mention the benefits to our environment, health and lives. Think about our children, grandchildren and the ones after them. Yes you have achieved a lot simply by being elevated to the commission, now elevate yourself to GREATNESS by making this gigantic step. Thank you for your service! Stuart Matthews, Angier, NC

I am writing to protest the huge and oppressive raises in electric fees while Duke makes exorbitant profits and pays salaries that border on greed. Since there is no competition in this market the voters elected you to create fair restrictions on greed. I believe that the covid crisis/situation has allowed corporations to raise prices at alarming rates while increasing profits and salaries of the elite. This is comparable to gouging. Seniors and low- middle income households are suffering the most. Although I believe in a free market economy. The greed of the elite needs to be reigned in on occasion. Particularly in this non-competitive market. This commission needs to be responsive to the people of North Carolina. Sincerely,  
Rosemary and Walter Fuller
