Subject: Docket E-100, Sub 180CS

Dear Commissioners,

As a person who invested in solar panels a few years ago, I strongly want rooftop solar to remain a big part of the solution to our changing climate. Please do not allow Duke Energy to change the rules on net metering. Panels are a big investment up front so any disincentive to putting them on is not a good idea. Duke Energy makes plenty of money, but they have only put a small investment in solar (accounts for 5% of their profile). We need more people to invest !

Thank you,
Susan Day Moore
