I am the Career and Technical Coordinator, Work-Based Learning Coordinator, and Academy of Architecture and Construction Coordinator at Mount Pleasant High School. I have been in this position 5 years. MPHS was fortunate to receive a solar panel a few years ago. Originally, MPHS had an academy of energy and sustainability which has now transitioned to architecture and construction. We focus on electrical trades, sustainability, masonry, architectural drafting, and interior design. My electrical trades teacher and I benefited from the NEED curriculum training recently. He does follow the NC Standard Course of Study for Construction Core and Electrical Trades which focuses on NCCER credentials.

Please advise if there is additional information needed for this application.

Thanks,

Elizabeth F Poole
