Subject: Docket E-100 Sub 180CS

I would like to oppose in the strongest possible terms Duke Power's attempt to change net-metering terms on solar. This would hurt lower and middle class households, penalize those who have invested in making the grid more stable by installing solar and overall is a big step backward in fighting climate change and would ultimately raise everyone's bills. Please vote for future generations.

Thank you,
Lisa Allen
