Antonia Dunston, Chief Clerk  
North Carolina Utilities Commission  
Dobbs Building  
430 North Salisbury Street  
Raleigh, North Carolina 27603

**Docket No. E-100, Sub 101**

Dear Ms. Dunston:

Please accept this letter as formal notice on behalf of Virginia Electric and Power Company, d/b/a Dominion Energy North Carolina ("the Company"), that the Company has made a non-substantive update to Section XXIV of its North Carolina Terms and Conditions, titled *Generator Interconnection Standard*, as further described in this letter. Clean and redlined versions of Section XXIV reflecting these changes are attached as Exhibit A.

The purpose of the Company's update is to incorporate the version of the North Carolina Interconnection Procedures, Forms and Agreements for State-Jurisdictional Generator Interconnections ("North Carolina Interconnection Standard" or the "Standard") currently in effect by reference to the North Carolina Utilities Commission Docket E-100 Sub 101, and to remove the Standard itself as an attachment to Section XXIV. This update is intended to ensure that customers can readily access the most up-to-date version of the Standard and to obviate the need for the Company to make future updates to Section XXIV as the Standard may be revised from time to time.

Please do not hesitate to contact me if you have any questions.

Sincerely yours,

*/s/ Lauren W. Biskie*

TERMS AND CONDITIONS

---

XXIV. GENERATOR INTERCONNECTION STANDARD

Electric generator interconnection service includes only the ability to interconnect an electric generator to the Company's facilities. Electric generator interconnection service does not include, without limitation, the purchase or sale of the output of the electric generator, station service, back-up power, the delivery of the output of the electric generator, nor any form of the supply or delivery of electricity to the Interconnection Customer. The Interconnection Customer shall make separate arrangements for any other services that it desires to purchase.

The North Carolina Interconnection Procedures, Forms and Agreements for State-Jurisdictional Generator Interconnections ("North Carolina Interconnection Standard") under North Carolina Utilities Commission Docket E-100 Sub 101 are hereby incorporated by reference into this Section XXIV and shall apply for all North Carolina jurisdictional interconnection requests pending with the Company or submitted by the Interconnection Customer to the Company. The North Carolina Interconnection Standard shall apply to the interconnection and/or parallel operation of a Generating Facility that is under the jurisdiction of the Commission, regardless of: 1) the size or voltage level of the interconnection; or 2) whether the Interconnection Customer is selling electricity or using the electricity produced to offset the Interconnection Customer's own electricity consumption.

The North Carolina Interconnection Standard shall not apply to the interconnection and/or parallel operation service of a Generating Facility: 1) under the jurisdiction of the Federal Energy Regulatory Commission; or 2) under the jurisdiction of the Commission that was interconnected or approved for interconnection on or before June 9, 2008, unless the Company and the Interconnection Customer agree otherwise.
