Mr. David Drooze
Chief Counsel
Public Staff – North Carolina Utilities Commission
4326 Mail Service Center
Raleigh, NC 27699-4300

Dear Mr. Drooze:

Ref: Request by CWS for a Rate Increase in Fairfield Harbour

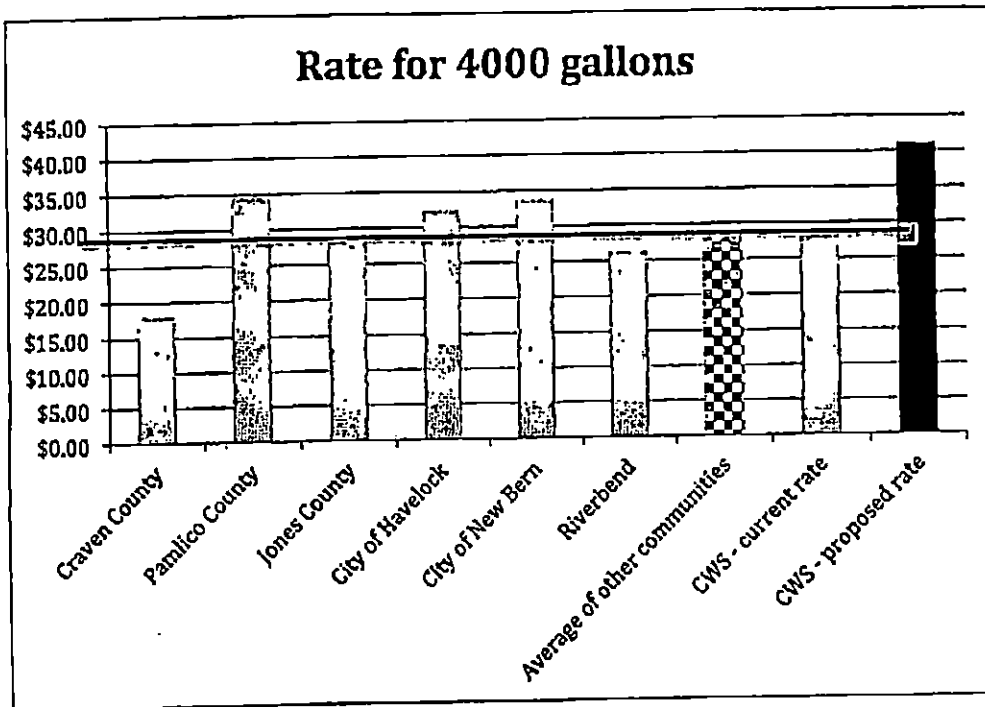

Over the past three years the North Carolina Utilities Commission has granted CWS two outrageous increases in water and sewer rates that have far outstripped the low rates in inflation that were occurring over this same period. The fact that CWS are now coming to the NC Utilities Commission for an even bigger rate increase than either of the two previous increases clearly shows that they have been emboldened by their previous successes.

In the documentation provided to the public there is absolutely no justification provided for this latest request for a rate increase of over 50% for water and almost 23% for sewage service, so it can only be concluded that this has nothing to do with the cost of providing service and is purely profit driven. One only has to look at the corporate structure of CWSNC being a wholly owned subsidiary of Utilities Inc, which is in turn is a wholly owned subsidiary of Corix whose principal owner is British Columbia Investment Management Corporation to recognize that this enterprise is profit driven and not in business to serve their clients like the typical local utility company.

As I am sure you are aware Fairfield Harbour is a community with a high proportion of retirees living on Social Security that increases at the rate of less than 2% per year and for those who are lucky enough to have other investments they are certainly not seeing gains of 23% let alone 50%. So how can a corporation be asking for such outrageous increases in their rates yet again when overall inflation is currently running at between

2 and 3% especially as the Utilities Commission have already twice granted this corporation rates that far exceed existing inflation within a period of 2 years.

As illustrated in the following graph it can clearly be seen that the current water rates are already at the average for the area. While the new proposed rate grossly exceeds any other water system.

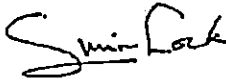

All the local water companies are pumping from the same aquifer (Castle Haines) so costs for pumping that water should be relatively similar. Thus, the differential should be in the number of miles of pipe that have to be maintained. If one equates road mileage to miles of water pipe then Fairfield Harbour with just 35 miles of road should have one of the lowest costs and be more comparable to Riverbend with about 17 miles of road than having a proposed rate that exceeds Pamlico County with over 300 miles of roads.

With respect to the sewer rates the entire billing model is grossly flawed. Yes there are fixed charges for plant and equipment before one drop of water is treated; BUT the higher the volume of water that has to be treated the greater the expense that is incurred both in terms of the need for capacity, the wear on the equipment and the need for treatment chemicals. So why is it that property owners are being penalized for good water stewardship by being charged largely for fixed costs and almost nothing for the volume of their water being treated. This puts an unfair burden on those practicing water conservation.

With many years of records, and based on a fiscally responsible budget that is designed to serve the community rather than passing unknown profits up the food chain, CWS could easily redesign their rate structure. This rate structure could allow them to collect the money they need to serve the community and generate a **reasonable** profit by dramatically lowering the fixed charges and increasing the rate per 1000 gallons treated.

In conclusion, I respectfully ask that you vigorously advocate on behalf of the residents of Fairfield Harbour to not only have the Utility Commission deny these rate increases in their entirety but also to freeze the rates for at least the next 2 years so that we can start bringing some sanity back into the costs to the community for water and sewage.

Sincerely

A handwritten signature in black ink that reads "Simon Lock". The signature is written in a cursive style with a large, stylized "S" and "L".

Simon Lock, Ph.D.

Petition to Public Staff-North Carolina Utilities Commission

Petition summary and background:	NC Utilities Commission Docket No. W-354, Sub 360 indicates application for authority to increase rates for water and sewer utility service in areas including Fairfield Harbour has been filed by Carolina Water Service, Inc of North Carolina (CWSNC)
Action petitioned for:	We, the undersigned, are concerned residents of Fairfield Harbour (FH) who urge the NC Utilities Commission and the Attorney General to oppose and disallow the rate increases proposed by CWSNC for FH. <u>Proposed increases in the average monthly residential bill of over 51% in water utility service and over 22% in sewer utility service in FH are not justified nor reasonable in comparison to rates paid by residents in neighboring areas. The increases proposed by CWSNC are also outrageous in light of increased efficiencies promised by CWSNC as a result of their corporate reorganization in August 2016, and utility rate increases very recently granted CWSNC by the Commission (water +21.38%, sewer +9.26%) in November 2017.</u>

Petition to Public Staff-North Carolina Utilities Commission

Petition summary and background: NC Utilities Commission Docket No. W-354, Sub 360 indicates application for authority to increase rates for water and sewer utility service in areas including Fairfield Harbour has been filed by Carolina Water Service, Inc of North Carolina (CWSNC)

Action petitioned for: **We, the undersigned, are concerned residents of Fairfield Harbour (FH) who urge the NC Utilities Commission and the Attorney General to oppose and disallow the rate increases proposed by CWSNC for FH. Proposed increases in the average monthly residential bill of over 51% in water utility service and over 22% in sewer utility service in FH are not justified nor reasonable in comparison to rates paid by residents in neighboring areas. The increases proposed by CWSNC are also outrageous in light of increased efficiencies promised by CWSNC as a result of their corporate reorganization in August 2016, and utility rate increases very recently granted CWSNC by the Commission (water +21.38%, sewer +9.26%) in November 2017.**

Petition to Public Staff-North Carolina Utilities Commission

Petition summary and background:

NC Utilities Commission Docket No. W-354, Sub 360 indicates application for authority to increase rates for water and sewer utility service in areas including Fairfield Harbour has been filed by Carolina Water Service, Inc of North Carolina (CWSNC)

Action petitioned for:

We, the undersigned, are concerned residents of Fairfield Harbour (FH) who urge the NC Utilities Commission and the Attorney General to oppose and disallow the rate increases proposed by CWSNC for FH. Proposed increases in the average monthly residential bill of over 51% in water utility service and over 22% in sewer utility service in FH are not justified nor reasonable in comparison to rates paid by residents in neighboring areas. The increases proposed by CWSNC are also outrageous in light of increased efficiencies promised by CWSNC as a result of their corporate reorganization in August 2016, and utility rate increases very recently granted CWSNC by the Commission (water +21.38%, sewer +9.26%) in November 2017.

Petition to Public Staff-North Carolina Utilities Commission

Petition summary and background: NC Utilities Commission Docket No. W-354, Sub 360 indicates application for authority to increase rates for water and sewer utility service in areas including Fairfield Harbour has been filed by Carolina Water Service, Inc of North Carolina (CWSNC)

Action petitioned for: **We, the undersigned, are concerned residents of Fairfield Harbour (FH) who urge the NC Utilities Commission and the Attorney General to oppose and disallow the rate increases proposed by CWSNC for FH. Proposed increases in the average monthly residential bill of over 51% in water utility service and over 22% in sewer utility service in FH are not justified nor reasonable in comparison to rates paid by residents in neighboring areas. The increases proposed by CWSNC are also outrageous in light of increased efficiencies promised by CWSNC as a result of their corporate reorganization in August 2016, and utility rate increases very recently granted CWSNC by the Commission (water +21.38%, sewer +9.26%) in November 2017.**
