Subject: E-100 Sub 83: Protect Our Solar Future, Duke should give North Carolina a Fair Deal

**Clerk's Office
N.C. Utilities Commission**

Dear North Carolina Utilities Commission NCUC,

Last month, Duke Energy guaranteed that rooftop solar customers in South Carolina would not face solar-specific charges for at least the next six years. Let's ensure that North Carolinians are given that same policy stability to ensure energy choice and clean energy development.

Utilities can threaten our state's progress by proposing changes to North Carolina's net metering program. In order to grow and protect our state's admirable progress in solar energy, Duke customers in North Carolina should get the same deal that Duke customers in South Carolina are getting.

I urge you to support a strong solar net metering policy by taking the same leadership as South Carolina and protecting solar customers from solar-specific discriminatory fees.

Sincerely,

Michael Teal

N.C. Utilities Commission

Dear North Carolina Utilities Commission NCUC,

Last month, South Carolina came to an agreement on retail net metering for rooftop solar. In that agreement, Duke Energy promised not to impose solar-specific fees on their customers for at least the next six years.

As Duke customers, this is a pivotal moment in securing North Carolina's energy future. Our state has taken significant steps to establish a clean, renewable energy market, but policy uncertainty means fewer projects, fewer jobs, and less investment.

North Carolina deserves the same agreement Duke has provided in South Carolina. I urge you to strengthen our net metering program and ensure consumer choice for rooftop solar.

Sincerely,

samuel smith

Dear North Carolina Utilities Commission NCUC,

Please do this for the sake of my children and the future of the planet. Planet earth needs you on her side especially after the environmental disaster caused by the orreries pontine dumping of coal ash all over our beautiful state! Set you greed and money mongering aside and do the right thing! Last month, South Carolina came to an agreement on retail net metering for rooftop solar. In that agreement, Duke Energy promised not to impose solar-specific fees on their customers for at least the next six years.

As Duke customers, this is a pivotal moment in securing North Carolina's energy future. Our state has taken significant steps to establish a clean, renewable energy market, but policy uncertainty means fewer projects, fewer jobs, and less investment.

Subject: E-100 Sub 83: I Support A Strong Net Metering Policy

JAN 27 2015

Clerk's Office
N.C. Utilities Commission

Dear North Carolina Utilities Commission NCUC,

North Carolina is a leader in the solar energy industry. But utilities can threaten our progress by proposing changes to North Carolina's net metering program. In South Carolina, Duke Energy just agreed not to impose discriminatory charges on their rooftop solar customers for at least the next six years. Let's ensure that North Carolinians are given that same policy stability to ensure energy choice and clean energy development.

I urge you to support a strong solar net metering policy by taking the same leadership as South Carolina and protecting solar customers from discriminatory fees.

I do not believe that public utilities should have the power to penalize households with solar power capability. Such a "tax" would be a clear subsidy to the fossil fuel industry. That is not capitalism, it represents instead corporate socialism.

Sincerely,

Eric Lewis
