Good morning [REDACTED],

As it currently stands we don't anticipate calling for COG. With capacity margins as close as they are, any trend up in load forecast or generation unit derate will likely put us in a scenario where we would make the call to the Distribution Operator desk. We'll keep you posted as the situation continues to develop.

Thanks,

Good morning,

I know everyone is busy and excited preparing for this weekend (for more than one reason). With temperatures falling Friday into the low teens on Saturday throughout NC and high temperatures barely making it above freezing we want to check-in on the likelihood of any COG call. Our winter preparation tests have gone well and we are touching base with customer/member Cooperatives and our Distribution Operator desk prior to the weekend. Any information you can

share on outlook, likelihood, or cooperation would be helpful as we prepare. If you would like to have a call on this subject we are open to that as well.

Thanks,
