Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

John Amarante

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Nora Barnes

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

We recently installed a grid-connected solar PV system on our rooftop here in Asheville. We are very happy with our investment, but alarmed to read of Duke's lobbying effort to change net-metering in NC. The proposed changes would be a huge disincentive to other citizens contemplating an investment in solar energy production. We support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Subject: Docket E-100, Sub 83: Net Metering

I strongly encourage you to oppose changes to Net Metering.

I have invested in rooftop solar at my home in Chatham County. In April 2014, 30% of our family's electricity came from the PV panels. That's electricity that doesn't need to be generated by a large utility; decreasing the need for additional fossil fuel electrical capacity.

Rooftop solar produces sales tax revenue for North Carolina, and creates good jobs for the installers and support technicians - as well as decreasing pollutants in our environment.

Solar is a win-win for our state (and country.)

Thank You,
Bram Sorgman
