Docket No. E-2, Sub 1185.

Message

I am encouraged by the possibility of more battery storage and renewable energy to be incorporated into the electric grid in Western North Carolina. It makes a lot of sense as part of a path toward a lower carbon energy future. I believe Hot Springs will benefit from this combination of storage, micro grid and renewable generation.

I would like to see the Hot Springs North Carolina micro grid project happen. I am a member of the Duke Power Technology Subgroup in Asheville. We need these type of projects. They make the grid more stable and offer an alternative to the way we now transfer power.
