Utilities Commission,

This is to the Commission and those who appointed you: You (should be) meeting the needs of the majority - NOT feeding mega corporations. YOU (should be) holding Duke accountable. NOT upping energy rates and, by doing so, sanctioning their actions! Change is coming. The people know of corruption among our "leaders" of government and industry. I am disgusted with you and Duke! Better if we sponsored a class action suit for all the illness and death of your actions.
