Subject: approval of Duke fees

Dear Commissioners,

I am appalled that the NC Utilities Commission recently approved Duke Energy Progress fees for Manual Read Meter (MRM) option. As customers, WE PAY FOR ELECTRIC service already. We pay to be connected to the grid, to be metered, to be billed, for generation of electricity and maintenance.

I currently have a MRM. Now Duke Energy wants to charge me \$170 to keep it??? Then another \$14.75/ mo again???

Did you get a large kickback from Duke? Are you just mean? The NC Utilities Commission is supposed to work for the general populace and regulate Utilities because they are a monopoly. As a monopoly, they are efficient and can save by not duplicating equipment, services. The Utilities Commission is the safeguard against abuse of the monopoly's power.

I beg you to reconsider this gross misuse of power by Duke Energy Progress.

Sincerely, Frank Southecorvo
