Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

joseph csensick

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Meryl Pinque

Subject: Docket E-100, Sub 83: Net Metering

Dear Chief Clerk of the Commission,

My name is Reid Lerner and I am a concerned citizen who lives at 121 Mulligan Drive, Chapel Hill, NC 27517. I chose to invest over \$30,000 in 2013 in residential solar PV panels for my home.

I did this in order to help the environment and with the understanding of the current net metering rules and regulations in North Carolina.

I want to be clear that I do NOT support changes to the net metering rules or regulations that would adversely affect rooftop solar in North Carolina. I respectfully request that the committee opposes any changes to net metering in NC that would adversely affect rooftop solar.

If you have any questions, please call me at 919-200-1443.

Sincerely,

Reid Lerner

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Sara Gritsavage

Dear NC Utilities Commission,

I'm writing to you today OPPOSING net metering and solar energy.

Please do not burden North Carolina's business and individual ratepayers by supporting niche markets that are unable to be self-supporting.

Duke's request for less compensation to solar users is eminently sensible.

Thank you.

Sincerely,

John Droz
