I advocate for the following: Under NC WARN's Sharing Solar proposal: There would be no up-front cost for customers to add solar plus battery storage. It would be funded through the Rate System – just as we now all pay for dirty power. Local solar-with-storage can expand across NC quickly, inexpensively and equitably – with a priority on disadvantaged communities. All homes, businesses, nonprofits benefit in many ways – even if they don't have solar themselves. It avoids the year-after-year rate hikes in Duke Energy's high-risk plan to keep expanding fossil fuels and building experimental nuclear reactors. Experts agree that Local Solar is the best tool we have to address the climate crisis.

I urge the adoption of the NC Warn plan which is described as follows. Under NC WARN's Sharing Solar proposal: * There would be no up-front cost for customers to add solar plus battery storage. It would be funded through the Rate System – just as we now all pay for dirty power. *Local solar-with-storage can expand across NC quickly, inexpensively and equitably – with a priority on disadvantaged communities. *All homes, businesses, nonprofits benefit in many ways – even if they don't have solar themselves. *It avoids the year-after-year rate hikes in Duke Energy's high-risk plan to keep expanding fossil fuels and building experimental nuclear reactors. *Experts agree that Local Solar is the best tool we have to address the climate crisis.
