Subject: Docket E-100, Sub 180CS

I had solar panels installed this spring at my house, 208 Cumberland Ave, Asheville, NC 28801. They are working perfectly and I am very pleased with how they have lowered my utility bill. NC's current program is working well for homeowners like me and disadvantaging anyone else. My comment on the proposed program is, "If it ain't broke, don't fix it!"
