NCUC Docket No. E-100 Sub 90

September 6, 2023

Office of Chief Clerk of the NC Utilities Commission
4325 Mail Service Center
Raleigh, NC 27699-4325

Members of the North Carolina Utilities Commission:

My name is Jamie Applequist and I would like to be considered for the Corporate Client seat on the NC Green Power Board of Directors on which I have served since 2014. I currently serve the membership and employees of the State Employees' Credit Union as the Chief Delivery Officer.

In my twenty-four year career at SECU, I have worked for our branch network and facilities services department and have witnessed firsthand the need for efficient, clean energy services that can benefit the citizens of North Carolina. In fact, I would say that my time on the NC Green Power Board is partially responsible for our organization's recent commitment to stand up a sustainability department that will further emphasize our commitment to being good stewards of our environmental resources. I am especially proud to see the direct benefit of the Solar + Schools program across our state and the impact it has had on our children and communities.

My background also extends into the Air Force where I served for over twenty years in the Fuels career field. I participated in many innovative projects that improved fuel efficiencies and also recovered contaminated fuels to protect the environment both at home and abroad.

If selected, I will continue to give my all to the NC Green Power Board. Thank you for your consideration.

Sincerely,

Jamie Applequist
Chief Delivery Officer
