Clerk's Office
N.C. Utilities Commission

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid, and provides customer choice in a state with an otherwise monopolized energy market. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Rick McHenry

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

susan steiner

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Scott Gramig

Dear NC Utilities Commission,

Clerk's Office
N.C. Utilities Commission

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

Matt Burrough

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

Gayle Stone

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Aiden Carson

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Lauren Mazur

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

This winter, I had a one-month electric bill of over \$700: for a senior on a small fixed income, this has me seriously considering home wind or solar power--particularly since I live in coastal North Carolina, an area which has abundant wind and sun. The alternatives--freezing to death or amassing debts I'm unlikely to be able to pay in my lifetime--are not pretty.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Clerk's Office
N.C. Utilities Commission

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

It is vital that we move towards less polluting and more sustainable energy production in this country. Home and business generated solar power is a very viable and important way to move in that direction.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Deborah Kelly

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

Michael Pope

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

Susan Kish

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

If our local energy companies lack the vision to support and work toward clean energy, then we need to help them along. This is one small way we can do that and also do our part toward maintaining a healthy planet.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Sally Thomas

Duke Energy is already seriously out of control with their obvious monopoly. They are already exploiting the citizens of this state by raising their rates to cover their expenses from the massive coal ash spill. I refuse to continue being abused by this terrible company, and I especially oppose them making it more difficult for individuals and businesses to pursue cleaner energy options. We should be encouraging and simplifying clean energy, not countering it.

Thank you.
