Docket

solar energy steal!

Message

According to 'net metering' in NC, any excess I produce with my 7.68 Kwh system that I paid \$23,000.00 for, on my 'contract' date, is gifted to Duke Energy and the next month, if I export less than I import from Duke, I am charged!! I'm on a fixed income and was only able to purchase this system because I inherited the money from my Aunt. A \$100.00 here, a \$150.00 there, is not monetarily acceptable when I know I have 'gifted' Duke megawatts of electricity!! They will not change the 'contract' date to a more amenable date, say January 1st, where I use less electric. But I also understand that Florida and South Carolina get reimbursed for their excess. My question is...Why is NC Utilities Commission allowing this theft??
