STATE OF NORTH CAROLINA  
UTILITIES COMMISSION  
DOCKET NO. E-100, SUB 124

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

**FILED**

**JUN 17 2010**

In the Matter of  
Investigation of the Integrated Resource  
Plan in North Carolina for 2009

)  
)  
)

CORRECTION TO  
BRIEF OF NC WARN

**OFFICIAL COPY**

NOW COMES the North Carolina Waste Awareness and Reduction Network, Inc. ("NC WARN"), through the undersigned attorney, with a correction to the brief filed in this matter on June 10, 2010.

Paragraph 9 should read:

9. In its 2009 IRP, page 42, Duke Energy lists the 18 coal plants that it is planning on retiring by 2020. These plants have a capacity of 1504 MW, although they only generate approximately 3.5 million mWh annually.<sup>1</sup> In addition to the stated cancellations, Duke Energy has regulatory requirements pursuant to the certificate of public convenience and necessity issued by the Commission in Docket E-7, Sub 790, to retire Cliffside Units 1-4 and retire other units equivalent to Cliffside 6 on a MW for MW basis. Pursuant to conditions in the Carbon Mitigation Plan in the air quality permit for Cliffside 6, Duke Energy is required to retire an additional 800 MW of coal fired plants and further, to take additional actions to make Cliffside 6 carbon neutral by 2018. Although these requirements would only come into effect if Cliffside 6 goes into operation, they should be incorporated into the 2009 IRP.

---

<sup>1</sup> See Docket E-7, Sub 876 and similar monthly reports on power plant performance.

Respectfully submitted, this the 16<sup>th</sup> day of June 2010.

A handwritten signature in black ink, appearing to read "John D. Runkle", is written over a horizontal line.
