Subject: Water rate increase/ Bradfield farms

Dear committee,

I wish to express my concern over the large increase requested in water/ sewer rates for our neighborhood. While I understand that increases will happen from time to time, I find it unacceptable for any company to request such a large percentage of increase for any service. It is excessive, especially after they requested and received a rate increase in recent years. Please consider a more equitable and fair percentage or no increase at all.

Thank you,
Tracy Wade
Resident of Bradfield Farms since 1991

Docket No W-354 Sub 356
Application for rate increase
Carolina Water Service, Inc

I would like to speak at the hearing

I am writing due to my concern for this increase of over 60% for my water service. What warrants this large of an increase and what improvements are planned that require this increase. I live alone and this company bills me a fixed sewage rate of \$27 already, they want this to go to \$48! I use little water living alone and I would like a system like the city of Charlotte uses that links usage to sewage cost. I cannot afford to pay the same as a household with multiple members. As a single person household I already pay \$40 a month. This increase would make it closer to \$70 which is outrageous for a person using 2000 gallons a month. Thanks for your time and consideration.
