Feb 26, 2020

NC Public Utilities Commissioners

Dear NC Public Utilities Commissioners,

When it comes to the health and well-being of older North Carolinians, affordable electricity is vital. As the state prepares to meet future energy demands, it must also be ready to handle the needs of its rapidly aging population.

In just a few short years, more North Carolinians will be age 60 and over than those under the age of 18. For 36 percent of adults age 65 plus, Social Security is the only source of income in retirement and it averages less than \$1,300 a month.*

When it comes to balancing rent, health care and prescription drug costs, groceries, gasoline and other basic living needs, every penny and every dollar counts.

Please consider the needs of older North Carolinians and those on fixed-incomes when determining whether the company's plans for spending and earning are fair and reasonable.

I urge you to reject this rate increase request!

***AARP Public Policy Institute, Social Security State Fact Sheets 2014**

Feb 26, 2020

NC Public Utilities Commissioners

Dear NC Public Utilities Commissioners,

This is outrageous! Duke power needs to backoff, they continue to raise our rates while paying huge bonuses and incentives to their upper management.

THEY were charged with cleaning up the coal ash spill into the Cape Gear river and its tributaries. THEY continue to raise OUR electric rates to pay for this work. How convenient, that they have turned a blind eye to this problem which they created. Well it's not working for US any more. This greed must stop !

They have polluted the main water source for the Cape Fear region. They have the temerity to pass on this cost to us, the consumer. Great plan and oh so fiscally sound but they had their chance to remedy the situation years ago. They chose to sweep it under the rug, now it's time to pay up, out of their own pockets. They should NOT be allowed to pass the cost of their mistakes into the consumer.I

**Respectfully,
Maureen Harling

NC Public Utilities Commissioners

Dear NC Public Utilities Commissioners,

When it comes to the health and well-being of older North Carolinians, affordable electricity is vital. As the state prepares to meet future energy demands, it must also be ready to handle the needs of its rapidly aging population.

In just a few short years, more North Carolinians will be age 60 and over than those under the age of 18. For 36 percent of adults age 65 plus, Social Security is the only source of income in retirement and it averages less than \$1,300 a month.*

When it comes to balancing rent, health care and prescription drug costs, groceries, gasoline and other basic living needs, every penny and every dollar counts.

Please consider the needs of older North Carolinians and those on fixed-incomes when determining whether the company's plans for spending and earning are fair and reasonable.

I urge you to reject this rate increase request!
