Clerk's Office  
N.C. Utilities Commission

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice. Why should I invest in solar generation for my property if Duke Energy and other utilities are allowed to steal what I generate?

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Barry Lentz

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Joseph Carrier

Dear NC Utilities Commission,

We built a solar energy house in 1987 and have saved approximately 65% on our energy bills since then. Current and addition incentives to encourage the use of solar energy are required.

We support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. We citizens have seen the benefits for the state of net metering as it helps support North Carolina's booming solar industry - an industry that has created thousands of jobs and boosts our state's economy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid.

It is critical that the NC Utility Commission supports a transition away from dirty fossil fuels that pollute the air and water, threaten the public health, and contribute to climate change. Duke Energy's business model is clearly based on ignoring the public good and pursuing profits no matter what the cost to NC citizens. This is not acceptable, and it is the job of the Utility Commission to stand against this monopoly's dysfunctional practices whenever they are counter to the public good.

Please be vigilant in protecting North Carolina's net metering standards.

Thank you.

Sincerely,

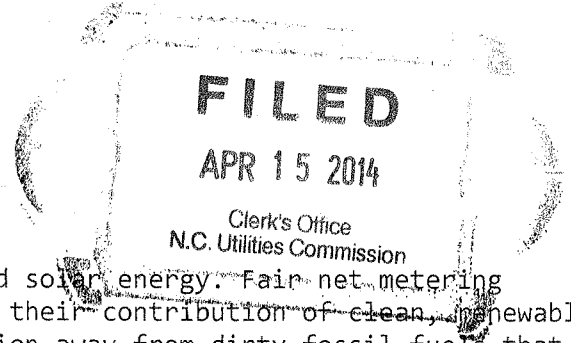

Kathleen Hoffmann

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Stephen Dufrene

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

N.C. Utilities Commission

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Linda Griffin

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Judith Mathis

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

**FILED**

APR 15 2014

Clerk's Office  
N.C. Utilities Commission

Chief Clerk of the Commission,

My wife and I are residents of Buncombe County in Asheville, NC. We are both retired and recently invested in rooftop solar on our home in Asheville. Our system was designed and installed by a local company in the Asheville area and we purchased all US made modules and racking. We carefully reviewed our production projections and costs to build our system prior to making the decision to invest in the system. The ability to net meter was an important part of our decision to invest in our 5.25 KW grid-tied system. Our system does not offset all our electrical costs and we will continue to support maintenance of the Duke Energy electrical grid through payment of needed additional energy and through the basic customer charge we pay each month. We do not support any changes to net metering that would reduce the incentive for rooftop solar use in North Carolina.

Sincerely,  
Myrri and Linda McBride

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Vera Rivera

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Cassandra Mote

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

Jayne Boyer

N.C. Utilities Commission

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Amy Hux

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Clerk's Office  
N.C. Utilities Commission

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Donya Smith

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

Meg MacLeod

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Darlene Gardner

Dear NC Utilities Commission,

First Duke purposely pollutes our waterways with coal ash and now they want to quell free enterprise by attacking clean energy such as solar.

So I do strongly support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice. I urge you to oppose Duke energy on this matter.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Thom Feeney

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

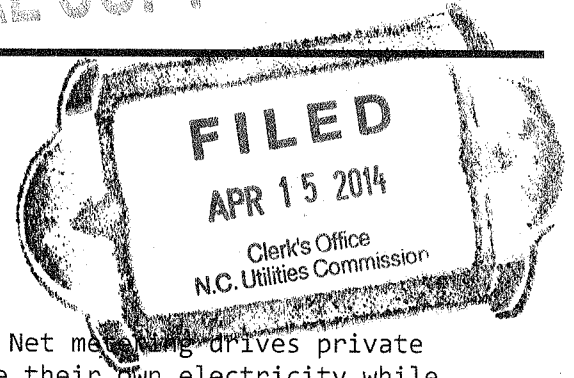

Bob Grier

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Hattie Hair

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

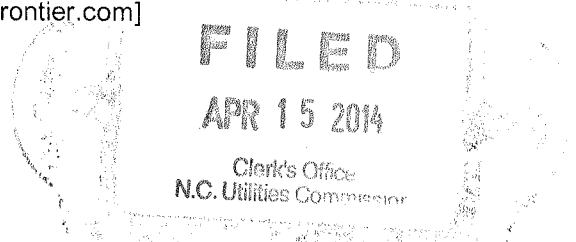

Timothy Marshall

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

Duke energy is a large company that has monopolized the power industry forcing North Carolina residences to to pay for their services at steadily increasing rates. These residents are being strong armed during a time of national economic hardships.

Duke Energy is also responsible for the coal ash incident and the cost for cleaning it up. The people of NC fear that Duke Energy will raise their rates (yet again) to cover the cost of the coal ash clean up.

Other than Duke Energy, NC residents have no other source for home energy.

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Clerk's Office  
N.C. Utilities Commission

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Russell Brian Fregien

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

Julie Overman

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Brenda Denton

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

Alan Howell

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Cynthia Sealy

N.C. Utilities Commission

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Daphne Clinton

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

I live in a small rural county in eastern NC and we have recently had a boom in new solar farms and individuals are quickly also getting on board. Solar is much better for our economy, our environment and our future. Please don't let Duke Power force small companies and individuals to give up their right to this free power supply because they fear not being the biggest fish in the local pond. They have done enough damage to North Carolina please respect the individual voices of the citizens of North Carolina and not just the big businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

jan best

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

David Fregeau

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

Lucas McMahon

Dear NC Utilities Commission,

Clerk's Office  
N.C. Utilities Commission

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Jenny Barrier

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Clerk's Office  
NC Utilities Commission

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

wwalt Farnsworth

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Ronald Godfrey

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

V E Christie

NC Utilities Commission

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Brad Marshall

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Joan Posey-Neumann

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.
