- i am writing to note that i am sick of the lying and the greed at duke energy. now they are trying to pad investors' pockets with a pre-approval of grid projects that are either unneeded or could be better handled with solar-plus-storage investments. duke has been quietly building new gas-burning capacity at existing coal-fired power plants in a way that maximizes both greenhouse gas emissions and the cost of the electricity!!!! very trumpish.

- we know 2 things:

1] -> fossil fuels are a LIMITED RESOURCE.

2] -> it is GREED and TOTAL LACK OF RESPECT FOR OUR PLANET that is driving the TOTAL BLOCKING OF A SWITCH TO ALTERNATIVE ENERGY. the resources and lesser cost of wind and solar are clear. what insanity, [other than greed and climate denial] is stopping duke and other fossil fuel businesses from reversing the ratio of @3% investment in alternative energy to 97%? we have a lot of us who just refuse to do their homework and deny the facts once they have discovered them.

- VERY SAD.
