**Re: SCH File # 15-E-4600-0472; Application of Bladen Solar, LLC for Certificate to construct a
50 MW Solar Photovoltaic Electric Generating Facility in Bladen Co.
Docket #SP-5220 Sub 0.**

Dear Ms. Mount:

The above referenced environmental impact information has been reviewed through the State Clearinghouse under the provisions of the North Carolina Environmental Policy Act.

Attached to this letter are comments made in the review of this document. Because of the nature of the comments, it has been determined that no further State Clearinghouse review action on your part is needed for compliance with the North Carolina Environmental Policy Act. The attached comments should be taken into consideration in project development.

Sincerely,

A handwritten signature in cursive script that reads "Crystal Best".

Crystal Best

MEMORANDUM

To: Crystal Best
State Clearinghouse

From: Lyn Hardison 
Division of Environmental Assistance and Customer Service
Environmental Assistance and Project Review Coordinator

RE: 15-0472
Environmental Review –Application of Bladen Solar, LLC for the Certificate to construct a
50 MW Solar Photovoltaic Electric Generating Facility
Bladen County

Date: April 7, 2015

The Department of Environment and Natural Resources has reviewed the proposal for the referenced project. Based on the information provided, several of our agencies have identified permits that may be required and offered some valuable guidance to minimize impacts to the natural resources, aquatic and terrestrial wildlife resources within and around the project area. If rare species are found within and around the project area, please contact the staff at the NC Natural Heritage Program, NC Wildlife Resources Commission and the US Fish and Wildlife Services. The comments are attached for the applicant review.

If the applicant has any questions pertaining to NCDENR permitting processes, please suggest to the applicant to contact David Lee, Permit Assistance Coordinator, in the Department's Raleigh Regional Office, (919)791-4200 for more permitting assistance. The proposed project is located within his geographic working territory.

Thank you for the opportunity to respond.

MEMORANDUM

TO: Lyn Hardison, Environmental Assistance and SEPA Coordinator
NCDENR Division of Environmental Assistance and Customer Services

FROM: Gabriela Garrison
Eastern Piedmont Coordinator
Habitat Conservation *Gabriela Garrison*

DATE: April 6, 2015

SUBJECT: Comments on Bladen Solar, LLC Solar Facility in Bladen County; Project Number 15-0472.

Biologists with the North Carolina Wildlife Resources Commission (NCWRC) have reviewed the proposed project description. Comments are provided in accordance with certain provisions of the North Carolina Environmental Policy Act (G.S. 113A-1 through 113A-10; 1 NCAC 25) and the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.).

Bladen Solar, LLC proposes to construct a 50 MW solar photovoltaic electric generating facility in Bladen County. The facility would be located on the west side of Braxton Edge Road, west of its intersection with Old Fayetteville Road and east of Walter West Road, southeast of Fayetteville.

An aerial view of the proposed location suggests the project is sited on both forested and cleared land. The western portion of the property is within the Horseshoe Lake and Marshy Bay Natural Heritage Natural Area. Clearing trees from this site and installing solar panels will significantly diminish this sensitive habitat and displace a diverse array of wildlife species. Installing solar panels on previously cleared and disturbed land will have less impact and is therefore the preferred option. Solar projects should be sited to avoid impacts to wetlands, streams, riparian buffers and priority wildlife habitat.

Aerial images and maps indicate Turnbull Creek bisects the property. There are records for the state-special concern (SSC) dwarf salamander (*Eurycea quadridigitata*) on the project site. The NCWRC-owned Suggs Mill Pond Game Lands (SMGL) are located both east and west of the project site. In the western section of the SMGL, there are records for the following species: the state-significantly rare (SSR), chicken turtle (*Deirochelys reticularia*), ornate chorus frog (*Pseudacris ornata*), pine barrens treefrog (*Hyla andersonii*) and coachwhip (*Masticophis flagellum*); the state-threatened and federally threatened (due to similarity of appearance) American alligator (*Alligator mississippiensis*); and the SSC dwarf salamander. In the eastern section of the SMGL, there are records for the following species: the

April 6, 2015
Bladen Solar, LLC
DENR Project No. 15-0472

SSR coachwhip, the SSC dwarf salamander, and a great blue heron (*Ardea herodias*) rookery. Due to the presence of these rare and sensitive species, it is important to minimize disturbance, protect water quality and enhance habitat. The following recommendations will minimize impacts to aquatic and terrestrial wildlife resources:

1. The project footprint should be surveyed for wetlands and streams to ensure there are no impacts to surface waters. In addition to providing wildlife habitat, wetland areas and streams aid in flood control and water quality protection. United States Army Corps of Engineers Section 404 Permits and NC Division of Water Resources Section 401 Certifications are required for any impacts to jurisdictional streams or wetlands.
2. Maintain or establish a minimum 100-foot undisturbed, native forested buffer along each side of perennial streams and 50-foot undisturbed, native forested buffer along each side of intermittent streams and wetlands. Forested riparian buffers provide habitat areas and travel corridors for wildlife species. In addition, forested riparian buffers protect water quality by stabilizing stream banks and filtering stormwater runoff.
3. The solar facility will connect to existing utility lines; impacts to wildlife habitat will be minimized by connecting along pathways that do not contain quality wildlife habitat, such as cleared or agricultural land. If additional overhead transmission lines will be installed, measures to minimize impacts to birds should be implemented. These can include increasing line visibility, insulating wires to cover exposed connections and increasing the distance between wires so no contact with ground or other energized wire can be made. For more information see <http://www.fws.gov/birds/documents/powerlines.pdf>.
4. Consider establishing vegetative cover on the site that is beneficial to wildlife. Please contact Tom Padgett, District Wildlife Biologist, at (910) 645-4115 or thomas.padgett@ncwildlife.org for information on developing a site-specific vegetation plan.
5. If pesticides or chemicals will be used for site maintenance, stormwater runoff from the site should be funneled to bio-retention areas prior to discharge to streams or wetlands. Pesticides, fertilizers and other chemicals should not be used in wetland areas or near streams.
6. Sediment and erosion control measures should be installed prior to any land clearing or construction. The use of biodegradable and wildlife-friendly sediment and erosion control devices is strongly recommended. Silt fencing, fiber rolls and/or other products should have loose-weave netting that is made of natural fiber materials with movable joints between the vertical and horizontal twines. Silt fencing that has been reinforced with plastic or metal mesh should be avoided as it impedes the movement of terrestrial wildlife species. Excessive silt and sediment loads can have detrimental effects on aquatic resources including destruction of spawning habitat, suffocation of eggs and clogging of gills.

Thank you for the opportunity to review and comment on this project. If I can be of further assistance, please contact me at (910) 409-7350 or gabriela.garrison@ncwildlife.org.

March 31, 2015

TO: Lyn Hardison, NCDENR State Clearinghouse Coordinator

FROM: Allison (Schwarz) Weakley, North Carolina Natural Heritage Program *Allison Weakley*

CC: Gabriela Garrison, North Carolina Wildlife Resources Commission

SUBJECT: Environmental Review – Application of Bladen Solar, LLC, for Certificate to Construct a 50 MW Solar Photovoltaic Electric Generating Facility west of Braxton Edge Road, west of Old Fayetteville Road, and east of Walter West Road, Fayetteville, Bladen County, North Carolina

REFERENCE: Project No. 15-0472

Thank you for the opportunity to provide information from the North Carolina Natural Heritage Program (NCNHP) database for the proposed project referenced above. The NCNHP database shows that the proposed project is within the Horseshoe Lake (Suggs Mill Pond) and Marshy Bay natural area, and includes a record for a high-quality Cypress-Gum Swamp (Blackwater Subtype) natural community within the northern and eastern portions of the proposed project area along Turnbull Creek. The Horseshoe Lake (Suggs Mill Pond) and Marshy Bay natural area includes a large expanse of rolling sandhills with several large and small Carolina bays, and represents an outstanding cluster of rare plants, rare animals, and important natural communities associated with peat-filled Carolina bays and sandy longleaf pine communities.

There is also a record for Pine Barrens Treefrog within the northern portion of the project area along Turnbull Creek, and a record for Venus Flytrap along the western portion of the project. Further, the proposed project area is adjacent to the Suggs Mill Pond Game Land, owned and managed by the North Carolina Wildlife Resources Commission as a Dedicated Nature Preserve, on both the eastern and western boundaries of the proposed project area.

Within one mile of the proposed project area, the NCNHP database shows element occurrence records for the following rare species:

SCIENTIFIC NAME	COMMON NAME	ELEMENT OCCURRENCE STATUS	ACCURACY	STATE STATUS	FEDERAL STATUS
<i>Alligator mississippiensis</i>	American Alligator	Current	Medium	T	T(S/A)
<i>Colaptes auratus</i>	Scarlet Tanager	Current	Low	SR	---
<i>Deirochelys reticularia</i>	Chicken Turtle	Current	Medium	SR	---
<i>Dionaea muscipula</i>	Venus Flytrap	Historical	Medium	SC-V	FSC
<i>Drosera filiformis</i>	Threadleaf Sundew	Current	High	SC-V	---

1601 Mail Service Center, Raleigh, North Carolina 27699-1601

<i>Eurycea quadridigitata</i>	Dwarf Salamander	Current	Very Low	SC	---
<i>Hyla andersonii</i>	Pine Barrens Treefrog	Current (2 records)	High	SR	---
			Medium		
<i>Masticophis flagellum</i>	Coachwhip	Current (2 records)	Low (2 records)	SR	---
<i>Picoides borealis</i>	Red-cockaded Woodpecker	Historical	Medium	E	E
<i>Pseudacris ornata</i>	Ornate Chorus Frog	Current	Low	SR	---
<i>Rhexia aristosa</i>	Awed Meadow-beauty	Historical	Low	SC-V	FSC
<i>Rhynchospora alba</i>	Northern White Beaksedge	Current	Medium	SR-P	---
<i>Sagittaria isoetiformis</i>	Quillwort Arrowhead	Current	Very High	T	---
<i>Samatichlora georgiana</i>	Coppery Emerald	Historical	Very Low	SR	---
<i>Stylurus ivae</i>	Shining Clutail	Historical	Very Low	SR	---

*For status and accuracy definitions, please see the Rare Species Status Definitions and Element Occurrences documents at <https://ncnhp.natureserve.org/content/help>.

The occurrences of American Alligator, Hessel's Hairstreak, Chicken Turtle, Red-cockaded Woodpecker, Ornate Chorus Frog, Awed Meadow Beauty, Northern White Beaksedge, and Quillwort Arrowhead are all located in and around Suggs Mill Pond (Horseshoe Lake), immediately west of the project area.

As noted above, the occurrence of Venus Flytrap is located along the western portion of the proposed project area, and the occurrence of Threadleaf Sundew is just southwest of the project area in a savanna on the eastern side of Suggs Mill Pond.

The occurrence of Banded Sunfish is located in Turnbull Creek, ca. 0.6 miles north of the project area. An occurrence of a Colonial Wading Bird Colony is also documented at Turnbull Creek, southeast of the project area.

There are two occurrences of Pine Barrens Treefrog within one mile of the project area; as noted above, one occurrence is located within the northern portion of the project area along Turnbull Creek, and the other is located at Suggs Mill Pond just west of the project area. There are also two occurrences of Coachwhip within one mile; one is documented at Suggs Mill Pond, and the other is just southeast of the project area in the vicinity of Ammon.

The occurrence records for Southern Wild-buckwheat, Dwarf Salamander, Coppery Emerald, and Shining Clutail all have very low accuracy due to the lack of site-specific locational information associated with these records, but these species have been documented in Bladen County.

The NCNHP database also shows records for the following high-quality natural communities within one mile of the project area, all located within the Horseshoe Lake (Suggs Mill Pond) and Marshy Bay natural

area: Coastal Plain Semi-permanent Impoundment (Cypress-Gum and Open Water Subtypes), Cypress-Gum Swamp (Blackwater Subtype), Floating Bog, and Pond Pine Woodland (Typic Subtype). As noted above, a portion of the high-quality Cypress-Gum Swamp natural community occurs within the northern and eastern portions of the project area along Turnbull Creek.

In addition, the NCNHP database shows that the Bladen Lake State Forest is located ca. 0.9 miles northeast of the project area.

The locations of natural areas and conservation/managed areas near the project area may be viewed by accessing the Natural Heritage Data Explorer online map viewer, or by downloading and using Geographic Information System (GIS) data; both options are available from the NCNHP Data Services webpage (see www.ncnhp.org).

Please note that although the NCNHP database may not show records for rare species within the proposed project area, it does not necessarily mean that they are not present; it may simply mean that the area has not been surveyed. Occurrences of rare species documented within one mile of the proposed project area increase the likelihood that these species may be present within the project area if suitable habitat exists. The use of Natural Heritage Program data should not be substituted for actual field surveys if needed, particularly if the project area contains suitable habitat for rare species. If rare species are found during field surveys, the NCNHP would appreciate receiving this information so that we may update our database.

Due to the occurrence of a Federal listed species within one mile of the proposed project area, the applicant may want to contact the U.S. Fish and Wildlife Service – Raleigh office directly. Also, because the proposed project area is adjacent to the Suggs Mill Game Land and a Dedicated Nature Preserve on both the eastern and western portions of the project, the applicant may want to contact the North Carolina Wildlife Resources Commission directly.

Please feel free to contact me at Allison.Weakley@ncdenr.gov or 919-707-8629 if you have questions or need additional information.

INTERGOVERNMENTAL REVIEW - PROJECT COMMENTS

Reviewing Office: PRO

Project Number 15-0472 Due Date: 4/1/2015
County BLADEN

After review of this project it has been determined that the ENR permit(s) and/or approvals indicated may need to be obtained in order for this project to comply with North Carolina Law. Questions regarding these permits should be addressed to the Regional Office indicated on the reverse of the form. All applications, information and guidelines relative to these plans and permits are available from the same Regional Office.

	PERMITS	SPECIAL APPLICATION PROCEDURES or REQUIREMENTS	Normal Process Time (statutory time limit)
<input type="checkbox"/>	Permit to construct & operate wastewater treatment facilities, sewer system extensions & sewer systems not discharging into state surface waters.	Application 90 days before begin construction or award of construction contracts. On-site inspection. Post-application technical conference usual.	30 days (90 days)
<input type="checkbox"/>	NPDES - permit to discharge into surface water and/or permit to operate and construct wastewater facilities discharging into state surface waters.	Application 180 days before begin activity. On-site inspection. Pre-application conference usual. Additionally, obtain permit to construct wastewater treatment facility-granted after NPDES. Reply time, 30 days after receipt of plans or issue of NPDES permit-whichever is later.	90-120 days (N/A)
<input type="checkbox"/>	Water Use Permit	Pre-application technical conference usually necessary	30 days (N/A)
<input type="checkbox"/>	Well Construction Permit	Complete application must be received and permit issued prior to the installation of a well.	7 days (15 days)
<input type="checkbox"/>	Dredge and Fill Permit	Application copy must be served on each adjacent riparian property owner. On-site inspection. Pre-application conference usual. Filling may require Easement to Fill from N.C. Department of Administration and Federal Dredge and Fill Permit.	55 days (90 days)
<input type="checkbox"/>	Permit to construct & operate Air Pollution Abatement facilities and/or Emission Sources as per 15 A NCAC (2Q.0100 thru 2Q.0300)	Application must be submitted and permit received prior to construction and operation of the source. If a permit is required in an area without local zoning, then there are additional requirements and timelines (2Q.0113).	90 days
<input type="checkbox"/>	Permit to construct & operate Transportation Facility as per 15A NCAC (2D.0800, 2Q.0601)	Application must be submitted at least 90 days prior to construction or modification of the source.	90 days
<input type="checkbox"/>	Any open burning associated with subject proposal must be in compliance with 15 A NCAC 2D.1900	N/A	60 days (90 days)
<input type="checkbox"/>	Demolition or renovations of structures containing asbestos material must be in compliance with 15 A NCAC 20.1110 (a) (1) which requires notification and removal prior to demolition. Contact Asbestos Control Group 919-707-5950.		
<input type="checkbox"/>	Complex Source Permit required under 15 A NCAC 2D.0800		
<input checked="" type="checkbox"/>	The Sedimentation Pollution Control Act of 1973 must be properly addressed for any land disturbing activity. An erosion & sedimentation control plan will be required if one or more acres to be disturbed. Plan filed with proper Regional Office (Land Quality Section) At least 30 days before beginning activity. A fee of \$65 for the first acre or any part of an acre. An express review option is available with additional fees.		20 days (30 days)
<input type="checkbox"/>	Sedimentation and erosion control must be addressed in accordance with NCDOT's approved program. Particular attention should be given to design and installation of appropriate perimeter sediment trapping devices as well as stable stormwater conveyances and outlets.		(30 days)
<input type="checkbox"/>	Mining Permit	On-site inspection usual. Surety bond filed with ENR Bond amount varies with type mine and number of acres of affected land. Any acre mined greater than one acre must be permitted. The appropriate bond must be received before the permit can be issued.	30 days (60 days)
<input type="checkbox"/>	North Carolina Burning permit	On-site inspection by N.C. Division Forest Resources if permit exceeds 4 days	1 day (N/A)
<input type="checkbox"/>	Special Ground Clearance Burning Permit - 22 counties in coastal N.C. with organic soils	On-site inspection by N.C. Division Forest Resources required "if more than five acres of ground clearing activities are involved. Inspections should be requested at least ten days before actual burn is planned."	1 day (N/A)
<input type="checkbox"/>	Oil Refining Facilities	N/A	90-120 days (N/A)
<input type="checkbox"/>	Dam Safety Permit	If permit required, application 60 days before begin construction. Applicant must hire N.C. qualified engineer to: prepare plans, inspect construction, certify construction is according to ENR approved plans. May also require permit under mosquito control program. And a 404 permit from Corps of Engineers. An inspection of site is necessary to verify Hazard Classification. A minimum fee of \$200.00 must accompany the application. An additional processing fee based on a percentage of the total project cost will be required upon completion.	30 days (60 days)
