E-100 Sub 190

Message

Please STOP helping Duke. People need to have more financial incentives for rooftop solar. We only have one earth and one atmosphere. STOP helping Duke to ruin it. Thank you!

Docket

E-100 Sub 190

Message

Climate change is real and more needs to be done, not less. More financial incentives for residents seeking to have installed and use rooftop solar is needed, not less. Shame on those utility regulators who bypassed the mandatory independent cost-benefit analysis required for any major rule changes to North Carolina's energy policy. Please STOP helping Duke. Thank you.

Docket

E-100 Sub 190

Message

Dear NCUC, As you close public comment for Duke Energy's consolidated docket E-100 Sub 190, we urge you to put communities and the climate first. Communities living in the shadow of dirty power plants have already paid dearly for our reliance on energy sources that are not clean – suffering serious harms to their health, air, and water. To ensure a just transition, a carbon plan must acknowledge the role these facilities continue to play in communities across North Carolina and ensure their voices are heard in visioning a clean energy future. Building new gas infrastructure and increasing our reliance on fracked gas to generate electricity risks climate catastrophe due to fugitive methane, threatens to saddle ratepayers with billions in stranded costs, puts us at the mercy of gas price volatility, and requires destructive pipelines that may never be permitted. We urge Commissioners to agree to a final carbon plan that is in the public interest. Please put equity, clean energy, and a swift transition away from fossil fuels at the center of the North Carolina carbon plan.

E-100 Sub 190

Message

Dear NCUC, Hi. I'm your pro-clean air, voting, taxpaying North Carolina citizen! As you close public comment for Duke Energy's consolidated docket E-100 Sub 190, we urge you to put communities and the climate first. Communities living in the shadow of dirty power plants have already paid dearly for our reliance on energy sources that are not clean – suffering serious harms to their health, air, and water. To ensure a just transition, a carbon plan must acknowledge the role these facilities continue to play in communities across North Carolina and ensure their voices are heard in visioning a clean energy future. Building new gas infrastructure and increasing our reliance on fracked gas to generate electricity risks climate catastrophe due to fugitive methane, threatens to saddle ratepayers with billions in stranded costs, puts us at the mercy of gas price volatility, and requires destructive pipelines that may never be permitted. We strongly urge Commissioners to agree to a final carbon plan that is in the public interest. Please put equity, clean energy, and a swift transition away from fossil fuels at the center of the North Carolina carbon plan. Thank you.
