Re: SCH File # 22-E-0000-0182 Application of Duke Energy Progress, LLC for a Certificate to construct an approximately 1.3 Miles of New 230 kV Transmission Line in Chatham County. Docket #E-2 Sub 1288.

Dear Kimberley Campbell:

The above referenced environmental impact information has been reviewed through the State Clearinghouse under the provisions of the North Carolina Environmental Policy Act.

Attached to this letter are comments made in the review of this document. Because of the nature of the comments, it has been determined that no further State Clearinghouse review action on your part is needed for compliance with the North Carolina Environmental Policy Act. The attached comments should be taken into consideration in project development.

Sincerely,

CRYSTAL BEST State Environmental Review Clearinghouse

Date: April 11, 2022

The Department of Environment Quality has reviewed the proposal for the referenced project. Based on the information provided, several of our agencies have identified permits that may be required and offered some valuable guidance to help minimize impacts to aquatic, terrestrial wildlife, and natural resources The comments are attached for the applicant's review.

The Department will continue to be available to assist the applicant with any question or concerns.

Thank you for the opportunity to respond.

### 🕞 NORTH CAROLINA WILDLIFE RESOURCES COMMISSION 😂

Cameron Ingram, Executive Director

#### MEMORANDUM

TO:	Lyn Hardison, Environmental Assistance Coordinator NCDEQ Division of Environmental Assistance and Customer Services		
FROM:	Gabriela Garrison Eastern Piedmont Coordinator Habitat Conservation		
DATE:	April 5, 2022		
SUBJECT:	Request for Environmental Scoping for New 230 kV Transmission Line, Chatham County, DEO Project No. 22-0182.		

Biologists with the North Carolina Wildlife Resources Commission (NCWRC) have reviewed the subject document. Comments are provided in accordance with provisions of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661-667e), North Carolina Environmental Policy Act (G.S. 113A-1 through 113A-10; 1 NCAC 25) and North Carolina General Statutes (G.S. 113-131 et seq.).

Duke Energy Progress proposes to construct a new, 1.3-mile transmission line in Chatham County; it will run from the existing Harris Plant – Siler City 230 kV Transmission Line to the proposed Pittsboro Hanks Chapel Substation. From the southern endpoint, most of the line is proposed to extend north, paralleling the existing Bynum Tap 230 kV transmission line. At the northern end, approximately 0.25 mile of line will deviate northeast to meet the planned substation site.

Aerial images and maps indicate the proposed corridor will cross Robeson Creek and associated tributaries. The NCWRC offers the following recommendations to minimize impacts to aquatic and terrestrial wildlife resources:

- 1. The project footprint should be surveyed for wetlands and streams to ensure there are no impacts to surface waters. In addition to providing wildlife habitat, wetland areas and streams aid in flood control and water quality protection. United States Army Corps of Engineers Section 404 Permits and NC Division of Water Resources Section 401 Certifications are required for any impacts to jurisdictional streams or wetlands.
- 2. Maintain or establish a minimum 100-foot undisturbed, native forested buffer along each side of perennial streams and 50-foot undisturbed, native forested buffer along each side of intermittent streams and wetlands. Forested riparian buffers protect habitat areas and travel corridors for wildlife species. In addition, forested riparian buffers protect water quality by stabilizing stream banks and filtering stormwater runoff.
- 3. Consider using native shrubs, grasses and wildflower seed mixes that are beneficial to wildlife for stabilization and revegetation. The NCWRC strongly recommends against the use of fescue-based

Page 2

April 5, 2022 New 230 kV Transmission Line – Chatham Co DEQ Project No.: 22-0182

mixtures and Sericea lespedeza (*Lespedeza cuneata*) as stabilizing groundcovers. Sericea lespedeza in particular is an egregious and invasive, non-native species that is very hard to eradicate. Additionally, exercise caution if the proposed corridor will be allowed to revegetate naturally as these areas can become overrun with non-native, invasive plants. Free technical assistance from NCWRC biologists is available for ideas on establishing vegetation or incorporating other measures that are beneficial for wildlife.

- 4. Minimize corridor maintenance and prohibit mowing between April 1 and October 1 to minimize impacts to nesting wildlife. We suggest a maintenance schedule that incorporates only a portion of the area one third of the area, for example each year instead of the entire project every 3 or 4 years.
- 5. Insecticides and herbicides should not be used within 100 feet of perennial streams and 50 feet of intermittent streams, or within floodplains and wetlands associated with these streams.
- 6. Stringent sediment and erosion control measures should be installed prior to any land-disturbing activity. The use of biodegradable and wildlife-friendly sediment and erosion control devices is strongly recommended. Silt fencing, fiber rolls and/or other products should have loose-weave netting that is made of natural fiber materials with movable joints between the vertical and horizontal twines. Silt fencing and similar materials that have been reinforced with plastic or metal mesh should be avoided as they impede the movement of terrestrial wildlife species. Excessive silt and sediment loads can have detrimental effects on aquatic resources including destruction of spawning habitat, suffocation of eggs and clogging of gills.

The NCWRC encourages the applicant to consider additional measures to protect aquatic and terrestrial wildlife species in developing landscapes. The NCWRC's *Guidance Memorandum to Address and Mitigate Secondary and Cumulative Impacts to Aquatic and Terrestrial Wildlife Resources and Water Quality* (August 2002; <u>http://www.ncwildlife.org/Portals/0/Conserving/documents/2002\_</u> <u>GuidanceMemorandumforSecondaryandCumulativeImpacts.pdf</u>) details measures to minimize secondary and cumulative impacts to aquatic and terrestrial wildlife resources; in addition, the NCWRC's Green Growth Toolbox (<u>https://www.ncwildlife.org/conserving/programs/Green-Growth-Toolbox</u>) provides information on nature-friendly planning.

Thank you for the opportunity to review and comment on this project. If I can be of further assistance, please contact me at (910) 409-7350 or <u>gabriela.garrison@ncwildlife.org</u>.

ROY COOPER Governor ELIZABETH S. BISER Secretary MICHAEL SCOTT Director

DATE:	March 15, 2022
TO:	Michael Scott, Division Director through Sharon Brinkley
FROM:	Deb Aja, Western District Supervisor - Solid Waste Section, Field Operations Branch
RE:	SEPA Project #22-0182, Chatham County, N.C. Pittsboro Hanks Chapel 230 kV Transmission Line Project

The Solid Waste Section has reviewed the Environmental Assessment/Finding of No Significant Impact - Application of Duke Energy Progress, LLC for a Certificate to construct approximately 1.3 miles of new 230 kV Transmission Line located approximately 2 miles east of Pittsboro, Chatham County, North Carolina. The review has been completed and has found no adverse impact on the surrounding community and likewise knows of no situations in the community, which would affect this project from a solid waste perspective.

During the project, every feasible effort should be made to minimize the generation of waste, to recycle materials for which viable markets exist, and to use recycled products and materials in the development of this project where suitable. Any waste generated by this project that cannot be beneficially reused or recycled must be disposed of at a solid waste management facility approved to manage the respective waste type. The Section strongly recommends that any contractors are required to provide proof of proper disposal for all waste generated as part of the project. A list of permitted solid waste management facilities is available on the Solid Waste Section portal site at: <a href="http://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/solid-waste-management-annual-reports/solid-waste-permitted-facility-list">http://deq.nc.gov/about/divisions/waste-management-rules-data/solid-waste-management-annual-reports/solid-waste-permitted-facility-list</a>

Please contact Chuck Kirchner, Environmental Senior Specialist, with any questions regarding solid waste management. Mr. Kirchner may be reached at (336) 776-9633 or by email at <u>chuck.kirchner@ncdenr.gov</u>.

Cc: Jason Watkins, Field Operations Branch Head Chuck Kirchner, Environmental Senior Specialist

North Carolina Department of Environmental Quality | Division of Waste Management Asheville Regional Office | 2090 U.S. Highway 70 | Swannanoa, North Carolina 28778 828.296.4500

Reviewing Regional Office: <u>Raleigh</u> Project Number: <u>22-0182</u> Due Date: <u>4/5/2022</u> County: <u>Chatham</u>

After review of this project it has been determined that the DEQ permit(s) and/or approvals indicated may need to be obtained in order for this project to comply with North Carolina Law. Questions regarding these permits should be addressed to the Regional Office indicated on the reverse of the form. All applications, information and guidelines relative to these plans and permits are available from the same Regional Office.

	PERMITS	SPECIAL APPLICATION PROCEDURES or REQUIREMENTS	Normal Process Time (statutory time limit)	
	Permit to construct & operate wastewater treatment facilities, non-standard sewer system extensions & sewer systems that do not discharge into state surface waters.	Application 90 days before begins construction or award of construction contracts. On-site inspection may be required. Post-application technical conference usual.	30 days (90 days)	
	Permit to construct & operate, sewer extensions involving gravity sewers, pump stations and force mains discharging into a sewer collection system	Fast-Track Permitting program consists of the submittal of an application and an engineer's certification that the project meets all applicable State rules and Division Minimum Design Criteria.	30 days (N/A)	
	NPDES - permit to discharge into surface water and/or permit to operate and construct wastewater facilities discharging into state surface waters.	Application 180 days before begins activity. On-site inspection. Pre- application conference usual. Additionally, obtain permit to construct wastewater treatment facility-granted after NPDES. Reply time, 30 days after receipt of plans or issue of NPDES permit-whichever is later.	90-120 days (N/A)	
	Water Use Permit	Pre-application technical conference usually necessary.	30 days (N/A)	
	Well Construction Permit	Complete application must be received and permit issued prior to the installation of a groundwater monitoring well located on property not owned by the applicant, and for a large capacity (>100,000 gallons per day) water supply well.	7 days (15 days)	
	Dredge and Fill Permit	Application copy must be served on each adjacent riparian property owner. On-site inspection. Pre-application conference usual. Filling may require Easement to Fill from N.C. Department of Administration and Federal Dredge and Fill Permit.	55 days (90 days)	
	Permit to construct & operate Air Pollution Abatement facilities and/or Emission Sources as per 15 A NCAC (2Q.0100 thru 2Q.0300)	Application must be submitted and permit received prior to construction and operation of the source. If a permit is required in an area without local zoning, then there are additional requirements and timelines (2Q.0113).	90 days	
$\boxtimes$	Any open burning associated with subject proposal must be in compliance with 15 A NCAC 2D.1900	N/A	60 days (90 days)	
$\boxtimes$	Demolition or renovations of structures containing asbestos material must be in compliance with 15 A NCAC 20.1110 (a) (1) which requires notification and removal prior to demolition. Contact Asbestos Control Group 919-707-5950	Please Note - The Health Hazards Control Unit (HHCU) of the N.C. Department of Health and Human Services, must be notified of plans to demolish a building, including residences for commercial or industrial expansion, even if no asbestos is present in the building.	60 days (90 days)	
	sedimentation control plan will be required if one by applicable Regional Office (Land Quality Section	nust be properly addressed for any land disturbing activity. An erosion & or more acres are to be disturbed. Plan must be filed with and approved n) at least 30 days before beginning activity. A NPDES Construction sued should design features meet minimum requirements. A fee of \$65 is review option is available with additional fees.	20 days (30 days)	
	Sedimentation and erosion control must be addressed in accordance with NCDOT's approved program. Particular attention should be given to design and installation of appropriate perimeter sediment trapping devices as well as stable Stormwater conveyances and outlets. (30 days)			
	Sedimentation and erosion control must be addre Particular attention should be given to design and as stable Stormwater conveyances and outlets.	Based on Local Program		
	Compliance with 15A NCAC 2H .0126 - NPDES Stor Municipal Separate Storm Sewer System & Constr	rmwater Program which regulates three types of activities: Industrial, uction activities that disturb ≥1 acre.	30-60 days (90 days)	
	Compliance with 15A NCAC 2H 1000 -State Storm construction stormwater runoff control. Areas su various other counties and watersheds throughou	45 days (90 days)

## STATE OF NORTH CAROLINA DEPARTMENT OF TRANSPORTATION

ROY COOPER GOVERNOR J. ERIC BOYETTE Secretary

DATE:	April 8, 2022
TO:	North Carolina State Clearinghouse Department of Administration Intergovernmental Review
FROM:	Julie E. Bogle, P.E. OF NCDOT-Transportation Planning Division
SUBJECT:	22-E-0000-0182 – Proposed project is to construct an approximately 1.3 miles of new 230 kV transmission line – Located in Chatham County

Thank you for allowing the Transportation Planning Division to review the project proposal. In reviewing the information, below are some comments.

The 2011 Town of Pittsboro Comprehensive Transportation Plan (CTP) was adopted by Pittsboro, Chatham County, and the North Carolina Department of Transportation (NCDOT). The CTP maps final report be viewed and can at: https://connect.ncdot.gov/projects/planning/Pages/CTP-Details.aspx?study\_id=Pittsboro. The Pittsboro CTP recommends several new location roadways that either cross your proposed transmission lines or are in the vicinity of your project.

TIP Project R-5963 is in the current 2020-2029 State Transportation Improvement Program (STIP) and is in your project study area. R-5963 is the construction of a 2-lane roadway on new location.

Please continue to coordinate and consult with Pittsboro, the Triangle Area Rural Planning Organization (TARPO), and NCDOT on your project as you move forward. If you have any questions, please do not hesitate to email me at jebogle@ncdot.gov or call me at 919-707-0945.

Re: Construct 1.3 miles of 230 kV transmission line from Harris Plant to Pittsboro Hanks Chapel substation, Pittsboro, Chatham County, 22-E-0000-0182, ER 22-0878

Dear Ms. Richard:

Thank you for your letter dated February 9, 2022, concerning the above-referenced project. We have reviewed the information provided and offer the following comments.

We have determined that the project as proposed will not have an effect on historic structures.

The proposed project consists of three alternative routes. Two of the three route options, including the preferred alternative, largely follow existing transmission lines. Based on our knowledge of the area, it is unlikely that any archaeological resources that may be eligible for inclusion in the National Register of Historic Places will be affected by the Preferred Alternative or Alternative 2 and do not recommend an archaeological investigation if either of these routes are selected.

Alternative 3 is projected to include areas that have not been previously surveyed for archaeological sites. While no archaeological resources have been previously recorded within this portion of the project area, the project area includes landforms and soils adjacent to tributaries associated with Roberson Creek that have a high probability for archaeological sites. Several archaeological sites have been identified in the project vicinity and based on the topographic and hydrological setting; we expect the project area may contain intact, significant archaeological sites.

If Alternative 3 is selected, we recommend that a comprehensive archaeological survey be conducted by an experienced archaeologist prior to the initiation of any ground disturbing activities within the project area. The purpose of this survey will be to identify any archaeological sites that may be damaged or destroyed by the proposed project and make recommendations regarding their eligibility status in terms of the National Register of Historic Places. Potential effects on unknown resources must be assessed prior to the initiation of construction activities. This work should be conducted by an experienced archaeologist that meets the Secretary of the Interior professional qualification standards. A list of archaeological consultants who have conducted or expressed an interest in contract work in North Carolina is available at https://archaeology.ncdcr.gov/programs/environmental-review/archaeological-consultant-list.

Please note that our office requests consultation with the Office of State Archaeology Review Archaeologist to discuss appropriate field methodologies prior to the archaeological field investigation. One paper copy and one digital copy (PDF) of all resulting archaeological reports, as well as a digital copy (PDF) of the North Carolina site form for each site recorded, should be forwarded to the Office of State Archaeology (OSA) through this office for review and comment as soon as they are available and in advance of any construction or ground disturbance activities. OSA's Archaeological Standards and Guidelines for Background Research, Field Methodologies, Technical Reports, and Curation can be found online at: https://archaeology.ncdcr.gov/osa-guidelines.

The above comments are made pursuant to Section 106 of the National Historic Preservation Act and the Advisory Council on Historic Preservation's Regulations for Compliance with Section 106 codified at 36 CFR Part 800.

Thank you for your cooperation and consideration. If you have questions concerning the above comment, contact Renee Gledhill-Earley, environmental review coordinator, at 919-814-6579 or <u>environmental.review@ncdcr.gov</u>. In all future communication concerning this project, please cite the above referenced tracking number.

Sincerely,

Zence Gledhill-Earley

Ramona Bartos, Deputy State Historic Preservation Officer
