Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Melissa Harrison

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Thomas Kirtley

Subject: DocketE-100, Sub 83: Net Metering

Dear Chief Clerk of the Commission,

I am a 30 year NC resident who invested in Solar Panels for my home. I chose to go the net metering rate and even did not use the Progress Duke incentives, but chose the straight net metering option. By my use of solar I am reducing our state's dependence on DIRTY Coal and their ASH PITS!! Why would you even consider eliminating net metering. With net metering I am putting power on the grid on hot sunny days when demand is high- lessening the need for new power plants!!

I DO NOT support changes to net metering! Please do not do things that harm rooftop solar in NC

Please oppose the changes to NET metering!!

Thank you for your consideration!

Dear NC Utilities Commission,

Most important issue now is holding Duke Power accountable as well as others in government responsible for the proper storage, disposal and CLEANUP of the coal ash ponds. The only reason I can see for this lobbying by Duke is to take advantage of citizen complacency and the fact that they have already tried to get out of the financial burden they have placed themselves in. Duke's coffers are full of money. If we the citizens of North Carolina allow these efforts to destroy our state's environment, then WE deserve to have to drink the water, eat the soil and fish and then die. To Hell with the almighty dollar. I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be

standing in the way of American ingenuity and customer choice to protect their old way of doing business. Ask why Duke doesn't promote solar energy for themselves to provide the grid.

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Reginald Steer

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice. Just look at that cell phone in your pocket and see how breaking up a phone monopoly changed our lives for the better. We can't even imagine what great things are in store if we do the same to the electric company.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Jude Lobe
