Please reject the proposal from Duke Energy to change net metering for residential customers. Please do a true investigation of solar costs and benefits before making any changes to net metering in NC. Net metering helps me pay my bill with my solar system. Thank you for your time! Maureen Allen 1206 Westbrook Avenue Elon, NC 27244 336-449-5005

I oppose duke energy change to the net metering plan I recently spent 56 000 dollars invested in to converting my house to net metering and was screwed over by titan solar and duke energy in the process. Both of these companies are taking advantage of people who want to lower there power bills that they can not afford and support clean energy. My system was designed to eliminate my power bill but I pay the exact same in financing. So it's all a illusion and was lied to about tax benefits and balloon payments And changing interest rates and now dukes. Greed is going to make them jack up are rates and lower are return to 3 cents per kilowatt when they charge us 10 cents For the the electricity that I produced ! Without them this is not fair Duke dosnt need the money has zero rights to it all this is going to do is make solar customers. Purchase a battery and disconnect and stop putting back into the grid to share ,,,,, duke has always screwed over its customers. Cut off power. To old people on fixed incomes and single parents and people trying to make it. They are not victims they are one of the wealthiest companies in the state. Make net metering a equal exchange support solar in nc. And regulations to solar companies who lie and rip off there customers.

Please deny Duke's plan to reduce net metering for solar power home producers. Does not make sense to try to raise revenue by punishing one of the more helpful aspects of energy conservation. If they need revenue, raise rates and submit that to the commission.
