N.C. Utilities Commission
Clerk's Office

Dear Charlotte Mitchell,

I am writing to let you know I am apposed to a rate increase on electricity by Duke Energy. I understand that they have had to do a lot of extra work lately due to the weather which I am grateful for. We all need electricity. But it isn't my responsibility to pay for coal ash clean up! If ~~you~~ they would reduce the main woman who is over Duke Energy's paycheck some you would probably have a lot of money to pay for Coal Ash Clean up. Instead of expecting Senior Adults on a fixed income pay for Duke Energy's mess ups! We should put the blame & Cost on the ones which allowed the problem to begin with. I don't have more money to pay for bills everything keeps going up & I get \$17.00 a month increase in social security which I am thankful for, but I can keep paying more so the people who have higher up in pay can get more money! I see a lot of senior citizens who feel the same way! So I will thank you for your time & Consideration in this matter! But when you live on a

fixed income you cant do but as
much with what you have. I have
the same bill everyone else has a car
most cars keep to pay them with.
Thank again, May the Good
Good Lord see you in a special way.
Sincerely yours,
Dorothy Hook
