CPRE Purchased and Generated Power Costs in the Experience Modification Factor (EMF) and Prospective Billing Periods

Walker Exhibit No. 1

Duke-owned facilities are considered generated power rather than purchased power. The cost for Duke owned facilities is authorized revenue as provided by G.S. 62-110.8(g).

<sup>&</sup>lt;sup>2</sup> Precommercial generation included at the energy-only component of the rate in accordance with CPRE PPA section 4.4.

Duke Energy Carolinas, LLC Docket No. E-7, Sub 1262 Proposed Rider CPRE (NC) Walker Exhibit No. 6

Duke Energy Carolinas, LLC

Electricity No. 4
North Carolina Second Revised (Proposed) Leaf No. 127
Superseding North Carolina Original Leaf No. 127

### RIDER CPRE (NC) COMPETITIVE PROCUREMENT OF RENEWABLE ENERGY RIDER

#### **APPLICABILITY (North Carolina Only)**

Service supplied under the Company's rate schedules is subject to approved adjustments to recover costs associated with implementation of the Company's Competitive Procurement of Renewable Energy (CPRE) Program. Adjustments are made pursuant to North Carolina General Statute 62-110.8(g) and North Carolina Utilities Commission Rule R8-71 as ordered by the North Carolina Utilities Commission.

#### CPRE PROSPECTIVE COMPONENT AND EXPERIENCE MODIFICATION FACTOR

All service supplied under the Company's rate schedules is subject to an increment per kilowatt hour as set forth below. This adjustment is not included in the Rate Schedules of the Company and therefore, must be applied to the bill as calculated under the applicable rate.

0.0412 ¢/kWh

#### **CONFIDENTIAL DATA**

Duke Energy Carolinas, LLC Docket No. E-7, Sub 1262 1% Calculation Test Walker Workpaper No. 6

Per Rule R8-71 (j)(9) "the annual increase in the aggregate amount of costs recovered under G.S. 62-110.8(g) in any recovery period from its North Carolina retail customers shall not exceed one percent (1%) of the electric public utility's total North Carolina retail jurisdictional gross revenues for the preceding calendar year determined as of December 31 of the previous calendar year. Any amount in excess of that limit shall be carried over and recovered in the next recovery period when the annual increase in the aggregate amount of costs to be recovered is less than one percent (1%)."

#### DUKE ENERGY CAROLINAS, LLC COMPETITIVE PROCUREMENT OF RENEWABLE ENERGY ("CPRE") COMPLIANCE REPORT

On November 6, 2017, the North Carolina Utilities Commission ("NCUC" or "Commission") issued an order in Docket No. E-100, Sub 150 adopting regulations to implement the Competitive Procurement of Renewable Energy ("CPRE") Program.<sup>1</sup> Section (h) of NCUC Rule R8-71 (the "CPRE Rule") requires Duke Energy Carolinas, LLC ("DEC" or the "Company") to annually file a CPRE Program Compliance Report for the prior calendar year, which for purposes of this Compliance Report is calendar year 2021 (referred to as the "reporting year"). DEC hereby submits this CPRE Compliance Report for the reporting year.

#### I. CPRE Solicitation Overview (R8-71(h)(2)(i))

As noted in the Company's initial CPRE Program Plan filed on November 27, 2017, DEC and Duke Energy Progress, LLC ("DEP" and together with DEC, the "Companies") have elected to jointly issue request for proposal ("RFP") solicitations to comply with the aggregate procurement requirements of the CPRE Program. The Accion Group, LLC serves as the Independent Administrator ("IA") of the CPRE Program.

The Commission authorized the Companies to commence the CPRE Program by Order issued February 21, 2018, in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156, modifying and approving the joint CPRE Program.

The Companies issued the CPRE Tranche 1 RFP on July 10, 2018, seeking to procure 600 MW of renewable capacity for DEC and 80 MW of renewable capacity for DEP. The results of CPRE Tranche 1 were presented in the IA's Tranche 1 Final Report filed with the Commission on July 18, 2019. Tranche 1 was completed in 2019 and was addressed in DEC's 2019 CPRE compliance report filed with the Commission.

The Companies issued the CPRE Tranche 2 RFP on October 15, 2019, seeking to procure 600 MW of renewable capacity. The results of CPRE Tranche 2 were presented in the IA's Tranche 2 Final Report filed with the Commission on February 9, 2021. Tranche 2 was completed in 2020 and was addressed in DEC's 2019 and 2020 CPRE compliance reports filed with the Commission.

In 2021, Duke Energy continued the CPRE Program. On June 2, 2021, the Commission issued its *Order Requesting Update* on the Companies' CPRE Program compliance in advance of the conclusion of the CPRE Program's 45-month compliance period, requesting an update from interested parties regarding (1)

<sup>&</sup>lt;sup>1</sup> Order Adopting and Amending Rules, Docket No. E-100, Sub 150 (Nov. 6, 2017). The Commission subsequently also issued an Order Amending Commission Rule R8-71 in the same docket on April 9, 2018.

the most current status of the Transition  $MW^2$ , (2) the need for and appropriate timing of a CPRE Tranche 3, and (3) the parties' positions on statutory interpretation regarding what must be completed within the 45-month term and what actions the Commission may properly take beyond the 45-month timeframe to ensure that the final procurement target is met.

On September 1, 2021, the Companies filed their CPRE Program Plans identifying that implementation of queue reform introduces an additional layer of complexity regarding the timing of implementing CPRE Program Tranche 3, due to the need to integrate a competitive procurement solicitation into future planned cluster studies, which have established timelines under the North Carolina Interconnection Procedures ("NCIP"), South Carolina Generator Interconnection Procedures ("SC GIP"), and FERC Large Generator Interconnection Procedures. The 2021 CPRE Program Plan identified that approximately 300 MW were needing to be procured under the CPRE Program, and that the Companies would update the Commission on the final amount of capacity in order to meet their obligations under the CPRE Program prior to the end of the 45-month procurement period.

Following submission of the Companies' 2021 CPRE Program Plans, DEC and DEP began to work collaboratively with the IA as well as engage with Carolinas Clean Energy Business Association ("CCEBA"), the Public Staff, and other stakeholders to determine feasible paths that would allow the Companies to meet their procurement obligations under the CPRE Program while also ensuring that the Companies can successfully achieve queue reform and transition to annual Cluster Studies in 2022. Through this engagement with stakeholders, the Companies determined that Tranche 3 should be a DEC-only procurement for third-party PPA resources and should not include asset acquisition bids. The Companies and stakeholders also agreed that Duke should utilize a Resource Solicitation Cluster ("RSC") held in spring 2022, and queued after the Transitional Cluster Study, to evaluate grid upgrades of Tranche 3 proposals.

On November 21, 2021, the 45-month CPRE Program Procurement Period ended.

On November 24, 2021, the Companies submitted a joint letter with CCEBA to the Commission in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156 regarding the Companies' plan to administer a DEC Tranche 3 RFP utilizing a Resource Solicitation Cluster ("RSC") to complete Step 2 of the CPRE RFP evaluation process.

On December 3, 2021, the Companies filed a Petition for Determination of Final CPRE Program Procurement Amount in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156, requesting the Commission determine the aggregate number of MW to be competitively procured through the CPRE Program based on

<sup>&</sup>lt;sup>2</sup> "Transition MW" is the term the Companies use to refer to projects that qualify under N.C. Gen. Stat. § 62-110.8(b)(1) as having executed power purchase agreements ("PPA") and interconnection agreements for renewable energy capacity within the DEC and DEP Balancing Authorities that are not subject to economic dispatch or curtailment and were not procured under the Green Source Advantage program pursuant to N.C. Gen. Stat. § 62-159.2. Pursuant to N.C. Gen. Stat. § 62-110.8, should the level of Transition MW exceed 3,500 MW, then the aggregate targeted competitive procurement aggregate amount (2,660 MW) is to be reduced. If the aggregate capacity of such Transition MW is less than 3,500 MW at the end of the initial 45-month competitive procurement period, the Commission shall also require the Companies to conduct an additional competitive procurement in the amount of such deficit pursuant to the statute.

the exceedance of Transition MW over the 45-month CPRE Procurement Period, and approve the resulting Tranche 3 target MW amount of 596 MW.

On December 20, 2021, the Commission issued its *Order Determining Adjusted CPRE Program Procurement Target, Requiring Tranche 3 CPRE Program Procurement Solicitation, Approving Resource Solicitation Cluster, and Requiring Responses to Commission Questions Regarding Pro Forma PPA.* The Commission's Order authorized DEC to implement Tranche 3 of the CPRE Program through an RSC, and determined that the current CPRE Program procurement target is 1,782 MW as reduced in accordance with N.C.G.S. § 62-110.8(b)(1).

DEC issued the CPRE Tranche 3 RFP on January 4, 2022, seeking to procure 596 MW of renewable capacity. The bid window for CPRE Tranche 3 closed on February 3, 2022. Below follows a timeline regarding CPRE Tranche 3 Milestones completed in 2021:

The IA is now completing Step 1 of the CPRE evaluation process for Tranche 3.

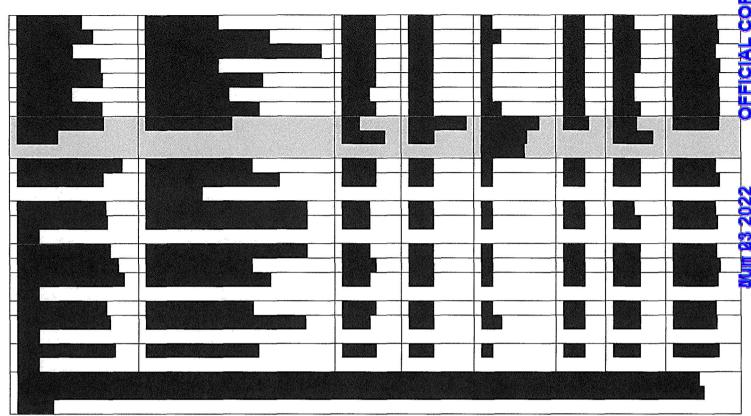

### II. Summary of PPAs and Utility-Owned Assets Procured During the Reporting Year (R8-71(h)(2)(ii))

No PPAs were executed or utility-owned assets procured during the reporting year. Below follows a table identifying all projects procured in CPRE Tranches 1 and 2. The table lists whether such projects are utility-owned assets or third-party owned PPA assets, and provides estimated commercial operation dates as of the date of this filing for each project.

#### **END CONFIDENTIAL**

### III. Capacity and Energy Obtained through the CPRE Program During the Reporting Year (R8-71(h)(2)(iii))

The nameplate capacity of the winning proposals in DEC for Tranche 2 are identified above. No megawatthours of renewable energy or renewable energy certificates were obtained through the CPRE Program during the reporting year for any Tranche 2 projects because none of the winning projects achieved commercial operation during the reporting year.

Two Tranche 1 winning projects were operational and delivered renewable energy to DEC during the reporting year. Details concerning those projects are included in the table below. Two additional Tranche 1 projects have now also achieved commercial operation and will be reported on in 2022.

#### END CONFIDENTIAL

#### IV. Duke Owned Facilities Submitted as Proposals in CPRE Solicitation (R8-71(h)(2)(iv))

No proposals sponsored by Duke Energy Corp. or Duke Energy Corp. affiliates were submitted as part of the Tranche 3 CPRE RFP.

#### V. Avoided Cost Rates (R8-71(h)(2)(v))

The Company's avoided costs used in the Tranche 3 CPRE solicitation are DEC's levelized 20 year avoided costs developed consistent with the methodology approved by the Commission in Docket No. E-100, Sub 167. Each proposal in Tranche 3 was required to submit their bid price as a positive \$/MWh decrement to the levelized avoided cost rates, as identified in the Tranche 3 RFP solicitation documents. The following is an excerpt from the RFP document describing the proposal pricing approach:

Proposal pricing must be in the same format of 20-year avoided cost pricing periods as shown in the tables above. Proposal pricing must be stated as a fixed dollar per MWh decrement that is applied equally to all energy pricing periods. For example, an MP could propose pricing that is \$2.00/MWh less than the avoided cost in each energy pricing period (for clarity, the decrement does not apply to capacity pricing periods). This format for pricing will be required for the bid entry on the IA RFP Website and will be the basis for the pricing in the PPA.

The bid form on the IA's website allowed only for a single (positive) pricing decrement to be entered, and then presented the resulting \$/MWh pricing for each pricing period based on this decrement. The avoided costs used in Tranche 3 are presented below:

#### **Avoided Costs Threshold for Tranche 3**

#### VI. Total Costs and Authorized Revenues (R8-71(h)(2)(vi))

During the reporting period, DEC has incurred a total of \$567,542, which includes costs for legal support, outside publishing, internal company labor, and Independent Administrator fees not recovered through

program fees. None of the winning CPRE Tranche 2 projects achieved commercial operation during reporting year, so no purchased power costs or authorized revenues associated with these assets were incurred. One CPRE winning proposal from Tranche 1, a Company-owned project, achieved commercial operation late in December of 2020. Another Company-owned project from Tranche 1 was placed in service in January 2021. Authorized revenues associated with these two assets total \$5,332,175.

#### VII. Status of Compliance with CPRE Program Requirements (R8-71(h)(2)(vii))

DEC and DEP have procured 1,024 MW and 161 MW, respectively through two Tranches of the CPRE Program. Collectively, DEC and DEP have now issued Tranche 3 to fully comply with the aggregate CPRE Program procurement requirements. As explained above, the Commission's December 20, 2021 Order issued in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156 determined that the CPRE Program procurement target is 1,782 MW, as reduced in accordance with N.C.G.S. § 62-110.8(b)(1), and that the CPRE Tranche 3 procurement target shall be 596 MW. The Companies also note for transparency purposes that the 596 MW Tranche 3 target amount may be reduced as a result the Commission's *Order Granting Petition for Relief* issued in Docket No. SP-13695, Sub 1 on November 2, 2021. On February 8, 2022 Bid A notified the Company that it was declining to pursue a Tranche 1 PPA under the CPRE Program.

#### VIII. Independent Administrator and Evaluation Costs (R8-71(h)(2)(viii))

The Independent Administrator was selected in January 2018. A copy of the contract between the Companies and the IA in effect for the 2021 reporting period can be found in DEC's 2019 and 2020 CPRE compliance reports filed previously with the Commission. The Companies note that this contract expired at the end of the 45-month CPRE procurement period, and, as such, the Companies and IA are currently in the process of negotiating an updated contract for the remaining CPRE Tranche 3 procurement period. Once the updated contract is executed, the Company will file the contract with the Commission.

During the reporting year, the total costs incurred by the IA to implement the CPRE Program for DEC and DEP were approximately \$391,240.

In Tranche 3 of the RFP, DEC elected to structure the Proposal Fees and Winners' Fees as follows:

- 1) Proposal Fees were required of each proposal submitted on the Independent Administrators website, including Asset Acquisition proposals. This fee was set at \$500/MW, based on the facility's nameplate capacity, up to a maximum of ten thousand dollars (\$10,000).
- 2) In addition, Winners' Fee will be collected on a pro-rata basis from each winning proposal. This fee will be calculated on the amount of the IA costs as well as any Duke costs related to proposal evaluation (i.e., costs incurred in the Step 2 evaluation process as described in the RFP) that was not recovered from the Proposal Fees. The Winners' Fee will be determined upon conclusion of the RFP and upon completion of contracting. Any such Winners' Fees will be allocated among all winning proposals selected by both DEC and DEP on a pro-rata basis on a per MW basis. The total of the Winners' Fees shall not exceed one million five hundred thousand dollars (\$1,500,000).

### IX. Independent Administrator Certification (R8-71(h)(2)(ix))

The Independent Administrator certification required by NCUC Rule R8-71(h)(ix) is provided as Appendix A.

### X. Grid Upgrade Costs<sup>3</sup>

There are no grid Upgrade costs to report on for the 2021 reporting year as no new PPAs or utility-owned assets were procured during the reporting year. See DEC's 2019 and 2020 compliance reports for grid Upgrades cost information regarding Tranches 1 and 2.

<sup>&</sup>lt;sup>3</sup> Order Modifying and Approving Joint CPRE Program, Docket Nos. E-7, Sub 1156, and E-2, Sub 1159 (Feb. 21, 2018) (directing that "[i]n addition to requiring Duke to address grid upgrade costs, as necessary, in its explanation of the elimination of proposals, Duke shall report on grid upgrade costs on a per-proposal basis in its future CPRE compliance reports")

#### **CERTIFICATION**

TO: Angela Tabor, Duke CPRE Coordinator

FROM: Harold T. Judd, Independent Administrator

DATE: February 28, 2022

RE: CPRE 2021 Process Certification

In January 2018 Accion Group, LLC, was approved by the North Carolina Utilities Commission ("NCUC") to serve as Independent Administrator ("IA") for the Duke Energy, Carolinas, LLC and Duke Energy Progress, LLC Competitive Procurement of Renewable Energy ("CPRE") Program. The CPRE Program was divided into annual "Tranches" as independent solicitations. Tranche 1 was issued in 2018 and completed in July 2019. Tranche 2 was released in August 2019, finalists were selected on July 17, 2020, and PPAs were executed on October 15, 2020.

Tranche 3 began on September 9, 2021, when the IA Website was released for Market Participant registration, and the first Stakeholder session was conducted by the IA on September 17, 2021. The second Stakeholder session was conducted on September 24, 2021, the third Stakeholder session was held on October 14, 2021. The fourth and final Stakeholder sessions 2021 prior to the submission of final documents to the North Carolina Utilities Commission ("NCUC"). The IA also conducted two open comment periods concerning the draft Tranche 3 Request for Proposal ("RFP") documents through November 22, 2021. The opportunity to submit proposals opened on January 5, 2022. The activities in 2022 will be addressed in a future certification.

The IA participated in the preparation of the Tranche 3 documents, including transitioning the CPRE Program to align with the revised generator interconnection cluster study process requirements. The IA provided the IA Website through which all information about the CPRE Program is available to interested parties. Similar to Tranches 1 and 2, in Tranche 3 all communications with Market Participants were conducted through the IA Website and all Proposals were received on the IA Website. The IA Website also serves as the repository of all Proposals, as well as retaining a record all exchanges with Market Participants for Tranche 3.

In 2021 the IA participated in a series of hearings before NCUC regarding issues arising from Tranche 1, and participated in litigation before the North Carolina Court of Appeals to defend a decision of the NCUC.

### DUKE ENERGY CAROLINAS, LLC COMPETITIVE PROCUREMENT OF RENEWABLE ENERGY ("CPRE") COMPLIANCE REPORT (UPDATED)

On November 6, 2017, the North Carolina Utilities Commission ("NCUC" or "Commission") issued an order in Docket No. E-100, Sub 150 adopting regulations to implement the Competitive Procurement of Renewable Energy ("CPRE") Program. Section (h) of NCUC Rule R8-71 (the "CPRE Rule") requires Duke Energy Carolinas, LLC ("DEC" or the "Company") to annually file a CPRE Program Compliance Report for the prior calendar year, which for purposes of this Compliance Report is calendar year 2021 (referred to as the "reporting year"). DEC hereby submits this update to its 2021 CPRE Compliance Report for the reporting year and for certain recent updates that have occurred since the initial 2021 CPRE Compliance Report was filed on March 1, 2022.

### I. CPRE Solicitation Overview (R8-71(h)(2)(i))

As noted in the Company's initial CPRE Program Plan filed on November 27, 2017, DEC and Duke Energy Progress, LLC ("DEP" and together with DEC, the "Companies") have elected to jointly issue request for proposal ("RFP") solicitations to comply with the aggregate procurement requirements of the CPRE Program. The Accion Group, LLC serves as the Independent Administrator ("IA") of the CPRE Program.

The Commission authorized the Companies to commence the CPRE Program by Order issued February 21, 2018, in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156, modifying and approving the joint CPRE Program.

The Companies issued the CPRE Tranche 1 RFP on July 10, 2018, seeking to procure 600 MW of renewable capacity for DEC and 80 MW of renewable capacity for DEP. The results of CPRE Tranche 1 were presented in the IA's Tranche 1 Final Report filed with the Commission on July 18, 2019. Tranche 1 was completed in 2019 and was addressed in DEC's 2019 CPRE compliance report filed with the Commission.

The Companies issued the CPRE Tranche 2 RFP on October 15, 2019, seeking to procure 600 MW of renewable capacity. The results of CPRE Tranche 2 were presented in the IA's Tranche 2 Final Report filed with the Commission on February 9, 2021. Tranche 2 was completed in 2020 and was addressed in DEC's 2019 and 2020 CPRE compliance reports filed with the Commission.

In 2021, Duke Energy continued the CPRE Program. On June 2, 2021, the Commission issued its *Order Requesting Update* on the Companies' CPRE Program compliance in advance of the conclusion of the CPRE Program's 45-month compliance period, requesting an update from interested parties regarding (1)

<sup>&</sup>lt;sup>1</sup> Order Adopting and Amending Rules, Docket No. E-100, Sub 150 (Nov. 6, 2017). The Commission subsequently also issued an Order Amending Commission Rule R8-71 in the same docket on April 9, 2018.

the most current status of the Transition  $MW^2$ , (2) the need for and appropriate timing of a CPRE Tranche 3, and (3) the parties' positions on statutory interpretation regarding what must be completed within the 45-month term and what actions the Commission may properly take beyond the 45-month timeframe to ensure that the final procurement target is met.

On September 1, 2021, the Companies filed their CPRE Program Plans identifying that implementation of queue reform introduces an additional layer of complexity regarding the timing of implementing CPRE Program Tranche 3, due to the need to integrate a competitive procurement solicitation into future planned cluster studies, which have established timelines under the North Carolina Interconnection Procedures ("NCIP"), South Carolina Generator Interconnection Procedures ("SC GIP"), and FERC Large Generator Interconnection Procedures. The 2021 CPRE Program Plan identified that approximately 300 MW were needing to be procured under the CPRE Program, and that the Companies would update the Commission on the final amount of capacity in order to meet their obligations under the CPRE Program prior to the end of the 45-month procurement period.

Following submission of the Companies' 2021 CPRE Program Plans, DEC and DEP began to work collaboratively with the IA as well as engage with Carolinas Clean Energy Business Association ("CCEBA"), the Public Staff, and other stakeholders to determine feasible paths that would allow the Companies to meet their procurement obligations under the CPRE Program while also ensuring that the Companies can successfully achieve queue reform and transition to annual Cluster Studies in 2022. Through this engagement with stakeholders, the Companies determined that Tranche 3 should be a DEConly procurement for third-party PPA resources and should not include asset acquisition bids. The Companies and stakeholders also agreed that Duke should utilize a Resource Solicitation Cluster ("RSC") held in spring 2022, and queued after the Transitional Cluster Study, to evaluate grid upgrades of Tranche 3 proposals.

On November 21, 2021, the 45-month CPRE Program Procurement Period ended.

On November 24, 2021, the Companies submitted a joint letter with CCEBA to the Commission in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156 regarding the Companies' plan to administer a DEC Tranche 3 RFP utilizing a Resource Solicitation Cluster ("RSC") to complete Step 2 of the CPRE RFP evaluation process.

On December 3, 2021, the Companies filed a Petition for Determination of Final CPRE Program Procurement Amount in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156, requesting the Commission determine the aggregate number of MW to be competitively procured through the CPRE Program based on

<sup>&</sup>lt;sup>2</sup> "Transition MW" is the term the Companies use to refer to projects that qualify under N.C. Gen. Stat. § 62-110.8(b)(1) as having executed power purchase agreements ("PPA") and interconnection agreements for renewable energy capacity within the DEC and DEP Balancing Authorities that are not subject to economic dispatch or curtailment and were not procured under the Green Source Advantage program pursuant to N.C. Gen. Stat. § 62-159.2. Pursuant to N.C. Gen. Stat. § 62-110.8, should the level of Transition MW exceed 3,500 MW, then the aggregate targeted competitive procurement aggregate amount (2,660 MW) is to be reduced. If the aggregate capacity of such Transition MW is less than 3,500 MW at the end of the initial 45-month competitive procurement period, the Commission shall also require the Companies to conduct an additional competitive procurement in the amount of such deficit pursuant to the statute.

the exceedance of Transition MW over the 45-month CPRE Procurement Period, and approve the resulting Tranche 3 target MW amount of 596 MW.

On December 20, 2021, the Commission issued its *Order Determining Adjusted CPRE Program Procurement Target, Requiring Tranche 3 CPRE Program Procurement Solicitation, Approving Resource Solicitation Cluster, and Requiring Responses to Commission Questions Regarding Pro Forma PPA.* The Commission's Order authorized DEC to implement Tranche 3 of the CPRE Program through an RSC, and determined that the current CPRE Program procurement target is 1,782 MW as reduced in accordance with N.C.G.S. § 62-110.8(b)(1).

DEC issued the CPRE Tranche 3 RFP on January 4, 2022, seeking to procure 596 MW of renewable capacity. The bid window for CPRE Tranche 3 closed on February 3, 2022. Below follows a timeline regarding CPRE Tranche 3 Milestones completed in 2021:

| CPRE Tranche 3 Milestones in 2021                    |            |  |  |
|--|------------|--|--|
| September Stakeholder Session 1                      | 09/17/2021 |  |  |
| Release RFP Documents                                | 09/20/2021 |  |  |
| September Stakeholder Session 2                      | 09/24/2021 |  |  |

The IA is now completing Step 1 of the CPRE evaluation process for Tranche 3.

### II. Summary of PPAs and Utility-Owned Assets Procured During the Reporting Year (R8-71(h)(2)(ii))

No PPAs were executed or utility-owned assets procured during the reporting year. Below follows a table identifying all projects procured in CPRE Tranches 1 and 2. The table lists whether such projects are utility-owned assets or third-party owned PPA assets, and provides estimated commercial operation dates as of the date of this filing for each project.

### **BEGIN CONFIDENTIAL**

<sup>&</sup>lt;sup>3</sup> Estimated COD that are bolded have been updated since the Company's original March 1, 2022, filing.

### III. Capacity and Energy Obtained through the CPRE Program During the Reporting Year (R8-71(h)(2)(iii))

The nameplate capacity of the winning proposals in DEC for Tranche 2 are identified above. No megawatthours of renewable energy or renewable energy certificates were obtained through the CPRE Program during the reporting year for any Tranche 2 projects because none of the winning projects achieved commercial operation during the reporting year.

Two Tranche 1 winning projects were operational and delivered renewable energy to DEC during the reporting year. Details concerning those projects are included in the table below. Two additional Tranche 1 projects have now also achieved commercial operation and will be reported on in 2022.

### **BEGIN CONFIDENTIAL**

<sup>&</sup>lt;sup>4</sup> This project did not sign its Interconnection Agreement as of the required due date, April 19, 2022. DEC expects that the project will soon terminate its PPA.

### **END CONFIDENTIAL**

### IV. Duke Owned Facilities Submitted as Proposals in CPRE Solicitation (R8-71(h)(2)(iv))

No proposals sponsored by Duke Energy Corp. or Duke Energy Corp. affiliates were submitted as part of the Tranche 3 CPRE RFP.

### V. Avoided Cost Rates (R8-71(h)(2)(v))

The Company's avoided costs used in the Tranche 3 CPRE solicitation are DEC's levelized 20 year avoided costs developed consistent with the methodology approved by the Commission in Docket No. E-100, Sub 167. Each proposal in Tranche 3 was required to submit their bid price as a positive \$/MWh decrement to the levelized avoided cost rates, as identified in the Tranche 3 RFP solicitation documents. The following is an excerpt from the RFP document describing the proposal pricing approach:

Proposal pricing must be in the same format of 20-year avoided cost pricing periods as shown in the tables above. Proposal pricing must be stated as a fixed dollar per MWh decrement that is applied equally to all energy pricing periods. For example, an MP could propose pricing that is \$2.00/MWh less than the avoided cost in each energy pricing period (for clarity, the decrement does not apply to capacity pricing periods). This format for pricing will be required for the bid entry on the IA RFP Website and will be the basis for the pricing in the PPA.

The bid form on the IA's website allowed only for a single (positive) pricing decrement to be entered, and then presented the resulting \$/MWh pricing for each pricing period based on this decrement. The avoided costs used in Tranche 3 are presented below:

### **Avoided Costs Threshold for Tranche 3**

|              |                           |             |           |                         | DEC 2       | 0 Year CPRE  | - Solar Only  |                |         |          |          |          |

### VI. Total Costs and Authorized Revenues (R8-71(h)(2)(vi))

During the reporting period, DEC has incurred a total of \$567,542, which includes costs for legal support, outside publishing, internal company labor, and Independent Administrator fees not recovered through program fees. None of the winning CPRE Tranche 2 projects achieved commercial operation during reporting year, so no purchased power costs or authorized revenues associated with these assets were incurred. One CPRE winning proposal from Tranche 1, a Company-owned project, achieved commercial operation late in December of 2020. Another Company-owned project from Tranche 1 was placed in service in January 2021. Authorized revenues associated with these two assets total \$5,332,175.

### VII. Status of Compliance with CPRE Program Requirements (R8-71(h)(2)(vii))

DEC and DEP have procured 1,024 MW and 161 MW, respectively through two Tranches of the CPRE Program. Collectively, DEC and DEP have now issued Tranche 3 to fully comply with the aggregate CPRE Program procurement requirements. As explained above, the Commission's December 20, 2021 Order issued in Docket Nos. E-2, Sub 1159 and E-7, Sub 1156 determined that the CPRE Program procurement target is 1,782 MW, as reduced in accordance with N.C.G.S. § 62-110.8(b)(1), and that the CPRE Tranche 3 procurement target shall be 596 MW. The Companies also note for transparency purposes that the 596 MW Tranche 3 target amount may be reduced as a result the Commission's *Order Granting Petition for Relief* issued in Docket No. SP-13695, Sub 1 on November 2, 2021. On February 8, 2022 Bid A notified the Company that it was declining to pursue a Tranche 1 PPA under the CPRE Program. Bid B did not execute a Tranche 1 PPA by April 30, 2022, as requested by DEC in order for the Company to comply with the Commission's *Order Requesting Update on Status of B Bid B.* Accordingly, the 596 MW Tranche 3 target will not be reduced as a result of the Commission's aforementioned *Order Granting Petition for Relief*.

As indicated above in Section II. of this report, a Tranche 2 project has terminated its PPA. This Tranche 2 75 MW project terminated its Tranche 2 PPA effective March 10, 2022, and paid DEC liquidated damages in the amount of [BEGIN CONFIDENTIAL] [END CONFIDENTIAL], as required under the terms of the Tranche 2 PPA. As also indicated above, another Tranche 2 75 MW project recently failed to sign its Interconnection Agreement, and will likely be terminating its Tranche 2 PPA in the near future.

<sup>&</sup>lt;sup>5</sup> The Commission's Order Requesting Update on the Status of Bid B directed that the Bid B Tranche 1 PPA needed to be resolved prior to Tranche 3 awards. On May 2, 2022 the Tranche 3 Step 2 Evaluation will begin; therefore, DEC allowed Bid B to execute the Tranche 1 PPA until April 30, 2022, at which point after Bid B's Tranche 1 PPA offer was terminated. DEC has communicated to Bid B that it may participate in the forthcoming 2022 Solar Procurement Program.

# 2022

### VIII. Independent Administrator and Evaluation Costs (R8-71(h)(2)(viii))

The Independent Administrator was selected in January 2018. A copy of the contract between the Companies and the IA in effect for the 2021 reporting period can be found in DEC's 2019 and 2020 CPRE compliance reports filed previously with the Commission. The Companies note that this contract expired at the end of the 45-month CPRE procurement period, and, as such, the Companies and IA amended the contract to extend the term through January, 2023 in order for the IA to remain engaged through competition of CPRE Tranche 3. A copy of this contract amendment is included with this updated CPRE Compliance Report as Updated Appendix B.

During the reporting year, the total costs incurred by the IA to implement the CPRE Program for DEC and DEP were approximately \$391,240.

In Tranche 3 of the RFP, DEC elected to structure the Proposal Fees and Winners' Fees as follows:

- 1) Proposal Fees were required of each proposal submitted on the Independent Administrators website, including Asset Acquisition proposals. This fee was set at \$500/MW, based on the facility's nameplate capacity, up to a maximum of ten thousand dollars (\$10,000).
- 2) In addition, Winners' Fee will be collected on a pro-rata basis from each winning proposal. This fee will be calculated on the amount of the IA costs as well as any Duke costs related to proposal evaluation (i.e., costs incurred in the Step 2 evaluation process as described in the RFP) that was not recovered from the Proposal Fees. The Winners' Fee will be determined upon conclusion of the RFP and upon completion of contracting. Any such Winners' Fees will be allocated among all winning proposals selected by both DEC and DEP on a pro-rata basis on a per MW basis. The total of the Winners' Fees shall not exceed one million five hundred thousand dollars (\$1,500,000).

### IX. Independent Administrator Certification (R8-71(h)(2)(ix))

The Independent Administrator certification required by NCUC Rule R8-71(h)(ix) is provided as Appendix A.

### X. Grid Upgrade Costs<sup>6</sup>

There are no grid Upgrade costs to report on for the 2021 reporting year as no new PPAs or utility-owned assets were procured during the reporting year. See DEC's 2019 and 2020 compliance reports for grid Upgrades cost information regarding Tranches 1 and 2.

<sup>&</sup>lt;sup>6</sup> Order Modifying and Approving Joint CPRE Program, Docket Nos. E-7, Sub 1156, and E-2, Sub 1159 (Feb. 21, 2018) (directing that "[i]n addition to requiring Duke to address grid upgrade costs, as necessary, in its explanation of the elimination of proposals, Duke shall report on grid upgrade costs on a per-proposal basis in its future CPRE compliance reports")

## FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT INDEPENDENT ADMINISTRATOR SERVICES FOR THE NORTH CAROLINA COMPETITIVE PROCUREMENT OF RENEWABLE ENERGY PROGRAM

This First Amendment to the Professional Services Agreement, Independent Administrator Services For The North Carolina Competitive Procurement Of Renewable Energy Program (the "Amendment") is made and entered into as of the 10<sup>th</sup> day of January 2022, by and between Duke Energy Business Services LLC, acting as agent for and on behalf of each of Duke Energy Carolinas, LLC and Duke Energy Progress, LLC (collectively, "Duke Energy"), and Accion Group, LLC ("Consultant"). For purposes of this Amendment, the foregoing entities may collectively be generically referred to herein as the "Parties" to this Amendment. All capitalized terms not otherwise defined in this Amendment shall have the meanings given to them in the Agreement.

#### WITNESSETH:

WHEREAS, Duke Energy and Consultant entered into that certain Professional Services Agreement, Independent Administrator Services For The North Carolina Competitive Procurement Of Renewable Energy Program, effective as of January 9, 2018 ("Agreement"), pursuant to which Duke Energy engaged Consultant to provide technical expertise and consulting Services in the area of competitive renewable energy facility procurement; and

WHEREAS, subsequent to the development of the Tranche 3 scope of work and associated fee estimate, the Parties determined that a material increase in the targeted Tranche 3 procurement was needed to achieve the total Competitive Procurement Of Renewable Energy ("CPRE") Program procurement target (as identified in the Duke Energy's December 3, 2021 Petition for Determination of Final CPRE Program Procurement Amount), which had already been accepted by the North Carolina Utilities Commission; and

WHEREAS, recognizing the materiality of this change in the Tranche 3 procurement (and as a result of the increased capacity to be procured in the Tranche 3 solicitation), the Parties desire to amend the Agreement to extend the original Term of the Agreement and to update the Agreement with new pricing information.

**NOW, THEREFORE,** in consideration of the mutual covenants contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties, intending to be legally bound, hereby agree as follows.

#### 1. AMENDMENT.

The Agreement is hereby amended as follows:

a) Deleting Section 3(c) in its entirety and replacing it with the following: The term of this Agreement shall commence on the Effective Date and shall continue until January 10, 2023 ("Term"), unless extended by written agreement between Duke Energy and the Consultant, or unless

- sooner terminated at any time during the Term in accordance with the terms and conditions hereof.
- b) Replacing Exhibit B ("Pricing Information") with the new attached Exhibit B ("Pricing Information").
- 2. RATIFICATION. In all other respects, the Agreement is ratified and confirmed and all other terms and conditions of the Agreement shall remain unchanged and in full effect.
- 3. BINDING EFFECT.

This Amendment shall be binding upon, and shall inure to the benefit of, the Parties hereto and their respective successors and assigns.

4. COUNTERPARTS. This Amendment may be executed in any number of counterparts and by different parties hereto in separate counterparts, each of which when so executed shall be deemed to be an original and all of which when taken together shall constitute one and the same instrument.

[Remainder of page intentionally left blank and signature page immediately follows]

IN WITNESS WHEREOF and in confirmation of their consent to the terms and conditions contained in this Amendment and agreeing to be legally bound hereby, the Parties have executed this Amendment by their respective duly authorized representatives as of the last date set forth below.

### Exhibit B

Pricing Information (Effective January 10, 2022)

Consultant Hourly Rates are shown in the table below and shall be held constant throughout the Term of this Agreement.

| Position           | Rates (USD) |
|--------------------|-------------|
| President/Director |             |
| Vice President     | ·           |
| Senior Consultant  |             |
| Consultant 1       |             |
| Consultant 2       |             |
| Analyst            |             |

### Categories of expenses:

- a) Fees will be charged on an hourly basis. Consultant will not charge for travel time or secretarial services.
- b) Supplies procured at the request of Duke Energy will be charged on an actual cost basis.
- c) Other direct costs: Consultant may charge for printing and production costs at 10 cents per page for standard copies and \$1.00 per page for color copies. In the event that Consultant must use outside services to copy or produce materials, these costs will be billed at actual charges incurred. Consultant will not charge for faxes, Internet usage or other overhead items. Telephone, postage and express delivery charges are billed at cost. Significant expenses will require Duke Energy's prior written consent or Duke Energy will not accept responsibility of the reimbursement of the same.
- d) Travel costs will be billed at actual cost in accordance with Exhibit C, Guidelines for Consultant Expense Reimbursement.
- e) Website Design and Hosting will be invoiced on an annual basis at the rates set forth in the table below.

| Year | Annual Price (USD) | Cumulative Price | Notes |
|------|--------------------|------------------|-------|

Copies of all pleadings, testimony, orders and correspondence in this proceeding should be served upon the attorneys listed above.

- 3. N.C. Gen. Stat. § 62-110.8 requires North Carolina's electric public utilities to file for Commission approval of a program for the competitive procurement of energy and capacity from renewable energy facilities with the purpose of adding renewable energy to the State's generation portfolio in a manner that allows the State's electric public utilities to continue to reliably and cost-effectively serve customers' future energy needs.
- 4. N.C. Gen. Stat. § 62-110.8(b) provides that electric public utilities may jointly or individually implement the aggregate competitive procurement requirements and may satisfy certain requirements set forth in N.C. Gen. Stat. § 62-110.8 for the procurement of renewable energy capacity to be supplied by renewable energy facilities through any of the following: (i) renewable energy facilities to be acquired from third parties and subsequently owned and operated by the soliciting public utility or utilities; (ii) renewable

energy facilities to be constructed, owned, and operated by the soliciting public utility or utilities subject to certain limitation set forth in N.C. Gen. Stat. § 62-110.8; or (iii) the purchase of renewable energy, capacity, and environmental and renewable attributes from renewable energy facilities owned and operated by third parties that commit to allow the procuring public utility rights to dispatch, operate, and control the solicited renewable energy facilities in the same manner as the utility's own generating resources.

- 5. N.C. Gen. Stat. § 62-110.8(g) provides that an electric public utility shall be authorized to recover the costs of all purchases of energy, capacity, and environmental and renewable attributes from third-party renewable energy facilities and to recover the authorized revenue of any utility-owned assets through an annual rider approved by the Commission and reviewed annually.
- 6. N.C. Gen. Stat. § 62-110.8(h) provides that the Commission shall adopt rules to implement the requirements of the competitive procurement of renewable energy program. The Commission adopted and subsequently authorized amendments to Rule R8-71 to implement N.C. Gen. Stat. § 62-110.8, by orders issued November 6, 2017 and April 9, 2018, in Docket No. E-100, Sub 150.1
- 7. Rule R8-71(j)(1) provides that the Commission shall schedule an annual public hearing pursuant to N.C. Gen. Stat. § 62-110.8(g) to review the costs incurred or anticipated to be incurred by the electric public utility to comply with N.C. Gen. Stat. § 62-110.8.
  - 8. Rule R8-71(j)(2) provides that the Commission shall permit each electric

•

<sup>&</sup>lt;sup>1</sup> See Order Adopting and Amending Rules, Docket No. E-100, Sub 150 (Nov. 6, 2017); Order Amending Commission Rule R8-71, Docket No. E-100, Sub 150 (April 9, 2018).

public utility to charge an increment or decrement as a rider to its rates to recover in a timely manner the reasonable and prudent costs incurred and anticipated to be incurred to implement its CPRE Program and to comply with N.C. Gen. Stat. § 62-110.8. The costs and authorized revenue will be further modified through the use of a CPRE Program experience modification factor (CPRE EMF) rider. The CPRE EMF rider will reflect the difference between reasonable and prudently-incurred CPRE Program actual costs and authorized revenue, and the revenues that were actually realized during the test period under the CPRE Program rider then in effect.

- 9. Rule R8-71(h) provides that each electric public utility shall file its annual CPRE Program compliance report on the same date that it files its application to recover costs pursuant to Rule R8-71(j). The Commission shall consider each electric public utility's CPRE Program compliance report at the hearing provided for in Rule R8-71(j) and shall determine whether the electric public utility is reasonably and prudently implementing the CPRE Program requirements of N.C. Gen. Stat. § 62-110.8. *See* NCUC Rule R8-71(i)(l).
- 10. DEC and DEP are reasonably and prudently implementing the CPRE Program requirements. CPRE Tranches 1 and 2 are completed and Tranche 3 is underway to procure the remaining 596 MW directed under the Program. Further details regarding Tranche 3, are described in the direct testimony of DEC witness Angela M. Tabor.
- 11. Pursuant N.C. Gen. Stat. § 62-110.8(g) and Commission Rule R8-71(j), DEC hereby requests Commission approval of the Rider CPRE to recover the Company's reasonable and prudently incurred costs to comply with the CPRE Program. More specifically, the Company requests to give back to DEC's North Carolina retail customers,

through the CPRE EMF rider, (\$2,262,968) related to the actual CPRE costs incurred and other credits for the test period and to collect \$23,271,430 for CPRE costs projected to be incurred during the period from September 1, 2022 through August 31, 2023 ("Billing Period"). The Rider CPRE will be in effect for the twelve-month period September 1, 2022 through August 31, 2023.

12. In this Application, DEC proposes a CPRE Rider amount (excluding regulatory fee) of:

Residential – 0.0412¢/kWh

General Service & Lighting – 0.0395¢/kWh

Industrial – 0.0384¢/kWh

And DEC proposes an EMF decrement (excluding regulatory fee) of:

Residential – (0.0044)¢/kWh

General Service & Lighting – (0.0047)¢/kWh

Industrial -(0.0045)¢/kWh

This results in composite CPRE factors (excluding regulatory fee) of:

 $Residential - 0.0368 \rlap/e/kWh$ 

General Service & Lighting – 0.0348¢/kWh

Industrial - 0.0339¢/kWh

13. The Company also requests approval of its Compliance Report for calendar year 2021, which is being submitted as an attachment to the testimony of DEC witness Tabor. The Compliance Report details the Company's compliance with the CPRE Program requirements of N.C. Gen. Stat. § 62-110.8 and, along with Company's updated CPRE Program Plan and the IA's Tranche 3 Status Report, demonstrates that the Company is

reasonably and prudently implementing the CPRE Program requirements.

14. The information and data required to be filed by NCUC Rule R8-71 in connection with this application is contained in the testimony and exhibits of DEC witnesses Tabor and Christy J. Walker, which are being filed simultaneously with this Application and incorporated herein by reference.

WHEREFORE, DEC requests that the Commission issue an order approving Rider CPRE, approving the Company's Compliance Report, and finding the Company to be reasonably and prudently implementing the CPRE Program Requirements of N.C. Gen. Stat. § 62-110.8.

Respectfully submitted this 1<sup>st</sup> day of March, 2022.
