Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Good heavens! We must avoid fracked gas at all costs and GO FOR RENEWA LES!

I?m writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG?s proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Nancy Bryant

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

No rate hikes for any Duke/ Duke owned company until it proves its practices do not and will not harm humans and/ the environment. When an adverse event does happen, Duke must immediately restore it to original or even better condition - but on THEIR dime, or on their stockholders', but NOT at their customers' expense.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Dear North Carolina Utilities Commission,

No more money to increase our use of fossil fuels. Let me know when I can contribute to green and clean energy.
Thank you.

Marilyn Meares

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Marilyn Meares

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

If PNG/Duke wants a rate hike, they can justify it by investing in renewable energy sources, rather than continuing to invest in fossil fuel sources.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Erv and Jane Kelman
