Re: SCH File # 16-E-4600-0365; Amended Application of Bladen Solar, LLC for Certificate to construct a 50 MW Solar Photovoltaic Electric Generating Facility in Bladen Co. Docket #SP-5220, Sub 0.

Dear Ms. Mount:

The above referenced environmental impact information has been reviewed through the State Clearinghouse under the provisions of the North Carolina Environmental Policy Act.

Attached to this letter are additional comments made in the review of this document. Because of the nature of the comments, it has been determined that no further State Clearinghouse review action on your part is needed for compliance with the North Carolina Environmental Policy Act. The attached comments should be taken into consideration in project development.

Sincerely,

Crystal Best
State Environmental Review Clearinghouse

Dear Ms. Best:

The proposed Photovoltaic Electric Generating Facility has the potential to negatively impact agricultural/environmental/economic balance in the immediate area. The NCDA&CS discourages taking agricultural or managed forestland out of production. Far too much productive farmland has been, and continues to be, lost to development of various types in North Carolina. As farmland is taken out of production the associated jobs and potential for producing food and fiber for a growing population is reduced, and with it a substantial amount of associated economic activity generated by farming dollars that contributes revenue to the local economy and beyond year after year.

If implementation of the solar project moves forward on this tract of land, we encourage conservation of highly productive soils for their best use, i.e. agriculture. If crop or forestry activities are a current component of land use, seek solar development on less productive sites on this tract if possible.

The use of best practices in construction and maintenance of the facility are encouraged to insure that the productive capabilities of the land for any future agricultural activity is maintained and the integrity of unique or sensitive habitats is not destroyed. It is also recommended that a decommissioning plan that clearly defines the responsible party, process, time-line, and specific responsibilities (including restoration to prior condition) is incorporated.

We have cross-referenced the parcel for existing easements related to agriculture and found no CREP conservation easements, swine buyout easements, ADFP easements, plant conservation easements or plant conservation priority sites on the subject property.

Respectfully,

Joseph Hudyncia
Environmental Programs
NCDA&CS
