The remaining information presented in this discussion of results of operations is on a GAAP basis. Management evaluates segment performance based on segment income. Segment income is defined as income from continuing operations net of income attributable to noncontrolling interests and preferred stock dividends. Segment income includes intercompany revenues and expenses that are eliminated in the Condensed Consolidated Financial Statements.

Duke Energy's segment structure includes the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables. The remainder of Duke Energy's operations is presented as Other. See Note 2 to the Condensed Consolidated Financial Statements, "Business Segments," for additional information on Duke Energy's segment structure.

Electric Utilities and Infrastructure

	Three Months Ended March 31,		
(in millions)	2020	2019	Variance
Operating Revenues	$ 5,183	$ 5,329	$ (146)
Operating Expenses			
Fuel used in electric generation and purchased power	1,467	1,630	(163)
Operation, maintenance and other	1,325	1,282	43
Depreciation and amortization	977	947	30
Property and other taxes	303	301	2
Impairment charges	2	—	2
Total operating expenses	4,074	4,160	(86)
Gains (Losses) on Sales of Other Assets and Other, net	1	(3)	4
Operating Income	1,110	1,166	(56)
Other Income and Expenses, net	85	91	(6)
Interest Expense	339	338	1
Income Before Income Taxes	856	919	(63)
Income Tax Expense	151	169	(18)
Segment Income	$ 705	$ 750	$ (45)
Duke Energy Carolinas GWh sales	21,236	21,828	(592)
Duke Energy Progress GWh sales	15,670	16,348	(678)
Duke Energy Florida GWh sales	8,617	8,321	296
Duke Energy Ohio GWh sales	5,823	6,164	(341)
Duke Energy Indiana GWh sales	7,606	8,033	(427)
Total Electric Utilities and Infrastructure GWh sales	58,952	60,694	(1,742)
Net proportional MW capacity in operation	49,561	49,725	(164)

Three Months Ended March 31, 2020, as compared to March 31, 2019

Electric Utilities and Infrastructure's results were driven by unfavorable weather and lower wholesale revenues, partially offset by higher revenues resulting from the South Carolina retail rate cases and Duke Energy Florida base and solar rate adjustments. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $147 million decrease in fuel revenues primarily due to lower fuel cost recovery;
- a $45 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year; and

- a $17 million decrease in wholesale revenues, net of fuel, primarily due to coal ash cost recovery in the prior year at Duke Energy Progress.

Partially offset by:

- a $19 million increase due to higher pricing from South Carolina retail rate case, net of a return of EDIT to customers;
- a $17 million increase in retail pricing due to Duke Energy Florida's base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment; and
- a $17 million increase in weather-normal retail sales volumes.

Operating Expenses. The variance was driven primarily by:

- a $163 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix at Duke Energy Progress and lower coal and natural gas costs and lower amortization of deferred fuel costs at Duke Energy Indiana.

Partially offset by:

- a $43 million increase in operation, maintenance and other expense primarily due to higher employee benefit costs and increased vegetation management costs; and
- a $30 million increase in depreciation and amortization expense primarily due to additional plant in service and new depreciation rates associated with the South Carolina retail rate case.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income. The ETRs for the three months ended March 31, 2020, and 2019, were 17.6% and 18.4%, respectively.

Matters Impacting Future Electric Utilities and Infrastructure Results

The COVID-19 pandemic has not had a material impact on Electric Utilities and Infrastructure as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Electric Utilities and Infrastructure results of operations, financial position and cash flows in the future. Electric Utilities and Infrastructure will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Electric Utilities and Infrastructure customers, suppliers and partners and could cause Electric Utilities and Infrastructure to experience an increase in certain costs, such as bad debt, and a reduction in the demand for energy. Electric Utilities and Infrastructure also has various pending rate case proceedings that have been delayed. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

On December 31, 2019, Duke Energy Carolinas and Duke Energy Progress entered into a settlement agreement with NCDEQ and certain community groups under which Duke Energy Carolinas and Duke Energy Progress agreed to excavate seven of the nine remaining coal ash basins in North Carolina with ash moved to on-site lined landfills. At the two remaining basins, uncapped basin ash will be excavated and moved to lined landfills. An order from regulatory authorities disallowing recovery of costs related to closure of these ash basins could have an adverse impact on Electric Utilities and Infrastructure's results of operations, financial position and cash flows.

On May 21, 2019, Duke Energy Carolinas and Duke Energy Progress received orders from the PSCSC granting the companies' requests for retail rate increases but denying recovery of certain coal ash costs. Duke Energy Carolinas and Duke Energy Progress have appealed these decisions to the South Carolina Supreme Court and those appeals are pending. Electric Utilities and Infrastructure's results of operations, financial position and cash flows could be adversely impacted if coal ash costs are not ultimately approved for recovery. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

In 2019, Duke Energy Indiana filed a general rate case with the IURC, and Duke Energy Carolinas and Duke Energy Progress filed general rate cases with the NCUC. The outcome of these rate cases could materially impact Electric Utilities and Infrastructure's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

On June 22, 2018, Duke Energy Carolinas received an order from the NCUC, which denied the Grid Rider Stipulation and deferral treatment of grid improvement costs. Duke Energy Carolinas and Duke Energy Progress have petitioned for deferral of future grid improvement costs in their 2019 rate cases. Electric Utilities and Infrastructure's results of operations, financial position and cash flows could be adversely impacted if grid improvement costs are not ultimately approved for recovery and/or deferral treatment.

Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida's service territories were impacted by several named storms in 2018. Hurricane Florence, Hurricane Michael and Winter Storm Diego caused flooding, extensive damage and widespread power outages to the service territories of Duke Energy Carolinas and Duke Energy Progress. Duke Energy Florida's service territory was also impacted by Hurricane Michael, a Category 5 hurricane and the most powerful storm to hit the Florida Panhandle in recorded history. In September 2019, Hurricane Dorian impacted Duke Energy Progress and Duke Energy Florida's service territories. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the deferral and future recovery of storm restoration costs could have an adverse impact on Electric Utilities and Infrastructure's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

On April 17, 2015, the EPA published in the Federal Register a rule to regulate the disposal of CCR from electric utilities as solid waste. Duke Energy Indiana has interpreted the rule to identify the coal ash basin sites impacted and has assessed the amounts of coal ash subject to the rule and a method of compliance. Duke Energy Indiana's interpretation of the requirements of the CCR rule is subject to potential legal challenges and further regulatory approvals, which could result in additional ash basin closure requirements, higher costs of compliance and greater AROs. Additionally, Duke Energy Indiana has retired facilities that are not subject to the CCR rule. Duke Energy Indiana may incur costs at these facilities to comply with environmental regulations or to mitigate risks associated with on-site storage of coal ash. An order from regulatory authorities disallowing recovery of costs related to closure of ash basins could have an adverse impact on Duke Energy Indiana's results of operations, financial position and cash flows.

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Duke Energy Registrants' Annual Reports on Form 10-K for the year ended December 31, 2019, for discussion of risks associated with the Tax Act.

Gas Utilities and Infrastructure

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	$ **664**	$ 756	$ (92)
Operating Expenses			
Cost of natural gas	**199**	327	(128)
Operation, maintenance and other	**110**	110	—
Depreciation and amortization	**66**	65	1
Property and other taxes	**30**	33	(3)
Total operating expenses	**405**	535	(130)
Operating Income	**259**	221	38
Other Income and Expenses, net	**49**	40	9
Interest Expense	**31**	30	1
Income Before Income Taxes	**277**	231	46
Income Tax Expense	**28**	5	23
Segment Income	$ **249**	$ 226	$ 23
Piedmont LDC throughput (dekatherms)	**148,503,995**	151,662,741	(3,158,746)
Duke Energy Midwest LDC throughput (Mcf)	**33,785,834**	38,538,272	(4,752,438)

Three Months Ended March 31, 2020, as compared to March 31, 2019

Gas Utilities and Infrastructure's results were impacted by an increase in operating income primarily due to the North Carolina base rate case and IMR, partially offset by prior year tax benefits related to AFUDC equity from ACP. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $134 million decrease due to lower natural gas costs passed through to customers and lower volumes due to warmer weather;
- a $20 million decrease due to return of EDIT to customers; and
- a $7 million decrease due to NCUC approval related to tax reform accounting from fixed-rate contracts in the prior year.

Partially offset by:

- a $53 million increase due to North Carolina base rate case increases; and
- a $12 million increase due to North Carolina IMR increases.

Operating Expenses. The variance was driven primarily by:

- a $128 million decrease in cost of natural gas due to lower natural gas prices, lower volumes and decreased off-system sales natural gas costs.

Other Income and Expenses, net. The variance was driven primarily by higher equity earnings from ACP in the current year.

Income Tax Expense. The increase in tax expense was primarily due to an adjustment, recorded in the first quarter of 2019, related to the income tax recognition for equity method investments and an increase in pretax income, partially offset by an increase in the amortization of excess deferred taxes. The ETRs for the three months ended March 31, 2020, and 2019, were 10.1% and 2.2%, respectively. The increase in the ETR was primarily due to an adjustment related to the income tax recognition for equity method investments recorded in the first quarter of 2019, partially offset by an increase in the amortization of excess deferred taxes. The equity method investment adjustment was immaterial and relates to prior years.

Matters Impacting Future Gas Utilities and Infrastructure Results

The COVID-19 pandemic has not had a material impact on Gas Utilities and Infrastructure as of March 31, 2020; however we cannot predict the extent to which the COVID-19 pandemic will impact Gas Utilities and Infrastructure results of operations, financial position and cash flows in the future. Gas Utilities and Infrastructure will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Gas Utilities and Infrastructure customers, suppliers and partners and could cause Gas Utilities and Infrastructure to experience an increase in certain costs, such as bad debt, or cause constructions delays with ACP. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

Gas Utilities and Infrastructure has a 47% ownership interest in ACP, which is building an approximately 600-mile interstate natural gas pipeline intended to transport diverse natural gas supplies into southeastern markets. Affected states (West Virginia, Virginia and North Carolina) have issued certain necessary permits; the project remains subject to other pending federal and state approvals, which will allow full construction activities to begin. In 2018, FERC issued a series of Notices to Proceed, which authorized the project to begin certain construction-related activities along the pipeline route. Given the legal challenges and ongoing discussions with customers, ACP expects the project to enter full in-service in the first half of 2022.The delays resulting from legal challenges have impacted the cost for the project. Project cost is approximately $8 billion, excluding financing costs. This estimate is based on the current facts available around construction costs and timelines, and is subject to future changes as those facts develop. Abnormal weather, work delays (including delays due to judicial or regulatory action or COVID-19 social distancing) and other conditions may result in cost or schedule modifications, a suspension of AFUDC for ACP and/or impairment charges potentially material to Duke Energy's cash flows, financial position and results of operations. ACP and Duke Energy will continue to consider their options with respect to the foregoing given their existing contractual and legal obligations. See Notes 3 and 11 to the Condensed Consolidated Financial Statements, "Regulatory Matters" and "Variable Interest Entities," respectively, for additional information.

On November 13, 2013, the PUCO issued an order authorizing recovery of MGP costs at certain sites in Ohio with a deadline to complete the MGP environmental investigation and remediation work prior to December 31, 2016. This deadline was subsequently extended to December 31, 2019. Duke Energy Ohio has filed for a request for extension of the deadline. A hearing on that request has not been scheduled. Disallowance of costs incurred, failure to complete the work by the deadline or failure to obtain an extension from the PUCO could result in an adverse impact on Gas Utilities and Infrastructure's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

Commercial Renewables

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 129**	$ 106	$ 23
Operating Expenses			
Operation, maintenance and other	**69**	66	3
Depreciation and amortization	**48**	40	8
Property and other taxes	**8**	6	2
Total operating expenses	**125**	112	13
Operating Income (Loss)	**4**	(6)	10
Other Income and Expenses, net	**(1)**	(2)	1
Interest Expense	**18**	21	(3)
Loss Before Income Taxes	**(15)**	(29)	14
Income Tax Benefit	**(24)**	(35)	11
Less: Loss Attributable to Noncontrolling Interests	**(48)**	(7)	(41)
Segment Income	**$ 57**	$ 13	$ 44
Renewable plant production, GWh	**2,437**	2,068	369
Net proportional MW capacity in operation[(a)]	**3,502**	2,996	506

(a) Certain projects are included in tax equity structures where investors have differing interests in the project's economic attributes. One hundred percent of the tax equity project's capacity is included in the table above.

Three Months Ended March 31, 2020, as compared to March 31, 2019

Commercial Renewables' results were favorable primarily due to new tax equity structures and favorable wind revenue. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The increase was primarily due to favorable wind portfolio revenue as a result of favorable market pricing, favorable wind resource and new solar projects placed in service.

Operating Expenses. The increase was primarily due to higher depreciation expense as a result of new projects placed in service.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by an increase in taxes associated with Duke Energy's interest in tax equity projects and a decrease in pretax losses.

Loss Attributable to Noncontrolling Interests The increase was primarily due to new tax equity structures**.**

Matters Impacting Future Commercial Renewables Results

The COVID-19 pandemic has not had a material impact on Commercial Renewables as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Commercial Renewables results of operations, financial position and cash flows in the future. Commercial Renewables will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Commercial Renewables customers, suppliers and partners and could cause Commercial Renewables to experience delays in project construction and availability of financing. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

Commercial Renewables continues to experience growth with tax equity structures; however, the future expiration of federal tax incentives could result in adverse impacts to future results of operations, financial position and cash flows.

Duke Energy continues to monitor recoverability of its renewable merchant plants principally in the Electric Reliability Council of Texas West market, due to declining market pricing and declining long-term forecasted energy prices, primarily driven by lower forecasted natural gas prices. Although these assets were not impaired, a continued decline in energy market pricing would likely result in a future impairment. Impairment of these assets could result in adverse impacts to the future results of operations, financial position and cash flows of Commercial Renewables.

Other

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 23**	$ 21	$ 2
Operating Expenses	**(89)**	28	(117)
Operating Income (Loss)	**112**	(7)	119
Other Income and Expenses, net	**(33)**	44	(77)
Interest Expense	**171**	171	—
Loss Before Income Taxes	**(92)**	(134)	42
Income Tax Benefit	**(19)**	(45)	26
Less: Preferred Dividends	**39**	—	39
Net Loss	**$ (112)**	$ (89)	$ (23)

Three Months Ended March 31, 2020, as compared to March 31, 2019

The variance was driven by lower returns on investments and the declaration of preferred stock dividends, partially offset by a reversal of corporate allocated severance costs. The following is a detailed discussion of the variance drivers by line item.

Operating Expenses. The decrease was primarily driven by the deferral of 2018 corporate allocated severance costs due to the partial settlement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case.

Other Income and Expenses, net. The variance was primarily due to lower returns on investments that fund certain employee benefit obligations as well as lower Bison investment income.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by a decrease in pretax losses.

Preferred Dividends. The variance was driven by the declaration of preferred stock dividends on preferred stock issued in 2019.

Matters Impacting Future Other Results

The COVID-19 pandemic has not had a material impact on Other as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Other results of operations, financial position and cash flows in the future. Other will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

DUKE ENERGY CAROLINAS

Results of Operations

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	$ **1,748**	$ 1,744	$ 4
Operating Expenses			
Fuel used in electric generation and purchased power	**453**	472	(19)
Operation, maintenance and other	**386**	440	(54)
Depreciation and amortization	**343**	317	26
Property and other taxes	**81**	80	1
Impairment charges	**2**	—	2
Total operating expenses	**1,265**	1,309	(44)
Gains on Sales of Other Assets and Other, net	**1**	—	1
Operating Income	**484**	435	49
Other Income and Expenses, net	**43**	31	12
Interest Expense	**123**	110	13
Income Before Income Taxes	**404**	356	48
Income Tax Expense	**65**	63	2
Net Income	$ **339**	$ 293	$ 46

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	**2020**
Residential sales	(5.1)%
General service sales	(0.1)%
Industrial sales	(1.2)%
Wholesale power sales	(3.0)%
Joint dispatch sales	(54.0)%
Total sales	(2.7)%
Average number of customers	1.8 %

Three Months Ended March 31, 2020, as compared to March 31, 2019

Operating Revenues. The variance was driven primarily by:

- a $23 million increase in weather-normal retail sales volumes; and
- an $11 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers.

Partially offset by:

- a $26 million decrease in retail sales due to unfavorable weather in the current year.

***Operating Expenses*.** The variance was driven primarily by:

- a $54 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, partially offset by higher storm restoration costs; and
- a $19 million decrease in fuel used in electric generation and purchased power primarily due to changes in the generation mix.

Partially offset by:

- a $26 million increase in depreciation and amortization expense primarily due to additional plant in service and new depreciation rates associated with the South Carolina rate case.

Other Income and Expenses, net. The variance was primarily due to higher AFUDC equity in the current year.

Interest Expense. The variance was primarily due to higher debt outstanding in the current year.

Matters Impacting Future Results

The COVID-19 pandemic has not had a material impact on Duke Energy Carolinas as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Duke Energy Carolinas results of operations, financial position and cash flows in the future. Duke Energy Carolinas will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Duke Energy Carolinas customers, suppliers and partners and could cause Duke Energy Carolinas to experience an increase in certain costs, such as bad debt, and a reduction in the demand for energy. Duke Energy Carolinas also has pending rate case proceedings that have been delayed. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

On December 31, 2019, Duke Energy Carolinas entered into a settlement agreement with NCDEQ and certain community groups under which Duke Energy Carolinas agreed to excavate five of the six remaining coal ash basins in North Carolina with ash moved to on-site lined landfills. At the one remaining basin, uncapped basin ash will be excavated and moved to lined landfills. An order from regulatory authorities disallowing recovery of costs related to closure of these ash basins could have an adverse impact on Duke Energy Carolinas' results of operations, financial position and cash flows.

Duke Energy Carolinas filed a general rate case with the NCUC on September 30, 2019. The outcome of this rate case could materially impact Duke Energy Carolina's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

On June 22, 2018, Duke Energy Carolinas received an order from the NCUC, which denied the Grid Rider Stipulation and deferral treatment of grid improvement costs. Duke Energy Carolinas has petitioned for deferral of future grid improvement costs in its 2019 rate case. Duke Energy Carolinas' results of operations, financial position and cash flows could be adversely impacted if grid improvement costs are not ultimately approved for recovery and/or deferral treatment.

Duke Energy Carolinas' service territory was impacted by several named storms in 2018. Hurricane Florence, Hurricane Michael and Winter Storm Diego caused flooding, extensive damage and widespread power outages in the service territory. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the future recovery of storm restoration costs could have an adverse impact on Duke Energy Carolinas' results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

On May 21, 2019, the PSCSC issued an order granting Duke Energy Carolinas request for a retail rate increase but denying recovery of certain coal ash costs. Duke Energy Carolinas has appealed this decision to the South Carolina Supreme Court and that appeal is pending. Duke Energy Carolinas' results of operations, financial position and cash flows could be adversely impacted if coal ash costs are not ultimately approved for recovery. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Duke Energy Registrants' Annual Reports on Form 10-K for the year ended December 31, 2019, for discussion of risks associated with the Tax Act.

PROGRESS ENERGY

Results of Operations

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	$ **2,422**	$ 2,572	$ (150)
Operating Expenses			
Fuel used in electric generation and purchased power	**763**	925	(162)
Operation, maintenance and other	**554**	567	(13)
Depreciation and amortization	**452**	455	(3)
Property and other taxes	**135**	137	(2)
Total operating expenses	**1,904**	2,084	(180)
Losses on Sales of Other Assets and Other, net	**(1)**	—	(1)
Operating Income	**517**	488	29
Other Income and Expenses, net	**32**	31	1
Interest Expense	**206**	219	(13)
Income Before Income Taxes	**343**	300	43
Income Tax Expense	**60**	52	8
Net Income	**283**	248	35
Less: Net Loss Attributable to Noncontrolling Interests	**—**	(1)	1
Net Income Attributable to Parent	$ **283**	$ 249	$ 34

Three Months Ended March 31, 2020, as compared to March 31, 2019

Operating Revenues. The variance was driven primarily by:

- a $160 million decrease in fuel cost recovery driven by lower fuel prices and volumes as well as less Duke Energy Progress native load transfer sales in the current year;
- a $16 million decrease in wholesale power revenues, net of fuel, primarily due to coal ash cost recovery in the prior year at Duke Energy Progress, partially offset by increased demand at Duke Energy Florida;
- a $15 million decrease in rider revenues primarily due to the Crystal River 3 Uprate regulatory asset being fully recovered in 2019 at Duke Energy Florida; and
- a $7 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year at Duke Energy Progress, partially offset by favorable weather in the current year at Duke Energy Florida.

Partially offset by:

- a $17 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment at Duke Energy Florida;
- a $12 million increase in storm revenues due to Hurricane Dorian collections at Duke Energy Florida;
- a $10 million increase in other revenues primarily due to increased transmission revenues at Duke Energy Florida; and
- an $8 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers at Duke Energy Progress.

Operating Expenses. The variance was driven primarily by:

- a $162 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix at Duke Energy Progress and lower fuel costs, net of deferrals at Duke Energy Florida; and
- a $13 million decrease in operation, maintenance and other expense at Duke Energy Progress primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, partially offset by storm cost amortizations and employee benefits at Duke Energy Florida.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt at Duke Energy Progress.

Income Tax Expense. The increase in tax expense was primarily due to an increase in pretax income.

Matters Impacting Future Results

The COVID-19 pandemic has not had a material impact on Progress Energy as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Progress Energy results of operations, financial position and cash flows in the future. Progress Energy will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Progress Energy customers, suppliers and partners and could cause Progress Energy to experience an increase in certain costs, such as bad debt, and a reduction in the demand for energy. Progress Energy also has various pending rate case proceedings that have been delayed. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

On December 31, 2019, Duke Energy Progress entered into a settlement agreement with NCDEQ and certain community groups under which Duke Energy Progress agreed to excavate two of the three remaining coal ash basins in North Carolina with ash moved to on-site lined landfills. At the one remaining basin, uncapped basin ash will be excavated and moved to lined landfills. An order from regulatory authorities disallowing recovery of costs related to closure of these ash basins could have an adverse impact on Duke Energy Progress' results of operations, financial position and cash flows.

Duke Energy Progress filed a general rate case with the NCUC on October 30, 2019. The outcome of this rate case could materially impact Progress Energy's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

Duke Energy Progress has petitioned for deferral of future grid improvement costs in its 2019 rate case. Progress Energy's results of operations, financial position and cash flows could be adversely impacted if grid improvement costs are not ultimately approved for recovery and/or deferral treatment.

Duke Energy Progress and Duke Energy Florida's service territories were impacted by several named storms in 2018. Hurricane Florence, Hurricane Michael and Winter Storm Diego caused flooding, extensive damage and widespread power outages to the service territory of Duke Energy Progress. Duke Energy Florida's service territory was also impacted by Hurricane Michael, a Category 5 hurricane and the most powerful storm to hit the Florida Panhandle in recorded history. In September 2019, Hurricane Dorian impacted Duke Energy Progress' and Duke Energy Florida's service territories. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the deferral and future recovery of storm restoration costs could have an adverse impact on Progress Energy's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

On May 21, 2019, the PSCSC issued an order granting Duke Energy Progress' request for a retail rate increase but denying recovery of certain coal ash costs. Duke Energy Progress has appealed this decision to the South Carolina Supreme Court and that appeal is pending. Progress Energy's results of operations, financial position and cash flows could be adversely impacted if coal ash costs are not ultimately approved for recovery. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Duke Energy Registrants' Annual Reports on Form 10-K for the year ended December 31, 2019, for discussion of risks associated with the Tax Act.

DUKE ENERGY PROGRESS

Results of Operations

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 1,338**	$ 1,484	$ (146)
Operating Expenses			
Fuel used in electric generation and purchased power	**405**	515	(110)
Operation, maintenance and other	**305**	335	(30)
Depreciation and amortization	**287**	290	(3)
Property and other taxes	**47**	44	3
Total operating expenses	**1,044**	1,184	(140)
Losses on Sales of Other Assets and Other, net	**(1)**	—	(1)
Operating Income	**293**	300	(7)
Other Income and Expenses, net	**22**	24	(2)
Interest Expense	**69**	77	(8)
Income Before Income Taxes	**246**	247	(1)
Income Tax Expense	**42**	44	(2)
Net Income	**$ 204**	$ 203	$ 1

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior period	**2020**
Residential sales	(5.7)%
General service sales	(1.9)%
Industrial sales	(0.2)%
Wholesale power sales	(7.4)%
Joint dispatch sales	(0.5)%
Total sales	(4.1)%
Average number of customers	1.4 %

Three Months Ended March 31, 2020, as compared to March 31, 2019

Operating Revenues. The variance was driven primarily by:

- a $109 million decrease in fuel cost recovery driven by lower fuel prices and volumes as well as less native load transfer sales in the current year;
- a $24 million decrease in retail sales due to unfavorable weather in the current year; and
- a $23 million decrease in wholesale power revenues, net of fuel, primarily due to coal ash cost recovery in the prior year.

Partially Offset by:

- an $8 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $110 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix; and
- a $30 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt.

Matters Impacting Future Results

The COVID-19 pandemic has not had a material impact on Duke Energy Progress as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Duke Energy Progress results of operations, financial position and cash flows in the future. Duke Energy Progress will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Duke Energy Progress customers, suppliers and partners and could cause Duke Energy Progress to experience an increase in certain costs, such as bad debt, and a reduction in the demand for energy. Duke Energy Progress also has pending rate case proceedings that have been delayed. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

On December 31, 2019, Duke Energy Progress entered into a settlement agreement with NCDEQ and certain community groups under which Duke Energy Progress agreed to excavate two of the three remaining coal ash basins in North Carolina with ash moved to on-site lined landfills. At the one remaining basin, uncapped basin ash will be excavated and moved to lined landfills. An order from regulatory authorities disallowing recovery of costs related to closure of these ash basins could have an adverse impact on Duke Energy Progress' results of operations, financial position and cash flows.

Duke Energy Progress filed a general rate case with the NCUC on October 30, 2019. The outcome of this rate case could materially impact Duke Energy Progress' results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

On May 21, 2019, the PSCSC issued an order granting Duke Energy Progress' request for a retail rate increase but denying recovery of certain coal ash costs. Duke Energy Progress has appealed this decision to the South Carolina Supreme Court and that appeal is pending. Duke Energy Progress' results of operations, financial position and cash flows could be adversely impacted if coal ash costs are not ultimately approved for recovery. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

Duke Energy Progress has petitioned for deferral of future grid improvement costs in its 2019 rate case. Duke Energy Progress' results of operations, financial position and cash flows could be adversely impacted if grid improvement costs are not ultimately approved for recovery and/or deferral treatment.

Duke Energy Progress' service territory was impacted by several named storms in 2018. Hurricane Florence, Hurricane Michael and Winter Storm Diego caused flooding, extensive damage and widespread power outages in the service territory. In September 2019, Hurricane Dorian reached the Carolinas bringing high winds, tornadoes and heavy rain, impacting about 300,000 customers within the service territory. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the deferral and future recovery of storm restoration costs could have an adverse impact on Duke Energy Progress' results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Duke Energy Registrants' Annual Reports on Form 10-K for the year ended December 31, 2019, for discussion of risks associated with the Tax Act.

DUKE ENERGY FLORIDA

Results of Operations

	Three Months Ended March 31,		
(in millions)	2020	2019	Variance
Operating Revenues	**$ 1,080**	$ 1,086	$ (6)
Operating Expenses			
Fuel used in electric generation and purchased power	**358**	410	(52)
Operation, maintenance and other	**245**	230	15
Depreciation and amortization	**165**	165	—
Property and other taxes	**88**	93	(5)
Total operating expenses	**856**	898	(42)
Operating Income	**224**	188	36
Other Income and Expenses, net	**10**	13	(3)
Interest Expense	**84**	82	2
Income Before Income Taxes	**150**	119	31
Income Tax Expense	**30**	23	7
Net Income	**$ 120**	$ 96	$ 24

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Wholesale power sales include both billed and unbilled sales. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior period	2020
Residential sales	(3.7)%
General service sales	0.4 %
Industrial sales	13.6 %
Wholesale and other	(18.0)%
Total sales	3.6 %
Average number of customers	1.5 %

Three Months Ended March 31, 2020, as compared to March 31, 2019

Operating Revenues. The variance was driven primarily by:

- a $51 million decrease in fuel revenues primarily due to a decrease in fuel rates billed to retail customers; and
- a $15 million decrease in rider revenue requirements primarily due to the Crystal River 3 Uprate regulatory asset being fully recovered in 2019.

Partially offset by:

- a $17 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment;
- a $17 million increase in retail sales, net of fuel revenues, due to favorable weather in the current year;
- a $12 million increase in storm revenues due to Hurricane Dorian collections;
- a $10 million increase in other revenues primarily due to increased transmission revenues; and
- a $7 million increase in wholesale power revenues, net of fuel, primarily due to increased demand.

Operating Expenses. The variance was driven primarily by:

- a $52 million decrease in fuel used in electric generation and purchased power primarily due to lower fuel costs, net of deferrals.

Partially offset by:

- a $15 million increase in operation, maintenance and other expense primarily due to storm cost amortizations and employee benefits.

Income Tax Expense. The increase in tax expense was primarily due to an increase in pretax income.

Matters Impacting Future Results

The COVID-19 pandemic has not had a material impact on Duke Energy Florida as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Duke Energy Florida results of operations, financial position and cash flows in the future. Duke Energy Florida will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Duke Energy Florida customers, suppliers and partners and could cause Duke Energy Florida to experience an increase in certain costs, such as bad debt, and a reduction in the demand for energy. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

On October 10, 2018, Hurricane Michael made landfall on Florida's Panhandle as a Category 5 hurricane, the most powerful storm to hit the Florida Panhandle in recorded history. The storm caused significant damage within the service territory of Duke Energy Florida, particularly from Panama City Beach to Mexico Beach. In September 2019, Duke Energy Florida's service territory was threatened by Hurricane Dorian with landfall as a possible Category 5 hurricane and therefore Duke Energy Florida incurred costs to secure necessary resources to be prepared for that potential impact. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the future recovery of storm restoration costs could have an adverse impact on Duke Energy Florida's financial position, results of operations and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, “Regulatory Matters,” for additional information.

DUKE ENERGY OHIO

Results of Operations

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues			
Regulated electric	$ 346	$ 355	$ (9)
Regulated natural gas	152	176	(24)
Total operating revenues	498	531	(33)
Operating Expenses			
Fuel used in electric generation and purchased power	87	93	(6)
Cost of natural gas	37	54	(17)
Operation, maintenance and other	123	132	(9)
Depreciation and amortization	68	64	4
Property and other taxes	83	84	(1)
Total operating expenses	398	427	(29)
Operating Income	100	104	(4)
Other Income and Expenses, net	3	9	(6)
Interest Expense	24	30	(6)
Income Before Income Taxes	79	83	(4)
Income Tax Expense	14	14	—
Net Income	$ 65	$ 69	$ (4)

The following table shows the percent changes in GWh sales of electricity, dekatherms of natural gas delivered and average number of electric and natural gas customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

	Electric	Natural Gas
Increase (Decrease) over prior year	**2020**	**2020**
Residential sales	(9.2)%	(16.1)%
General service sales	(3.4)%	(13.9)%
Industrial sales	(2.1)%	(2.5)%
Wholesale electric power sales	(33.1)%	n/a
Other natural gas sales	n/a	(1.9)%
Total sales	(5.5)%	(12.3)%
Average number of customers	0.8 %	0.6 %

Three Months Ended March 31, 2020, as compared to March 31, 2019

Operating Revenues. The variance was driven primarily by:

- a $28 million decrease in fuel related revenues primarily due to lower natural gas prices as well as decreased volumes;
- a $10 million decrease due to unfavorable weather in the current year; and
- a $5 million decrease in other revenues due to lower OVEC sales into PJM.

Partially offset by:

- a $5 million increase in retail pricing primarily due to gas rate case impacts in Kentucky; and
- a $4 million increase in rider revenues primarily related to the Distribution Capital Investment rider as a result of additional investments and the new Legacy Generation Riders arising from Ohio HB6, which provide an alternative method of recovering OVEC losses, partially offset by decreased Energy Efficiency Rider Revenue.

Operating Expenses. The variance was driven primarily by:

- a $23 million decrease in fuel expense, primarily driven by lower natural gas prices; and
- a $9 million decrease in operations, maintenance and other expense primarily due to the timing of training and inspection programs for Customer Delivery and Customer Solutions as well as lower storm costs.

Partially offset by:

- a $4 million increase in depreciation and amortization primarily driven by an increase in distribution plant.

Other Income and Expenses, net. The variance was primarily due to lower intercompany interest income due to decreased borrowing and lower AFUDC equity.

Interest Expense. The variance was primarily driven by lower debt outstanding in the current year and lower post in-service carrying costs, partially offset by higher intercompany interest expense due to increased borrowing.

Matters Impacting Future Results

The COVID-19 pandemic has not had a material impact on Duke Energy Ohio as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Duke Energy Ohio results of operations, financial position and cash flows in the future. Duke Energy Ohio will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Duke Energy Ohio customers, suppliers and partners and could cause Duke Energy Ohio to experience an increase in certain costs, such as bad debt, and a reduction in the demand for energy. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

On November 13, 2013, the PUCO issued an order authorizing recovery of MGP costs at certain sites in Ohio with a deadline to complete the MGP environmental investigation and remediation work prior to December 31, 2016. This deadline was subsequently extended to December 31, 2019. Duke Energy Ohio has filed a request for extension of the deadline. A hearing on that request has not been scheduled. Disallowance of costs incurred, failure to complete the work by the deadline or failure to obtain an extension from the PUCO could result in an adverse impact on Duke Energy Ohio's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

DUKE ENERGY INDIANA

Results of Operations

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 692**	$ 768	$ (76)
Operating Expenses			
Fuel used in electric generation and purchased power	**194**	257	(63)
Operation, maintenance and other	**186**	189	(3)
Depreciation and amortization	**132**	131	1
Property and other taxes	**22**	19	3
Total operating expenses	**534**	596	(62)
Losses on Sales of Other Assets and Other, net	**—**	(3)	3
Operating Income	**158**	169	(11)
Other Income and Expenses, net	**10**	19	(9)
Interest Expense	**43**	43	—
Income Before Income Taxes	**125**	145	(20)
Income Tax Expense	**26**	35	(9)
Net Income	**$ 99**	$ 110	$ (11)

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	**2020**
Residential sales	(10.0)%
General service sales	(4.8)%
Industrial sales	(2.6)%
Wholesale power sales	1.8 %
Total sales	(5.3)%
Average number of customers	1.1 %

Three Months Ended March 31, 2020, as compared to March 31, 2019

Operating Revenues. The variance was driven primarily by:

- a $58 million decrease in fuel revenues primarily due to lower cost of fuel and unseasonably milder weather;
- a $9 million decrease in retail sales due to unfavorable weather in the current year; and
- an $8 million decrease in rider revenues primarily related to lower Edwardsport IGCC sales volumes.

Operating Expenses. The variance was driven primarily by:

- a $63 million decrease in fuel used in electric generation and purchased power expense primarily due to lower coal and natural gas costs and lower amortization of deferred fuel costs, partially offset by higher purchased power expense.

Other Income and Expenses, net. The decrease was primarily due to life insurance proceeds received in the prior year.

Income Tax Expense. The decrease in income tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

Matters Impacting Future Results

The COVID-19 pandemic has not had a material impact on Duke Energy Indiana as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Duke Energy Indiana results of operations, financial position and cash flows in the future. Duke Energy Indiana will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Duke Energy Indiana customers, suppliers and partners and could cause Duke Energy Indiana to experience an increase in certain costs, such as bad debt, and a reduction in the demand for energy. Duke Energy Indiana also has a pending rate case proceeding that could be delayed. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

Duke Energy Indiana filed a general rate case with the IURC on July 2, 2019, its first general rate case in 16 years. The outcome of this rate case could materially impact Duke Energy Indiana's results of operations, financial position and cash flows. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

On April 17, 2015, the EPA published in the Federal Register a rule to regulate the disposal of CCR from electric utilities as solid waste. Duke Energy Indiana has interpreted the rule to identify the coal ash basin sites impacted and has assessed the amounts of coal ash subject to the rule and a method of compliance. Duke Energy Indiana's interpretation of the requirements of the CCR rule is subject to potential legal challenges and further regulatory approvals, which could result in additional ash basin closure requirements, higher costs of compliance and greater AROs. Additionally, Duke Energy Indiana has retired facilities that are not subject to the CCR rule. Duke Energy Indiana may incur costs at these facilities to comply with environmental regulations or to mitigate risks associated with on-site storage of coal ash. An order from regulatory authorities disallowing recovery of costs related to closure of ash basins could have an adverse impact on Duke Energy Indiana's results of operations, financial position and cash flows.

PIEDMONT

Results of Operations

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 512**	$ 579	$ (67)
Operating Expenses			
Cost of natural gas	**162**	273	(111)
Operation, maintenance and other	**80**	80	—
Depreciation and amortization	**45**	42	3
Property and other taxes	**12**	12	—
Total operating expenses	**299**	407	(108)
Operating Income	**213**	172	41
Other Income and Expenses, net	**12**	6	6
Interest Expense	**27**	22	5
Income Before Income Taxes	**198**	156	42
Income Tax Expense	**20**	34	(14)
Net Income	**$ 178**	$ 122	$ 56

The following table shows the percent changes in dekatherms delivered and average number of customers. The percentages for all throughput deliveries represent billed and unbilled sales. Amounts are not weather-normalized.

Increase (Decrease) over prior year	2020
Residential deliveries	(13.1)%
Commercial deliveries	(12.4)%
Industrial deliveries	(2.1)%
Power generation deliveries	5.8 %
For resale	(23.7)%
Total throughput deliveries	(2.1)%
Secondary market volumes	(26.3)%
Average number of customers	1.4 %

Due to the margin decoupling mechanism in North Carolina and the weather normalization adjustment (WNA) mechanisms in South Carolina and Tennessee and fixed-price contracts with most power generation customers, changes in throughput deliveries do not have a material impact on Piedmont's revenues or earnings. The margin decoupling mechanism adjusts for variations in residential and commercial use per customer, including those due to weather and conservation. The WNA mechanisms mostly offset the impact of weather on bills rendered, but do not ensure full recovery of approved margin during periods when winter weather is significantly warmer or colder than normal.

Three Months Ended March 31, 2020, as compared to March 31, 2019

Operating Revenues. The variance was driven primarily by:

- a $111 million decrease due to lower natural gas costs passed through to customers;
- a $20 million decrease due to return of EDIT to customers; and
- a $7 million decrease due to NCUC approval related to tax reform accounting from fixed-rate contracts in the prior year.

Partially offset by:

- a $53 million increase due to North Carolina base rate case increases; and
- a $12 million increase due to North Carolina IMR increases.

Operating Expenses. The variance was driven primarily by:

- a $111 million decrease in cost of natural gas due to lower natural gas prices.

Income Tax Expense. The decrease in income tax expense was primarily due to an increase in the amortization of excess deferred taxes, partially offset by an increase in pretax income.

Matters Impacting Future Results

The COVID-19 pandemic has not had a material impact on Piedmont as of March 31, 2020; however, we cannot predict the extent to which the COVID-19 pandemic will impact Piedmont results of operations, financial position and cash flows in the future. Piedmont will continue to actively monitor the impacts of COVID-19 including the potential economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown could adversely affect Piedmont customers, suppliers and partners and could cause Piedmont to experience an increase in certain costs, such as bad debt. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Cash

Duke Energy relies primarily upon cash flows from operations, debt and equity issuances and its existing cash and cash equivalents to fund its liquidity and capital requirements. Duke Energy's capital requirements arise primarily from capital and investment expenditures, repaying long-term debt and paying dividends to shareholders. Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019, included a summary and detailed discussion of projected primary sources and uses of cash for 2020 to 2022.

In March 2020, capital markets experienced significant liquidity challenges as a result of the ongoing uncertainty around the economic impacts from COVID-19. Investor demand for liquidity and cash holdings created substantial volatility, particularly in the short-term commercial paper market. As such, issuers of commercial paper experienced difficulties issuing commercial paper for longer duration at competitive interest rates. During March 2020 and in response to market volatility and the ongoing economic uncertainty related to COVID-19, Duke Energy took several actions to enhance the Company's liquidity position including:

- Duke Energy drew down the remaining $500 million of availability under the existing $1 billion Three-Year Revolving Credit Facility; and
- Duke Energy entered into and borrowed the full amount under a $1.5 billion, 364-day Term Loan Credit Agreement. The Term Loan Credit Agreement contains a provision for additional borrowing capacity of $500 million. Duke Energy exercised the provision and borrowed an additional $188 million, for a total borrowing of approximately $1.7 billion.

As of March 31, 2020, Duke Energy had approximately $1.5 billion of cash on hand and $4.8 billion available under its $8 billion Master Credit Facility. Duke Energy has additional liquidity available totaling approximately $2.6 billion under outstanding equity forward agreements. Duke Energy expects to have sufficient liquidity in the form of cash on hand, cash from operations and available credit capacity to support its funding needs. Duke Energy continues to monitor access to credit and equity markets.

In addition to the $500 million draw under the Three-Year Revolving Credit Facility and $1.7 billion of incremental borrowings under the new 364-day Term Loan Credit Agreement, Duke Energy also issued approximately $1.5 billion of debt and raised $67 million of common equity through its dividend reinvestment program during the three months ended March 31, 2020. Refer to Notes 5 and 13 to the Condensed Consolidated Financial Statements, "Debt and Credit Facilities" and "Stockholders' Equity," respectively, for information regarding Duke Energy's debt and equity issuances, debt maturities and available credit facilities including the Master Credit Facility.

In light of the COVID-19 pandemic, Duke Energy currently does not expect significant changes to the projected capital and investment expenditures provided in the Form 10-K for the year ended December 31, 2019. However, Duke Energy will continue to reassess capital projects depending on the duration and severity of economic impacts caused by the pandemic.

Cash Flow Information

The following table summarizes Duke Energy's cash flows.

	Three Months Ended March 31,	
(in millions)	**2020**	**2019**
Cash flows provided by (used in):		
Operating activities	**$ 1,554**	$ 1,239
Investing activities	**(3,022)**	(2,713)
Financing activities	**2,593**	1,433
Net increase (decrease) in cash, cash equivalents and restricted cash	**1,125**	(41)
Cash, cash equivalents and restricted cash at beginning of period	**573**	591
Cash, cash equivalents and restricted cash at end of period	**$ 1,698**	$ 550

OPERATING CASH FLOWS

The following table summarizes key components of Duke Energy's operating cash flows.

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Net income	**$ 890**	$ 893	$ (3)
Non-cash adjustments to net income	**1,627**	1,299	328
Payments for asset retirement obligations	**(132)**	(152)	20
Working capital	**(831)**	(801)	(30)
Net cash provided by operating activities	**$ 1,554**	$ 1,239	$ 315

The variance was primarily due to timing of payments of property taxes, higher Nuclear Electric Insurance Limited (NEIL) refunds in the current year and lower storm costs in the current year.

INVESTING CASH FLOWS

The following table summarizes key components of Duke Energy's investing cash flows.

	Three Months Ended March 31,		
(in millions)	**2020**	**2019**	**Variance**
Capital, investment and acquisition expenditures	**$ (2,909)**	$ (2,630)	$ (279)
Other investing items	**(113)**	(83)	(30)
Net cash used in investing activities	**$ (3,022)**	$ (2,713)	$ (309)

The variance relates to an increase in capital expenditures due to higher overall investments primarily in the Commercial Renewables segment.

FINANCING CASH FLOWS

The following table summarizes key components of Duke Energy's financing cash flows.

	Three Months Ended March 31,		
(in millions)	2020	2019	Variance
Issuances of long-term debt, net	$ 1,662	$ 1,536	$ 126
Issuances of common stock	40	13	27
Issuances of preferred stock	—	974	(974)
Notes payable, commercial paper and other short-term borrowings	1,569	(408)	1,977
Dividends paid	(707)	(649)	(58)
Contributions from noncontrolling interests	103	6	97
Other financing items	(74)	(39)	(35)
Net cash provided by financing activities	$ 2,593	$ 1,433	$ 1,160

The variance was primarily due to:

- a $1,977 million increase in net proceeds from issuances of notes payable and commercial paper primarily due to borrowings of $1.7 billion under the 364-day Term Loan Credit Agreement.

Partially offset by:

- a $974 million decrease in proceeds from the issuance of preferred stock.

OTHER MATTERS

Environmental Regulations

The Duke Energy Registrants are subject to federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal, coal ash and other environmental matters. These regulations can be changed from time to time and result in new obligations of the Duke Energy Registrants. Refer to Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for further information regarding potential plant retirements and regulatory filings related to the Duke Energy Registrants.

Off-Balance Sheet Arrangements

During the three months ended March 31, 2020, there were no material changes to Duke Energy's off-balance sheet arrangements. See Note 11 – Variable Interest Entities and Note 13 – Stockholders' Equity to the Condensed Consolidated Financial Statements for information regarding ACP and equity forward sales agreements. For additional information on Duke Energy's off-balance sheet arrangements, see "Off-Balance Sheet Arrangements" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

Contractual Obligations

Duke Energy enters into contracts that require payment of cash at certain specified periods, based on certain specified minimum quantities and prices. During the three months ended March 31, 2020, there were no material changes in Duke Energy's contractual obligations. For an in-depth discussion of Duke Energy's contractual obligations, see "Contractual Obligations" and "Quantitative and Qualitative Disclosures about Market Risk" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For an in-depth discussion of the Duke Energy Registrants' market risks, see "Quantitative and Qualitative Disclosures about Market Risk" in Item 7 of the Annual Report on Form 10-K for the Duke Energy Registrants. During the three months ended March 31, 2020, there were no material changes to the Duke Energy Registrants' disclosures about market risk, other than as described below.

Credit Risk

In response to the COVID-19 pandemic, in March 2020, the Duke Energy Subsidiary Registrants announced a suspension of disconnections for nonpayment to be effective throughout the national emergency. This is expected to result in an increase in charge-offs over historical levels. In addition, the Registrants are monitoring the effects of the resultant economic slowdown on counterparties' abilities to perform under their contractual obligations.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified by the SEC rules and forms.

Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated the effectiveness of their disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2020, and, based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are effective in providing reasonable assurance of compliance.

Changes in Internal Control over Financial Reporting

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated changes in internal control over financial reporting (as such term is defined in Rules 13a-15 and 15d-15 under the Exchange Act) that occurred during the fiscal quarter ended March 31, 2020, and have concluded no change has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

ITEM 1. LEGAL PROCEEDINGS

For information regarding material legal proceedings, including regulatory and environmental matters, see Note 3, "Regulatory Matters," and Note 4, "Commitments and Contingencies," to the Condensed Consolidated Financial Statements. For additional information, see Item 3, "Legal Proceedings," in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, careful consideration should be given to the factors discussed in Part I, “Item 1A. Risk Factors” in the Duke Energy Registrants' Annual Report on Form 10-K for the year ended December 31, 2019, which could materially affect the Duke Energy Registrants’ financial condition or future results. As described in the Duke Energy Form 8-K Filing on May 8, 2020, the information presented below updates, and should be read in conjunction with, the risk factors and information disclosed in the Annual Report on Form 10-K for the year ended December 31, 2019.

The Duke Energy Registrants’ operations have been and may be affected by COVID-19 in ways listed below and in ways the registrants cannot predict at this time.

The COVID-19 pandemic has begun to impact the Duke Energy Registrants' business strategy, results of operations, financial position and cash flows, albeit not materially as of this filing date, from specific activities listed below:

- Decreased demand for electricity and natural gas;
- Delays in rate cases and other legal proceedings; and
- The health and availability of our critical personnel and their ability to perform business functions.

Furthermore, due to the unpredictability of the COVID-19 pandemic’s ongoing impact on global health and economic stability as of this filing date, the Duke Energy Registrants expect that the activities listed below could negatively impact their business strategy, results of operations, financial position and cash flows:

- An inability to procure satisfactory levels of fuels or other necessary equipment to continue production of electricity and delivery of natural gas;
- An inability to obtain labor or equipment necessary for the construction of generation projects or pipeline expansion;
- An inability to maintain information technology systems and protections from cyberattack;
- An inability to obtain financing in volatile financial markets;
- Additional federal regulation tied to stimulus and other aid packages;
- Impairment charges to certain assets, including goodwill; and
- Actions of state utility commissions or federal or state governments to allow customers to suspend or delay payment of bills related to the provision of electric or gas services.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 6. EXHIBITS

Exhibits filed herein are designated by an asterisk (*). All exhibits not so designated are incorporated by reference to a prior filing, as indicated. Items constituting management contracts or compensatory plans or arrangements are designated by a double asterisk (**). The company agrees to furnish upon request to the commission a copy of any omitted schedules or exhibits upon request on all items designated by a triple asterisk (***).

Exhibit 10.4

PERFORMANCE AWARD AGREEMENT

Duke Energy Corporation (the "Corporation") grants to the individual named below ("Grantee"), in accordance with the terms of the Duke Energy Corporation 2015 Long-Term Incentive Plan, as it may be amended from time to time (the "Plan") and this Performance Award Agreement (the "Agreement"), the following number of Performance Shares (the "Award"), on the Date of Grant set forth below:

Name of Grantee: ________________________________

Target # of Performance Shares: ________________________________

Date of Grant: ________________________________

Performance Period: The three-year period commencing on January 1 of the year in which the Date of Grant occurs

Section 1. *Nature of Performance Shares*. Each Performance Share, upon becoming vested, represents a right to receive payment in the form of one (1) share of Common Stock (a "Share"). Performance Shares are used solely as units of measurement and are not Shares, and Grantee is not, and has no rights as, a shareholder of the Corporation by virtue of this Award.

Section 2. *Vesting of Performance Shares.* Subject to Section 3 and 6 below, the Performance Shares shall vest as follows:

(a) The Performance Shares shall vest only if and to the extent the Committee determines that the Performance Goals (as defined in Exhibit A) have been met for the Performance Period set forth above.

(b) In general, Grantee must be employed by the Corporation or a Subsidiary on the last day of the Performance Period to be entitled to payment of any Performance Shares earned under Section 2(a) above. However, Grantee shall be entitled to a pro-rated portion of the Performance Shares earned under Section 2(a) above in the event that, during the Performance Period (i) Grantee ceases to be employed with the Corporation and its Subsidiaries by reason of death or Disability (defined by reference Section 22(e)(3) of the Code), (ii) the Corporation and its Subsidiaries terminate Grantee's employment other than for cause (as determined by the Corporation in its sole discretion), or (iii) Grantee voluntarily terminates employment with the Corporation and its Subsidiaries after having attained age 55 and completed 10 years of consecutive service from Grantee’s most recent date of hire or re-hire, as applicable (as determined under such rules as may be established by the Corporation from time-to-time). The pro-rated portion of the Performance Shares that becomes payable under this Section 2(b), if any, shall be determined by the Committee or its delegate, in its sole discretion, based upon Grantee's continuous employment with the Corporation and its Subsidiaries during the Performance Period (including additional service credit provided to Grantee, if any, under an employment or change in control agreement with the Corporation or a Subsidiary, or a severance plan maintained by the Corporation or a Subsidiary, as applicable). Notwithstanding the foregoing provisions, Grantee shall be entitled to all (rather than a pro-rated portion) of the Performance Shares earned under Section 2(a) above in the event that, during the Performance Period, Grantee voluntarily terminates employment with the Corporation and its Subsidiaries after having attained age 60 and completed five years of consecutive service from Grantee's most recent date of hire or re-hire, as applicable (as determined under such rules as may be established by the Corporation from time-to-time), but only if such voluntary termination occurs following the completion of the first year of the Performance Period.

(c) For purposes of Section 2 of this Agreement, the continuous employment of Grantee with the Corporation and its Subsidiaries shall not be deemed to have been interrupted, and Grantee shall not be deemed to have ceased to be an employee, by reason of the transfer of his or her employment among the Corporation and its Subsidiaries or a leave of absence approved by the Corporation or a Subsidiary; provided that, to the extent permitted under applicable law, the Corporation shall pro-rate the payout of any Performance Shares earned in the event Grantee is on an approved but unpaid leave of absence during the Performance Period, based upon the portion of the Performance Period during which Grantee received payment of salary (as determined under such rules as may be established by the Corporation from time-to-time).

Section 3. <u>*Forfeiture*</u>. The Performance Shares (including without limitation any right to accumulated Dividend Equivalents described in Section 5 hereof) shall be forfeited automatically without further action or notice if (a) Grantee ceases to be employed by the Corporation or a Subsidiary prior to the last day of the Performance Period other than as provided in Section 2(b), or (b) the Committee or its delegate, in its sole discretion, determines that Grantee is in violation of any obligation identified in Section 6. Grantee acknowledges and agrees that payments made under this Agreement are subject to the Corporation's requirement that the Grantee reimburse the portion of any payment where such portion of the payment was (i) inadvertently paid based on an incorrect calculation, or (ii) predicated upon the achievement of financial results that are subsequently the subject of a restatement caused or partially caused by Grantee's fraud or misconduct.

Section 4. <u>*Payment of Performance Shares*</u>. Payment of the Performance Shares earned under Section 2 above shall be made to Grantee by March 15 of the calendar year immediately following the end of the Performance Period, except to the extent deferred by Grantee in accordance with procedures as the Committee, or its delegate, may prescribe from time to time. Payment of vested Performance Shares shall be in the form of one (1) Share for each full Performance Share earned; provided that if payment would be less than ten (10) Shares, or if payment would result in fractional shares, then, if so determined by the Committee or its delegate, in its sole discretion, payment may be made in cash in lieu of Shares.

Section 5. Dividend Equivalents. Upon payment of a Performance Share, Grantee shall be entitled to a cash payment (without interest) equal to the aggregate cash dividends declared and payable with respect to one (1) Share for each record date that occurs during the period beginning on the Date of Grant and ending on the date the Performance Share is paid (the "Dividend Equivalent"). The Dividend Equivalents shall be forfeited to the extent that the underlying Performance Share is forfeited and shall be paid to Grantee, if at all, at the same time that the related Performance Share is paid in accordance with Section 4 above. Dividend Equivalents will be subject to any required withholding for federal, state, local, foreign or other taxes.

Section 6. Restrictive Covenants.

(a) In consideration of the Award, Grantee agrees that during the period ending on the ________ anniversary of the Date of Grant ("Restricted Period"), Grantee shall not for any reason, directly or indirectly, without the prior written consent of the Corporation or its delegate: (i) become employed, engaged or involved with a competitor (defined below) of the Corporation or any Subsidiary in a position that involves: providing services that relate to or are similar in nature or purpose to the services performed by Grantee for the Corporation or any Subsidiary at any time during his or her previous ________ years of employment with the Corporation or any Subsidiary; or, supervision, management, direction or advice regarding such services; either as principal, agent, manager, employee, partner, shareholder, director, officer or consultant (other than as a less-than three percent (3%) equity owner of any corporation traded on any national, international or regional stock exchange or in the over-the-counter market); or (ii) induce or attempt to induce any customer, client, supplier, employee, agent or independent contractor of the Corporation or any of the Subsidiaries to reduce, terminate, restrict or otherwise alter (to the Corporation's detriment) its business relationship with the Corporation.

(b) The noncompetition obligations of clause (i) of the preceding sentence shall be effective only with respect to a "competitor" of the Corporation or any Subsidiary which is understood to mean any person or entity in competition with the Corporation or any Subsidiary, and more particularly those persons and entities engaged in any business in which the Corporation, including Subsidiaries, is engaged at the termination of Grantee's continuous employment by the Corporation, including Subsidiaries; and within the following geographical areas: (i) any country in the world (other than the United States) where the Corporation, including Subsidiaries, has at least $25 million in capital deployed as of the termination of Grantee's employment; (ii) the states of Florida, Indiana, Kentucky, North Carolina, Ohio, South Carolina and Tennessee, and (iii) any other state in the United States where the Corporation, including the Subsidiaries, has at least $25 million in capital deployed as of the termination of Grantee's employment. The Corporation and Grantee intend the above restrictions on competition in geographical areas to be entirely severable and independent, and any invalidity or unenforceability of this provision with respect to any one or more of such restrictions, including geographical areas, shall not render this provision unenforceable as applied to any one or more of the other restrictions, including geographical areas.

(c) Grantee agrees not to: (i) disclose to any third party or otherwise misappropriate any confidential or proprietary information of the Corporation or of any Subsidiary (except as required by subpoena or other legal process, in which event Grantee will give the Chief Legal Officer of the Corporation prompt notice of such subpoena or other legal process in order to permit the Corporation or any affected individual to seek appropriate protective orders); or (ii) publish or provide any oral or written statements about the Corporation or any Subsidiary, any of the Corporation's or any Subsidiary's current or former officers, executives, directors, employees, agents or representatives that are false, disparaging or defamatory, or that disclose private or confidential information about their business or personal affairs. The obligations of this paragraph are in addition to, and do not replace, eliminate or reduce in any way, all other contractual, statutory, or common law obligations Grantee may have to protect the Corporation's confidential information and trade secrets and to avoid defamation or business disparagement.

(d) Nothing contained in this Agreement shall prohibit, restrict or otherwise discourage Grantee from reporting possible violations of federal, state or local laws or regulations to any federal, state or local governmental agency or commission (a "Government Agency"), from making other disclosures that are protected under the whistleblower provisions of federal, state or local laws or regulations, or from participating in "protected activity" as defined in 10 CFR 50.7 and Section 211 of the Energy Reorganization Act of 1974, including, without limitation, reporting any suspected instance of illegal activity of any nature, any nuclear safety concern, any workplace safety concern, any public safety concern, or any other matter within the United States Nuclear Regulatory Commission's ("NRC") regulatory responsibilities to the NRC or any other Government Agency. Grantee does not need prior authorization of any kind to engage in such activity or make any such reports or disclosures to any Government Agency and Grantee is not required to notify the Corporation that Grantee has made such reports or disclosures. Nothing in this Agreement limits any right Grantee may have to receive a whistleblower award or bounty for information provided to any Government Agency.

(e) If any part of this Section is held to be unenforceable because of the duration, scope or geographical area covered, the Corporation and Grantee agree to modify such part, or that the court making such holding shall have the power to modify such part, to reduce its duration, scope or geographical area.

(f) Nothing in Section 6 shall be construed to prohibit Grantee from being retained during the Restricted Period in a capacity as an attorney licensed to practice law, or to restrict Grantee from providing advice and counsel in such capacity, in any jurisdiction where such prohibition or restriction is contrary to law. Notwithstanding any provisions of this Award to the contrary, Grantee may be entitled to immunity and protection from retaliation under the Defend Trade Secrets Act of 2016 for disclosing a trade secret under limited circumstances, as set forth in the Corporation's Innovations - Inventions, Patents and Intellectual Properties Policy.

(g) Grantee's agreement to the restrictions provided for in this Agreement and the Corporation's agreement to provide the Award are mutually dependent consideration. Therefore, notwithstanding any other provision to the contrary in this Agreement, if Grantee materially breaches any provision of this Section 6 or if the enforceability of any material restriction on Grantee provided for in this Agreement is challenged and found unenforceable by a court of law, then the Corporation shall, at its election, have the right to (i) cancel the Award, (ii) recover from Grantee any Shares or Dividend Equivalents or other cash paid under Award, or (iii) with respect to any Shares paid under the Award that have been disposed of, require Grantee to repay to the Corporation the fair market value of such Shares on the date such shares were sold, transferred, or otherwise disposed of by Grantee. This provision shall be construed as a return of consideration or ill-gotten gains due to the failure of Grantee's promises under the Agreement, and not as a liquidated damages clause. Nothing herein shall (x) reduce or eliminate the Corporation's right to assert that the restrictions provided for in this agreement are fully enforceable as written, or as modified by a court pursuant to Section 6, or (y) eliminate, reduce, or compromise the application of temporary or permanent injunctive relief as a fully appropriate and applicable remedy to enforce the restrictions provided for in Section 6 (inclusive of its subparts), in addition to recovery of damages or other remedies otherwise allowed by law.

(h) Notwithstanding any other provision of this Agreement to the contrary, if the Corporation determines at any time that the Grantee engaged in Detrimental Activity while employed by the Corporation or a Subsidiary, then, to the extent permitted by applicable law, such Grantee: (a) shall not be entitled to any further Shares, Dividend Equivalents or other amounts hereunder (and, if it is determined that a participant may have engaged in Detrimental Activity, payment of any Shares, Dividend Equivalents or other amounts otherwise due to the Grantee shall be suspended pending resolution to the Corporation’s satisfaction of any investigation of the matter), and (b) shall be required to promptly return to the Corporation, upon notice from the Corporation, any Shares, Dividend Equivalents or other amounts received under this Agreement by the Grantee during the three-year period preceding the date of the determination by the Corporation. To the extent that Shares, Dividend Equivalents or other amounts are not immediately returned or paid to the Corporation as provided in this paragraph, the Corporation may, to the extent permitted by applicable law, seek other remedies, including a set off of the Shares, Dividend Equivalents or other amounts so payable to it against any amounts that may be owing from time to time by the Corporation or an affiliate to the Grantee. For purposes of this paragraph, “Detrimental Activity” means: (i) the engaging by the Grantee in misconduct that is detrimental to the financial condition or business reputation of the Corporation or its affiliates, including due to any adverse publicity, or (ii) the Grantee’s breach or violation of any material written policy of the Corporation, including without limitation the Corporation’s Code of Business Ethics or any written policy or regulation dealing with workplace harassment, including sexual harassment and other forms of harassment prohibited by the Corporation’s Harassment-Free Workplace Policy.

Section 7*.* *Change in Control*. Vesting of the Performance Shares shall not accelerate solely as a result of a Change in Control. In the event of a Change in Control, the surviving, continuing, successor, or purchasing entity, as the case may be, may, without Grantee's consent, either assume or continue the

Corporation's rights and obligations under this Agreement or provide a substantially equivalent award or other consideration in substitution for the Performance Shares subject to this Agreement.

Section 8. *Withholding*. To the extent the Corporation or any Subsidiary is required to withhold any federal, state, local, foreign or other taxes in connection with the delivery of Shares under this Agreement, then the Corporation or Subsidiary (as applicable) shall retain a number of Shares otherwise deliverable hereunder with a value equal to the required withholding (based on the Fair Market Value of the Shares on the date of delivery); provided that in no event shall the value of the Shares retained exceed the minimum amount of taxes required to be withheld or such other amount permitted under the Plan. If the Corporation or any Subsidiary is required to withhold any federal, state, local or other taxes at any time other than upon delivery of the Shares under this Agreement (for example, if Grantee elects to defer payment of the Performance Shares), then the Corporation or Subsidiary (as applicable) shall have the right in its sole discretion to (a) require Grantee to pay or provide for payment of the required tax withholding, or (b) deduct the required tax withholding from any amount of salary, bonus, incentive compensation or other amounts otherwise payable in cash to Grantee (other than deferred compensation subject to Section 409A of the Code).

Section 9. *Conflicts with Plan, Correction of Errors, Section 409A and Grantee's Consent*. In the event that any provision of this Agreement conflicts in any way with a provision of the Plan, such Plan provision shall be controlling and the applicable provision of this Agreement shall be without force and effect to the extent necessary to cause such Plan provision to be controlling. Capitalized terms used herein without definition shall have the meanings assigned to them in the Plan. In the event that, due to administrative error, this Agreement does not accurately reflect an Award properly granted to Grantee pursuant to the Plan, the Corporation, acting through its Executive Compensation and Benefits Department, reserves the right to cancel any erroneous document and, if appropriate, to replace the cancelled document with a corrected document.

To the extent applicable, it is intended that this Agreement comply with the provisions of Section 409A of the Code and that this Award not result in unfavorable tax consequences to Grantee under Section 409A of the Code. This Agreement will be administered and interpreted in a manner consistent with this intent, and any provision that would cause this Agreement to fail to satisfy Section 409A of the Code will have no force and effect until amended to comply therewith (which amendment may be retroactive to the extent permitted by Section 409A of the Code and made without the consent of Grantee). For purposes of this Agreement, each amount to be paid to Grantee pursuant to this Agreement shall be construed as a separate identified payment for purposes of Section 409A of the Code.

Notwithstanding the foregoing, this Award is subject to cancellation by the Corporation in its sole discretion unless Grantee has signed a duplicate of this Agreement, in the space provided below, and returned the signed duplicate to the Executive Compensation and Benefits Department – Performance Shares____, which, if, and to the extent, permitted by the Executive Compensation and Benefits Department, may be accomplished by electronic means.

IN WITNESS WHEREOF, the Corporation has caused this Agreement to be executed effective as of the Date of Grant.

DUKE ENERGY CORPORATION

By: ____

Its:

Acceptance of Performance Award

IN WITNESS OF Grantee's acceptance of this Performance Award and Grantee's agreement to be bound by the provisions of this Agreement and the Plan, Grantee has signed this Agreement on ____________________.

______________________________ Grantee's Signature

______________________________ (print name)

EXHIBIT A
PERFORMANCE GOALS

Cumulative Adjusted Basic EPS (__%)

_____% of the Target Number of Performance Shares subject to this Award shall become vested based upon the extent to which the Corporation achieves the "Cumulative Adjusted Basic EPS Performance Goal," which is based on the Corporation's cumulative adjusted basic earnings per share ("EPS"), for the Performance Period, in accordance with the applicable vesting percentage specified for Cumulative Adjusted Basic EPS in the following schedule:

Cumulative Adjusted Basic EPS	Percent Payout of Target Performance Shares*

*When such determination is at a level between those specified, the Committee, or its delegatee, in its sole discretion, shall interpolate to determine the applicable vesting percentage. The Committee shall have the authority to calculate and adjust the Cumulative Adjusted Basic EPS and the Cumulative Adjusted Basic EPS Performance Goal in the same manner as adjusted basic EPS is calculated and adjusted pursuant to the _____ Short-Term Incentive Program Guidelines, provided, however, that the Committee specifically reserves discretion to make adjustments to the EPS performance levels or results in the event that a major project is not placed in-service at the time assumed by the Corporation as of the Date of Grant for purposes of its business plan.

Total Shareholder Return (__%)

___% of the Target Number of Performance Shares subject to this Award shall become vested based upon the extent to which the Corporation achieves the "TSR Performance Goal," which is the Corporation's Total Shareholder Return ("TSR") percentile ranking among the companies that are in the Philadelphia Utility Index as of the beginning of the Performance Period, with higher percentile ranking for more positive/less negative TSR, for the Performance Period in accordance with the applicable vesting percentage specified for such percentile ranking in the following schedule:

Relative TSR Performance Percentile	**Percent Payout of Target Performance Shares****

**When such determination is of a percentile ranking between those specified, the Committee, or its delegatee, in its sole discretion, shall interpolate to determine the applicable vesting percentage. If the Corporation's TSR is at least ___% during the Performance Period, the vesting percentage for this portion of the Performance Shares and Dividend Equivalents shall not be less than ___%, and if the Corporation's TSR is less than ___% during the Performance Period, the vesting percentage for this portion of the Performance Shares and Dividend Equivalents shall not be more than _____%.

For purposes of this Agreement, TSR means, with respect to any company, the percentage change in total stockholder return, determined by dividing (A) the difference between the price of a share of the company's common stock from the Opening Value (as defined below) to the Closing Value (as defined below), with any dividends with ex-dividend dates falling inside the Performance Period deemed reinvested in the company's common stock on the ex-dividend date, by (B) the Opening Value. The term "Opening Value" means, with respect to any company, the average of the closing prices per share of the company's common stock on each trading day during the calendar month preceding the start of the Performance Period, assuming any dividends with ex-dividend dates falling inside such calendar month are deemed reinvested in the company's common stock on the ex-dividend date. The term "Closing Value" means, with respect to any company, the average of the closing prices per share of the company's common stock on each trading day during the last calendar month of the Performance Period, assuming any dividends with ex-dividend dates falling inside such calendar month are deemed reinvested in the company's common stock on the ex-dividend date. In the event that a company becomes a member of the Philadelphia Utility Index following _____________, or if a member of the Philadelphia Utility Index on ___________ ceases to exist during the Performance Period as a separate publicly-traded company due to a merger, acquisition or privatization, such company shall not be taken into account for purposes of this Agreement. If a member of the Philadelphia Utility Index on __________ becomes bankrupt or insolvent during the Performance Period and ceases to be publicly-traded, for purposes of this Agreement its TSR shall be -100%.

Total Incident Case Rate For Employees (___%)

____% of the Target Number of Performance Shares subject to this Award shall become vested based upon the extent to which the Corporation achieves the "TICR Performance Goal," which is the Corporation's total incident case rate for employees, including staff augmentation workers ("TICR") as compared to the applicable vesting percentage specified in the following schedule:

Duke Energy TICR vs. __________* **	**Percent Payout of Target Performance Shares******

***The __________ shall consist of the results of the ______________, excluding companies without gas or nuclear operations, that report TICR results for at least one year during the _________ period.

****When such determination is at a level between those specified, the Committee, or its delegatee, in its sole discretion, shall interpolate to determine the applicable vesting percentage. The Committee retains discretion to make equitable adjustments to the TICR Performance Goal and the related payout levels to prevent dilution or enlargement of the Grantee's right to payment in the event there are changes in the composition of the ___________ during the _________ period and/or there are fewer than ___ companies in the ___________________ (excluding companies without gas or nuclear operations) that report TICR results for at least one year during the __________ period. The employees of any company acquired during the Performance Period shall not be taken into account when measuring the Corporation's TICR for the Performance Period.

Adjustments

If the Committee determines that a merger, consolidation, liquidation, issuance of rights or warrants to purchase securities, recapitalization, reclassification, stock dividend, spin-off, split-off, stock split, reverse stock split or other distribution with respect to the Shares, or any similar corporate transaction or event in respect of the Shares, the manner in which the Corporation conducts its business, changes in the law or regulations or regulatory structure, changes in accounting practices, other unusual or nonrecurring items or occurrences, or other events or circumstances, render the Performance Goals to be unsuitable, the Committee may, in its sole discretion, and without the consent of the Grantee or any other persons, modify the calculation of the Performance Goals, or any of the related minimum, target or maximum levels of achievement, or the performance results, in whole or in part, as the Committee deems equitable and appropriate to reflect such event.

In addition, the Committee reserves the right to reduce any vesting to the extent the Committee determines that such reduction is equitable and appropriate for any reason, including reductions based on overall financial performance such as adjusted and reported earnings, capital deployment and credit position during the Performance Period.

Exhibit 10.2.1

JOINDER AGREEMENT, dated as of March 27, 2020 (this "Joinder"), is made and entered into by and among DUKE ENERGY CORPORATION, a Delaware corporation (the "Borrower"), each of the entities listed under the caption "Incremental Lenders" on the signature pages hereto (each, an "Incremental Lender" and, collectively, the "Incremental Lenders"), and PNC BANK, N.A., as Administrative Agent (in such capacity, the "Administrative Agent").

RECITALS:

WHEREAS, reference is made to the Credit Agreement dated as of March 19, 2020 (as amended, supplemented or otherwise modified prior to the date hereof, the "Credit Agreement"), by and among the Borrower, the lenders from time to time party thereto and the Administrative Agent;

WHEREAS, it is intended that (a) the Borrower will obtain the Incremental Commitments (as defined below) (as defined in the Credit Agreement) and (b) the proceeds of the borrowings under the Incremental Commitments will be used for general corporate purposes of the Borrower;

WHEREAS, subject to the terms and conditions of the Credit Agreement, and pursuant to Section 2.17 of the Credit Agreement, the Borrower has requested that the Incremental Lenders provide Incremental Commitments in an aggregate principal amount of $187,500,000; and

WHEREAS, the Incremental Lenders are willing to provide the Incremental Commitments to the Borrower on the Incremental Commitment Effective Date (as defined below).

NOW, THEREFORE, in consideration of the mutual agreements herein contained and other good and valuable consideration, the sufficiency and receipt of which are hereby acknowledged, the parties hereto agree as follows:

SECTION 1. ***Defined Terms; Interpretation; Etc***. Capitalized terms used and not defined herein shall have the meanings assigned to such terms in the Credit Agreement.

SECTION 2. ***Incremental Commitments***. (a) Each Incremental Lender hereby agrees, severally and not jointly, to make an Incremental Loan to the Borrower on the Incremental Commitment Effective Date in Dollars in an aggregate principal amount equal to the amount set forth opposite such Incremental Lender's name on Schedule I attached hereto (each, an "Incremental Commitment" and, collectively, the "Incremental Commitments"), on the terms set forth herein and in the Credit Agreement (as amended hereby), and subject to the conditions set forth herein. The Incremental Loans shall be deemed to be "Loans" as defined in the Credit Agreement (as amended hereby) for all purposes of the Credit Agreement having terms and provisions identical to those applicable to the Loans outstanding immediately prior to the Incremental Commitment Effective Date (the "Existing Loans").

(b) The Incremental Loans shall be made as a single borrowing, with an initial Interest Period that commences on the Incremental Commitment Effective Date and ends on the last day of the Interest Period applicable to the Existing Loans on the Incremental Commitment Effective Date. During such initial Interest Period, the London Interbank Offered Rate applicable to the Incremental Loans shall be the same London Interbank Offered Rate applicable for the Existing Loans as of the Incremental Commitment Effective Date. Notwithstanding anything to the contrary contained herein or in the Credit Agreement, from and after the Incremental Commitment Effective Date, the Existing Loans and the Incremental Loans shall constitute a single Borrowing of Term Loans for all purposes under the Credit Agreement.

(c) Unless previously terminated, the Incremental Commitments of the Incremental Lenders pursuant to Section 2(a) shall terminate upon the making of the Incremental Loans on the Incremental Commitment Effective Date.

(d) Each Incremental Lender (i) confirms that a copy of the Credit Agreement, together with copies of the financial statements referred to therein and such other documents and information as it has deemed appropriate to make its own credit analysis and decision to enter into this Joinder and make its Incremental Loan, have been made available to such Incremental Lender; (ii) agrees that it will, independently and without reliance upon the Administrative Agent, any joint lead arranger or joint bookrunner, or any other Lender or agent and based on such documents and information as it shall deem appropriate at the time, continue to make its own credit decisions in taking or not taking action under the Credit Agreement, including this Joinder; (iii) appoints and authorizes the Administrative Agent to take such action as agent on its behalf and to exercise such powers under the Credit Agreement as are delegated to the Administrative Agent by the terms thereof, together with such powers as are reasonably incidental thereto; and (iv) acknowledges and agrees that upon the Incremental Commitment Effective Date such Incremental Lender shall be a "Lender" and an "Incremental Lender" under, and for all purposes of, the Credit Agreement, and shall be subject to and bound by the terms thereof, and shall perform all the obligations of and shall have all rights of a Lender and an Incremental Lender thereunder.

SECTION 3. ***Conditions Precedent to Incremental Loans***. This Joinder and each Incremental Lender's obligation to provide the Incremental Loans pursuant to this Joinder, shall become effective as of the date on which the following conditions precedent are satisfied (such date, the "Incremental Commitment Effective Date"):

(a) The Administrative Agent shall have received from the Borrower and each Incremental Lender either (i) a counterpart of this Joinder duly executed and delivered on behalf of such party or (ii) written evidence satisfactory to the Administrative Agent (which may include facsimile or other electronic transmission of a signed counterpart of this Joinder) that such party has duly executed and delivered a counterpart of this Joinder.

(b) Each of the conditions set forth in Section 3.03 of the Credit Agreement shall have been satisfied or waived.

(c) The Administrative Agent and each Incremental Lender shall have received all documentation and other information about the Borrower as shall have been reasonably requested prior to the Incremental Commitment Effective Date by the Administrative Agent or such Incremental Lender that they shall have reasonably determined is required by regulatory authorities under applicable "know your customer" and anti-money laundering rules and regulations, including without limitation the USA PATRIOT Act.

(d) The Administrative Agent shall have received a Notice of Borrowing with respect to the Incremental Term Loans as required by Section 2.02 of the Credit Agreement.

The Administrative Agent shall notify the Borrower and the Lenders of the Incremental Commitment Effective Date, and such notice shall be conclusive and binding.

SECTION 4. ***Representations and Warranties***. In order to induce the Incremental Lenders and the Administrative Agent to enter into this Joinder and to induce the Incremental Lenders to make the Incremental Loans hereunder, the Borrower hereby represents and warrants to the Incremental Lenders and the Administrative Agent on and as of the Incremental Commitment Effective Date that the representations and warranties of the Borrower set forth in the Credit Agreement are true on and as of the Incremental Commitment Effective Date (or, in the case of any such representation or warranty expressly stated to have been made as of a specific date, as of such specific date).

SECTION 5. ***Expenses; Indemnity; Damage Waiver***. Section 9.03 of the Credit Agreement is hereby incorporated by reference, *mutatis mutandis*, as if such Section was set forth in full herein.

SECTION 6. ***Waiver of Integral Multiple Requirement***. Each party hereby waives the requirement in Section 2.17 of the Credit Agreement requiring that the Incremental Commitment be in an integral multiple of $10,000,000.

SECTION 7. ***Miscellaneous***.

(a) ***Non-U.S. Lenders***. Each Incremental Lender shall have delivered to the Administrative Agent and the Borrower such forms, certificates or other evidence with respect to United States federal income tax withholding matters as such Incremental Lender may be required to deliver to the Administrative Agent and the Borrower pursuant to Section 8.04(d) of the Credit Agreement.

(b) ***Recordation of the Incremental Loans***. Upon execution and delivery hereof, and the funding of the Incremental Loans, the Administrative Agent will record in the Register the Incremental Loans made by the Incremental Lenders.

(c) ***Amendment, Modification and Waiver***. This Joinder may not be amended and no provision hereof may be waived except pursuant to a writing signed by each of the parties hereto.

(d) ***Entire Agreement***. This Joinder and the Credit Agreement constitute the entire agreement among the parties with respect to the subject matter hereof and thereof and supersede all other prior agreements and understandings, both written and verbal, among the parties or any of them with respect to the subject matter hereof.

(e) ***Governing Law***. This Joinder and any claims controversy, dispute or cause of action (whether in contract or tort or otherwise) based upon, arising out of or relating to this Joinder and the transactions contemplated hereby shall be governed by, and construed in accordance with, the laws of the State of New York.

(f) ***Jurisdiction; Waiver of Venue; Service of Process***. Section 9.09 of the Credit Agreement is hereby incorporated by reference, *mutatis mutandis*, as if such Section was set forth in full herein.

(g) ***WAIVER OF JURY TRIAL***. SECTION 9.11 OF THE CREDIT AGREEMENT IS HEREBY INCORPORATED BY REFERENCE, *MUTATIS MUTANDIS*, AS IF SUCH SECTION WAS SET FORTH IN FULL HEREIN.

(h) ***Severability***. Any term or provision of this Joinder that is invalid or unenforceable in any jurisdiction shall, as to that jurisdiction, be ineffective to the extent of such invalidity or unenforceability without rendering invalid or unenforceable the remaining terms and provisions of this Joinder or affecting the validity or enforceability of any of the terms or provisions of this Joinder in any other jurisdiction. If any provision of this Joinder is so broad as to be unenforceable, the provision shall be interpreted to be only so broad as would be enforceable.

(i) ***Counterparts; Integration***. Section 9.10 of the Credit Agreement is hereby incorporated by reference, *mutatis mutandis*, as if such Section was set forth in full herein.

(j) ***Headings***. The headings of this Joinder are for purposes of reference only and shall not limit or otherwise affect the meaning hereof.

(k) ***Reference to and Effect on the Credit Agreement***. On and after the Incremental Commitment Effective Date, each reference in the Credit Agreement to "this Agreement", "hereunder", "herein" or words of like import referring to the Credit Agreement, shall mean and be a reference to the Credit Agreement as modified by this Joinder. Except as specifically modified by this Joinder, the Credit Agreement shall remain in full force and effect and is hereby ratified and confirmed. The execution, delivery and performance of this Joinder shall not constitute a waiver of any provision of, or operate as a waiver of any right, power or remedy of the Administrative Agent or Lender under the Credit Agreement.

[*Remainder of this page intentionally left blank*]

IN WITNESS WHEREOF, the parties hereto have caused this Joinder to be duly executed by their respective authorized officers as of the day and year first above written.

CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Lynn J. Good, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Duke Energy Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

I, Lynn J. Good, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Duke Energy Florida, LLC;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a–15(f) and 15d–15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a–15(f) and 15d–15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Registrant	Description	Shares
Duke Energy	Common stock, $0.001 par value	734,852,539

This combined Form 10-Q/A is filed separately by eight registrants: Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont (collectively the Duke Energy Registrants). Information contained herein relating to any individual registrant is filed by such registrant solely on its own behalf. Each registrant makes no representation as to information relating exclusively to the other registrants.

EXPLANATORY NOTE

Duke Energy Corporation and its subsidiaries (collectively, the “Company”) filed its Quarterly Report on Form 10-Q for the quarter ended March 31, 2020 (the “Original Filing”) with the U.S. Securities and Exchange Commission (the “SEC”) on May 12, 2020. The Company is filing this Amendment No. 1 (the “Amendment”) to its Original Filing solely to add this Explanatory Note which was inadvertently omitted from the Original Filing.

As previously disclosed in the Company’s Current Report on Form 8-K filed with the SEC on May 8, 2020 (the “Form 8-K”), and in accordance with the SEC’s “Order Under Section 36 of the Securities Exchange Act of 1934 Modifying Exemptions From the Reporting and Proxy Delivery Requirements for Public Companies," dated March 25, 2020 (Release No. 34-88465) (the “Order”), the Company (i) relied on the relief provided by the Order in connection with the filing of the Original Filing and (ii) the delay in the Original Filing was necessitated by the additional time required by our workforce, who are largely working remotely during the COVID-19 pandemic, to complete the processes necessary for our internal controls. In addition, as required by Rule 12b-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company is including in this Amendment certifications from its Chief Executive Officer and Chief Financial Officer as required by Rule 13a-14(a) or Rule 15d-14(a) under the Exchange Act as exhibits to this Amendment. Because no financial statements have been included in this Amendment and this Amendment does not contain or amend any disclosure with respect to Items 307 and 308 of Regulation S-K, paragraphs 3, 4 and 5 of the certifications have been omitted. We are not including the certifications under Section 906 of the Sarbanes-Oxley Act of 2002 as no financial statements are being filed with this Amendment.

This Amendment has not been updated for events or information subsequent to the filing date of the Original Filing and should be read in conjunction with the Original Filing and Duke Energy’s other filings with the SEC. Except as described above, no other changes have been made in the Amendment to modify or update the other disclosures in or exhibits filed or furnished with the Original Filing. Material events may have occurred subsequent to the filing of the Original Filing that are not reflected in this Amendment.

Number of shares of common stock outstanding at July 31, 2020:

Registrant	Description	Shares
Duke Energy	Common stock, $0.001 par value	735,432,137

This combined Form 10-Q is filed separately by eight registrants: Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont (collectively the Duke Energy Registrants). Information contained herein relating to any individual registrant is filed by such registrant solely on its own behalf. Each registrant makes no representation as to information relating exclusively to the other registrants.

Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont meet the conditions set forth in General Instructions H(1)(a) and (b) of Form 10-Q and are therefore filing this form with the reduced disclosure format specified in General Instructions H(2) of Form 10-Q.

TABLE OF CONTENTS

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are based on management's beliefs and assumptions and can often be identified by terms and phrases that include "anticipate," "believe," "intend," "estimate," "expect," "continue," "should," "could," "may," "plan," "project," "predict," "will," "potential," "forecast," "target," "guidance," "outlook" or other similar terminology. Various factors may cause actual results to be materially different than the suggested outcomes within forward-looking statements; accordingly, there is no assurance that such results will be realized. These factors include, but are not limited to:

- The impact of the COVID-19 pandemic;
- State, federal and foreign legislative and regulatory initiatives, including costs of compliance with existing and future environmental requirements, including those related to climate change, as well as rulings that affect cost and investment recovery or have an impact on rate structures or market prices;
- The extent and timing of costs and liabilities to comply with federal and state laws, regulations and legal requirements related to coal ash remediation, including amounts for required closure of certain ash impoundments, are uncertain and difficult to estimate;
- The ability to recover eligible costs, including amounts associated with coal ash impoundment retirement obligations and costs related to significant weather events, and to earn an adequate return on investment through rate case proceedings and the regulatory process;
- The costs of decommissioning nuclear facilities could prove to be more extensive than amounts estimated and all costs may not be fully recoverable through the regulatory process;
- Costs and effects of legal and administrative proceedings, settlements, investigations and claims;
- Industrial, commercial and residential growth or decline in service territories or customer bases resulting from sustained downturns of the economy and the economic health of our service territories or variations in customer usage patterns, including energy efficiency efforts and use of alternative energy sources, such as self-generation and distributed generation technologies;
- Federal and state regulations, laws and other efforts designed to promote and expand the use of energy efficiency measures and distributed generation technologies, such as private solar and battery storage, in Duke Energy service territories could result in customers leaving the electric distribution system, excess generation resources as well as stranded costs;
- Advancements in technology;
- Additional competition in electric and natural gas markets and continued industry consolidation;
- The influence of weather and other natural phenomena on operations, including the economic, operational and other effects of severe storms, hurricanes, droughts, earthquakes and tornadoes, including extreme weather associated with climate change;
- The ability to successfully operate electric generating facilities and deliver electricity to customers including direct or indirect effects to the company resulting from an incident that affects the United States electric grid or generating resources;
- The ability to obtain the necessary permits and approvals and to complete necessary or desirable pipeline expansion or infrastructure projects in our natural gas business;
- Operational interruptions to our natural gas distribution and transmission activities;
- The availability of adequate interstate pipeline transportation capacity and natural gas supply;
- The impact on facilities and business from a terrorist attack, cybersecurity threats, data security breaches, operational accidents, information technology failures or other catastrophic events, such as fires, explosions, pandemic health events or other similar occurrences;
- The inherent risks associated with the operation of nuclear facilities, including environmental, health, safety, regulatory and financial risks, including the financial stability of third-party service providers;
- The timing and extent of changes in commodity prices and interest rates and the ability to recover such costs through the regulatory process, where appropriate, and their impact on liquidity positions and the value of underlying assets;
- The results of financing efforts, including the ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings, interest rate fluctuations, compliance with debt covenants and conditions and general market and economic conditions;
- Credit ratings of the Duke Energy Registrants may be different from what is expected;
- Declines in the market prices of equity and fixed-income securities and resultant cash funding requirements for defined benefit pension plans, other post-retirement benefit plans and nuclear decommissioning trust funds;
- Construction and development risks associated with the completion of the Duke Energy Registrants' capital investment projects, including risks related to financing, obtaining and complying with terms of permits, meeting construction budgets and schedules and satisfying operating and environmental performance standards, as well as the ability to recover costs from customers in a timely manner, or at all;
- Changes in rules for regional transmission organizations, including changes in rate designs and new and evolving capacity markets, and risks related to obligations created by the default of other participants;
- The ability to control operation and maintenance costs;
- The level of creditworthiness of counterparties to transactions;
- The ability to obtain adequate insurance at acceptable costs;
- Employee workforce factors, including the potential inability to attract and retain key personnel;

- The ability of subsidiaries to pay dividends or distributions to Duke Energy Corporation holding company (the Parent);
- The performance of projects undertaken by our nonregulated businesses and the success of efforts to invest in and develop new opportunities;
- The effect of accounting pronouncements issued periodically by accounting standard-setting bodies;
- The impact of United States tax legislation to our financial condition, results of operations or cash flows and our credit ratings;
- The impacts from potential impairments of goodwill or equity method investment carrying values; and
- The ability to implement our business strategy, including enhancing existing technology systems.

Additional risks and uncertainties are identified and discussed in the Duke Energy Registrants' reports filed with the SEC and available at the SEC's website at sec.gov. In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than described. Forward-looking statements speak only as of the date they are made and the Duke Energy Registrants expressly disclaim an obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Glossary of Terms

The following terms or acronyms used in this Form 10-Q are defined below:

Term or Acronym	Definition
2013 Settlement	Revised and Restated Stipulation and Settlement Agreement approved in November 2013 among Duke Energy Florida, the Florida OPC and other customer representatives
2017 Settlement	Second Revised and Restated Settlement Agreement in 2017 among Duke Energy Florida, the Florida OPC and other customer representatives, which replaces and supplants the 2013 Settlement
ACP	Atlantic Coast Pipeline, LLC, a limited liability company owned by Dominion Energy, Inc. and Duke Energy
ACP pipeline	The approximately 600-mile canceled interstate natural gas pipeline
AFS	Available for Sale
AFUDC	Allowance for funds used during construction
AMT	Alternative Minimum Tax
ARO	Asset retirement obligations
Bison	Bison Insurance Company Limited
CC	Combined Cycle
CCR	Coal Combustion Residuals
CARES Act	Coronavirus Aid, Relief and Economic Security Act
Coal Ash Act	North Carolina Coal Ash Management Act of 2014
the Company	Duke Energy Corporation and its subsidiaries
Constitution	Constitution Pipeline Company, LLC
COVID-19	Coronavirus Disease 2019
CRC	Cinergy Receivables Company, LLC
Crystal River Unit 3	Crystal River Unit 3 Nuclear Plant
DEFPF	Duke Energy Florida Project Finance, LLC
DEFR	Duke Energy Florida Receivables, LLC
DEPR	Duke Energy Progress Receivables, LLC
DERF	Duke Energy Receivables Finance Company, LLC
Duke Energy	Duke Energy Corporation (collectively with its subsidiaries)
Duke Energy Ohio	Duke Energy Ohio, Inc.
Duke Energy Progress	Duke Energy Progress, LLC
Duke Energy Carolinas	Duke Energy Carolinas, LLC
Duke Energy Florida	Duke Energy Florida, LLC
Duke Energy Indiana	Duke Energy Indiana, LLC
Duke Energy Kentucky	Duke Energy Kentucky, Inc.
Duke Energy Registrants	Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont
EDIT	Excess deferred income tax
EPA	U.S. Environmental Protection Agency
EPS	Earnings Per Share
ESP	Electric Security Plan

Tables within the notes may not sum across due to (i) Progress Energy's consolidation of Duke Energy Progress, Duke Energy Florida and other subsidiaries that are not registrants and (ii) subsidiaries that are not registrants but included in the consolidated Duke Energy balances.

1. ORGANIZATION AND BASIS OF PRESENTATION

BASIS OF PRESENTATION

These Condensed Consolidated Financial Statements have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, these Condensed Consolidated Financial Statements do not include all information and notes required by GAAP for annual financial statements and should be read in conjunction with the Consolidated Financial Statements in the Duke Energy Registrants' combined Annual Report on Form 10-K for the year ended December 31, 2019.

The information in these combined notes relates to each of the Duke Energy Registrants as noted in the Index to Combined Notes to Condensed Consolidated Financial Statements. However, none of the registrants make any representations as to information related solely to Duke Energy or the subsidiaries of Duke Energy other than itself.

These Condensed Consolidated Financial Statements, in the opinion of the respective companies' management, reflect all normal recurring adjustments necessary to fairly present the financial position and results of operations of each of the Duke Energy Registrants. Amounts reported in Duke Energy's interim Condensed Consolidated Statements of Operations and each of the Subsidiary Registrants' interim Condensed Consolidated Statements of Operations and Comprehensive Income are not necessarily indicative of amounts expected for the respective annual periods due to effects of seasonal temperature variations on energy consumption, regulatory rulings, timing of maintenance on electric generating units, changes in mark-to-market valuations, changing commodity prices and other factors.

In preparing financial statements that conform to GAAP, management must make estimates and assumptions that affect the reported amounts of assets and liabilities, the reported amounts of revenues and expenses and the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

BASIS OF CONSOLIDATION

These Condensed Consolidated Financial Statements include, after eliminating intercompany transactions and balances, the accounts of the Duke Energy Registrants and subsidiaries or VIEs where the respective Duke Energy Registrants have control. See Note 11 for additional information on VIEs. These Condensed Consolidated Financial Statements also reflect the Duke Energy Registrants' proportionate share of certain jointly owned generation and transmission facilities.

COVID-19

The COVID-19 pandemic is having a significant impact on global health and economic environments. In March 2020, the World Health Organization declared COVID-19 a global pandemic, and President Trump proclaimed that the COVID-19 outbreak in the United States constitutes a national emergency. The extent to which the COVID-19 pandemic will impact the Duke Energy Registrants during 2020 and beyond is uncertain, and the Duke Energy Registrants are monitoring developments closely. The company incurred approximately $34 million and $40 million of incremental COVID-19 costs for the three and six months ended June 30, 2020, respectively, included in Operation, maintenance and other on the Condensed Consolidated Statements of Operations. These costs were primarily bad debt expense, personal protective equipment and cleaning supplies. Further the company experienced approximately another $25 million of waived late payment fees for the three and six months ended June 30, 2020. See Notes 3, 5, 11, 12 and 15 for additional information as well as steps taken to mitigate the impacts to our business and customers from the COVID-19 pandemic.

OTHER CURRENT ASSETS

Included in Other within Current Assets on the Piedmont Condensed Consolidated Balance Sheets are income taxes receivable of $22 million and $14 million as of June 30, 2020, and December 31, 2019, respectively, and prepaid assets of $19 million and $3 million as of June 30, 2020, and December 31, 2019, respectively. The income taxes receivable relates to increases of net operating losses for Piedmont and intercompany tax settlements. The prepaid assets relate to natural gas storage injections and inventory transfers classified as prepaid assets until winter season when the gas is moved to Inventory on the Piedmont Condensed Consolidated Balance Sheets under certain agreements.

OTHER CURRENT LIABILITIES

During the second quarter of 2020, Duke Energy recorded a current liability related to the abandonment of ACP within Current Liabilities in the Gas Utilities and Infrastructure segment. The liability represents Duke Energy's obligation to fund ACP's obligations of outstanding debt and satisfy ARO requirements to restore construction sites. As a result, Liabilities associated with unconsolidated affiliates is $920 million, and exceeds 5% of Total current liabilities on the Duke Energy Condensed Consolidated Balance Sheets as of June 30, 2020. See Notes 3, 4 and 11 for further information.

NONCONTROLLING INTEREST

Duke Energy maintains a controlling financial interest in certain less than wholly owned nonregulated subsidiaries. As a result, Duke Energy consolidates these subsidiaries and presents the third-party investors' portion of Duke Energy's net income (loss), net assets and comprehensive income (loss) as noncontrolling interest. Noncontrolling interest is included as a component of equity on the Condensed Consolidated Balance Sheet.

Several operating agreements of Duke Energy's subsidiaries with noncontrolling interest are subject to allocations of earnings, tax attributes and cash flows in accordance with contractual agreements that vary throughout the lives of the subsidiaries. Therefore, Duke Energy and the other investors' (the owners) interests in the subsidiaries are not fixed, and the subsidiaries apply the Hypothetical Liquidation at Book Value (HLBV) method in allocating income or loss and other comprehensive income or loss (all measured on a pretax basis) to the owners. The HLBV method measures the amounts that each owner would hypothetically claim at each balance sheet reporting date, including tax benefits realized by the owners over the IRS recapture period, upon a hypothetical liquidation of the subsidiary at the net book value of its underlying assets. The change in the amount that each owner would hypothetically receive at the reporting date compared to the amount it would have received on the previous reporting date represents the amount of income or loss allocated to each owner for the reporting period. The following table presents cash received for the sale of noncontrolling interest to tax equity members and allocated losses to noncontrolling tax equity members utilizing the HLBV method for the three and six months ended June 30, 2020, and 2019.

	Three Months Ended		Six Months Ended	
(in millions)	**June 30, 2020**	**June 30, 2019**	**June 30, 2020**	**June 30, 2019**
Cash received for the sale of noncontrolling interest to tax equity members	**$ 60**	$ 187	**$ 163**	$ 193
Allocated losses to noncontrolling tax equity members utilizing the HLBV method	**79**	83	**128**	90

Other operating agreements of Duke Energy's subsidiaries with noncontrolling interest allocate profit and loss based on their pro rata shares of the ownership interest in the respective subsidiary. Therefore, Duke Energy allocates net income or loss and other comprehensive income or loss of these subsidiaries to the owners based on their pro rata shares.

CASH, CASH EQUIVALENTS AND RESTRICTED CASH

Duke Energy, Progress Energy and Duke Energy Florida have restricted cash balances related primarily to collateral assets, escrow deposits and VIEs. See Notes 9 and 11 for additional information. Restricted cash amounts are included in Other within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets. The following table presents the components of cash, cash equivalents and restricted cash included in the Condensed Consolidated Balance Sheets.

	June 30, 2020			December 31, 2019		
	Duke Energy	**Progress Energy**	**Duke Energy Florida**	**Duke Energy**	**Progress Energy**	**Duke Energy Florida**
Current Assets						
Cash and cash equivalents	**$ 341**	**$ 78**	**$ 20**	$ 311	$ 48	$ 17
Other	**193**	**31**	**31**	222	39	39
Other Noncurrent Assets						
Other	**107**	**102**	**—**	40	39	—
Total cash, cash equivalents and restricted cash	**$ 641**	**$ 211**	**$ 51**	$ 573	$ 126	$ 56

INVENTORY

Provisions for inventory write-offs were not material at June 30, 2020, and December 31, 2019. The components of inventory are presented in the tables below.

	June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Materials and supplies	$ 2,220	$ 769	$ 1,014	$ 682	$ 333	$ 83	$ 254	$ 5
Coal	776	271	257	189	68	13	234	—
Natural gas, oil and other fuel	293	40	195	109	85	33	1	24
Total inventory	$ 3,289	$ 1,080	$ 1,466	$ 980	$ 486	$ 129	$ 489	$ 29

	December 31, 2019							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Materials and supplies	$ 2,297	$ 768	$ 1,038	$ 686	$ 351	$ 79	$ 318	$ 5
Coal	586	187	186	138	48	15	198	—
Natural gas, oil and other fuel	349	41	199	110	90	41	1	67
Total inventory	$ 3,232	$ 996	$ 1,423	$ 934	$ 489	$ 135	$ 517	$ 72

NEW ACCOUNTING STANDARDS

The following new accounting standard was adopted by the Duke Energy Registrants in 2020.

Current Expected Credit Losses. In June 2016, the Financial Accounting Standards Board (FASB) issued new accounting guidance for credit losses. Duke Energy adopted the new accounting guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year results. Duke Energy did not adopt any practical expedients.

Duke Energy recognizes allowances for credit losses based on management's estimate of losses expected to be incurred over the lives of certain assets or guarantees. Management monitors credit quality, changes in expected credit losses and the appropriateness of the allowance for credit losses on a forward-looking basis. Management reviews the risk of loss periodically as part of the existing assessment of collectability of receivables.

Duke Energy reviews the credit quality of its counterparties as part of its regular risk management process and requires credit enhancements, such as deposits or letters of credit, as appropriate and as allowed by regulators.

Duke Energy recorded cumulative effects of changes in accounting principles related to the adoption of new credit loss standard, for allowances for credit losses of trade and other receivables, insurance receivables and financial guarantees. These amounts are included in the Condensed Consolidated Balance Sheets in Receivables, Receivables of VIEs, Other Noncurrent Assets and Other Noncurrent Liabilities. See Notes 4 and 12 for more information.

Duke Energy recorded an adjustment for the cumulative effect of a change in accounting principle due to the adoption of this standard on January 1, 2020, as shown in the table below:

	January 1, 2020					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Piedmont
Total pretax impact to Retained Earnings	$ 120	$ 16	$ 2	$ 1	$ 1	$ 1

The following new accounting standard has been issued but not yet adopted by the Duke Energy Registrants as of June 30, 2020.

Reference Rate Reform. In March 2020, the FASB issued new accounting guidance for reference rate reform. This guidance is elective and provides expedients to facilitate financial reporting for the anticipated transition away from the London Inter-bank Offered Rate (LIBOR) and other interbank reference rates by the end of 2021. The optional expedients are effective for modification of existing contracts or new arrangements executed between March 12, 2020, through December 31, 2022.

Duke Energy has variable-rate debt and manages interest rate risk by entering into financial contracts including interest rate swaps that are generally indexed to LIBOR. Impacted financial arrangements extending beyond 2021 may require contractual amendment or termination to fully adapt to a post-LIBOR environment. Duke Energy is assessing these financial arrangements and is evaluating the use of optional expedients outlined in the new accounting guidance. Alternative index provisions are also being assessed and incorporated into new financial arrangements that extend beyond 2021. The full outcome of the transition away from LIBOR cannot be determined at this time, but is not expected to have a material impact on the financial statements.

2. BUSINESS SEGMENTS

Duke Energy

Duke Energy's segment structure includes the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables. The Electric Utilities and Infrastructure segment primarily includes Duke Energy's regulated electric utilities in the Carolinas, Florida and the Midwest. The Gas Utilities and Infrastructure segment includes Piedmont, Duke Energy's natural gas local distribution companies in Ohio and Kentucky, and Duke Energy's natural gas storage and midstream pipeline investments.

The Commercial Renewables segment is primarily comprised of nonregulated utility-scale wind and solar generation assets located throughout the U.S. In 2020, Duke Energy evaluated recoverability of a renewable merchant plant located in the Electric Reliability Council of Texas West market due to declining market pricing and declining long-term forecasted energy prices, primarily driven by lower forecasted natural gas prices. Duke Energy determined that the asset was not impaired because the carrying value of $155 million approximates the aggregate estimated future cash flows and therefore further testing was not required. A continued decline in energy market pricing would likely result in a future impairment. Duke Energy retained 51% ownership interest in this facility following the 2019 transaction to sell a minority interest in certain renewable assets.

The remainder of Duke Energy’s operations is presented as Other, which is primarily comprised of interest expense on holding company debt, unallocated corporate costs, Duke Energy’s wholly owned captive insurance company, Bison, and Duke Energy's interest in National Methanol Company.

Business segment information is presented in the following tables. Segment assets presented exclude intercompany assets.

	Three Months Ended June 30, 2020						
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total Reportable Segments	Other	Eliminations	Total
Unaffiliated revenues	$ 5,026	$ 265	$ 123	$ 5,414	$ 7	$ —	$ 5,421

Less: Noncontrolling interests[(c)]							91
Add: Preferred stock dividend							12
Net Income							$ 1,641

(a) Gas Utilities and Infrastructure includes $2.0 billion of pretax costs related to the abandonment of its ACP investment recorded within Equity in (losses) earnings of unconsolidated affiliates on the Condensed Consolidated Statements of Operations. See Notes 1, 3 and Note 11 for additional information.
(b) Other includes a $98 million reversal, included in Operations, maintenance and other on the Condensed Consolidated Statements of Operations, of 2018 severance costs due to the partial settlement of the Duke Energy Carolina's 2019 North Carolina rate case. See Note 3 for additional information.
(c) Includes the allocation of losses to noncontrolling tax equity members. See Note 1 for additional information.

Duke Energy Ohio

Duke Energy Ohio has two reportable segments, Electric Utilities and Infrastructure and Gas Utilities and Infrastructure. The remainder of Duke Energy Ohio's operations is presented as Other.

	Three Months Ended June 30, 2020					
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Total Reportable Segments	Other	Eliminations	Total
Total revenues	$ 330	$ 93	$ 423	$ —	$ —	$ 423

Segment income/Net (loss) income	$ 67	$ 52	$ 119	$ (3)	$ 116

3. REGULATORY MATTERS

RATE-RELATED INFORMATION

The NCUC, PSCSC, FPSC, IURC, PUCO, TPUC and KPSC approve rates for retail electric and natural gas services within their states. The FERC approves rates for electric sales to wholesale customers served under cost-based rates (excluding Ohio and Indiana), as well as sales of transmission service. The FERC also regulates certification and siting of new interstate natural gas pipeline projects.

Duke Energy Carolinas and Duke Energy Progress

COVID-19 Filings

North Carolina

On March 10, 2020, Governor Roy Cooper issued Executive Order No. 116 declaring a state of emergency due to the COVID-19 pandemic. On March 19, 2020, the NCUC issued an order directing that utilities under its jurisdiction suspend disconnections for nonpayment of utility bills during the state of emergency (as defined by Executive Order No. 116) and allow for customers to enter into payment arrangements to pay off arrearages accumulated during the state of emergency after the end of the state of emergency. Additionally, to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 19, 2020, Duke Energy Carolinas and Duke Energy Progress filed a request with the NCUC seeking authorization to waive: (1) any late payment charges incurred by a residential or nonresidential customer, effective March 21, 2020; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit; and (4) the fees and charges associated with the use of credit cards or debit cards to pay residential electric utility bills, effective March 21, 2020. The NCUC granted the companies' request on March 20, 2020.

On March 31, 2020, the governor issued Executive Order No. 124, which, in addition to requiring the steps in the NCUC order noted above, stated that nothing in Executive Order No. 124 shall relieve a customer of its obligation to pay bills for receipt of utility services provided. Executive Order No. 124 remains in effect for 60 days unless otherwise rescinded or replaced with a superseding Executive Order. On May 30, 2020, the governor issued Executive Order No. 142, which extended effective period for Executive Order No. 124 to July 29, 2020. Executive Order No. 142 was not extended.

On July 10, 2020, Duke Energy Carolinas and Duke Energy Progress filed a petition with the NCUC for clarification regarding when they may begin working with customers on establishing payment arrangements for arrears accumulated since March 13, 2020. On July 29, 2020, the NCUC issued its Order Lifting Disconnection Moratorium and Allowing Collection of Arrearages Pursuant to Special Repayment Plans. The order contained the following: 1) public utilities may resume customer disconnections due to nonpayment for bills first rendered on or after September 1, 2020, after appropriate notice; 2) the late fee moratorium will continue through the end of the state of emergency or until further order of the commission; 3) Duke Energy utilities may reinstate fees for checks returned for insufficient funds as well as transaction fees for use of credit cards or debit cards for bills first rendered on or after September 1, 2020; and 4) no sooner than September 1, 2020, the collection of past-due or delinquent accounts accrued up to and including August 31, 2020, may proceed subject to conditions.

Duke Energy Carolinas and Duke Energy Progress filed a joint petition on August 7, 2020, with the NCUC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

South Carolina

On March 13, 2020, Governor Henry McMaster issued Executive Order No. 2020-08 declaring a state of emergency due to the COVID-19 pandemic. The governor also issued a letter on March 14, 2020, to the ORS Executive Director regarding the suspension of disconnection of essential utility services for nonpayment. On March 18, 2020, the PSCSC issued an order approving such waivers, and also approved waivers for regulations related to late fees and reconnect fees. The PSCSC's order also required utilities to track the financial impacts of actions taken pursuant to such waivers for possible reporting to the PSCSC.

On April 30, 2020, the ORS requested the PSCSC grant a waiver of the applicable regulations to allow customers the flexibility to obtain deferred payment plans longer than six months for past-due amounts. On May 5, 2020, Duke Energy Carolinas and Duke Energy Progress filed responsive comments stating that while utility bills will remain due, Duke Energy Carolinas and Duke Energy Progress do not plan to immediately reinstitute disconnection upon the expiration of the state of emergency and intend to work through a potential grace period as economic recovery begins. Duke Energy Carolinas and Duke Energy Progress also concurred with the observation of the ORS that reduced usage is impacting the fixed-cost recovery and revenue assumptions included in rates. Those costs include not only ongoing operational and financing costs necessary to serve customers, but also the borrowings necessary to support extended payment arrangements that will be an important part of emerging from the COVID-19 pandemic. Duke Energy Carolinas and Duke Energy Progress will continue to track such costs, lost revenues and potential cost savings for future evaluation by the PSCSC.

Additionally, on May 8, 2020, the ORS filed a motion for the PSCSC to solicit comments from utilities and interested stakeholders regarding measures to be taken to mitigate impacts of COVID-19 on utility customers and require recordkeeping. In a detailed motion, the ORS specifically asked the PSCSC to: (1) solicit input from utilities regarding the temporary mitigation measures to address COVID-19; (2) request utilities to inform the PSCSC of the plans utilities have to return to normalized operations; (3) require utilities to track revenue impacts, incremental costs and savings related to COVID-19 and file the findings with the PSCSC on a quarterly basis; and (4) include any other matters that the PSCSC believes should be addressed. On May 14, 2020, the PSCSC adopted the ORS' motion.

On May 13, 2020, the ORS filed a letter with the PSCSC that included a request from Governor McMaster that utilities proceed with developing and implementing plans for phasing in normal business operations. On May 14, 2020, the PSCSC conditionally vacated the regulation waivers regarding termination of service and suspension of disconnect fees. Prior to termination, utilities are to refer past-due customers to local organizations for assistance and/or deferred payment arrangements. Duke Energy Carolinas and Duke Energy Progress filed a report on June 30, 2020, as required by PSCSC order, reporting revenue impact, costs and savings related to COVID-19 to date. Duke Energy Carolinas and Duke Energy Progress are evaluating a filing with the PSCSC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Carolinas

2017 North Carolina Rate Case

On August 25, 2017, Duke Energy Carolinas filed an application with the NCUC for a rate increase for retail customers of approximately $647 million. On February 28, 2018, Duke Energy Carolinas and the North Carolina Public Staff (Public Staff) filed an Agreement and Stipulation of Partial Settlement resolving certain portions of the proceeding. Terms of the settlement included a return on equity of 9.9% and a capital structure of 52% equity and 48% debt. On June 22, 2018, the NCUC issued an order approving the Stipulation of Partial Settlement and requiring a revenue reduction.

The North Carolina Attorney General and other parties separately filed Notices of Appeal to the North Carolina Supreme Court. On August 8, 2018, the Public Staff filed a Notice of Cross Appeal to the North Carolina Supreme Court. On November 29, 2018, the North Carolina Attorney General's Office filed a motion with the North Carolina Supreme Court requesting the court consolidate the Duke Energy Carolinas and Duke Energy Progress appeals and enter an order adopting the parties' proposed briefing schedule as set out in the filing. On November 29, 2018, the North Carolina Supreme Court adopted a schedule for briefing set forth in the motion to consolidate the Duke Energy Carolinas and Duke Energy Progress appeals. Appellant briefs were filed on April 26, 2019. The Appellee response briefs were filed on September 25, 2019. Oral arguments before the North Carolina Supreme Court were held on March 11, 2020. Duke Energy Carolinas cannot predict the outcome of this matter.

2019 North Carolina Rate Case

On September 30, 2019, Duke Energy Carolinas filed an application with the NCUC for a net rate increase for retail customers of approximately $291 million, which represented an approximate 6% increase in annual base revenues. The gross rate case revenue increase request was $445 million, which was offset by an EDIT rider of $154 million to return to customers North Carolina and federal EDIT resulting from recent reductions in corporate tax rates. The request for a rate increase was driven by major capital investments subsequent to the previous base rate case, coal ash pond closure costs, accelerated coal plant depreciation and deferred 2018 storm costs. Duke Energy Carolinas requested rates be effective no later than August 1, 2020. The NCUC established a procedural schedule with an evidentiary hearing to begin on March 23, 2020. On March 16, 2020, in consideration of public health and safety as a result of the COVID-19 pandemic, Duke Energy Carolinas filed a motion with the NCUC seeking a suspension of the procedural schedule in the rate case, including issuing discovery requests, and postponement of the evidentiary hearing for 60 days. Also on March 16, 2020, the NCUC issued an Order Postponing Hearing and Addressing Procedural Matters, which postponed the evidentiary hearing until further order by the commission.

On March 25, 2020, Duke Energy Carolinas and the Public Staff filed an Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain issues in the base rate proceeding. Major components of the settlement included:

- Removal of deferred storm costs from the rate case;
- Filing a petition seeking to securitize the deferred storm costs within 120 days of a commission order in this rate case regarding the reasonableness and prudency of the storm costs;
- Agreement of certain assumptions to demonstrate the quantifiable benefits to customers of a securitization financing; and
- Agreement on certain accounting matters, including recovery of employee incentives, severance, aviation costs and executive compensation.

On May 6, 2020, Duke Energy Carolinas, Duke Energy Progress and the Public Staff filed a joint motion requesting that the NCUC issue an order scheduling one consolidated evidentiary hearing to consider the companies' applications for net rate increases. On June 17, 2020, the NCUC issued an order adopting procedures for the expert witness hearings to take place in three phases: 1) a hearing on issues common to both rate cases conducted remotely; 2) a hearing on Duke Energy Carolinas specific rate case issues conducted in person, followed immediately by; 3) a hearing on Duke Energy Progress specific rate case issues conducted in person. On July 24, 2020, Duke Energy Carolinas filed its request for approval of its notice to customers required to implement temporary rates. On July 27, 2020, Duke Energy Carolinas filed a joint motion with Duke Energy Progress and the Public Staff notifying the commission that the parties reached a joint partial settlement with the Public Staff and requesting a postponement of the evidentiary hearing until August 24, 2020. The NCUC granted the joint motion on July 27, 2020. Also on July 27, 2020, Duke Energy Carolinas filed a letter stating that it intended to update its temporary rates calculation to reflect the terms of the partial settlement.

On July 31, 2020, Duke Energy Carolinas and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement (Second Partial Settlement), which is subject to review and approval of the NCUC, resolving certain remaining issues in the base rate proceeding. Major components of the Second Partial Settlement included:

- A return on equity of 9.6% and a capital structure of 52% equity and 48% debt;
- Agreement on amortization over a five-year period for unprotected federal EDIT flowbacks to customers;
- Agreement on the inclusion of plant in service and other revenue requirement updates through May 31, 2020, subject to Public Staff review. Annual revenue requirement associated with the May 31 update is estimated at $45 million; and
- Settlement on certain grid deferral projects of $0.8 billion and agreement to withdraw Duke Energy Carolinas' request for deferral of remaining grid projects of $0.5 billion.

The remaining items to be litigated at hearing include recovery of deferred coal ash compliance costs that are subject to asset retirement obligation accounting, implementation of new depreciation rates and amortization of the hydro station sale. As a result of the additional settlement terms, the NCUC ordered the Duke Energy Carolinas and Duke Energy Progress remote, consolidated evidentiary hearing to be delayed until August 24, 2020.

On August 4, 2020, Duke Energy Carolinas, filed an amended motion for approval of its amended notice to customers, seeking to exercise its statutory right to implement temporary rates subject to refund on or after August 24, 2020. The revenue requirement to be recovered, subject to refund, through the temporary rates is based on and consistent with the base rate component of the Second Partial Settlement with the Public Staff and excludes the items to be litigated noted above. Duke Energy Carolinas will not begin the amortization or implementation of these items until a final order is issued in the rate case and new base rates are implemented. These items will also be excluded when determining whether a refund of amounts collected through these temporary rates is needed. In addition, Duke Energy Carolinas also seeks authorization to place a temporary decrement EDIT Rider into effect, concurrent with the temporary base rate change. The temporary rate changes are not final rates and remain subject to the NCUC's determination of the just and reasonable rates to be charged by Duke Energy Carolinas on a permanent basis. The NCUC approved the August 4, 2020 amended temporary rates motion on August 6, 2020.

Duke Energy Carolinas expects the NCUC to issue an order on its net rate increase by the end of the year. Duke Energy Carolinas cannot predict the outcome of this matter.

2018 South Carolina Rate Case

On November 8, 2018, Duke Energy Carolinas filed an application with the PSCSC for a rate increase for retail customers of approximately $168 million.

After hearings in March 2019, the PSCSC issued an order on May 21, 2019, which included a return on equity of 9.5% and a capital structure of 53% equity and 47% debt. The order also included the following material components:

- Approval of cancellation of the Lee Nuclear Project, with Duke Energy Carolinas maintaining the Combined Operating License;
- Approval of recovery of $125 million (South Carolina retail portion) of Lee Nuclear Project development costs (including AFUDC through December 2017) over a 12-year period, but denial of a return on the deferred balance of costs;
- Approval of recovery of $96 million of coal ash costs over a five-year period with a return at Duke Energy Carolinas' WACC;
- Denial of recovery of $115 million of certain coal ash costs deemed to be related to the Coal Ash Act and incremental to the federal CCR rule;
- Approval of a $66 million decrease to base rates to reflect the change in ongoing tax expense, primarily the reduction in the federal income tax rate from 35% to 21%;
- Approval of a $45 million decrease through the EDIT Rider to return EDIT resulting from the federal tax rate change and deferred revenues since January 2018 related to the change, to be returned in accordance with the Average Rate Assumption Method (ARAM) for protected EDIT, over a 20-year period for unprotected EDIT associated with Property, Plant and Equipment, over a five-year period for unprotected EDIT not associated with Property, Plant and Equipment and over a five-year period for the deferred revenues; and
- Approval of a $17 million decrease through the EDIT Rider related to reductions in the North Carolina state income tax rate from 6.9% to 2.5% to be returned over a five-year period.

As a result of the order, revised customer rates were effective June 1, 2019. On May 31, 2019, Duke Energy Carolinas filed a Petition for Rehearing or Reconsideration of that order contending substantial rights of Duke Energy Carolinas were prejudiced by unlawful, arbitrary and capricious rulings by the commission on certain issues presented in the proceeding. On June 19, 2019, the PSCSC issued a Directive denying Duke Energy Carolinas' request to rehear or reconsider the commission's rulings on certain issues presented in the proceeding including coal ash remediation and disposal costs, return on equity and the recovery of a return on deferred operation and maintenance expenses. An order detailing the commission's decision in the Directive was issued on October 18, 2019. Duke Energy Carolinas filed a notice of appeal on November 15, 2019, with the Supreme Court of South Carolina. On November 20, 2019, the South Carolina Energy Users Committee filed a Notice of Appeal and the ORS filed a Notice of Cross Appeal with the Supreme Court of South Carolina. On February 12, 2020, Duke Energy Carolinas and the ORS filed a joint motion to extend briefing schedule deadlines, which was approved by the Supreme Court of South Carolina on February 20, 2020. On March 10, 2020, the ORS filed a consent motion requesting withdrawal of their appeal, which was granted by the Supreme Court of South Carolina on April 30, 2020. Initial briefs were filed on April 21, 2020, which included the South Carolina Energy User's Committee brief arguing that the PSCSC erred in allowing Duke Energy Carolinas' recovery of costs related to the Lee Nuclear Station. Response briefs were filed on July 6, 2020, and reply briefs are due on August 11, 2020. Based on legal analysis and the filing of the appeal, Duke Energy Carolinas has not recorded an adjustment for its deferred coal ash costs. Duke Energy Carolinas cannot predict the outcome of this matter.

Duke Energy Progress

2017 North Carolina Rate Case

On June 1, 2017, Duke Energy Progress filed an application with the NCUC for a rate increase for retail customers of approximately $477 million, which was subsequently adjusted to $420 million. On November 22, 2017, Duke Energy Progress and the Public Staff filed an Agreement and Stipulation of Partial Settlement resolving certain portions of the proceeding. Terms of the settlement included a return on equity of 9.9% and a capital structure of 52% equity and 48% debt. On February 23, 2018, the NCUC issued an order approving the stipulation. The Public Staff, the North Carolina Attorney General and the Sierra Club filed notes of appeal to the North Carolina Supreme Court.

On November 29, 2018, the North Carolina Attorney General's Office filed a motion with the North Carolina Supreme Court requesting the court consolidate the Duke Energy Progress and Duke Energy Carolinas appeals and enter an order adopting the parties' proposed briefing schedule as set out in the filing. Appellant briefs were filed on April 26, 2019. The Appellee response briefs were filed on September 25, 2019. Oral arguments before the North Carolina Supreme Court were held on March 11, 2020. Duke Energy Progress cannot predict the outcome of this matter.

2019 North Carolina Rate Case

On October 30, 2019, Duke Energy Progress filed an application with the NCUC for a net rate increase for retail customers of approximately $464 million, which represented an approximate 12.3% increase in annual base revenues. The gross rate case revenue increase request was $586 million, which was offset by riders of $122 million, primarily an EDIT rider of $120 million to return to customers North Carolina and federal EDIT resulting from recent reductions in corporate tax rates. The request for rate increase was driven by major capital investments subsequent to the previous base rate case, coal ash pond closure costs, accelerated coal plant depreciation and deferred 2018 storm costs. Duke Energy Progress seeks to defer and recover incremental Hurricane Dorian storm costs in this proceeding and requests rates be effective no later than September 1, 2020. As a result of the COVID-19 pandemic, on March 24, 2020, the NCUC suspended the procedural schedule and postponed the previously scheduled evidentiary hearing on this matter indefinitely. On April 7, 2020, the NCUC issued an order partially resuming the procedural schedule requiring intervenors to file direct testimony on April 13, 2020. Public Staff filed supplemental direct testimony on April 23, 2020. Duke Energy Progress filed rebuttal testimony on May 4, 2020.

On June 2, 2020, Duke Energy Progress and the Public Staff filed an Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain issues in the base rate proceeding. Major components of the settlement included:

- Removal of deferred storm costs from the rate case;
- Filing a petition seeking to securitize the deferred storm costs within 120 days of a commission order in this rate case regarding the reasonableness and prudency of the storm costs;
- Agreement of certain assumptions to demonstrate the quantifiable benefits to customers of a securitization financing;
- Agreement that the Asheville CC project is complete and in service and agreement on the amount to be included in rate base; and
- Agreement on certain accounting matters, including recovery of employee incentives, severance, aviation costs and executive compensation.

On May 6, 2020, Duke Energy Progress, Duke Energy Carolinas and the Public Staff filed a joint motion requesting that the NCUC issue an order scheduling one consolidated evidentiary hearing to consider the companies' applications for net rate increases. On June 17, 2020, the NCUC issued an order adopting procedures for the expert witness hearings to take place in three phases: 1) a hearing on issues common to both rate cases conducted remotely; 2) a hearing on Duke Energy Carolinas specific rate case issues conducted in person, followed immediately by; 3) a hearing on Duke Energy Progress specific rate case issues conducted in person. On July 27, 2020, Duke Energy Progress filed a joint motion with Duke Energy Carolinas and the Public Staff notifying the commission that the parties reached a joint partial settlement with the Public Staff and requesting a postponement of the evidentiary hearing until August 24, 2020. The NCUC granted the joint motion on July 27, 2020.

On July 31, 2020, Duke Energy Progress and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement (Second Partial Settlement), which is subject to review and approval of the NCUC, resolving certain remaining issues in the base rate proceeding. Major components of the Second Partial Settlement included:

- A return on equity of 9.6% and a capital structure of 52% equity and 48% debt;
- Agreement on amortization over a five-year period for unprotected federal EDIT flowbacks to customers;
- Agreement on the inclusion of plant in service and other revenue requirement updates through May 31, 2020, subject to Public Staff review. Annual revenue requirement associated with the May 31 update is estimated at $25 million; and
- Settlement on certain grid deferral projects of $0.5 billion and agreement to withdraw Duke Energy Progress' request for deferral of remaining grid projects of $0.5 billion.

The remaining items to be litigated at hearing include recovery of deferred coal ash compliance costs that are subject to asset retirement obligation accounting and implementation of new depreciation rates. As a result of the additional settlement terms, the NCUC ordered the Duke Energy Progress and Duke Energy Carolinas remote, consolidated evidentiary hearing to be delayed until August 24, 2020.

On August 7, 2020, Duke Energy Progress filed a motion for approval of notice required to implement temporary rates, seeking to exercise its statutory right to implement temporary rates subject to refund on or after September 1, 2020. The revenue requirement to be recovered subject to refund through the temporary rates is based on and consistent with the terms of the base rate component of the settlement agreements with the Public Staff and excludes items to be litigated noted above. Duke Energy Progress will not begin the amortization or implementation of these items until a final determination is issued in the rate case and new base rates are implemented. These items will also be excluded when determining whether a refund of amounts collected through these temporary rates is needed. In addition, Duke Energy Progress also seeks authorization to place a temporary decrement EDIT Rider into effect, concurrent with the temporary base rate change. The temporary rate changes are not final rates and remain subject to the NCUC's determination of the just and reasonable rates to be charged by Duke Energy Progress on a permanent basis.

Duke Energy Progress expects the NCUC to issue an order on its net rate increase by the end of the year. Duke Energy Progress cannot predict the outcome of this matter.

Hurricane Dorian

Hurricane Dorian reached the Carolinas in September 2019 as a Category 2 hurricane making landfall within Duke Energy Progress’ service territory. Total estimated incremental operation and maintenance expenses incurred to repair and restore the system are approximately $165 million with an additional $4 million in capital investments made for restoration efforts. Approximately $139 million and $179 million of the operation and maintenance expenses are deferred in Regulatory assets within Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of June 30, 2020, and December 31, 2019, respectively. A request for an accounting order to defer incremental storm costs associated with Hurricane Dorian was included in Duke Energy Progress' October 30, 2019, general rate case filing with the NCUC. Terms of the June 2, 2020, Agreement and Stipulation of Partial Settlement removed incremental storm costs from the general rate case. A petition seeking to securitize these costs will be filed within 120 days of an NCUC order in the general rate case. Duke Energy Progress cannot predict the outcome of this matter.

On February 7, 2020, a petition was filed with the PSCSC in the 2019 storm deferrals docket requesting deferral of approximately $22 million in operation and maintenance expenses to an existing storm deferral balance previously approved by the PSCSC. The PSCSC voted to approve the request on March 4, 2020, and issued a final order on April 7, 2020. On July 1, 2020, Duke Energy Progress filed a supplemental true up reducing the actual costs to $17 million.

2018 South Carolina Rate Case

On November 8, 2018, Duke Energy Progress filed an application with the PSCSC for a rate increase for retail customers of approximately $59 million.

After hearings in April 2019, the PSCSC issued an order on May 21, 2019, which included a return on equity of 9.5% and a capital structure of 53% equity and 47% debt. The order also included the following material components:

- Approval of recovery of $4 million of coal ash costs over a five-year period with a return at Duke Energy Progress' WACC;
- Denial of recovery of $65 million of certain coal ash costs deemed to be related to the Coal Ash Act and incremental to the federal CCR rule;
- Approval of a $17 million decrease to base rates to reflect the change in ongoing tax expense, primarily the reduction in the federal income tax rate from 35% to 21%;
- Approval of a $12 million decrease through the EDIT Tax Savings Rider resulting from the federal tax rate change and deferred revenues since January 2018 related to the change, to be returned in accordance with ARAM for protected EDIT, over a 20-year period for unprotected EDIT associated with Property, Plant and Equipment, over a five-year period for unprotected EDIT not associated with Property, Plant and Equipment and over a three-year period for the deferred revenues; and
- Approval of a $12 million increase due to the expiration of EDIT related to reductions in the North Carolina state income tax rate from 6.9% to 2.5%.

As a result of the order, revised customer rates were effective June 1, 2019. On May 31, 2019, Duke Energy Progress filed a Petition for Rehearing or Reconsideration of that order contending substantial rights of Duke Energy Progress were prejudiced by unlawful, arbitrary and capricious rulings by the commission on certain issues presented in the proceeding. On June 19, 2019, the PSCSC issued a Directive denying Duke Energy Progress' request to rehear or reconsider the commission's rulings on certain issues presented in the proceeding including coal ash remediation and disposal costs, return on equity and the recovery of a return on deferred operation and maintenance expenses, but allowing additional litigation-related costs. As a result of the Directive allowing litigation-related costs, customer rates were revised effective July 1, 2019. An order detailing the commission's decision in the Directive was issued on October 18, 2019. Duke Energy Progress filed a notice of appeal on November 15, 2019, with the Supreme Court of South Carolina. The ORS filed a Notice of Cross Appeal on November 20, 2019. On February 12, 2020, Duke Energy Progress and the ORS filed a joint motion to extend briefing schedule deadlines, which was approved by the Supreme Court of South Carolina on February 20, 2020. On March 10, 2020, the ORS filed a consent motion requesting withdrawal of their appeal, which was granted by the Supreme Court of South Carolina on April 30, 2020. Initial briefs were filed on April 21, 2020. Response briefs were filed on July 6, 2020, and reply briefs are due on August 11, 2020. Based on legal analysis and the filing of the appeal, Duke Energy Progress has not recorded an adjustment for its deferred coal ash costs. Duke Energy Progress cannot predict the outcome of this matter.

Western Carolinas Modernization Plan

Duke Energy Progress retired the 376-MW Asheville coal-fired plant on January 29, 2020, at which time the net book value, including associated ash basin closure costs, of $214 million was transferred from Generation facilities to be retired, net to Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets.

On December 27, 2019, Asheville Combined Cycle Unit 5 Combustion Turbine and Unit 6 Steam Turbine Generator and the common systems that serve combined cycle units went into commercial operation. Duke Energy Progress placed the Unit 7 Combustion Turbine into commercial operation in simple-cycle mode on January 15, 2020. The Unit 8 Steam Turbine Generator went into commercial operation on April 5, 2020. On June 2, 2020, Duke Energy Progress filed a request with the PSCSC for an accounting order for the deferral of post-in-service costs incurred in connection with the addition of the Asheville combined cycle generating plant. The petition requested the PSCSC issue an accounting order authorizing Duke Energy Progress to defer post-in-service costs including the Asheville combined cycle's depreciation expense, property taxes, incremental O&M and carrying costs at WACC of approximately $8 million annually. On June 17, 2020, the PSCSC voted to approve the petition and issued its final order on July 6, 2020.

On October 8, 2018, Duke Energy Progress filed an application with the NCUC for a CPCN to construct the Hot Springs Microgrid Solar and Battery Storage Facility, which was approved with certain conditions on May 10, 2019. A hearing to update the NCUC on the status of the project was held on March 5, 2020. Construction began in May 2020 with commercial operation expected to begin in December 2020.

FERC Return on Equity Complaint

On October 11, 2019, North Carolina Eastern Municipal Power Agency (NCEMPA) filed a complaint at the FERC against Duke Energy Progress pursuant to Section 206 of the Federal Power Act (FPA). Duke Energy Progress provides NCEMPA with service under the Full Requirements Power Purchase Agreement (FRPPA). The complaint alleges that the 11% stated return on equity (ROE) component contained in the FRPPA's demand formula rate is unjust and unreasonable. On July 16, 2020, the FERC set this matter for hearing and settlement judge procedures and established a refund effective date of October 11, 2019. In its order setting the matter for settlement, the FERC allowed for variation to the base transmission-related ROE methodology developed in Order No. 569-A, through the introduction of "specific facts and circumstances" involving the parties to this case. It is Duke Energy Progress' view that, in consideration of the specific facts and circumstances of risks under the provisions of the FRPPA, the stated 11% ROE applied to NCEMPA's metered billing demand is just and reasonable. Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Florida

COVID-19 Filings

On March 1, 2020, Governor Ron DeSantis issued Executive Order No. 20-51 directing the State Health Officer of Florida to declare a public health emergency in Florida related to the COVID-19 pandemic. The governor then issued a second Executive Order No. 20-52 on March 9, 2020, in which he declared a state of emergency in Florida and directed the Director of the Division of Emergency Management to implement the state's Comprehensive Emergency Management Plan. The governor issued additional Executive Orders – Nos. 2020-68, 2020-69, 2020-71, 2020-72 and 2020-83 – in response to the ongoing health care emergency that, among other things, suspended the in-person public meeting requirements for state agencies and local governments and directed the state surgeon general to issue public health advisories to limit potential exposure to COVID-19, advising against gatherings of 10 or more persons. On March 19, 2020, Duke Energy Florida filed a request to modify its tariff to allow it to waive late fees for customers, and on April 6, 2020, the FPSC issued an order approving the request. Duke Energy Florida had already voluntarily waived reconnect fees and credit card fees, and is not disconnecting customers for nonpayment. On April 2, 2020, Duke Energy Florida filed a petition with the FPSC to accelerate a $78 million fuel cost refund to customers in the month of May 2020. Typically, the refund would be made over the course of 2021. The FPSC approved the petition on April 28, 2020.

Storm Restoration Cost Recovery

Duke Energy Florida filed a petition with the FPSC on April 30, 2019, to recover $223 million of estimated retail incremental storm restoration costs for Hurricane Michael, consistent with the provisions in the 2017 Settlement, and the FPSC approved the petition on June 11, 2019. The FPSC also approved allowing Duke Energy Florida to use the tax savings resulting from the Tax Act to recover these storm costs in lieu of implementing a storm surcharge. Approved storm costs are currently expected to be fully recovered by approximately year-end 2021. On November 22, 2019, Duke Energy Florida filed a petition for approval of actual retail recoverable storm restoration costs related to Hurricane Michael in the amount of $191 million plus interest. On May 19, 2020, Duke Energy Florida filed a supplemental true up reducing the actual retail recoverable storm restoration costs related to Hurricane Michael by approximately $3 million, resulting in a total request to recover $188 million actual retail recoverable storm restoration costs, plus interest. An Order Establishing Procedure was issued on January 30, 2020, and hearings are scheduled to begin September 15, 2020. Approximately $163 million and $204 million of these costs are included in Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of June 30, 2020, and December 31, 2019, respectively. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Florida filed a petition with the FPSC on December 19, 2019, to recover $169 million of estimated retail incremental storm restoration costs for Hurricane Dorian, consistent with the provisions in the 2017 Settlement and the FPSC approved the petition on February 24, 2020. Approved storm costs are currently expected to be recovered over a 12-month period with rates effective in March 2020 and subject to true up. The final actual amount will be filed later in 2020 and the FPSC will hold a hearing to determine the final amount of incremental costs. Approximately $95 million and $167 million of these costs are included in Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of June 30, 2020, and December 31, 2019, respectively, representing recoverable costs under the FPSC's storm rule and Duke Energy Florida's OATT formula rates. Duke Energy Florida cannot predict the outcome of this matter.

Clean Energy Connection

On July 1, 2020, Duke Energy Florida petitioned the FPSC for approval of a voluntary solar program. The program consists of 10 new solar generating facilities with combined capacity of approximately 750 MW. The program allows participants to support cost effective solar development in Florida. Participants will pay a subscription fee based on per kilowatt-subscriptions and receive a credit on their bill based on the generation associated with their portion of the solar portfolio. The estimated cost of the 10 new solar generation facilities is approximately $1 billion over the next four years, and this investment will be included in base rates offset by the revenue from the subscription fees. The credits will be included for recovery in the fuel cost recovery clause. Duke Energy Florida cannot predict the outcome of this matter.

Crystal River Unit 3 Accelerated Decommissioning Filing

On May 29, 2019, Duke Energy Florida entered into a Decommissioning Services Agreement for the accelerated decommissioning of the Crystal River Unit 3 nuclear power station located in Citrus County, Florida, with ADP CR3, LLC and ADP SF1, LLC, each of which is a wholly owned subsidiary of Accelerated Decommissioning Partners, LLC, a joint venture between NorthStar Group Services, Inc. and Orano USA LLC. Closing of this agreement is contingent upon the approval of the U.S. Nuclear Regulatory Commission (NRC), which was received on April 1, 2020, and FPSC. If approved, the decommissioning will be accelerated starting in 2020 and continuing through 2027, rather than the expected time frame under SAFSTOR of starting in 2067 and ending in 2074. Duke Energy Florida expects that the assets of the Nuclear Decommissioning Trust Fund will be sufficient to cover the contract price. On July 10, 2019, Duke Energy Florida petitioned the FPSC for approval of the agreement. The FPSC held the hearing on July 7-9, 2020, and is expected to vote on the petition at its August 18 Agenda Conference. Duke Energy Florida cannot predict the outcome of this matter.

Storm Protection Plan

On April 10, 2020, Duke Energy Florida filed its initial Storm Protection Plan (SPP) with the FPSC. The SPP outlines storm protection programs over a 10-year planning period intended to enhance the existing infrastructure for the purpose of reducing restoration costs and reducing outage times associated with extreme weather conditions therefore improving overall service reliability. The FPSC will hold a hearing to determine whether to approve, deny, or approve the SPP with modifications beginning on August 10, 2020. On July 31, 2020, Duke Energy Florida entered into a settlement with certain intervenors in support of this filing. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Ohio

Duke Energy Ohio COVID-19 Filing

In response to the COVID-19 pandemic, on March 9, 2020, Governor Mike DeWine issued Executive Order No. 2020-01D declaring a state of emergency in the state of Ohio. The PUCO issued an order directing utilities to cease disconnections for nonpayment and waive late payment and reconnection fees and to minimize direct customer contact. The PUCO also directed utilities to maintain flexible payment plans and tariff interpretations to assist customers during this crisis and to seek any regulatory waivers, if necessary. In response, Duke Energy Ohio has ceased all disconnections except for safety-related concerns and is waiving late payment and reconnection fees. On March 19, 2020, Duke Energy Ohio filed its compliance plan with the PUCO and sought waiver of several regulations to minimize direct customer contact. On May 4, 2020, Duke Energy Ohio filed a motion to suspend payment rules to enable proactive outreach to residential customers offering additional options for managing their utility bills. PUCO found the proposal to address the state of emergency and the accompanying waivers reasonable and directed Duke Energy Ohio to work with the PUCO Staff on a comprehensive plan for resumption of activities and operations, to be filed 45 days before resumption of activities. The transition plan was filed on June 26, 2020, and approved by the PUCO on July 29, 2020.

On April 16, 2020, Duke Energy Ohio filed an application for a Reasonable Arrangement to temporarily lower the minimum bill for demand-metered commercial and industrial customers. On June 17, 2020, the PUCO denied Duke Energy Ohio's application for a reasonable arrangement and ordered the Duke Energy Ohio to work with the PUCO Staff on payment arrangements for impacted nonresidential customers.

On May 11, 2020, Duke Energy Ohio filed with the PUCO a request seeking deferral of incremental costs incurred, as well as specific miscellaneous lost revenues using existing bad debts and uncollectible riders already in place for both electric and natural gas operations. Duke Energy Ohio would subsequently file for rider recovery at a later date. On June 17, 2020, the PUCO approved Duke Energy Ohio's deferral application. The commission denied the accrual of carrying costs and ordered Duke Energy Ohio to also track potential savings experienced as a result of COVID-19.

Duke Energy Kentucky COVID-19

In response to the COVID-19 pandemic, on March 6, 2020, Governor Andy Beshear issued Executive Order No. 2020-215 declaring a state of emergency in the commonwealth of Kentucky. The KPSC issued an order directing utilities to cease disconnections for nonpayment and waive late payment. The KPSC also directed utilities to maintain flexible payment plans and tariff interpretations to assist customers during this crisis and to seek any regulatory waivers if necessary. In response, Duke Energy Kentucky has ceased all disconnections except for safety-related concerns and is waiving late payment and reconnection fees. On June 23, 2020, the KPSC issued data requests to all jurisdictional utilities seeking information on customer bill impacts, arrearages, bad debt and incremental costs and savings due to COVID-19. Responses were filed on July 21, 2020. Duke Energy Kentucky cannot predict the outcome of this matter.

2017 Electric Security Plan Filing

On June 1, 2017, Duke Energy Ohio filed with the PUCO a request for a standard service offer in the form of an ESP. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed a Stipulation and Recommendation (Stipulation) with the PUCO resolving that the term of the ESP would be from June 1, 2018, to May 31, 2025, and included continuation of market-based customer rates through competitive procurement processes for generation, continuation and expansion of existing rider mechanisms and approved new rider mechanisms relating to costs incurred to enhance the customer experience and transform the grid and a service reliability rider for vegetation management. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the Ohio Consumers' Counsel (OCC), respectively, filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the stipulation. The case has been resolved.

Electric Base Rate Case

Duke Energy Ohio filed with the PUCO an electric distribution base rate case application and supporting testimony in March 2017. Duke Energy Ohio requested an estimated annual increase of approximately $15 million and a return on equity of 10.4%. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed the Stipulation with the PUCO including a $19 million decrease in annual base distribution revenue with a return on equity unchanged from the current rate of 9.84% based upon a capital structure of 50.75% equity and 49.25% debt. Upon approval of new rates, Duke Energy Ohio's rider for recovering its initial SmartGrid implementation ended as these costs would be recovered through base rates. The Stipulation also renewed 14 existing riders, some of which were included in the company's ESP, and added two new riders including the Enhanced Service Reliability Rider to recover vegetation management costs not included in base rates, up to $10 million per year (operation and maintenance only) and the Power Future Initiatives Rider (formerly PowerForward Rider) to recover costs incurred to enhance the customer experience and further transform the grid (operation and maintenance and capital). In addition to the changes in revenue attributable to the Stipulation, Duke Energy Ohio's capital-related riders, including the Distribution Capital Investments Rider, began to reflect the lower federal income tax rate associated with the Tax Act with updates to customers' bills beginning April 1, 2018. This change reduced electric revenue by approximately $20 million on an annualized basis. On December 19, 2018, the PUCO approved the Stipulation without material modification. New base rates were implemented effective January 2, 2019. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the OCC, respectively, filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the stipulation. The case has been resolved.

Ohio Valley Electric Corporation

On March 31, 2017, Duke Energy Ohio filed for approval to adjust its existing Rider PSR to pass through net costs related to its contractual entitlement to capacity and energy from the generating assets owned by OVEC. Duke Energy Ohio sought deferral authority for net costs incurred from April 1, 2017, until the new rates under Rider PSR were put into effect. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed a Stipulation with the PUCO resolving numerous issues including those related to Rider PSR. The Stipulation activated Rider PSR for recovery of net costs incurred from January 1, 2018, through May 2025. On December 19, 2018, the PUCO approved the Stipulation without material modification. The PSR rider became effective April 1, 2019. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the OCC filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the stipulation. The case has been resolved.

On July 23, 2019, House Bill 6 (HB6) was signed into law that became effective January 1, 2020. Among other things, the bill allows for funding of two nuclear generating facilities located in Northern Ohio through a charge on utility bills owned by Energy Harbor (f/k/a FirstEnergy Solutions), repeal of energy efficiency mandates, and recovery of prudently incurred costs, net of any revenues, for Ohio investor-owned utilities that are participants under the OVEC power agreement. The recovery shall be through a non-bypassable rider that is to replace any existing recovery mechanism approved by the PUCO and will remain in place through 2030. The amounts recoverable from customers will be subject to an annual cap, with incremental costs that exceed such cap eligible for deferral and recovery subject to review. See Note 13 for additional discussion of Duke Energy Ohio's ownership interest in OVEC. In July 2020, legislation to repeal HB 6 has been proposed in both the Ohio House and Senate. Duke Energy Ohio cannot predict the outcome of this matter.

Energy Efficiency Cost Recovery

On March 28, 2014, Duke Energy Ohio filed an application for recovery of program costs, lost distribution revenue and performance incentives related to its energy efficiency and peak demand reduction programs. The PUCO approved Duke Energy Ohio's application but found that Duke Energy Ohio was not permitted to use banked energy savings from previous years in order to calculate the amount of allowed incentive. This conclusion represented a change to the cost recovery mechanism that had been agreed upon by intervenors and approved by the PUCO in previous cases. The PUCO granted the applications for rehearing filed by Duke Energy Ohio and an intervenor. On January 6, 2016, Duke Energy Ohio and the PUCO Staff entered into a stipulation, pending the PUCO's approval, to resolve issues related to performance incentives and the PUCO Staff audit of 2013 costs, among other issues. In December 2015, based upon the stipulation, Duke Energy Ohio re-established approximately $20 million of the revenues that had been previously reversed. On October 26, 2016, the PUCO issued an order approving the stipulation without modification. On February 26, 2020, the PUCO issued an order directing utilities to wind down their demand-side management programs by September 30, 2020, and to terminate the programs by December 31, 2020, in response to changes in Ohio law that eliminated Ohio's energy efficiency mandates. On March 27, 2020, Duke Energy Ohio filed an Application for Rehearing seeking clarification on the final true up and reconciliation process after 2020. On April 22, 2020, the PUCO granted rehearing for further consideration.

On June 8, 2020, Duke Energy Ohio filed an application to implement a voluntary energy efficiency program portfolio to commence on January 1, 2021. The application proposes a mechanism for recovery of program costs, lost margins and a shared savings incentive mechanism similar to those previously approved by the PUCO. On June 17, 2020, the PUCO, on its own motion, struck Duke Energy Ohio's proposal to include a shared savings mechanism in its plan finding such incentives are not permissible or supportable under Ohio law. On June 26, 2020, Duke Energy Ohio withdrew its application.

Natural Gas Pipeline Extension

Duke Energy Ohio is proposing to install a new natural gas pipeline (the Central Corridor Project) in its Ohio service territory to increase system reliability and enable the retirement of older infrastructure. Duke Energy Ohio currently estimates the pipeline development costs and construction activities will range from $163 million to $245 million in direct costs (excluding overheads and AFUDC) and that construction of the pipeline extension is expected to be completed before the 2021/2022 winter season. An evidentiary hearing for a Certificate of Environmental Compatibility and Public Need concluded on April 11, 2019. Briefs were filed on May 13, 2019, and reply briefs were filed on June 10, 2019. On November 21, 2019, the OPSB approved Duke Energy Ohio's application subject to 41 conditions on construction. Applications for rehearing were filed by several stakeholders on December 23, 2019, arguing that the OPSB approval was incorrect. On February 20, 2020, the OPSB denied the rehearing requests. On April 15, 2020, Joint Appellants filed a notice of appeal at the Supreme Court of Ohio of the OPSB's decision approving Duke Energy Ohio's Central Corridor application. On June 4, 2020, the OPSB filed a motion to dismiss claims raised by one of the Joint Appellants and to suspend the briefing schedule while the court considers the motion to dismiss. On August 5, 2020, the Supreme Court of Ohio dismissed one of the Joint Appellants from the appeal and established a new briefing schedule, with appellants' briefs due in 20 days. Duke Energy Ohio cannot predict the outcome of this matter.

MGP Cost Recovery

As part of its 2012 natural gas base rate case, Duke Energy Ohio has approval to defer and recover costs related to environmental remediation at two sites (East End and West End) that housed former MGP operations. Duke Energy Ohio has made annual applications for recovery of these deferred costs. Duke Energy Ohio has collected approximately $55 million in environmental remediation costs between 2009 through 2012 through Rider MGP, which is currently suspended. Duke Energy Ohio has made annual applications with the PUCO to recover its incremental remediation costs consistent with the PUCO's directive in Duke Energy Ohio's 2012 natural gas rate case. To date, the PUCO has not ruled on Duke Energy Ohio's annual applications for the calendar years 2013 through 2017. On September 28, 2018, the staff of the PUCO issued a report recommending a disallowance of approximately $12 million of the $26 million in MGP remediation costs incurred between 2013 through 2017 that staff believes are not eligible for recovery. Staff interprets the PUCO's 2012 Order granting Duke Energy Ohio recovery of MGP remediation as limiting the recovery to work directly on the East End and West End sites. On October 30, 2018, Duke Energy Ohio filed reply comments objecting to the staff's recommendations and explaining, among other things, the obligation Duke Energy Ohio has under Ohio law to remediate all areas impacted by the former MGPs and not just physical property that housed the former plants and equipment. On March 29, 2019, Duke Energy Ohio filed its annual application to recover incremental remediation expense for the calendar year 2018 seeking recovery of approximately $20 million in remediation costs. On July 12, 2019, the staff recommended a disallowance of approximately $11 million for work that staff believes occurred in areas not authorized for recovery. Additionally, staff recommended that any discussion pertaining to Duke Energy Ohio's recovery of ongoing MGP costs should be directly tied to or netted against insurance proceeds collected by Duke Energy Ohio. An evidentiary hearing concluded on November 21, 2019. Initial briefs were filed on January 17, 2020, and reply briefs were filed on February 14, 2020. Duke Energy Ohio cannot predict the outcome of this matter.

On March 31, 2020, Duke Energy Ohio filed its annual application to recover incremental remediation expense for the calendar year 2019 seeking recovery of approximately $39 million in remediation costs incurred during 2019. On July 23, 2020, the staff recommended a disallowance of approximately $4 million for work the staff believes occurred in areas not authorized for recovery. Additionally, the staff recommended insurance proceeds, net of litigation costs and attorney fees, should be reimbursed to customers and not be held by Duke Energy Ohio until all investigation and remediation is complete. Duke Energy Ohio cannot predict the outcome of this matter.

The 2012 PUCO order also contained conditional deadlines for completing the MGP environmental investigation and the deferral of remediation costs at the MGP sites. Subsequent to the order, the deadline was extended to December 31, 2019. On May 10, 2019, Duke Energy Ohio filed an application requesting a continuation of its existing deferral authority for MGP remediation and investigation that must occur after December 31, 2019. On September 13, 2019, intervenor comments were filed opposing Duke Energy Ohio's request for continuation of existing deferral authority and on October 2, 2019, Duke Energy Ohio filed reply comments. Duke Energy Ohio cannot predict the outcome of this matter.

Duke Energy Kentucky Electric Base Rate Case

On September 3, 2019, Duke Energy Kentucky filed a rate case with the KPSC requesting an increase in electric base rates of approximately $46 million. On January 31, 2020, Duke Energy Kentucky filed rebuttal testimony updating its rate increase calculations to approximately $44 million. Hearings concluded on February 20, 2020, and briefing was completed March 20, 2020. On April 27, 2020, the KPSC issued its decision approving a $24 million increase for Duke Energy Kentucky with a 9.25% return on equity. The KPSC denied Duke Energy Kentucky's major storm deferral mechanism and EV and battery storage pilots. The KPSC approved Duke Energy Kentucky's Green Source Advantage tariff. New customer rates were effective on May 1, 2020. On May 18, 2020, Duke Energy Kentucky filed its motion for rehearing and on June 4, 2020, the motion was granted in part and denied in part by the KPSC. On August 6, 2020, Duke Energy Kentucky submitted a letter to the commission submitting the case for decision without hearing. On August 6, 2020, the Kentucky Attorney General also filed a letter requesting to submit the rehearing case for decision without hearing. The Attorney General's letter also stated that the commission's reduction to the company's forecasted capital in its initial order was overstated and should be corrected, resulting in an approximate $5 million increase in the company's revenue requirement. Duke Energy Kentucky cannot predict the outcome of this matter.

Duke Energy Indiana

COVID-19

In response to the COVID-19 pandemic, on March 6, 2020, Governor Eric Holcomb issued Executive Order No. 20-02, which by law expired in 30 days unless extended, declaring a public health disaster emergency in the state of Indiana. Subsequently, the governor issued Executive Orders Nos. 20-17, 20-25, 20-30 and 20-34, each renewing the public health disaster emergency declaration for an additional 30 days, which is currently extended through September 2, 2020. All other Executive Orders issued since March 6, 2020, (Nos. 20-04 – 20-16) were renewed for the same 30-day period, provided they were supplements to Executive Order No. 20-02. Executive Order No. 20-05 was issued on March 19, 2020, requiring utilities in the state to suspend disconnections of utility service. Duke Energy Indiana had already voluntarily suspended all disconnections and is waiving late payment fees and check return fees. The utility is also waiving credit card fees for residential customers.

On May 8, 2020, Duke Energy Indiana, along with other Indiana utilities, filed a request with the IURC for approval of deferral treatment for costs and revenue reductions associated with the COVID-19 pandemic. The utilities requested initial deferral approval in July 2020, with individual subdockets for each utility to be established for consideration of utility-specific cost and revenue impacts, cost recovery timing and customer payment plans. On June 29, 2020, the IURC issued an order in Phase 1 wherein it extended the disconnection moratorium for jurisdictional utilities until August 14, 2020, along with requiring six month payment arrangements, waiver of late fees, reconnection fees, convenience fees and deposits. The IURC permitted jurisdictional utilities to use regulatory accounting for any impacts associated with the prohibition on utility disconnections, waiver or exclusion of certain utility fees (i.e., late fees, convenience fees, deposits, and reconnection fees), the use of expanded payment arrangements to aid customers, and for COVID-19 related uncollectible and incremental bad debt expense. The IURC did not permit recovery of lost revenues due to load reduction or carrying costs. In Phase 2 filings, individual utilities may choose to request regulatory accounting for other COVID-19 related operation and maintenance costs wherein evidence of the impact of any costs or offsetting savings can be presented and considered in an evidentiary hearing. Duke Energy Indiana cannot predict the outcome of this matter.

2019 Indiana Rate Case

On July 2, 2019, Duke Energy Indiana filed a general rate case with the IURC for a rate increase for retail customers of approximately $395 million. The rebuttal case, filed on December 4, 2019, updated the requested revenue requirement to result in a 15.6% or $396 million average retail rate increase, including the impacts of the Utility Receipts Tax. Hearings concluded on February 7, 2020. On June 29, 2020, the IURC issued the order in the rate case approving a revenue increase of $146 million before certain adjustments and ratemaking refinements. The order provided for an overall cost of capital of 5.7% based on a 9.7% return on equity and a 53% equity component of the capital structure, and approved Duke Energy Indiana's requested forecasted rate base of $10.2 billion as of December 31, 2020, including the Edwardsport IGCC Plant. The IURC reduced Duke Energy Indiana's request by slightly more than $200 million, when accounting for the utility receipts tax and other adjustments. Approximately 50% of the reduction is due to a prospective change in depreciation and use of regulatory asset for the end-of-life inventory at retired generating plants, approximately 20% is due to the approved 9.7% return on equity versus requested 10.4% and approximately 20% is related to miscellaneous earnings neutral adjustments. The rates were effective July 30, 2020. Several groups filed notices of appeal of the IURC order on July 29, 2020. Duke Energy Indiana cannot predict the outcome of this matter.

2020 Indiana Coal Ash Recovery Case

In Duke Energy Indiana's rate case, the IURC approved coal ash basin closure costs expended through 2018 including financing costs as a regulatory asset and included in rate base. The IURC opened a subdocket to deal with the post-2018 coal ash related expenditures. Duke Energy Indiana filed testimony on April 15, 2020, in the coal ash subdocket requesting recovery for the post-2018 coal ash basin closure costs for plans that have been approved by the Indiana Department of Environmental Management as well as continuing deferral, with carrying costs, on the balance. An evidentiary hearing is scheduled to begin on September 14, 2020, and an order is expected in the first quarter of 2021. Duke Energy Indiana cannot predict the outcome of this matter.

Piedmont

COVID-19 Filings

North Carolina

On March 10, 2020, Governor Roy Cooper issued Executive Order No. 116 declaring a state of emergency due to the COVID-19 pandemic. On March 19, 2020, the NCUC issued on order directing that utilities under its jurisdiction suspend disconnections for nonpayment of utility bills during the state of emergency (as defined by Executive Order No. 116) and allow for customers to enter into payment arrangements to pay off arrearages accumulated during the state of emergency after the end of the state of emergency. Additionally, to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 19, 2020, Piedmont filed a request with the NCUC seeking authorization to waive: (1) any late payment charges incurred by a residential or nonresidential customer, effective March 21, 2020; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit; and (4) the fees and charges associated with the use of credit cards or debit cards to pay residential electric utility bills, effective March 21, 2020. The NCUC granted Piedmont's request on March 20, 2020.

On March 31, 2020, the governor issued Executive Order No. 124, which, in addition to requiring the steps in the NCUC order noted above, stated that nothing in Executive Order No. 124 shall relieve a customer of its obligation to pay bills for receipt of utility services provided. Executive Order No. 124 remains in effect for 60 days unless otherwise rescinded or replaced with a superseding Executive Order. On May 30, 2020, the governor issued Executive Order No. 142, which extended effective period for Executive Order No. 124 to July 29, 2020. Executive Order No. 142 was not extended.

On July 10, 2020, Piedmont filed a petition with the NCUC for clarification regarding when they may begin working with customers on establishing payment arrangements for arrears accumulated since March 13, 2020. On July 29, 2020, the NCUC issued its Order Lifting Disconnection Moratorium and Allowing Collection of Arrearages Pursuant to Special Repayment Plans. The order contained the following: 1) public utilities may resume customer disconnections due to nonpayment for bills first rendered on or after September 1, 2020, after appropriate notice; 2) the late fee moratorium will continue through the end of the state of emergency or until further order of the commission; 3) Duke Energy utilities may reinstate fees for checks returned for insufficient funds as well as transaction fees for use of credit cards or debit cards for bills first rendered on or after September 1, 2020; and 4) no sooner than September 1, 2020, the collection of past due or delinquent accounts accrued up to and including August 31, 2020, may proceed subject to conditions. Piedmont cannot predict the outcome of this matter.

South Carolina

On March 13, 2020, Governor Henry McMaster issued Executive Order No. 2020-08 declaring a state of emergency due to the COVID-19 pandemic. The governor also issued a letter on March 14, 2020, to the ORS Executive Director regarding the suspension of disconnection of essential utility services for nonpayment. On March 18, 2020, the PSCSC issued an order approving such waivers, and also approved waivers for regulations related to late fees and reconnect fees. The PSCSC's order also required utilities to track the financial impacts of actions taken pursuant to such waivers for possible reporting to the PSCSC.

On April 30, 2020, the ORS requested the PSCSC grant a waiver of the applicable regulations to allow customers the flexibility to obtain deferred payment plans longer than six months for past-due amounts. On May 5, 2020, Piedmont filed responsive comments stating that while utility bills will remain due, Piedmont does not plan to immediately reinstitute disconnection upon the expiration of the state of emergency and intends to work through a potential grace period as economic recovery begins. Piedmont also concurred with the observation of the ORS that reduced usage is impacting the fixed-cost recovery and revenue assumptions included in rates. Those costs include not only ongoing operational and financing costs necessary to serve customers, but also the borrowings necessary to support extended payment arrangements that will be an important part of emerging from the COVID-19 pandemic. Piedmont will continue to track such costs, lost revenues and potential cost savings for future evaluation by the PSCSC.

Additionally, on May 8, 2020, the ORS filed a motion for the PSCSC to solicit comments from utilities and interested stakeholders regarding measures to be taken to mitigate impacts of COVID-19 on utility customers and require recordkeeping. In a detailed motion, the ORS specifically asked the PSCSC to: (1) solicit input from utilities regarding the temporary mitigation measures to address COVID-19; (2) request utilities to inform the PSCSC of the plans utilities have to return to normalized operations; (3) require utilities to track revenue impacts, incremental costs and savings related to COVID-19 and file the findings with the PSCSC on a quarterly basis; and (4) include any other matters that the PSCSC believes should be addressed. On May 14, 2020, the PSCSC adopted the ORS' motion.

On May 13, 2020, the ORS filed a letter with the PSCSC that included a request from Governor McMaster that utilities proceed with developing and implementing plans for phasing in normal business operations. On May 14, 2020, the PSCSC conditionally vacated the regulation waivers regarding termination of service and suspension of disconnect fees. Prior to termination, utilities are to refer past-due customers to local organizations for assistance and/or deferred payment arrangements. Piedmont filed a report on June 30, 2020, as required by PSCSC order, reporting revenue impact, costs and savings related to COVID-19 to date. Piedmont cannot predict the outcome of this matter.

Tennessee

On March 12, 2020, Governor Bill Lee issued Executive Order No. 14 declaring a state of emergency due to the COVID-19 pandemic. In an effort to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 20, 2020, Piedmont filed a request with the TPUC seeking authorization to waive, effective March 21, 2020: (1) any late payment charges incurred by a residential or nonresidential customer; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; and (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit. The TPUC granted Piedmont's request by Order issued March 31,2020. The Order also stated that customers were not relieved of their obligation to pay for utility services received.

2020 Tennessee Rate Case

On July 2, 2020, Piedmont filed an application with the TPUC, its first general rate case in Tennessee in nine years, for a rate increase for retail customers of approximately $30 million, which represents an approximate 15% increase in annual revenues. The rate increase is driven by significant infrastructure upgrade investments since its previous rate case. Approximately half of the plant additions being added to rate base are categories of capital investment not covered under the IMR mechanism, which was approved in 2013. An evidentiary hearing is expected to be scheduled for fall 2020, and a decision and revised customer rates are expected to become effective January 1, 2021. Piedmont cannot predict the outcome of this matter.

OTHER REGULATORY MATTERS

Atlantic Coast Pipeline, LLC

On September 2, 2014, Duke Energy, Dominion Energy, Inc. (Dominion), Piedmont and Southern Company Gas announced the formation of Atlantic Coast Pipeline, LLC (ACP) to build and own the proposed Atlantic Coast Pipeline (ACP pipeline), an approximately 600-mile interstate natural gas pipeline running from West Virginia to North Carolina. The ACP pipeline was designed to meet, in part, the needs identified by Duke Energy Carolinas, Duke Energy Progress and Piedmont. Dominion would have been responsible for building and operating the ACP pipeline and holds a leading ownership percentage in ACP of 53%, following the purchase in March 2020 of Southern Company Gas' 5% ownership interest. Duke Energy owns a 47% interest, which is accounted for as an equity method investment through its Gas Utilities and Infrastructure segment.

On April 15, 2020, the United States District Court for the District of Montana granted partial summary judgment in favor of the plaintiffs in Northern Plains Resource Council v. U.S. Army Corps of Engineers (USACE) (Northern Plains), vacating USACE's Nationwide Permit 12 (NWP 12) and remanding it to USACE for consultation under the Endangered Species Act (ESA) of 1973. In Northern Plains, the court ruled that NWP 12 was unlawful because USACE did not consult under the ESA with the U.S. Fish and Wildlife Service and/or National Marine Fisheries Service prior to NWP 12's reissuance in 2017. Because NWP 12 has been vacated and its application enjoined, USACE currently has suspended verification of any new or pending applications under NWP 12 until further court action clarifies the situation.

On May 28, 2020, the U.S. Court of Appeals for the Ninth Circuit issued a ruling that limited the NWP 12 vacatur to energy infrastructure projects. In July 2020, the Supreme Court of the United States issued an order allowing other new oil and gas pipeline projects to use the NWP 12 process pending appeal to the U.S. Court of Appeals for the Ninth Circuit; however, that did not decrease the uncertainty associated with an eventual ruling. Together, these rulings indicated that the timeline to reinstate the necessary water crossing permits for ACP would likely cause further delays and cost increases.

On July 5, 2020, Dominion announced a sale of substantially all of its gas transmission and storage segment assets, operations core to the ACP pipeline project.

As a result of the uncertainty created by the NWP 12 rulings, the potential impact on the cost and schedule for the project, the ongoing legal challenges and the risk of additional legal challenges and delays through the construction period and Dominion's decision to sell substantially all of its gas transmission and storage segment assets, Duke Energy's Board of Directors and management decided that it was not prudent to continue to invest in the project. On July 5, 2020, Duke Energy and Dominion announced the cancellation of the ACP pipeline.

As a result, Duke Energy recorded a pretax charge to earnings of approximately $2.0 billion for the three months and six months ended June 30, 2020, within Equity in (losses) earnings of unconsolidated affiliates on the Duke Energy Condensed Consolidated Statements of Operations. The tax benefit associated with this abandonment was $374 million and is recorded in Income Tax (Benefit) Expense on the Duke Energy Condensed Consolidated Statements of Operations. Additional charges of less than $100 million are expected to be recorded within the next 12 months as ACP incurs obligations to exit operations.

As part of the pretax charge to earnings of approximately $2.0 billion, Duke Energy established a $920 million current liability related to the abandonment of ACP within Current Liabilities in the Gas Utilities and Infrastructure segment. The liability represents Duke Energy's obligation of approximately $860 million to fund ACP's outstanding debt and approximately $60 million to satisfy ARO requirements to restore construction sites.

See Notes 1, 4 and 11 for additional information regarding this transaction.

Potential Coal Plant Retirements

The Subsidiary Registrants periodically file integrated resource plans (IRPs) with their state regulatory commissions. The IRPs provide a view of forecasted energy needs over a long term (10 to 20 years) and options being considered to meet those needs. IRPs filed by the Subsidiary Registrants included planning assumptions to potentially retire certain coal-fired generating facilities in North Carolina and Indiana earlier than their current estimated useful lives. Duke Energy continues to evaluate the potential need to retire these coal-fired generating facilities earlier than the current estimated useful lives and plans to seek regulatory recovery for amounts that would not be otherwise recovered when any of these assets are retired.

The table below contains the net carrying value of generating facilities planned for retirement or included in recent IRPs as evaluated for potential retirement. Dollar amounts in the table below are included in Net property, plant and equipment on the Condensed Consolidated Balance Sheets as of June 30, 2020, and exclude capitalized asset retirement costs.

	Capacity (in MW)	Remaining Net Book Value (in millions)
Duke Energy Carolinas		
Allen Steam Station Units 1-3[(a)]	**585**	**$ 145**
Duke Energy Indiana		
Gallagher Units 2 and 4[(b)]	**280**	**116**
Gibson Units 1-5[(c)]	**3,132**	**1,690**
Cayuga Units 1-2[(c)]	**1,005**	**953**
Total Duke Energy	**5,002**	**$ 2,904**

(a) Duke Energy Carolinas will retire Allen Steam Station units 1 through 3 by December 31, 2024, as part of the resolution of a lawsuit involving alleged New Source Review violations.
(b) Duke Energy Indiana committed to either retire or stop burning coal at Gallagher units 2 and 4 by December 31, 2022, as part of the 2016 settlement of Edwardsport IGCC matters.
(c) On July 1, 2019, Duke Energy Indiana filed its 2018 IRP with the IURC. The 2018 IRP included scenarios evaluating the potential retirement of coal-fired generating units at Gibson and Cayuga. The rate case filed July 2, 2019, included proposed depreciation rates reflecting retirement dates from 2026 to 2038. These updated retirement dates were approved by the IURC as part of the rate case order issued on June 29, 2020.

Duke Energy continues to evaluate the potential need to retire generating facilities earlier than the current estimated useful lives, and plans to seek regulatory recovery, as necessary, for amounts that would not be otherwise recovered when any of these assets are retired. However, such recovery, including recovery of carrying costs on remaining book values, could be subject to future approvals and therefore cannot be assured.

Duke Energy Carolinas and Duke Energy Progress are evaluating the potential for coal-fired generating unit retirements with a net carrying value of approximately $693 million and $1.2 billion, respectively, included in Net property, plant and equipment on the Condensed Consolidated Balance Sheets as of June 30, 2020.

4. COMMITMENTS AND CONTINGENCIES

ENVIRONMENTAL

The Duke Energy Registrants are subject to federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal, coal ash and other environmental matters. These regulations can be changed from time to time, imposing new obligations on the Duke Energy Registrants. The following environmental matters impact all Duke Energy Registrants.

Remediation Activities

In addition to AROs recorded as a result of various environmental regulations, the Duke Energy Registrants are responsible for environmental remediation at various sites. These include certain properties that are part of ongoing operations and sites formerly owned or used by Duke Energy entities. These sites are in various stages of investigation, remediation and monitoring. Managed in conjunction with relevant federal, state and local agencies, remediation activities vary based upon site conditions and location, remediation requirements, complexity and sharing of responsibility. If remediation activities involve joint and several liability provisions, strict liability, or cost recovery or contribution actions, the Duke Energy Registrants could potentially be held responsible for environmental impacts caused by other potentially responsible parties and may also benefit from insurance policies or contractual indemnities that cover some or all cleanup costs. Liabilities are recorded when losses become probable and are reasonably estimable. The total costs that may be incurred cannot be estimated because the extent of environmental impact, allocation among potentially responsible parties, remediation alternatives and/or regulatory decisions have not yet been determined at all sites. Additional costs associated with remediation activities are likely to be incurred in the future and could be significant. Costs are typically expensed as Operation, maintenance and other on the Condensed Consolidated Statements of Operations unless regulatory recovery of the costs is deemed probable.

The following table contains information regarding reserves for probable and estimable costs related to the various environmental sites. These reserves are recorded in Accounts Payable within Current Liabilities and Other within Other Noncurrent Liabilities on the Condensed Consolidated Balance Sheets.

(in millions)	June 30, 2020	December 31, 2019
Reserves for Environmental Remediation		
Duke Energy	**$ 55**	$ 58
Duke Energy Carolinas	**10**	11
Progress Energy	**14**	16
Duke Energy Progress	**5**	4
Duke Energy Florida	**8**	9
Duke Energy Ohio	**19**	19
Duke Energy Indiana	**5**	4
Piedmont	**7**	8

Additional losses in excess of recorded reserves that could be incurred for the stages of investigation, remediation and monitoring for environmental sites that have been evaluated at this time are not material except as presented in the table below.

(in millions)	
Duke Energy	$ 59
Duke Energy Carolinas	11
Duke Energy Ohio	42

LITIGATION

Duke Energy Carolinas and Duke Energy Progress

Coal Ash Insurance Coverage Litigation

In March 2017, Duke Energy Carolinas and Duke Energy Progress filed a civil action in North Carolina Business Court against various insurance providers. The lawsuit seeks payment for coal ash-related liabilities covered by third-party liability insurance policies. The insurance policies were issued between 1971 and 1986 and provide third-party liability insurance for property damage. The civil action seeks damages for breach of contract and indemnification for costs arising from the Coal Ash Act and the EPA CCR rule at 15 coal-fired plants in North Carolina and South Carolina. In February and March 2020, the court heard arguments on numerous cross motions filed by the parties to seek legal determinations concerning several insurance related defenses raised by the insurance providers. On June 5, 2020, the court issued four rulings in favor of Duke Energy's legal positions in the coal ash recovery litigation proceedings. Due to COVID-19, the court has issued a new scheduling order and the trial is now scheduled for January 2022. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Carolinas

Asbestos-related Injuries and Damages Claims

Duke Energy Carolinas has experienced numerous claims for indemnification and medical cost reimbursement related to asbestos exposure. These claims relate to damages for bodily injuries alleged to have arisen from exposure to or use of asbestos in connection with construction and maintenance activities conducted on its electric generation plants prior to 1985. As of June 30, 2020, there were 118 asserted claims for non-malignant cases with cumulative relief sought of up to $27 million, and 59 asserted claims for malignant cases with cumulative relief sought of up to $20 million. Based on Duke Energy Carolinas' experience, it is expected that the ultimate resolution of most of these claims likely will be less than the amount claimed.

Duke Energy Carolinas has recognized asbestos-related reserves of $590 million at June 30, 2020, and $604 million at December 31, 2019. These reserves are classified in Other within Other Noncurrent Liabilities and Other within Current Liabilities on the Condensed Consolidated Balance Sheets. These reserves are based upon Duke Energy Carolinas' best estimate for current and future asbestos claims through 2039 and are recorded on an undiscounted basis. In light of the uncertainties inherent in a longer-term forecast, management does not believe they can reasonably estimate the indemnity and medical costs that might be incurred after 2039 related to such potential claims. It is possible Duke Energy Carolinas may incur asbestos liabilities in excess of the recorded reserves.

Duke Energy Carolinas has third-party insurance to cover certain losses related to asbestos-related injuries and damages above an aggregate self-insured retention. Duke Energy Carolinas' cumulative payments began to exceed the self-insured retention in 2008. Future payments up to the policy limit will be reimbursed by the third-party insurance carrier. The insurance policy limit for potential future insurance recoveries indemnification and medical cost claim payments is $747 million in excess of the self-insured retention. Receivables for insurance recoveries were $742 million at June 30, 2020, and December 31, 2019. These amounts are classified in Other within Other Noncurrent Assets and Receivables within Current Assets on the Condensed Consolidated Balance Sheets. Duke Energy Carolinas is not aware of any uncertainties regarding the legal sufficiency of insurance claims. Duke Energy Carolinas believes the insurance recovery asset is probable of recovery as the insurance carrier continues to have a strong financial strength rating.

Duke Energy Progress and Duke Energy Florida

Spent Nuclear Fuel Matters

On June 18, 2018, Duke Energy Progress and Duke Energy Florida sued the U.S. in the U.S. Court of Federal Claims for damages incurred for the period 2014 through 2018. The lawsuit claimed the Department of Energy breached a contract in failing to accept spent nuclear fuel under the Nuclear Waste Policy Act of 1982 and asserted damages for the cost of on-site storage in the amount of $100 million and $203 million for Duke Energy Progress and Duke Energy Florida, respectively. Discovery is ongoing and a trial is expected to occur in 2021.

Duke Energy Florida

Power Purchase Dispute Arbitration

Duke Energy Florida, on behalf of its customers, entered into a power purchase contract for the purchase of firm capacity and energy from a qualified facility. Duke Energy Florida determined the qualified facility did not perform in accordance with the power purchase contract, and Duke Energy Florida terminated the power purchase contract. The qualified facility counterparty filed a confidential American Arbitration Association (AAA) arbitration demand, challenging the termination of the power purchase contract and seeking damages. Duke Energy Florida denies liability and is vigorously defending the arbitration claim. The final arbitration hearing is scheduled for December 2020. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Indiana

Coal Ash Basin Closure Plan Appeal

On January 27, 2020, Hoosier Environmental Council filed a Petition for Administrative Review with the Indiana Office of Environmental Adjudication (the court) challenging the Indiana Department of Environmental Management's December 10, 2019, partial approval of Duke Energy Indiana's ash pond closure plan. On March 11, 2020, Duke Energy Indiana filed a Motion to Dismiss. On May 5, 2020, the court entered an order denying that motion. The parties are engaged in discovery and a hearing is scheduled for February 22, 2021. Duke Energy Indiana cannot predict the outcome of this matter.

Other Litigation and Legal Proceedings

The Duke Energy Registrants are involved in other legal, tax and regulatory proceedings arising in the ordinary course of business, some of which involve significant amounts. The Duke Energy Registrants believe the final disposition of these proceedings will not have a material effect on their results of operations, cash flows or financial position.

The table below presents recorded reserves based on management's best estimate of probable loss for legal matters, excluding asbestos-related reserves discussed above. Reserves are classified on the Condensed Consolidated Balance Sheets in Other within Other Noncurrent Liabilities and Other within Current Liabilities. The reasonably possible range of loss in excess of recorded reserves is not material, other than as described above.

(in millions)	June 30, 2020	December 31, 2019
Reserves for Legal Matters		
Duke Energy	**$ 60**	$ 62
Duke Energy Carolinas	**3**	2
Progress Energy	**52**	55
Duke Energy Progress	**9**	12
Duke Energy Florida	**23**	22
Piedmont	**1**	1

OTHER COMMITMENTS AND CONTINGENCIES

General

As part of their normal business, the Duke Energy Registrants are party to various financial guarantees, performance guarantees and other contractual commitments to extend guarantees of credit and other assistance to various subsidiaries, investees and other third parties. These guarantees involve elements of performance and credit risk, which are not fully recognized on the Condensed Consolidated Balance Sheets and have uncapped maximum potential payments. However, the Duke Energy Registrants do not believe these guarantees will have a material effect on their results of operations, cash flows or financial position.

In addition, the Duke Energy Registrants enter into various fixed-price, noncancelable commitments to purchase or sell power or natural gas, take-or-pay arrangements, transportation, or throughput agreements and other contracts that may or may not be recognized on their respective Condensed Consolidated Balance Sheets. Some of these arrangements may be recognized at fair value on their respective Condensed Consolidated Balance Sheets if such contracts meet the definition of a derivative and the NPNS exception does not apply. In most cases, the Duke Energy Registrants' purchase obligation contracts contain provisions for price adjustments, minimum purchase levels and other financial commitments.

As described in Note 1, Duke Energy adopted the new guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year reported results. The reserve for credit losses for insurance receivables based on adoption of the new standard is $15 million for Duke Energy and Duke Energy Carolinas as of June 30, 2020. Insurance receivables are evaluated based on the risk of default and the historical losses, current conditions and expected conditions around collectability. Management evaluates the risk of default annually based on payment history, credit rating and changes in the risk of default from credit agencies.

As of June 30, 2020, Duke Energy recognized $860 million related to the guarantees of ACP's outstanding debt of which $95 million was previously recognized due the adoption of new guidance for credit losses effective January 1, 2020. This reserve is included within Other current liabilities on the Condensed Consolidated Balance Sheets. See Notes 1, 3 and 11 for more information. The remaining reserve for credit losses for financial guarantees of $4 million as of June 30, 2020, is included within Other noncurrent liabilities on the Duke Energy's Condensed Consolidated Balance Sheets. Management considers financial guarantees for evaluation under this standard based on the anticipated amount outstanding at the time of default. The reserve for credit losses is based on the evaluation of the contingent components of financial guarantees. Management evaluates the risk of default, exposure and length of time remaining in the period for each contract.

5. DEBT AND CREDIT FACILITIES

SUMMARY OF SIGNIFICANT DEBT ISSUANCES

The following table summarizes significant debt issuances (in millions).

			Six Months Ended June 30, 2020						
Issuance Date	**Maturity Date**	**Interest Rate**	**Duke Energy**	**Duke Energy (Parent)**	**Duke Energy Carolinas**	**Duke Energy Florida**	**Duke Energy Ohio**	**Duke Energy Indiana**	**Piedmont**
Unsecured Debt									
May 2020[(a)]	Jun 2030	2.450%	**$ 500**	**$ 500**	$ —	$ —	$ —	$ —	**$ —**
May 2020[(b)]	Jun 2050	3.350%	**400**	—	—	—	—	—	**400**
First Mortgage Bonds									
January 2020[(c)]	Feb 2030	2.450%	**500**	**—**	**500**	**—**	**—**	**—**	**—**
January 2020[(c)]	Aug 2049	3.200%	**400**	**—**	**400**	**—**	**—**	**—**	**—**
March 2020[(d)]	Apr 2050	2.750%	**550**	**—**	**—**	**—**	**—**	**550**	**—**
May 2020[(b)]	Jun 2030	2.125%	**400**	**—**	**—**	**—**	**400**	**—**	**—**
June 2020[(b)]	Jun 2030	1.750%	**500**	**—**	**—**	**500**	**—**	**—**	**—**
Total issuances			**$ 3,250**	**$ 500**	**$ 900**	**$ 500**	**$ 400**	**$ 550**	**$ 400**

(a) Debt issued to repay $500 million borrowing made under Duke Energy (Parent) revolving credit facility in March 2020, and for general corporate purposes.
(b) Debt issued to repay short-term debt and for general corporate purposes.
(c) Debt issued to repay at maturity $450 million first mortgage bonds due June 2020 and for general corporate purposes.
(d) Debt issued to repay at maturity $500 million first mortgage bonds due July 2020 and to pay down short-term debt.

CURRENT MATURITIES OF LONG-TERM DEBT

The following table shows the significant components of Current Maturities of Long-Term Debt on the Condensed Consolidated Balance Sheets. The Duke Energy Registrants currently anticipate satisfying these obligations with cash on hand and proceeds from additional borrowings.

(in millions)	Maturity Date	Interest Rate	June 30, 2020
Unsecured Debt			
Duke Energy Progress	December 2020	0.986% (a)	$ 700
Progress Energy, Inc	January 2021	4.400%	500
Duke Energy (Parent)	May 2021	0.924% (a)	500
Piedmont	June 2021	4.240%	160
Secured Debt			
Duke Energy Florida	April 2021	1.384% (a)	250
First Mortgage Bonds			
Duke Energy Indiana	July 2020	3.750%	500
Duke Energy Progress	September 2020	0.498% (a)	300
Duke Energy Carolinas	June 2021	3.900%	500
Other(b)			346
Current maturities of long-term debt			$ 3,756

(a) Debt has a floating interest rate.
(b) Includes finance lease obligations, amortizing debt and small bullet maturities.

AVAILABLE CREDIT FACILITIES

Master Credit Facility

In March 2020, Duke Energy amended its existing $8 billion Master Credit Facility to extend the termination date to March 2025. The Duke Energy Registrants, excluding Progress Energy, have borrowing capacity under the Master Credit Facility up to a specified sublimit for each borrower. Duke Energy has the unilateral ability at any time to increase or decrease the borrowing sublimits of each borrower, subject to a maximum sublimit for each borrower. The amount available under the Master Credit Facility has been reduced to backstop issuances of commercial paper, certain letters of credit and variable-rate demand tax-exempt bonds that may be put to the Duke Energy Registrants at the option of the holder.

The table below includes the current borrowing sublimits and available capacity under these credit facilities.

	June 30, 2020							
(in millions)	Duke Energy	Duke Energy (Parent)	Duke Energy Carolinas	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Facility size(a)	$ 8,000	$ 2,650	$ 1,500	$ 1,250	$ 800	$ 600	$ 600	$ 600
Reduction to backstop issuances								
Commercial paper(b)	(2,480)	(1,248)	(389)	(323)	(156)	(79)	(150)	(135)
Outstanding letters of credit	(47)	(40)	(3)	(2)	—	—	—	(2)
Tax-exempt bonds	(81)	—	—	—	—	—	(81)	—
Available capacity under the Master Credit Facility	$ 5,392	$ 1,362	$ 1,108	$ 925	$ 644	$ 521	$ 369	$ 463

(a) Represents the sublimit of each borrower.
(b) Duke Energy issued $625 million of commercial paper and loaned the proceeds through the money pool to Duke Energy Carolinas, Duke Energy Progress, Duke Energy Ohio and Duke Energy Indiana. The balances are classified as Long-Term Debt Payable to Affiliated Companies on the Condensed Consolidated Balance Sheets.

Term Loan Facility

In response to market volatility and ongoing liquidity impacts from COVID-19, in March 2020, Duke Energy (Parent) entered into a $1.5 billion, 364-day Term Loan Credit Agreement, borrowing the full $1.5 billion available on March 19, 2020. The term loan contains a provision for increasing the amount available for borrowing by up to $500 million. Duke Energy (Parent) exercised this provision on March 27, 2020, borrowing an additional $188 million. Proceeds were used to reduce outstanding commercial paper and for general corporate purposes. Refer to Note 1 for additional information on the COVID-19 pandemic.

Other Credit Facilities

	June 30, 2020	
(in millions)	Facility size	Amount drawn
Duke Energy (Parent) Three-Year Revolving Credit Facility[(a)]	$ 1,000	$ 500
Duke Energy Progress Term Loan Facility	700	700

(a) In March 2020, Duke Energy (Parent) drew down the remaining $500 million. In May 2020, Duke Energy (Parent) repaid $500 million with proceeds of May 2020 unsecured debt issuance.

6. GOODWILL

Duke Energy

The following table presents the goodwill by reportable segment included on Duke Energy's Condensed Consolidated Balance Sheets at June 30, 2020, and December 31, 2019.

(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total
Goodwill balance	$ 17,379	$ 1,924	$ 122	$ 19,425
Accumulated impairment charges	—	—	(122)	(122)
Goodwill, adjusted for accumulated impairment charges	$ 17,379	$ 1,924	$ —	$ 19,303

Duke Energy Ohio

Duke Energy Ohio's Goodwill balance of $920 million, allocated $596 million to Electric Utilities and Infrastructure and $324 million to Gas Utilities and Infrastructure, is presented net of accumulated impairment charges of $216 million on the Condensed Consolidated Balance Sheets at June 30, 2020, and December 31, 2019.

Progress Energy

Progress Energy's Goodwill is included in the Electric Utilities and Infrastructure segment and there are no accumulated impairment charges.

Piedmont

Piedmont's Goodwill is included in the Gas Utilities and Infrastructure segment and there are no accumulated impairment charges.

7. RELATED PARTY TRANSACTIONS

The Subsidiary Registrants engage in related party transactions in accordance with applicable state and federal commission regulations. Refer to the Condensed Consolidated Balance Sheets of the Subsidiary Registrants for balances due to or due from related parties. Material amounts related to transactions with related parties included on the Condensed Consolidated Statements of Operations and Comprehensive Income are presented in the following table.

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	**2020**	**2019**	**2020**	**2019**
Duke Energy Carolinas				
Corporate governance and shared service expenses[(a)]	**$ 196**	$ 197	**$ 330**	$ 409
Indemnification coverages[(b)]	**5**	5	**10**	10
Joint Dispatch Agreement (JDA) revenue[(c)]	**3**	17	**10**	40
JDA expense[(c)]	**20**	20	**44**	113
Intercompany natural gas purchases[(d)]	**10**	3	**16**	7
Progress Energy				
Corporate governance and shared service expenses[(a)]	**$ 189**	$ 183	**$ 335**	$ 359
Indemnification coverages[(b)]	**9**	10	**18**	19
JDA revenue[(c)]	**20**	20	**44**	113
JDA expense[(c)]	**3**	17	**10**	40
Intercompany natural gas purchases[(d)]	**19**	19	**38**	38
Duke Energy Progress				
Corporate governance and shared service expenses[(a)]	**$ 113**	$ 108	**$ 188**	$ 214
Indemnification coverages[(b)]	**5**	4	**9**	8
JDA revenue[(c)]	**20**	20	**44**	113
JDA expense[(c)]	**3**	17	**10**	40
Intercompany natural gas purchases[(d)]	**19**	19	**38**	38
Duke Energy Florida				
Corporate governance and shared service expenses[(a)]	**$ 76**	$ 75	**$ 147**	$ 145
Indemnification coverages[(b)]	**4**	6	**9**	11
Duke Energy Ohio				
Corporate governance and shared service expenses[(a)]	**$ 77**	$ 83	**$ 161**	$ 168
Indemnification coverages[(b)]	**1**	1	**2**	2
Duke Energy Indiana				
Corporate governance and shared service expenses[(a)]	**$ 92**	$ 93	**$ 198**	$ 190
Indemnification coverages[(b)]	**2**	1	**4**	3
Piedmont				
Corporate governance and shared service expenses[(a)]	**$ 37**	$ 37	**$ 71**	$ 69
Indemnification coverages[(b)]	**—**	—	**1**	1
Intercompany natural gas sales[(d)]	**29**	22	**54**	45
Natural gas storage and transportation costs[(e)]	**6**	6	**12**	11

(a) The Subsidiary Registrants are charged their proportionate share of corporate governance and other shared services costs, primarily related to human resources, employee benefits, information technology, legal and accounting fees, as well as other third-party costs. These amounts are primarily recorded in Operation, maintenance and other on the Condensed Consolidated Statements of Operations and Comprehensive Income.

(b) The Subsidiary Registrants incur expenses related to certain indemnification coverages through Bison, Duke Energy's wholly owned captive insurance subsidiary. These expenses are recorded in Operation, maintenance and other on the Condensed Consolidated Statements of Operations and Comprehensive Income.

(c) Duke Energy Carolinas and Duke Energy Progress participate in a JDA, which allows the collective dispatch of power plants between the service territories to reduce customer rates. Revenues from the sale of power and expenses from the purchase of power pursuant to the JDA are recorded in Operating Revenues and Fuel used in electric generation and purchased power, respectively, on the Condensed Consolidated Statements of Operations and Comprehensive Income.

(d) Piedmont provides long-term natural gas delivery service to certain Duke Energy Carolinas and Duke Energy Progress natural gas-fired generation facilities. Piedmont records the sales in Operating revenues, and Duke Energy Carolinas and Duke Energy Progress record the related purchases as a component of Fuel used in electric generation and purchased power on their respective Condensed Consolidated Statements of Operations and Comprehensive Income.

(e) Piedmont has related party transactions as a customer of its equity method investments in Pine Needle LNG Company, LLC, Hardy Storage Company, LLC and Cardinal Pipeline Company, LLC natural gas storage and transportation facilities. These expenses are included in Cost of natural gas on Piedmont's Condensed Consolidated Statements of Operations and Comprehensive Income.

In addition to the amounts presented above, the Subsidiary Registrants have other affiliate transactions, including rental of office space, participation in a money pool arrangement, other operational transactions, such as pipeline lease arrangements, and their proportionate share of certain charged expenses. These transactions of the Subsidiary Registrants are incurred in the ordinary course of business and are eliminated in consolidation.

As discussed in Note 11, certain trade receivables have been sold by Duke Energy Ohio and Duke Energy Indiana to CRC, an affiliate formed by a subsidiary of Duke Energy. The proceeds obtained from the sales of receivables are largely cash but do include a subordinated note from CRC for a portion of the purchase price.

Intercompany Income Taxes

Duke Energy and the Subsidiary Registrants file a consolidated federal income tax return and other state and jurisdictional returns. The Subsidiary Registrants have a tax sharing agreement with Duke Energy for the allocation of consolidated tax liabilities and benefits. Income taxes recorded represent amounts the Subsidiary Registrants would incur as separate C-Corporations. The following table includes the balance of intercompany income tax receivables and payables for the Subsidiary Registrants.

(in millions)	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
June 30, 2020							
Intercompany income tax receivable	**$ —**	**$ 63**	**$ —**	**$ —**	**$ —**	**$ 10**	**$ 23**
Intercompany income tax payable	**19**	**—**	**7**	**51**	**1**	**—**	**—**
December 31, 2019							
Intercompany income tax receivable	$ —	$ 125	$ 28	$ —	$ 9	$ 28	$ 13
Intercompany income tax payable	5	—	—	2	—	—	—

8. DERIVATIVES AND HEDGING

The Duke Energy Registrants use commodity and interest rate contracts to manage commodity price risk and interest rate risk. The primary use of commodity derivatives is to hedge the generation portfolio against changes in the prices of electricity and natural gas. Piedmont enters into natural gas supply contracts to provide diversification, reliability and natural gas cost benefits to its customers. Interest rate derivatives are used to manage interest rate risk associated with borrowings.

All derivative instruments not identified as NPNS are recorded at fair value as assets or liabilities on the Condensed Consolidated Balance Sheets. Cash collateral related to derivative instruments executed under master netting arrangements is offset against the collateralized derivatives on the Condensed Consolidated Balance Sheets. The cash impacts of settled derivatives are recorded as operating activities on the Condensed Consolidated Statements of Cash Flows.

INTEREST RATE RISK

The Duke Energy Registrants are exposed to changes in interest rates as a result of their issuance or anticipated issuance of variable-rate and fixed-rate debt and commercial paper. Interest rate risk is managed by limiting variable-rate exposures to a percentage of total debt and by monitoring changes in interest rates. To manage risk associated with changes in interest rates, the Duke Energy Registrants may enter into interest rate swaps, U.S. Treasury lock agreements and other financial contracts. In anticipation of certain fixed-rate debt issuances, a series of forward-starting interest rate swaps or Treasury locks may be executed to lock in components of current market interest rates. These instruments are later terminated prior to or upon the issuance of the corresponding debt.

Cash Flow Hedges

For a derivative designated as hedging the exposure to variable cash flows of a future transaction, referred to as a cash flow hedge, the effective portion of the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings once the future transaction impacts earnings. Amounts for interest rate contracts are reclassified to earnings as interest expense over the term of the related debt. Gains and losses reclassified out of accumulated other comprehensive income (loss) for the three and six months ended June 30, 2020, and 2019, were not material. Duke Energy's interest rate derivatives designated as hedges include interest rate swaps used to hedge existing debt within the Commercial Renewables business and forward-starting interest rate swaps not accounted for under regulatory accounting.

Undesignated Contracts

Undesignated contracts primarily include contracts not designated as a hedge because they are accounted for under regulatory accounting or contracts that do not qualify for hedge accounting.

Duke Energy's interest rate swaps for its regulated operations employ regulatory accounting. With regulatory accounting, the mark-to-market gains or losses on the swaps are deferred as regulatory liabilities or regulatory assets, respectively. Regulatory assets and liabilities are amortized consistent with the treatment of the related costs in the ratemaking process. The accrual of interest on the swaps is recorded as Interest Expense on the Duke Energy Registrant's Condensed Consolidated Statements of Operations and Comprehensive Income.

The following table shows notional amounts of outstanding derivatives related to interest rate risk.

	June 30, 2020					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio
Cash flow hedges	$ 650	$ —	$ —	$ —	$ —	$ —
Undesignated contracts	1,477	400	1,050	1,050	—	27
Total notional amount[(a)]	$ 2,127	$ 400	$ 1,050	$ 1,050	$ —	$ 27

	December 31, 2019					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio
Cash flow hedges	$ 993	$ —	$ —	$ —	$ —	$ —
Undesignated contracts	1,277	450	800	250	550	27
Total notional amount[(a)]	$ 2,270	$ 450	$ 800	$ 250	$ 550	$ 27

(a) Duke Energy includes amounts related to consolidated VIEs of $650 million in cash flow hedges as of June 30, 2020, and $693 million in cash flow hedges as of December 31, 2019.

COMMODITY PRICE RISK

The Duke Energy Registrants are exposed to the impact of changes in the prices of electricity purchased and sold in bulk power markets and coal and natural gas purchases, including Piedmont's natural gas supply contracts. Exposure to commodity price risk is influenced by a number of factors including the term of contracts, the liquidity of markets and delivery locations. For the Subsidiary Registrants, bulk power electricity and coal and natural gas purchases flow through fuel adjustment clauses, formula-based contracts or other cost-sharing mechanisms. Differences between the costs included in rates and the incurred costs, including undesignated derivative contracts, are largely deferred as regulatory assets or regulatory liabilities. Piedmont policies allow for the use of financial instruments to hedge commodity price risks. The strategy and objective of these hedging programs are to use the financial instruments to reduce natural gas costs volatility for customers.

Volumes

The tables below include volumes of outstanding commodity derivatives. Amounts disclosed represent the absolute value of notional volumes of commodity contracts excluding NPNS. The Duke Energy Registrants have netted contractual amounts where offsetting purchase and sale contracts exist with identical delivery locations and times of delivery. Where all commodity positions are perfectly offset, no quantities are shown.

	June 30, 2020						
	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Ohio	Duke Energy Indiana	Piedmont

Natural gas (millions of dekatherms)	704	130	160	160	—	3	411

U.S. EQUITY SECURITIES RISK

In May 2019, Duke Energy Florida entered into a Decommissioning Services Agreement for the accelerated decommissioning of Crystal River Unit 3 with ADP CR3, LLC and ADP SF1, LLC. See Note 3 for additional information on the accelerated decommissioning. Duke Energy Florida executed U.S. equity option collars within the NDTF in May 2019, to preserve the U.S. equity portfolio value in the Duke Energy Florida NDTF in the event the accelerated decommissioning is approved. The Duke Energy Florida NDTF liquidated the options in April 2020, and received proceeds of approximately $7 million.

LOCATION AND FAIR VALUE OF DERIVATIVE ASSETS AND LIABILITIES RECOGNIZED ON THE CONDENSED CONSOLIDATED BALANCE SHEETS

The following tables show the fair value and balance sheet location of derivative instruments. Although derivatives subject to master netting arrangements are netted on the Condensed Consolidated Balance Sheets, the fair values presented below are shown gross and cash collateral on the derivatives has not been netted against the fair values shown.

OFFSETTING ASSETS AND LIABILITIES

The following tables present the line items on the Condensed Consolidated Balance Sheets where derivatives are reported. Substantially all of Duke Energy's outstanding derivative contracts are subject to enforceable master netting arrangements. The gross amounts offset in the tables below show the effect of these netting arrangements on financial position, and include collateral posted to offset the net position. The amounts shown are calculated by counterparty. Accounts receivable or accounts payable may also be available to offset exposures in the event of bankruptcy. These amounts are not included in the tables below.

Derivative Assets	June 30, 2020

OBJECTIVE CREDIT CONTINGENT FEATURES

Certain derivative contracts contain objective credit contingent features. These features include the requirement to post cash collateral or letters of credit if specific events occur, such as a credit rating downgrade below investment grade. The following tables show information with respect to derivative contracts that are in a net liability position and contain objective credit-risk-related payment provisions.

	June 30, 2020			
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress
Aggregate fair value of derivatives in a net liability position	**$ 63**	**$ 29**	**$ 34**	**$ 34**
Fair value of collateral already posted	**—**	**—**	**—**	**—**
Additional cash collateral or letters of credit in the event credit-risk-related contingent features were triggered	**63**	**29**	**34**	**34**

	December 31, 2019			
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress
Aggregate fair value of derivatives in a net liability position	$ 79	$ 35	$ 44	$ 44
Fair value of collateral already posted	—	—	—	—
Additional cash collateral or letters of credit in the event credit-risk-related contingent features were triggered	79	35	44	44

The Duke Energy Registrants have elected to offset cash collateral and fair values of derivatives. For amounts to be netted, the derivative and cash collateral must be executed with the same counterparty under the same master netting arrangement.

9. INVESTMENTS IN DEBT AND EQUITY SECURITIES

Duke Energy's investments in debt and equity securities are primarily comprised of investments held in (i) the NDTF at Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida, (ii) the grantor trusts at Duke Energy Progress, Duke Energy Florida and Duke Energy Indiana related to OPEB plans and (iii) Bison. The Duke Energy Registrants classify investments in debt securities as AFS and investments in equity securities as fair value through net income (FV-NI).

For investments in debt securities classified as AFS, the unrealized gains and losses are included in other comprehensive income until realized, at which time they are reported through net income. For investments in equity securities classified as FV-NI, both realized and unrealized gains and losses are reported through net income. Substantially all of Duke Energy's investments in debt and equity securities qualify for regulatory accounting, and accordingly, all associated realized and unrealized gains and losses on these investments are deferred as a regulatory asset or liability.

Duke Energy classifies the majority of investments in debt and equity securities as long term, unless otherwise noted.

Investment Trusts

The investments within the Investment Trusts are managed by independent investment managers with discretion to buy, sell and invest pursuant to the objectives set forth by the investment manager agreements and trust agreements. The Duke Energy Registrants have limited oversight of the day-to-day management of these investments. As a result, the ability to hold investments in unrealized loss positions is outside the control of the Duke Energy Registrants. Accordingly, all unrealized losses associated with debt securities within the Investment Trusts are recognized immediately and deferred to regulatory accounts where appropriate.

Other AFS Securities

Unrealized gains and losses on all other AFS securities are included in other comprehensive income until realized, unless it is determined the carrying value of an investment has a credit loss. The Duke Energy Registrants analyze all investment holdings each reporting period to determine whether a decline in fair value is related to a credit loss. If a credit loss exists, the unrealized credit loss is included in earnings. There were no material credit losses as of June 30, 2020, and December 31, 2019.

Other Investments amounts are recorded in Other within Other Noncurrent Assets on the Condensed Consolidated Balance Sheets.

DUKE ENERGY

The following table presents the estimated fair value of investments in debt and equity securities; equity investments are classified as FV-NI and debt investments are classified as AFS.

Total Investments	$ 40	$ 1	$ 122	$ 44	$ —	$ 125

Realized gains and losses, which were determined on a specific identification basis, from sales of FV-NI and AFS securities for the three and six months ended June 30, 2020, and 2019, were immaterial.

DEBT SECURITY MATURITIES

The table below summarizes the maturity date for debt securities.

	June 30, 2020					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Indiana
Due in one year or less	$ 63	$ 19	$ 30	$ 28	$ 2	$ 3
Due after one through five years	563	254	244	235	9	15
Due after five through 10 years	587	270	226	219	7	9
Due after 10 years	1,319	696	543	509	34	18
Total	$ 2,532	$ 1,239	$ 1,043	$ 991	$ 52	$ 45

10. FAIR VALUE MEASUREMENTS

Fair value is the exchange price to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. The fair value definition focuses on an exit price versus the acquisition cost. Fair value measurements use market data or assumptions market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs may be readily observable, corroborated by market data or generally unobservable. Valuation techniques maximize the use of observable inputs and minimize use of unobservable inputs. A midmarket pricing convention (the midpoint price between bid and ask prices) is permitted for use as a practical expedient.

Fair value measurements are classified in three levels based on the fair value hierarchy as defined by GAAP. Certain investments are not categorized within the fair value hierarchy. These investments are measured at fair value using the net asset value (NAV) per share practical expedient. The NAV is derived based on the investment cost, less any impairment, plus or minus changes resulting from observable price changes for an identical or similar investment of the same issuer.

Fair value accounting guidance permits entities to elect to measure certain financial instruments that are not required to be accounted for at fair value, such as equity method investments or the company's own debt, at fair value. The Duke Energy Registrants have not elected to record any of these items at fair value.

Valuation methods of the primary fair value measurements disclosed below are as follows.

Investments in equity securities

The majority of investments in equity securities are valued using Level 1 measurements. Investments in equity securities are typically valued at the closing price in the principal active market as of the last business day of the quarter. Principal active markets for equity prices include published exchanges such as the New York Stock Exchange and Nasdaq Stock Market. Foreign equity prices are translated from their trading currency using the currency exchange rate in effect at the close of the principal active market. There was no after-hours market activity that was required to be reflected in the reported fair value measurements.

Investments in debt securities

Most investments in debt securities are valued using Level 2 measurements because the valuations use interest rate curves and credit spreads applied to the terms of the debt instrument (maturity and coupon interest rate) and consider the counterparty credit rating. If the market for a particular fixed-income security is relatively inactive or illiquid, the measurement is Level 3.

Commodity derivatives

Commodity derivatives with clearinghouses are classified as Level 1. If forward price curves are not observable for the full term of the contract and the unobservable period had more than an insignificant impact on the valuation, the commodity derivative is classified as Level 3. In isolation, increases (decreases) in natural gas forward prices result in favorable (unfavorable) fair value adjustments for natural gas purchase contracts; and increases (decreases) in electricity forward prices result in unfavorable (favorable) fair value adjustments for electricity sales contracts. Duke Energy regularly evaluates and validates pricing inputs used to estimate the fair value of natural gas commodity contracts by a market participant price verification procedure. This procedure provides a comparison of internal forward commodity curves to market participant generated curves.

Interest rate derivatives

Most over-the-counter interest rate contract derivatives are valued using financial models that utilize observable inputs for similar instruments and are classified as Level 2. Inputs include forward interest rate curves, notional amounts, interest rates and credit quality of the counterparties.

Other fair value considerations

See Note 12 in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019, for a discussion of the valuation of goodwill and intangible assets.

DUKE ENERGY

The following tables provide recorded balances for assets and liabilities measured at fair value on a recurring basis on the Condensed Consolidated Balance Sheets. Derivative amounts in the tables below for all Duke Energy Registrants exclude cash collateral, which is disclosed in Note 8. See Note 9 for additional information related to investments by major security type for the Duke Energy Registrants.

Total Level 3 derivatives	$ (102)					

OTHER FAIR VALUE DISCLOSURES

The fair value and book value of long-term debt, including current maturities, is summarized in the following table. Estimates determined are not necessarily indicative of amounts that could have been settled in current markets. Fair value of long-term debt uses Level 2 measurements.

	June 30, 2020		December 31, 2019	
(in millions)	Book Value	Fair Value	Book Value	Fair Value
Duke Energy[(a)]	$ 59,899	$ 68,428	$ 58,126	$ 63,062
Duke Energy Carolinas	12,521	15,046	11,900	13,516
Progress Energy	19,604	23,476	19,634	22,291
Duke Energy Progress	9,063	10,506	9,058	9,934
Duke Energy Florida	7,951	9,655	7,987	9,131
Duke Energy Ohio	3,019	3,551	2,619	2,964
Duke Energy Indiana	4,603	5,617	4,057	4,800
Piedmont	2,779	3,289	2,384	2,642

(a) Book value of long-term debt includes $1.4 billion at June 30, 2020, and $1.5 billion at December 31, 2019, of unamortized debt discount and premium, net of purchase accounting adjustments related to the mergers with Progress Energy and Piedmont that are excluded from fair value of long-term debt.

At both June 30, 2020, and December 31, 2019, fair value of cash and cash equivalents, accounts and notes receivable, accounts payable, notes payable and commercial paper and nonrecourse notes payable of VIEs are not materially different from their carrying amounts because of the short-term nature of these instruments and/or because the stated rates approximate market rates.

11. VARIABLE INTEREST ENTITIES

CONSOLIDATED VIEs

The obligations of the consolidated VIEs discussed in the following paragraphs are nonrecourse to the Duke Energy Registrants. The registrants have no requirement to provide liquidity to, purchase assets of or guarantee performance of these VIEs unless noted in the following paragraphs.

No financial support was provided to any of the consolidated VIEs during the six months ended June 30, 2020, and the year ended December 31, 2019, or is expected to be provided in the future that was not previously contractually required.

Receivables Financing – DERF/DEPR/DEFR

DERF, DEPR and DEFR are bankruptcy remote, special purpose subsidiaries of Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida, respectively. DERF, DEPR and DEFR are wholly owned LLCs with separate legal existence from their parent companies, and their assets are not generally available to creditors of their parent companies. On a revolving basis, DERF, DEPR and DEFR buy certain accounts receivable arising from the sale of electricity and related services from their parent companies.

DERF, DEPR and DEFR borrow amounts under credit facilities to buy these receivables. Borrowing availability from the credit facilities is limited to the amount of qualified receivables purchased which generally exclude receivables past due more than a predetermined number of days and reserves for expected past-due balances. The sole source of funds to satisfy the related debt obligations is cash collections from the receivables. Amounts borrowed under the credit facilities for DERF and DEPR are reflected on the Condensed Consolidated Balance Sheets as Long-Term Debt. Amounts borrowed under the credit facilities for DEFR are reflected on the Condensed Consolidated Balance Sheets as Current maturities of long-term debt.

Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. The full impact of COVID-19 and the Duke Energy Registrant’s related response on customers’ ability to pay for service is uncertain. However, the level of past-due receivables at Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida have increased significantly during the COVID-19 pandemic, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates. In the second quarter of 2020, DERF, DEPR and DEFR executed amendments to their credit facilities to manage the impact of past-due receivables resulting from the suspension of customer disconnections from COVID-19. See Note 3 for information about COVID-19 filings with state utility commissions.

The most significant activity that impacts the economic performance of DERF, DEPR and DEFR are the decisions made to manage delinquent receivables. Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida are considered the primary beneficiaries and consolidate DERF, DEPR and DEFR, respectively, as they make those decisions.

Receivables Financing – CRC

CRC is a bankruptcy remote, special purpose entity indirectly owned by Duke Energy. On a revolving basis, CRC buys certain accounts receivable arising from the sale of electricity, natural gas and related services from Duke Energy Ohio and Duke Energy Indiana. CRC borrows amounts under a credit facility to buy the receivables from Duke Energy Ohio and Duke Energy Indiana. Borrowing availability from the credit facility is limited to the amount of qualified receivables sold to CRC which generally exclude receivables past due more than a predetermined number of days and reserves for expected past-due balances. The sole source of funds to satisfy the related debt obligation is cash collections from the receivables. Amounts borrowed under the credit facility are reflected on Duke Energy's Condensed Consolidated Balance Sheets as Long-Term Debt.

The proceeds Duke Energy Ohio and Duke Energy Indiana receive from the sale of receivables to CRC are approximately 75% cash and 25% in the form of a subordinated note from CRC. The subordinated note is a retained interest in the receivables sold. Depending on collection experience, additional equity infusions to CRC may be required by Duke Energy to maintain a minimum equity balance of $3 million.

Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. The full impact of COVID-19 and the Duke Energy Registrant’s related response on customers’ ability to pay for service is uncertain. However, the level of past-due receivables at Duke Energy Ohio and Duke Energy Indiana have increased significantly during the COVID-19 pandemic, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates. In July of 2020, CRC executed an amendment to its credit facility to manage the impact of past-due receivables resulting from the suspension of customer disconnections from COVID-19. See Note 3 for information about COVID-19 filings with state utility commissions.

CRC is considered a VIE because (i) equity capitalization is insufficient to support its operations, (ii) power to direct the activities that most significantly impact the economic performance of the entity is not held by the equity holder and (iii) deficiencies in net worth of CRC are funded by Duke Energy. The most significant activities that impact the economic performance of CRC are decisions made to manage delinquent receivables. Duke Energy is considered the primary beneficiary and consolidates CRC as it makes these decisions. Neither Duke Energy Ohio nor Duke Energy Indiana consolidate CRC.

Receivables Financing – Credit Facilities

The following table summarizes the amounts and expiration dates of the credit facilities and associated restricted receivables described above.

	Duke Energy	Duke Energy Carolinas	Duke Energy Progress	Duke Energy Florida
(in millions)	CRC	DERF	DEPR	DEFR
Expiration date	February 2023	December 2022	April 2023	April 2021
Credit facility amount	$ 350	$ 475	$ 350	$ 250
Amounts borrowed at June 30, 2020	**350**	**475**	**333**	**250**
Amounts borrowed at December 31, 2019	350	474	325	250
Restricted Receivables at June 30, 2020	**454**	**675**	**451**	**463**
Restricted Receivables at December 31, 2019	522	642	489	336

Nuclear Asset-Recovery Bonds – DEFPF

DEFPF is a bankruptcy remote, wholly owned special purpose subsidiary of Duke Energy Florida. DEFPF was formed in 2016 for the sole purpose of issuing nuclear asset-recovery bonds to finance Duke Energy Florida's unrecovered regulatory asset related to Crystal River Unit 3.

In 2016, DEFPF issued senior secured bonds and used the proceeds to acquire nuclear asset-recovery property from Duke Energy Florida. The nuclear asset-recovery property acquired includes the right to impose, bill, collect and adjust a non-bypassable nuclear asset-recovery charge from all Duke Energy Florida retail customers until the bonds are paid in full and all financing costs have been recovered. The nuclear asset-recovery bonds are secured by the nuclear asset-recovery property and cash collections from the nuclear asset-recovery charges are the sole source of funds to satisfy the debt obligation. The bondholders have no recourse to Duke Energy Florida.

DEFPF is considered a VIE primarily because the equity capitalization is insufficient to support its operations. Duke Energy Florida has the power to direct the significant activities of the VIE as described above and therefore Duke Energy Florida is considered the primary beneficiary and consolidates DEFPF.

The following table summarizes the impact of DEFPF on Duke Energy Florida's Condensed Consolidated Balance Sheets.

(in millions)	June 30, 2020	December 31, 2019
Receivables of VIEs	**$ 6**	$ 5
Regulatory Assets: Current	**53**	52
Current Assets: Other	**32**	39
Other Noncurrent Assets: Regulatory assets	**969**	989
Current Liabilities: Other	**10**	10
Current maturities of long-term debt	**54**	54
Long-Term Debt	**1,028**	1,057

Commercial Renewables

Certain of Duke Energy's renewable energy facilities are VIEs due to Duke Energy issuing guarantees for debt service and operations and maintenance reserves in support of debt financings. Assets are restricted and cannot be pledged as collateral or sold to third parties without prior approval of debt holders. Additionally, Duke Energy has VIEs associated with tax equity arrangements entered into with third-party investors in order to finance the cost of renewable assets eligible for tax credits. The activities that most significantly impacted the economic performance of these renewable energy facilities were decisions associated with siting, negotiating PPAs and Engineering, Procurement and Construction agreements, and decisions associated with ongoing operations and maintenance-related activities. Duke Energy is considered the primary beneficiary and consolidates the entities as it is responsible for all of these decisions.

The table below presents material balances reported on Duke Energy's Condensed Consolidated Balance Sheets related to Commercial Renewables VIEs.

(in millions)	June 30, 2020	December 31, 2019
Current Assets: Other	**$ 228**	$ 203
Property, Plant and Equipment: Cost	**6,198**	5,747
Accumulated depreciation and amortization	**(1,145)**	(1,041)
Other Noncurrent Assets: Other	**75**	106
Current maturities of long-term debt	**158**	162
Long-Term Debt	**1,457**	1,541
Other Noncurrent Liabilities: AROs	**144**	127
Other Noncurrent Liabilities: Other	**251**	228

NON-CONSOLIDATED VIEs

The Duke Energy Registrants are not aware of any situations where the maximum exposure to loss significantly exceeds the carrying values shown above except for the PPA with OVEC, which is discussed below, and future exit costs associated with the abandonment of the investment in ACP, as discussed below.

Pipeline Investments

Duke Energy has investments in various joint ventures to construct and operate pipeline projects. These entities are considered VIEs due to having insufficient equity to finance their own activities without subordinated financial support. Duke Energy does not have the power to direct the activities that most significantly impact the economic performance, the obligation to absorb losses or the right to receive benefits of these VIEs and therefore does not consolidate these entities.

On July 5, 2020, Duke Energy determined that it would no longer invest in the construction of the ACP pipeline. See Notes 1, 3 and 4 for further information regarding this transaction.

For the three and six months ended June 30, 2020, the ACP investment is considered a significant subsidiary because its income exceeds 20% of Duke Energy's income. The table below presents unaudited summarized financial information for ACP.

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	2020	2019	2020	2019
Net (Loss) Income	$ (4,414)	$ 61	$ (4,342)	$ 114

The table below presents Duke Energy's ownership interest and investment balances in these joint ventures.

		VIE Investment Amount (in millions)	
Entity Name	Ownership Interest	June 30, 2020	December 31, 2019
ACP[(a)]	47%	**$ (920)**	$ 1,179
Constitution[(b)]	24%	**—**	—
Total		**$ (920)**	$ 1,179

(a) During the quarter ended June 30, 2020, Duke Energy abandoned its investment in ACP as described above. The current liability related to the abandonment of ACP represents Duke Energy's obligation to fund ACP's obligations. See Notes 1, 3 and 4 for more information.
(b) During the year ended December 31, 2019, Duke Energy recorded an other-than-temporary impairment related to Constitution. This charge resulted in the full write-down of Duke Energy's investment in Constitution.

Commercial Renewables

Duke Energy has investments in various renewable energy project entities. Some of these entities are VIEs due to Duke Energy issuing guarantees for debt service and operations and maintenance reserves in support of debt financings. Duke Energy does not consolidate these VIEs because power to direct and control key activities is shared jointly by Duke Energy and other owners.

Other

In 2019, Duke Energy acquired a majority ownership in a portfolio of distributed fuel cell projects from Bloom Energy Corporation. Duke Energy is not the primary beneficiary of the assets within the portfolio and does not consolidate the assets in the portfolio.

OVEC

Duke Energy Ohio’s 9% ownership interest in OVEC is considered a non-consolidated VIE due to OVEC having insufficient equity to finance its activities without subordinated financial support. The activities that most significantly impact OVEC's economic performance include fuel strategy and supply activities and decisions associated with ongoing operations and maintenance-related activities. Duke Energy Ohio does not have the unilateral power to direct these activities, and therefore, does not consolidate OVEC.

As a counterparty to an Inter-Company Power Agreement (ICPA), Duke Energy Ohio has a contractual arrangement to receive entitlements to capacity and energy from OVEC’s power plants through June 2040 commensurate with its power participation ratio, which is equivalent to Duke Energy Ohio's ownership interest. Costs, including fuel, operating expenses, fixed costs, debt amortization and interest expense, are allocated to counterparties to the ICPA based on their power participation ratio. The value of the ICPA is subject to variability due to fluctuation in power prices and changes in OVEC's cost of business. On March 31, 2018, FirstEnergy Solutions Corp (FES), a subsidiary of FirstEnergy Corp. and an ICPA counterparty with a power participation ratio of 4.85%, filed for Chapter 11 bankruptcy, which could increase costs allocated to the counterparties. On July 31, 2018, the bankruptcy court rejected the FES ICPA, which means OVEC is an unsecured creditor in the FES bankruptcy proceeding. In addition, certain proposed environmental rulemaking could result in future increased OVEC cost allocations. In July 2020, legislation was proposed to repeal HB 6. Duke Energy cannot predict the outcome in this matter. See Note 3 for additional information.

CRC

See discussion under Consolidated VIEs for additional information related to CRC.

Amounts included in Receivables from affiliated companies in the above table for Duke Energy Ohio and Duke Energy Indiana reflect their retained interest in receivables sold to CRC. These subordinated notes held by Duke Energy Ohio and Duke Energy Indiana are stated at fair value.

The following table shows the gross and net receivables sold.

	Duke Energy Ohio		Duke Energy Indiana	
(in millions)	June 30, 2020	December 31, 2019	June 30, 2020	December 31, 2019
Receivables sold	**$ 221**	$ 253	**$ 280**	$ 307
Less: Retained interests	**34**	64	**49**	77
Net receivables sold	**$ 187**	$ 189	**$ 231**	$ 230

The following table shows sales and cash flows related to receivables sold.

	Duke Energy Ohio				Duke Energy Indiana			
	Three Months Ended June 30,		Six Months Ended June 30,		Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	2020	2019	2020	2019	2020	2019	2020	2019
Sales								
Receivables sold	$ **429**	$ 429	$ **966**	$ 1,004	$ **583**	$ 676	$ **1,230**	$ 1,410
Loss recognized on sale	**2**	3	**6**	7	**2**	4	**6**	9

Cash flows from sales of receivables are reflected within Cash Flows From Operating Activities on Duke Energy Ohio's and Duke Energy Indiana's Condensed Consolidated Statements of Cash Flows.

12. REVENUE

Duke Energy earns substantially all of its revenues through its reportable segments, Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables.

Electric Utilities and Infrastructure

Electric Utilities and Infrastructure earns the majority of its revenues through retail and wholesale electric service through the generation, transmission, distribution and sale of electricity. Duke Energy generally provides retail and wholesale electric service customers with their full electric load requirements or with supplemental load requirements when the customer has other sources of electricity.

The majority of wholesale revenues are full requirements contracts where the customers purchase the substantial majority of their energy needs and do not have a fixed quantity of contractually required energy or capacity. As such, related forecasted revenues are considered optional purchases. Supplemental requirements contracts that include contracted blocks of energy and capacity at contractually fixed prices have the following estimated remaining performance obligations:

	Remaining Performance Obligations						
(in millions)	2020	2021	2022	2023	2024	Thereafter	Total
Progress Energy	$ **58**	$ 92	$ 94	$ 44	$ 45	$ 58	$ 391
Duke Energy Progress	**4**	8	8	8	8	—	36
Duke Energy Florida	**54**	84	86	36	37	58	355
Duke Energy Indiana	**5**	5	—	—	—	—	10

Revenues for block sales are recognized monthly as energy is delivered and stand-ready service is provided, consistent with invoiced amounts and unbilled estimates.

Gas Utilities and Infrastructure

Gas Utilities and Infrastructure earns its revenues through retail and wholesale natural gas service through the transportation, distribution and sale of natural gas. Duke Energy generally provides retail and wholesale natural gas service customers with all natural gas load requirements. Additionally, while natural gas can be stored, substantially all natural gas provided by Duke Energy is consumed by customers simultaneously with receipt of delivery.

Fixed-capacity payments under long-term contracts for the Gas Utilities and Infrastructure segment include minimum margin contracts and supply arrangements with municipalities and power generation facilities. Revenues for related sales are recognized monthly as natural gas is delivered and stand-ready service is provided, consistent with invoiced amounts and unbilled estimates. Estimated remaining performance obligations are as follows:

	Remaining Performance Obligations						
(in millions)	2020	2021	2022	2023	2024	Thereafter	Total
Piedmont	$ **34**	$ 65	$ 64	$ 61	$ 58	$ 376	$ 658

Commercial Renewables

Commercial Renewables earns the majority of its revenues through long-term PPAs and generally sells all of its wind and solar facility output, electricity and Renewable Energy Certificates (RECs) to customers. The majority of these PPAs have historically been accounted for as leases. For PPAs that are not accounted for as leases, the delivery of electricity and the delivery of RECs are considered separate performance obligations.

Other

The remainder of Duke Energy's operations is presented as Other, which does not include material revenues from contracts with customers.

Disaggregated Revenues

Disaggregated revenues are presented as follows:

As described in Note 1, Duke Energy adopted the new guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year reported results. The following table presents the reserve for credit losses for trade and other receivables based on adoption of the new standard.

	Three Months Ended June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont

Trade and other receivables are evaluated based on an estimate of the risk of loss over the life of the receivable and current and historical conditions using supportable assumptions. Management evaluates the risk of loss for trade and other receivables by comparing the historical write-off amounts to total revenue over a specified period. Historical loss rates are adjusted due to the impact of current conditions, including the impacts of COVID-19, as well as forecasted conditions over a reasonable time period. The calculated write-off rate can be applied to the receivable balance for which an established reserve does not already exist. Management reviews the assumptions and risk of loss periodically for trade and other receivables. Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. The specific actions taken by each Duke Energy Registrant are described in Note 3. The impact of COVID-19 and Duke Energy's related response on customers' ability to pay for service is uncertain, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates.

The aging of trade receivables is presented in the table below. Duke Energy considers receivables greater than 30 days outstanding past due.

	June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Unbilled Receivables	$ 829	$ 332	$ 274	$ 137	$ 137	$ 1	$ 7	$ 6

Trade and Other Receivables	**$ 2,904**	**$ 944**	**$ 1,102**	**$ 542**	**$ 555**	**$ 88**	**$ 47**	**$ 108**

UNBILLED REVENUE

Unbilled revenues are recognized by applying customer billing rates to the estimated volumes of energy or natural gas delivered but not yet billed. Unbilled revenues can vary significantly from period to period as a result of seasonality, weather, customer usage patterns, customer mix, average price in effect for customer classes, timing of rendering customer bills and meter reading schedules and the impact of weather normalization or margin decoupling mechanisms.

Unbilled revenues are included within Receivables and Receivables of VIEs on the Condensed Consolidated Balance Sheets as shown in the following table.

(in millions)	June 30, 2020	December 31, 2019
Duke Energy	$ 829	$ 843
Duke Energy Carolinas	332	298
Progress Energy	274	217
Duke Energy Progress	137	122
Duke Energy Florida	137	95
Duke Energy Ohio	1	1
Duke Energy Indiana	7	16
Piedmont	6	78

Additionally, Duke Energy Ohio and Duke Energy Indiana sell, on a revolving basis, nearly all of their retail accounts receivable, including receivables for unbilled revenues, to an affiliate, CRC, and account for the transfers of receivables as sales. Accordingly, the receivables sold are not reflected on the Condensed Consolidated Balance Sheets of Duke Energy Ohio and Duke Energy Indiana. See Note 11 for further information. These receivables for unbilled revenues are shown in the table below.

(in millions)	June 30, 2020	December 31, 2019
Duke Energy Ohio	$ 68	$ 82
Duke Energy Indiana	106	115

13. STOCKHOLDERS' EQUITY

Basic EPS is computed by dividing net income available to Duke Energy common stockholders, as adjusted for distributed and undistributed earnings allocated to participating securities, by the weighted average number of common shares outstanding during the period. Diluted EPS is computed by dividing net income available to Duke Energy common stockholders, as adjusted for distributed and undistributed earnings allocated to participating securities, by the diluted weighted average number of common shares outstanding during the period. Diluted EPS reflects the potential dilution that could occur if securities or other agreements to issue common stock, such as stock options and equity forward sale agreements, were exercised or settled. Duke Energy's participating securities are restricted stock units that are entitled to dividends declared on Duke Energy common stock during the restricted stock unit's vesting periods. Dividends declared on preferred stock are recorded on the Condensed Consolidated Statements of Operations as a reduction of net income to arrive at net income available to Duke Energy common stockholders. Dividends accumulated on preferred stock are an adjustment to net income used in the calculation of basic and diluted EPS.

The following table presents Duke Energy's basic and diluted EPS calculations, the weighted average number of common shares outstanding and common and preferred share dividends declared.

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions, except per share amounts)	2020	2019	2020	2019

Dividends declared on Series A preferred stock per depositary share[(b)]	$ 0.359	$ 0.307	$ 0.719	$ 0.307
Dividends declared on Series B preferred stock per share[(c)]	$ —	$ —	$ 24.917	$ —

(a) Performance stock awards were not included in the dilutive securities calculation because the performance measures related to the awards had not been met.
(b) 5.75% Series A Cumulative Redeemable Perpetual Preferred Stock dividends are payable quarterly in arrears on the 16th day of March, June, September and December. The preferred stock has a $25 liquidation preference per depositary share.
(c) 4.875% Series B Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Stock dividends are payable semiannually in arrears on the 16th day of March and September. The preferred stock has a $1,000 liquidation preference per share.

Common Stock

In November 2019, Duke Energy filed a prospectus supplement and executed an Equity Distribution Agreement (EDA) under which it may sell up to $1.5 billion of its common stock through an at-the-market (ATM) offering program, including an equity forward sales component. Under the terms of the EDA, Duke Energy may issue and sell shares of common stock through September 2022. In March 2020, Duke Energy marketed approximately 940,000 shares of common stock through an equity forward transaction under the ATM with an initial forward price of $89.76 per share. In May 2020, Duke Energy marketed approximately 903,000 shares of common stock through an equity forward transaction under the ATM with an initial forward price of $82.44 per share.

Separately, in November 2019, Duke Energy marketed an equity offering of 28.75 million shares of common stock through an Underwriting Agreement. In connection with the offering, Duke Energy entered into an equity forward sales agreement with an initial forward price of $85.99 per share.

The equity forward sales agreements require Duke Energy to either physically settle the transaction by issuing shares in exchange for net proceeds at the then-applicable forward sale price specified by the agreement, or net settle in whole or in part through the delivery or receipt of cash or shares. The settlement alternatives are at Duke Energy's election. Settlement of the forward sales agreements are expected to occur on or prior to December 31, 2020. Until settlement of the equity forwards, EPS dilution resulting from the agreements, if any, will be determined under the treasury stock method.

14. EMPLOYEE BENEFIT PLANS

DEFINED BENEFIT RETIREMENT PLANS

Duke Energy and certain subsidiaries maintain, and the Subsidiary Registrants participate in, qualified and non-qualified, non-contributory defined benefit retirement plans. Duke Energy's policy is to fund amounts on an actuarial basis to provide assets sufficient to meet benefit payments to be paid to plan participants.

QUALIFIED PENSION PLANS

The following tables include the components of net periodic pension costs for qualified pension plans.

	Three Months Ended June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 42	$ 14	$ 12	$ 8	$ 6	$ 1	$ 2	$ 2
Interest cost on projected benefit obligation	68	15	22	9	11	4	5	3
Expected return on plan assets	(143)	(36)	(47)	(22)	(26)	(7)	(10)	(6)
Amortization of actuarial loss	30	7	9	4	5	1	3	3
Amortization of prior service credit	(8)	(2)	(1)	(1)	(1)	—	(1)	(3)
Amortization of settlement charges	3	1	—	1	—	—	—	—
Net periodic pension costs	$ (8)	$ (1)	$ (5)	$ (1)	$ (5)	$ (1)	$ (1)	$ (1)

	Three Months Ended June 30, 2019							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 37	$ 12	$ 10	$ 6	$ 6	$ 1	$ 2	$ 2
Interest cost on projected benefit obligation	82	21	26	12	13	4	7	3
Expected return on plan assets	(143)	(37)	(45)	(21)	(22)	(6)	(10)	(6)
Amortization of actuarial loss	25	5	9	3	6	—	1	1
Amortization of prior service credit	(8)	(2)	—	(1)	(1)	—	(1)	(2)
Net periodic pension costs	$ (7)	$ (1)	$ —	$ (1)	$ 2	$ (1)	$ (1)	$ (2)

	Six Months Ended June 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 83	$ 26	$ 24	$ 14	$ 11	$ 2	$ 4	$ 3
Interest cost on projected benefit obligation	135	31	43	19	23	8	11	5
Expected return on plan assets	(286)	(72)	(95)	(44)	(51)	(14)	(21)	(11)
Amortization of actuarial loss	64	14	20	9	11	3	6	5
Amortization of prior service credit	(16)	(4)	(2)	(1)	(1)	—	(1)	(5)
Amortization of settlement charges	5	2	1	1	—	—	—	—
Net periodic pension costs	$ (15)	$ (3)	$ (9)	$ (2)	$ (7)	$ (1)	$ (1)	$ (3)

	Six Months Ended June 30, 2019							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 74	$ 24	$ 21	$ 12	$ 10	$ 2	$ 4	$ 3
Interest cost on projected benefit obligation	165	41	52	24	27	9	13	6
Expected return on plan assets	(286)	(75)	(89)	(44)	(44)	(14)	(21)	(11)
Amortization of actuarial loss	49	11	18	6	12	1	3	3
Amortization of prior service credit	(16)	(4)	(1)	(1)	(1)	—	(1)	(5)
Net periodic pension costs	$ (14)	$ (3)	$ 1	$ (3)	$ 4	$ (2)	$ (2)	$ (4)

NON-QUALIFIED PENSION PLANS

Net periodic pension costs for non-qualified pension plans were not material for the three and six months ended June 30, 2020, and 2019.

OTHER POST-RETIREMENT BENEFIT PLANS

Net periodic costs for OPEB plans were not material for the three and six months ended June 30, 2020, and 2019.

15. INCOME TAXES

EFFECTIVE TAX RATES

The ETRs from continuing operations for each of the Duke Energy Registrants are included in the following table.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
Duke Energy	**26.2%**	15.9%	**98.9%**	12.6%
Duke Energy Carolinas	**13.7%**	19.7%	**15.1%**	18.7%
Progress Energy	**14.9%**	16.7%	**16.1%**	17.0%
Duke Energy Progress	**13.9%**	16.3%	**15.7%**	17.1%
Duke Energy Florida	**19.1%**	19.6%	**19.4%**	19.5%
Duke Energy Ohio	**15.4%**	16.1%	**16.6%**	16.5%
Duke Energy Indiana	**17.3%**	24.2%	**19.3%**	24.2%
Piedmont	**128.6%**	22.2%	**5.8%**	21.8%

The increase in the ETR for Duke Energy for the three and six months ended June 30, 2020, was primarily due to the impact of an abandonment of the ACP investment and an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Carolinas for the three months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes and certain favorable tax credits.

The decrease in the ETR for Duke Energy Carolinas for the six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Progress Energy for the three months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Progress for the three and six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Indiana for the three and six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The increase in the ETR for Piedmont for the three months ended June 30, 2020, was primarily due to an increase in AFUDC Equity, in relation to pretax losses.

The decrease in the ETR for Piedmont for the six months ended June 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes and an increase in AFUDC equity.

OTHER TAX MATTERS

On March 27, 2020, the CARES Act was enacted. The CARES Act is an emergency economic stimulus package in response to the COVID-19 pandemic. Among other provisions, the CARES Act accelerates the remaining AMT credit refund allowances resulting in taxpayers being able to immediately claim a refund in full for any AMT credit carryforwards. As a result, the remaining AMT credit carryforwards were reclassified in the first quarter 2020 to a current receivable included in Other within Current Assets on the Condensed Consolidated Balance Sheets. The total income tax receivable related to AMT credit carryforwards is approximately $572 million as of June 30, 2020. The other provisions within the CARES Act do not materially impact Duke Energy's income tax accounting. See Note 1 for information on COVID-19.

16. SUBSEQUENT EVENTS

For information on subsequent events related to regulatory matters and variable interest entities, see Notes 3 and 11.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following combined Management's Discussion and Analysis of Financial Condition and Results of Operations is separately filed by Duke Energy and Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont. However, none of the registrants make any representation as to information related solely to Duke Energy or the Subsidiary Registrants of Duke Energy other than itself.

DUKE ENERGY

Duke Energy is an energy company headquartered in Charlotte, North Carolina. Duke Energy operates in the U.S. primarily through its wholly owned subsidiaries, Duke Energy Carolinas, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont. When discussing Duke Energy's consolidated financial information, it necessarily includes the results of the Subsidiary Registrants, which, along with Duke Energy, are collectively referred to as the Duke Energy Registrants.

Management's Discussion and Analysis should be read in conjunction with the Condensed Consolidated Financial Statements and Notes for the six months ended June 30, 2020, and with Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

Executive Overview

ACP

On April 15, 2020, the United States District Court for the District of Montana granted partial summary judgment in favor of the plaintiffs in Northern Plains Resource Council v. U.S. Army Corps of Engineers (USACE) (Northern Plains), vacating USACE's Nationwide Permit 12 (NWP 12) and remanding it to USACE for consultation under the Endangered Species Act (ESA) of 1973. In Northern Plains, the court ruled that NWP 12 was unlawful because USACE did not consult under the ESA with the U.S. Fish and Wildlife Service and/or National Marine Fisheries Service prior to NWP 12's reissuance in 2017. Because NWP 12 has been vacated and its application enjoined, USACE currently has suspended verification of any new or pending applications under NWP 12 until further court action clarifies the situation.

On May 28, 2020, the U.S. Court of Appeals for the Ninth Circuit issued a ruling that limited the NWP 12 vacatur to energy infrastructure projects. In July 2020, the Supreme Court of the United States issued an order allowing other new oil and gas pipeline projects to use the NWP 12 process pending appeal to the U.S. Court of Appeals for the Ninth Circuit; however, that did not decrease the uncertainty associated with an eventual ruling. Together, these rulings indicated that the timeline to reinstate the necessary water crossing permits for ACP would likely cause further delays and cost increases.

On July 5, 2020, Dominion announced a sale of substantially all of its gas transmission and storage segment assets, operations core to the ACP pipeline project.

As a result of the uncertainty created by the NWP 12 rulings, the potential impact on the cost and schedule for the project, the ongoing legal challenges and risk of additional legal challenges throughout construction and Dominion's decision to sell substantially all of its gas transmission and storage segment assets, Duke Energy's Board of Directors and management decided that it was not prudent to continue to invest in the project. On July 5, 2020, Duke Energy and Dominion announced the cancellation of the ACP pipeline.

As a result, Duke Energy recorded a pretax charge to earnings of approximately $2.0 billion for the three months and six months ended June 30, 2020, within Equity in (losses) earnings of unconsolidated affiliates on the Duke Energy Condensed Consolidated Statements of Operations. The tax benefit associated with this abandonment was $374 million and is recorded in Income Tax (Benefit) Expense on the Duke Energy Condensed Consolidated Statements of Operations. Additional charges of less than $100 million are expected to be recorded within the next 12 months as ACP incurs obligations to exit operations.

See Notes 3, 4, and 11 to the Condensed Consolidated Financial Statements, "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information.

Even though the ACP pipeline was a critical infrastructure project for transporting natural gas into the Southeastern United States, natural gas still is an important fuel to help Duke Energy reach its carbon reduction goals of 50% by 2030 and net-zero carbon emissions by 2050 in a reliable and cost effective manner. In addition, Duke Energy will continue advancing its clean energy goals by investing in renewables, battery storage, energy efficiency programs and grid projects.

Social Justice and Racial Equity

In response to national events, in June and July 2020, the Duke Energy Foundation pledged $1.75 million to nonprofit organizations committed to social justice and racial equity. This grant builds upon the company's past efforts to support and encourage diversity, inclusion and equity in our company and communities. The company will continue to engage its employees, local organizations and leaders to understand how to be a part of the long-term solution to the social justice issues our communities and organizations face.

COVID-19

The COVID-19 pandemic is having a significant impact on global health and economic environments. Retail electric sales are down 6.5% for the quarter compared to the prior year due to the pandemic. This reduction however is not as steep as expected in our revised March 2020 forecast reflecting the potential economic impact of COVID-19 on 2020 results. The company also incurred approximately $40 million of incremental COVID-19 costs, primarily bad debt expense, personal protective equipment and cleaning supplies, and experienced another $25 million of waived late payment fees for the six months ended June 30, 2020. The Duke Energy Registrants are monitoring developments closely, have taken steps to mitigate the impacts to our business, and have a pandemic response plan in place to protect our employees, customers and communities. We expect to begin a sales rebound during the second half of 2020 and have cost mitigation plans.

- Employees. The health of our employees is of paramount importance. Power plants and electricity and natural gas delivery facilities are staffed. Employees who are not involved with power generation, power delivery, customer service or certain other functions have been performing their work duties remotely from home. Employees who need to interact with customers in person are following the Centers for Disease Control and Prevention's safety guidelines, including social distancing and use of face masks. Operating procedure changes include additional cleaning and disinfection procedures at our facilities.
- Customers. The Duke Energy Subsidiary Registrants began, in the first quarter of 2020, a suspension of disconnections for nonpayment in order to give customers experiencing financial hardship extra time to make payments. This is expected to result in an increase in future charge-offs over historical levels. In addition, several Subsidiary Registrants are waiving late payment charges and other fees for credit cards and returned checks. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information. The COVID-19 pandemic and stay-at-home orders have impacted commercial and industrial customers, and many of them have suspended operations which is impacting the Duke Energy Registrants' volumes. Several large industrial customers have begun to restart their businesses since initially closing in late March and April.
- Communities. The Duke Energy Foundation announced approximately $6 million in donations and grants as of June 30, 2020, to support hunger relief, local health and human services nonprofits, and education initiatives across the Duke Energy Registrants' service territories.
- Balance Sheet Strength and Liquidity Assurance. See Notes 5 and 13 to the Condensed Consolidated Financial Statements, "Debt and Credit Facilities," and "Stockholders Equity," respectively, for additional information. During the six months ended June 30, 2020:
    - Duke Energy issued approximately $3.3 billion of debt.
    - Duke Energy entered into and borrowed approximately $1.7 billion under a 364-day Term Loan Credit Agreement.
    - Duke Energy drew down the remaining $500 million of availability under its existing $1 billion Three-Year Revolving Credit Facility.
    - Duke Energy issued $85 million of common stock through a forward sales agreement which is expected to settle on or prior to December 31, 2020.
- Policymaker actions. The CARES Act was signed by President Trump on March 27, 2020. Duke Energy Registrants will benefit from certain provisions such as the AMT acceleration and deferral of certain payroll taxes. See Note 15 to the Condensed Consolidated Financial Statements, "Income Taxes," for additional information.

Rate Case and utility commission filings. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

- On July 31, 2020, Duke Energy Carolinas, Duke Energy Progress and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain remaining issues in the 2019 base rate proceeding. As a result of the additional settlement terms, the NCUC ordered the remote evidentiary hearing to be delayed until August 24, 2020. Duke Energy Carolinas and Duke Energy Progress expect the NCUC to issue an order on each net rate increase by the end of the year. On August 4, 2020 and August 7, 2020, respectively, Duke Energy Carolinas and Duke Energy Progress filed a motion for approval of notice required to implement temporary rates, seeking to exercise its statutory right to implement temporary rates subject to refund.
- Duke Energy Florida filed a petition with the FPSC on April 2, 2020, to accelerate a fuel cost refund to customers in the month of May 2020. Typically, the refund would be made over the course of 2021. The FPSC approved the petition on April 28, 2020.
- Duke Energy Kentucky filed an electric rate case with the KPSC on September 3, 2019. On April 27, 2020, the KPSC issued its decision and new customer rates were effective on May 1, 2020. On May 18, 2020, Duke Energy Kentucky filed its motion for rehearing, and on June 4, 2020, the motion was granted in part and denied in part by the KPSC.
- Duke Energy Indiana filed a general rate case with the IURC on July 2, 2019. The IURC issued its order June 29, 2020, approving a revenue increase of approximately $146 million, before utility receipt taxes. Customer rates were effective July 30, 2020. Several groups filed notices of appeal of the IURC order on July 29, 2020.
- COVID-19 deferral requests
    - Duke Energy Carolinas and Duke Energy Progress filed a joint petition with the NCUC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic on August 7, 2020. Duke Energy Carolinas and Duke Energy Progress are evaluating a filing with the PSCSC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic.
    - Duke Energy Ohio on May 11, 2020, filed with the PUCO a request seeking deferral of incremental costs incurred due to the COVID-19 pandemic, as well as specific miscellaneous lost revenues. The request seeks to use existing bad debts and uncollectible riders already in place for both electric and natural gas operations. Duke Energy Ohio would subsequently file for rider recovery at a later date. On June 17, 2020, the PUCO approved Duke Energy Ohio's deferral application.
    - On May 8, 2020, Duke Energy Indiana, along with other Indiana utilities, filed a request with the IURC for approval of deferral treatment for costs associated with the COVID-19 pandemic. On June 29, 2020, the IURC issued its order permitting jurisdictional utilities to use regulatory accounting for any impacts associated with the prohibition on utility disconnections, waiver or exclusion of certain utility fees, the use of expanded payment arrangements to aid customers, and for COVID-19 related uncollectible and incremental bad debt expense.

Results of Operations

Non-GAAP Measures

Management's Discussion and Analysis includes financial information prepared in accordance with GAAP in the U.S., as well as certain non-GAAP financial measures such as adjusted earnings and adjusted EPS discussed below. Generally, a non-GAAP financial measure is a numerical measure of financial performance, financial position or cash flows that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. Non-GAAP financial measures should be viewed as a supplement to, and not a substitute for, financial measures presented in accordance with GAAP. Non-GAAP measures presented may not be comparable to similarly titled measures used by other companies because other companies may not calculate the measures in the same manner.

Management evaluates financial performance in part based on non-GAAP financial measures, including adjusted earnings and adjusted EPS. Adjusted earnings and adjusted EPS represent income from continuing operations available to Duke Energy Corporation common stockholders in dollar and per share amounts, adjusted for the dollar and per share impact of special items. As discussed below, special items represent certain charges and credits, which management believes are not indicative of Duke Energy's ongoing performance. The most directly comparable GAAP measures for adjusted earnings and adjusted EPS are GAAP Reported Earnings (Loss) and GAAP Reported Earnings (Loss) Per Share, respectively.

Special items included in the periods presented below include the following, which management believes do not reflect ongoing costs:

- ACP represents costs related to the abandonment of the ACP investment.
- Severance represents the reversal of 2018 costs which were deferred as a result of the partial settlement in the Duke Energy Carolinas 2019 North Carolina rate case.

Three Months Ended June 30, 2020, as compared to June 30, 2019

GAAP reported loss per share was $(1.13) for the second quarter of 2020 compared to earnings per share of $1.12 in the second quarter of 2019. GAAP reported earnings decreased primarily due to the abandonment of the investment in ACP.

As discussed above, management also evaluates financial performance based on adjusted EPS. Duke Energy's second quarter 2020 adjusted EPS was $1.08 compared to $1.12 for the second quarter of 2019. The decrease in adjusted earnings was primarily due to unfavorable weather, lower volumes and higher depreciation expense, partially offset by lower operations and maintenance expense.

The following table reconciles non-GAAP measures, including adjusted EPS, to their most directly comparable GAAP measures.

	Three Months Ended June 30,			
	2020		2019	
(in millions, except per share amounts)	**(Loss) Earnings**	**(Loss) Earnings Per Share**	**Earnings**	**EPS**
GAAP Reported (Loss) Earnings/GAAP Reported (Loss) Earnings Per Share	**$ (817)**	**$ (1.13)**	$ 820	$ 1.12
Adjustments:				
ACP[(a)]	**1,626**	**2.21**	—	—
Adjusted Earnings/Adjusted EPS	**$ 809**	**$ 1.08**	$ 820	$ 1.12

(a) Net of tax benefit of $374 million.

Six Months Ended June 30, 2020, as compared to June 30, 2019

GAAP Reported EPS was $0.11 for the six months ended June 30, 2020, compared to $2.36 for the six months ended June 30, 2019. GAAP reported earnings decreased primarily due to the abandonment of the investment in ACP.

As discussed above, management also evaluates financial performance based on adjusted EPS. Duke Energy's adjusted EPS was $2.22 for the six months ended June 30, 2020, compared to $2.36 for the six months ended June 30, 2019. The decrease in adjusted earnings was primarily due to unfavorable weather, lower volumes, higher depreciation expense, higher financing costs and a prior year adjustment related to income tax recognition for equity method investments. This was partially offset by positive rate case impacts, growth in Commercial Renewables and lower operations and maintenance expense.

The following table reconciles non-GAAP measures, including adjusted EPS, to their most directly comparable GAAP measures.

	Six Months Ended June 30,							
	2020				2019			
(in millions, except per-share amounts)	Earnings		EPS		Earnings		EPS	
GAAP Reported Earnings/GAAP Reported EPS	$	82	$	0.11	$	1,720	$	2.36
Adjustments:								
ACP[(a)]		1,626		2.21		—		—
Severance[(b)]		(75)		(0.10)		—		—
Adjusted Earnings/Adjusted EPS	$	1,633	$	2.22	$	1,720	$	2.36

(a) Net of tax benefit of $374 million.
(b) Net of tax expense of $23 million.

SEGMENT RESULTS

The remaining information presented in this discussion of results of operations is on a GAAP basis. Management evaluates segment performance based on segment income. Segment income is defined as income from continuing operations net of income attributable to noncontrolling interests and preferred stock dividends. Segment income includes intercompany revenues and expenses that are eliminated in the Condensed Consolidated Financial Statements.

Duke Energy's segment structure includes the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables. The remainder of Duke Energy's operations is presented as Other. See Note 2 to the Condensed Consolidated Financial Statements, "Business Segments," for additional information on Duke Energy's segment structure.

Electric Utilities and Infrastructure

	Three Months Ended June 30,			Six Months Ended June 30,

Net proportional MW capacity in operation				50,364	49,725	639

Three Months Ended June 30, 2020, as compared to June 30, 2019

Electric Utilities and Infrastructure's variance is due to unfavorable weather, lower weather-normal retail sale volumes driven by impacts from the COVID-19 pandemic and lower wholesale revenues, partially offset by higher revenues resulting from the South Carolina retail rate cases and Duke Energy Florida base and solar rate adjustments. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $332 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs at Duke Energy Florida in response to the COVID-19 pandemic;

- a $79 million decrease in retail sales, net of fuel revenues, due to unfavorable weather compared to prior year;
- a $47 million decrease in wholesale revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress; and
- a $32 million decrease in weather-normal retail sale volumes due to lower nonresidential customer demand driven by impacts from the COVID-19 pandemic.

Partially offset by:

- a $23 million increase in retail pricing due to Duke Energy Florida's base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment; and
- a $13 million increase due to higher pricing from South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $295 million decrease in fuel used in electric generation and purchased power primarily due to lower generation demand and lower fuel, coal, and natural gas costs; and
- a $78 million decrease in operation, maintenance and other expense driven by lower employee benefit costs and lower outage costs.

Partially offset by:

- a $42 million increase in depreciation and amortization expense primarily due to additional plant in service and impacts from the South Carolina retail rate cases.

Interest Expense. The variance was primarily due to higher outstanding debt in the current year and favorable debt return on deferred coal ash spend in the prior year.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes. The ETRs for the three months ended June 30, 2020, and June 30, 2019, were 15.3% and 19.5%. The decrease in the ETR was primarily due to an increase in the amortization of excess deferred taxes.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Electric Utilities and Infrastructure’s variance is due to unfavorable weather, lower weather-normal retail sale volumes driven by impacts from the COVID-19 pandemic and lower wholesale revenues, partially offset by higher revenues resulting from the South Carolina retail rate cases and Duke Energy Florida base and solar rate adjustments. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $482 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs at Duke Energy Florida in response to the COVID-19 pandemic;
- a $124 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year;
- a $63 million decrease in wholesale revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress; and
- a $15 million decrease in weather-normal retail sale volumes due to lower nonresidential customer demand driven by impacts from the COVID-19 pandemic.

Partially offset by:

- a $39 million increase in retail pricing due to Duke Energy Florida's base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment; and
- a $32 million increase due to higher pricing from South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $458 million decrease in fuel used in electric generation and purchased power primarily due to lower generation demand and lower fuel, coal, and natural gas costs; and
- a $35 million decrease in operation, maintenance and other expense primarily lower employee benefit costs and lower outage costs.

Partially offset by:

- a $72 million increase in depreciation and amortization expense primarily due to additional plant in service and impacts from the South Carolina retail rate cases.

Interest Expense. The variance was primarily due to higher outstanding debt in the current year and favorable debt return on deferred coal ash spend in the prior year.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes. The ETRs for the six months ended June 30, 2020, and 2019, were 16.4% and 19.0%, respectively. The decrease in the ETR was primarily due to an increase in the amortization of excess deferred taxes.

Three Months Ended June 30, 2020, as compared to June 30, 2019

Gas Utilities and Infrastructure's results were impacted primarily by the abandonment of the investment in ACP. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $16 million decrease due to lower natural gas costs passed through to customers and decreased off-system sales natural gas costs; and
- a $7 million decrease due to return of EDIT to customers.

Partially offset by:

- a $7 million increase due to North Carolina base rate case increases.

Operating Expenses. The variance was driven primarily by:

- a $16 million decrease in cost of natural gas due to lower natural gas prices and decreased off-system sales natural gas costs; and
- an $8 million decrease in operation, maintenance and other due to deferral of previously expensed IT project costs and lower employee benefits costs.

Equity in (losses) earnings of unconsolidated affiliates. The variance was driven primarily by the abandonment of the investment in ACP.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, offset by lower AFUDC debt income.

Income Tax Benefit. The decrease in tax expense was primarily due to a decrease in pretax income driven by the impact of an abandonment of the ACP investment. The ETRs for the three months ended June 30, 2020, and 2019, were 19.2% and 7%, respectively. The increase in the ETR was primarily due to the impact of an abandonment of the ACP investment.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Gas Utilities and Infrastructure's results were impacted primarily by the abandonment of ACP. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $144 million decrease due to lower natural gas costs passed through to customers and decreased off-system sales natural gas costs; and
- a $27 million decrease due to return of EDIT to customers.

Partially offset by:

- a $60 million increase due to North Carolina base rate case increases.

Operating Expenses. The variance was driven primarily by:

- a $144 million decrease in cost of natural gas due to lower natural gas prices and decreased off-system sales natural gas costs; and
- an $8 million decrease in operation, maintenance and other due to deferral of previously expensed IT project costs and lower employee benefits costs.

Equity in (losses) earnings of unconsolidated affiliates. The variance was driven primarily by the abandonment of the investment in ACP.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, offset by lower AFUDC debt income.

Income Tax Benefit. The decrease in tax expense was primarily due to a decrease in pretax income driven by the impact of an abandonment of the ACP investment. The ETRs for the six months ended June 30, 2020, and 2019, were 20.7% and 2.9%, respectively. The increase in the ETR was primarily due to an adjustment, recorded in the first quarter of 2019, related to the income tax recognition for equity method investments. The equity method investment adjustment was immaterial and relates to prior years.

Commercial Renewables

	Three Months Ended June 30,			Six Months Ended June 30,		
(in millions)	**2020**	**2019**	**Variance**	**2020**	**2019**	**Variance**

(a) Certain projects are included in tax equity structures where investors have differing interests in the project's economic attributes. One hundred percent of the tax equity project's capacity is included in the table above.

Three Months Ended June 30, 2020, as compared to June 30, 2019

Commercial Renewables' results were favorable primarily due to new investments in solar projects. During the second quarter of 2020, Commercial Renewables had over 250MW of capacity placed in service. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The increase was primarily due to new solar projects placed in service.

Operating Expenses. The increase was primarily due to higher depreciation and property tax expense as a result of new projects placed in service and an impairment charge in the current year related to a non-contracted wind project.

Other Income and Expenses, net. The increase was primarily due to mark-to-market losses in the solar portfolio in the prior year.

Interest Expense. The decrease was primarily due to higher capitalized interest for solar and wind projects in development.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by a decrease in production tax credits generated and an increase in taxes associated with new tax equity investments.

Loss Attributable to Noncontrolling Interests. The increase was primarily due to tax equity structures related to new renewable investments.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Commercial Renewables' results were favorable primarily due to new investments in renewable projects and favorable wind revenue. Since the second quarter of 2019, Commercial Renewables has placed in service over 700MW of capacity.

The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The increase was primarily due to new projects placed in service and favorable wind portfolio revenue as a result of favorable market pricing and wind resource.

Operating Expenses. The increase was primarily due to higher depreciation and property tax expense as a result of new projects placed in service and an impairment charge in the current year related to a non-contracted wind project.

Other Income and Expenses, net. The increase was primarily due to mark-to-market losses in the solar portfolio in the prior year.

Interest Expense. The decrease was primarily due to higher capitalized interest for solar and wind projects in development.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by an increase in taxes associated with new tax equity investments and a decrease in production tax credits generated.

Loss Attributable to Noncontrolling Interests. The increase was primarily due to tax equity structures related to new renewable investments.

Three Months Ended June 30, 2020, as compared to June 30, 2019

The variance was primarily driven by lower state income tax expense. The following is a detailed discussion of the variance drivers by line item.

Operating Expenses. The increase was primarily driven by higher loss experience related to non-property captive insurance claims and higher expenses associated with certain employee benefit obligations.

Other Income and Expenses, net. The variance was primarily due to higher returns on investments that fund certain employee benefit obligations, partially offset by lower earnings on the NMC investment.

Interest Expense. The variance was primarily due to lower outstanding short-term debt and lower interest rates.

Income Tax Benefit. The increase in the tax benefit was primarily driven by lower state income tax expense. The ETRs for the three months ended June 30, 2020, and 2019 were 48.1% and 24.3%, respectively. The increase in the ETR was primarily due to lower state income tax expense.

Six Months Ended June 30, 2020, as compared to June 30, 2019

The variance was primarily driven by a reversal of corporate allocated severance costs, partially offset by lower returns on investments and the declaration of preferred stock dividends. The following is a detailed discussion of the variance drivers by line item.

Operating Expenses. The decrease was primarily due to the deferral of 2018 corporate allocated severance costs due to the partial settlement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case.

Other Income and Expenses, net. The variance was primarily due to lower returns on investments that fund certain employee benefit obligations, lower earnings on the NMC investment and lower interest income due to a tax true up in the prior year.

Interest Expense. The variance was primarily due to lower outstanding short-term debt and lower interest rates.

Preferred Dividends. The variance was driven by the declaration of preferred stock dividends on preferred stock issued in 2019.

DUKE ENERGY CAROLINAS

Results of Operations

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	2020
Residential sales	(5.0)%
General service sales	(6.7)%
Industrial sales	(9.6)%
Wholesale power sales	(3.0)%
Joint dispatch sales	(60.0)%
Total sales	(7.2)%
Average number of customers	1.8 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $77 million decrease in retail sales due to unfavorable weather in the current year; and
- a $66 million decrease in fuel revenues due to lower prices and retail sales volumes.

Partially offset by:

- a $37 million increase in weather-normal retail sales volumes; and
- a $17 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $65 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, partially offset by higher storm restoration costs; and
- a $38 million decrease in fuel used in electric generation and purchased power primarily due to lower retail sales volumes, net of a prior period true up.

Partially offset by:

- a $55 million increase in depreciation and amortization expense primarily due to additional plant in service and new depreciation rates associated with the South Carolina rate case.

Other Income and Expenses, net. The variance was primarily due to higher AFUDC equity in the current year.

Interest Expense. The variance was primarily due to higher debt outstanding in the current year.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

PROGRESS ENERGY

Results of Operations

	Six Months Ended June 30,		
(in millions)	2020	2019	Variance

Income Before Income Taxes	**747**	695	52
Income Tax Expense	**120**	118	2
Net Income	**627**	577	50

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $380 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs in response to the COVID-19 pandemic at Duke Energy Florida and lower fuel prices, volumes and native load transfer sales in the current year at Duke Energy Progress;
- a $49 million decrease in wholesale power revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress, partially offset by increased demand at Duke Energy Florida;
- a $44 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year at Duke Energy Progress, partially offset by favorable weather in the current year at Duke Energy Florida;
- a $32 million decrease in rider revenues primarily due to the Crystal River 3 uprate regulatory asset being fully recovered in 2019 at Duke Energy Florida; and
- a $29 million decrease in weather-normal retail sales volume.

Partially offset by:

- a $55 million increase in storm revenues due to Hurricane Dorian collections at Duke Energy Florida;
- a $39 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment at Duke Energy Florida;
- a $15 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers at Duke Energy Progress; and
- a $12 million increase in other revenues primarily due to increased transmission revenues at Duke Energy Florida.

Operating Expenses. The variance was driven primarily by:

- a $373 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix at Duke Energy Progress and lower fuel costs at Duke Energy Florida;
- a $30 million decrease in operation, maintenance and other expense at Duke Energy Progress primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, reduced outage costs and energy efficiency program costs, partially offset by storm cost amortizations at Duke Energy Florida; and
- an $8 million decrease in property and other taxes primarily due to lower revenue related taxes as a result of the decreased fuel revenues, and lower accrued property taxes at Duke Energy Florida.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt at Duke Energy Progress.

DUKE ENERGY PROGRESS

Results of Operations

	Six Months Ended June 30,

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior period	**2020**
Residential sales	(6.0)%
General service sales	(8.8)%
Industrial sales	(4.8)%
Wholesale power sales	(12.2)%
Joint dispatch sales	22.8 %
Total sales	(6.4)%
Average number of customers	1.6 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $185 million decrease in fuel cost recovery driven by lower fuel prices and volumes as well as less native load transfer sales in the current year;
- a $61 million decrease in wholesale power revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and decreased volumes, partially offset by increased capacity rates;
- a $60 million decrease in retail sales due to unfavorable weather in the current year; and
- a $13 million decrease in weather-normal retail sales volumes in the current year.

Partially Offset by:

- a $15 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $194 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix; and
- a $70 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, reduced outage costs and energy efficiency program costs.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

DUKE ENERGY FLORIDA

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Wholesale power sales include both billed and unbilled sales. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior period	**2020**
Residential sales	1.2 %
General service sales	(6.6)%
Industrial sales	5.4 %
Wholesale and other	(10.7)%
Total sales	(1.0)%
Average number of customers	1.7 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $195 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs in response to the COVID-19 pandemic;
- a $32 million decrease in rider revenues primarily due to full recovery of the Crystal River 3 uprate regulatory asset in 2019; and
- a $16 million decrease in weather-normal retail sales volumes.

Partially offset by:

- a $55 million increase in storm revenues due to Hurricane Dorian collections;
- a $39 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment;
- a $16 million increase in retail sales, net of fuel revenues, due to favorable weather in the current year;
- a $12 million increase in other revenues primarily due to increased transmission revenues; and
- a $12 million increase in wholesale power revenues, net of fuel, primarily due to increased demand.

Operating Expenses. The variance was driven primarily by:

- a $179 million decrease in fuel used in electric generation and purchased power primarily due to lower fuel costs; and
- a $16 million decrease in property and other taxes driven by lower gross receipts taxes due to decreased fuel revenues as well as lower accrued property taxes.

Partially offset by:

- a $40 million increase in operation, maintenance and other expense primarily due to storm cost amortizations.

Income Tax Expense. The increase in tax expense was primarily due to an increase in pretax income.

Interest Expense	**49**	54	(5)
Income Before Income Taxes	**157**	139	18
Income Tax Expense	**26**	23	3
Net Income	**$ 131**	$ 116	$ 15

The following table shows the percent changes in GWh sales of electricity, dekatherms of natural gas delivered and average number of electric and natural gas customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

	Electric	Natural Gas
Increase (Decrease) over prior year	**2020**	**2020**
Residential sales	(2.3)%	(7.5)%
General service sales	(8.1)%	(10.1)%
Industrial sales	(8.0)%	(3.2)%
Wholesale electric power sales	(52.0)%	n/a
Other natural gas sales	n/a	(0.5)%
Total sales	(6.3)%	(6.5)%
Average number of customers	1.3 %	0.8 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $34 million decrease in fuel related revenues primarily due to lower natural gas prices and decreased volumes;
- an $8 million decrease in other revenues due to lower OVEC sales into PJM; and
- a $6 million decrease in bulk power marketing sales.

Partially offset by:

- a $10 million increase in retail pricing primarily due to rate case impacts in Kentucky.

Operating Expenses. The variance was driven primarily by:

- a $36 million decrease in fuel expense, primarily driven by lower natural gas prices and decreased volumes; and
- a $37 million decrease in operations, maintenance and other expense primarily due to Customer Connect and Network Integration Transmission Services deferrals, the timing of energy efficiency programs and outage costs, lower employee benefit expenses and lower vegetation and pole maintenance costs.

Partially offset by:

- a $6 million increase in depreciation and amortization primarily driven by an increase in distribution plant, partially offset by lower amortization due to the suspension of the MGP rider in Ohio.

Other Income and Expenses, net. The variance was primarily due to lower AFUDC equity and lower intercompany interest income.

DUKE ENERGY INDIANA

Results of Operations

	Six Months Ended June 30,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 1,309**	$ 1,482	$ (173)
Operating Expenses			
Fuel used in electric generation and purchased power	**355**	486	(131)
Operation, maintenance and other	**357**	377	(20)
Depreciation and amortization	**266**	263	3
Property and other taxes	**42**	39	3
Total operating expenses	**1,020**	1,165	(145)
Operating Income	**289**	317	(28)
Other Income and Expenses, net	**19**	27	(8)
Interest Expense	**85**	71	14
Income Before Income Taxes	**223**	273	(50)
Income Tax Expense	**43**	66	(23)
Net Income	**$ 180**	$ 207	$ (27)

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	**2020**
Residential sales	(3.5)%
General service sales	(9.3)%
Industrial sales	(9.8)%
Wholesale power sales	(4.3)%
Total sales	(7.1)%
Average number of customers	1.4 %

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $118 million decrease in fuel revenues primarily due to lower fuel cost recovery driven by customer demand and fuel prices;
- a $20 million decrease in weather-normal retail sales volumes driven by lower nonresidential customer demand;
- an $18 million decrease in rider revenues primarily related to lower Edwardsport IGCC sales volumes; and
- a $9 million decrease primarily related to the true up of wholesale revenues in the current year.

Operating Expenses. The variance was driven primarily by:

- a $131 million decrease in fuel used in electric generation and purchased power expense primarily due to lower coal and natural gas costs, lower amortization of deferred fuel costs and lower purchased power expense; and
- a $20 million decrease in operation, maintenance and other expense primarily due to lower outage expenses, storm restoration costs, training costs, employee related costs and the Customer Connect deferral.

Other Income and Expenses, net. The decrease was primarily due to life insurance proceeds received in the prior year.

Interest Expense. The variance was primarily due to higher fixed-rate debt outstanding in the current year and a favorable debt return, in the prior year, on the cumulative balance of deferred coal ash spend.

Income Tax Expense. The decrease in income tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

PIEDMONT

Results of Operations

	Six Months Ended June 30,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 709**	$ 788	$ (79)
Operating Expenses			
Cost of natural gas	**215**	338	(123)
Operation, maintenance and other	**159**	163	(4)
Depreciation and amortization	**88**	84	4
Property and other taxes	**24**	25	(1)
Total operating expenses	**486**	610	(124)
Operating Income	**223**	178	45
Other Income and Expenses, net	**28**	12	16
Interest Expense	**60**	43	17
Income Before Income Taxes	**191**	147	44
Income Tax Expense	**11**	32	(21)
Net Income	**$ 180**	$ 115	$ 65

The following table shows the percent changes in dekatherms delivered and average number of customers. The percentages for all throughput deliveries represent billed and unbilled sales. Amounts are not weather-normalized.

Increase (Decrease) over prior year	**2020**
Residential deliveries	(4.6)%
Commercial deliveries	(11.8)%
Industrial deliveries	(3.3)%
Power generation deliveries	(2.8)%
For resale	(15.0)%
Total throughput deliveries	(4.3)%
Secondary market volumes	(17.7)%
Average number of customers	1.7 %

Due to the margin decoupling mechanism in North Carolina and the weather normalization adjustment (WNA) mechanisms in South Carolina and Tennessee and fixed-price contracts with most power generation customers, changes in throughput deliveries do not have a material impact on Piedmont's revenues or earnings. The margin decoupling mechanism adjusts for variations in residential and commercial use per customer, including those due to weather and conservation. The WNA mechanisms mostly offset the impact of weather on bills rendered, but do not ensure full recovery of approved margin during periods when winter weather is significantly warmer or colder than normal.

Six Months Ended June 30, 2020, as compared to June 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $123 million decrease due to lower natural gas costs passed through to customers and decreased off-system sales natural gas costs;
- a $27 million decrease due to return of EDIT to customers; and
- a $7 million decrease due to NCUC approval related to tax reform accounting from fixed-rate contracts in the prior year.

Partially offset by:

- a $60 million increase due to North Carolina base rate case increases; and
- a $15 million increase due to North Carolina IMR increases.

Operating Expenses. The variance was driven primarily by:

- a $123 million decrease in cost of natural gas due to lower natural gas prices and decreased off-system sales natural gas costs.

Other Income and Expenses, net. The variance was driven primarily by AFUDC equity and intercompany interest related to Belews Creek and Marshall Power Generation contracts.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, partially offset by lower AFUDC debt income.

Income Tax Expense. The decrease in income tax expense was primarily due to an increase in the amortization of excess deferred taxes and an increase in AFUDC Equity, partially offset by an increase in pretax income.

Matters Impacting Future Results

The matters discussed herein could materially impact the future operating results, financial condition and cash flows of the Duke Energy Registrants and Business Segments.

COVID-19

Duke Energy cannot predict the extent to which the COVID-19 pandemic will impact its results of operations, financial position and cash flows in the future. Duke Energy will continue to actively monitor the impacts of COVID-19 including the economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown will adversely affect the company's customers, suppliers and partners and could cause an increase in certain costs, such as bad debt, and a reduction in the demand for energy. It could also cause delays in construction for Commercial Renewables and availability of financing. The company also has various pending rate case proceedings that have been delayed. Duke Energy has cost mitigation plans in place to partially offset these impacts, and the ability to execute these plans is critical to preserving future financial results. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

ACP

On July 5, 2020, Duke Energy and Dominion Energy determined that they would no longer invest in the construction of the Atlantic Coast Pipeline. Duke Energy has recorded $2.0 billion of pretax charges and expects additional charges of less than $100 million to be recorded when certain exit costs related to the project are incurred by ACP. Estimates used to calculate the loss could be revised and exit obligations which have not yet been incurred or recorded could have an adverse impact on future results. Furthermore, the loss of earnings from this project, including AFUDC, will lower Duke Energy's future expected results. See Notes 1, 3, 4 and 11 to the Condensed Consolidated Financial Statements, "Organization and Basis of Presentation," "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information.

Regulatory Matters

On December 31, 2019, Duke Energy Carolinas and Duke Energy Progress entered into a settlement agreement with North Carolina Department of Environmental Quality and certain community groups under which Duke Energy Carolinas and Duke Energy Progress agreed to excavate seven of the nine remaining coal ash basins in North Carolina with ash moved to on-site lined landfills. At the two remaining basins, uncapped basin ash will be excavated and moved to lined landfills. Duke Energy Carolinas and Duke Energy Progress have also received orders from the PSCSC granting the companies' requests for retail rate increases but denying recovery of certain coal ash costs. Duke Energy Carolinas and Duke Energy Progress have appealed these decisions to the South Carolina Supreme Court and those appeals are pending. Appeals of the 2017 North Carolina approved rate cases for Duke Energy Carolinas and Duke Energy Progress are still pending at the North Carolina Supreme Court. The North Carolina Attorney General and various intervenors primarily dispute the allowance of recovery of coal ash costs from customers, which was approved by the NCUC. An order from regulatory or judicial authorities disallowing recovery of costs related to closure of these ash basins could have an adverse impact on future results.

In 2015, the EPA published in the Federal Register a rule to regulate the disposal of CCR from electric utilities as solid waste. Duke Energy Indiana has interpreted the rule to identify the coal ash basin sites impacted and has assessed the amounts of coal ash subject to the rule and a method of compliance. Duke Energy Indiana's interpretation of the requirements of the CCR rule is subject to potential legal challenges and further regulatory approvals, which could result in additional ash basin closure requirements, higher costs of compliance and greater AROs. Additionally, Duke Energy Indiana has retired facilities that are not subject to the CCR rule. Duke Energy Indiana may incur costs at these facilities to comply with environmental regulations or to mitigate risks associated with on-site storage of coal ash. An order from regulatory authorities disallowing recovery of costs related to closure of ash basins could have an adverse impact.

Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida's service territories were impacted by several named storms in 2018. Hurricane Florence, Hurricane Michael and Winter Storm Diego caused flooding, extensive damage and widespread power outages to the service territories of Duke Energy Carolinas and Duke Energy Progress. Duke Energy Florida's service territory was also impacted by Hurricane Michael, a Category 5 hurricane and the most powerful storm to hit the Florida Panhandle in recorded history. In September 2019, Hurricane Dorian impacted Duke Energy Progress and Duke Energy Florida's service territories. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the deferral and future recovery of storm restoration costs could have an adverse impact.

Duke Energy Carolinas received an order from the NCUC in 2018, which denied the Grid Rider Stipulation and deferral treatment of grid improvement costs. Duke Energy Carolinas and Duke Energy Progress have petitioned for deferral of future grid improvement costs in their 2019 rate cases. There could be adverse impact if grid improvement costs are not ultimately approved for recovery and/or deferral treatment.

In 2019, Duke Energy Carolinas and Duke Energy Progress filed general rate cases with the NCUC. The outcome of these rate cases could have a material impact.

The PUCO has issued an order authorizing recovery of MGP costs at certain sites in Ohio with a deadline to complete the MGP environmental investigation and remediation work prior to December 31, 2016. This deadline was subsequently extended to December 31, 2019. Duke Energy Ohio has filed for a request for extension of the deadline. A hearing on that request has not been scheduled. Disallowance of costs incurred, failure to complete the work by the deadline or failure to obtain an extension from the PUCO could result in an adverse impact.

For additional information, see Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters."

Other Matters

Duke Energy continues to experience growth in Commercial Renewables with tax equity structures; however, the future expiration of federal tax incentives could result in adverse impacts to future results of operations, financial position and cash flows.

Duke Energy continues to monitor recoverability of a renewable merchant plant located in the Electric Reliability Council of Texas West market, due to declining market pricing and declining long-term forecasted energy prices, primarily driven by lower forecasted natural gas prices. Based on the most recent recoverability test performed this quarter, the carrying value approximated the aggregate estimated future cash flows for this plant and therefore further testing was not required. A continued decline in energy market pricing would likely result in a future impairment. Impairment of this asset could result in adverse impacts. For additional information, see Note 2 to the Condensed Consolidated Financial Statements, "Business Segments."

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Duke Energy Registrants' Annual Reports on Form 10-K for the year ended December 31, 2019, for discussion of risks associated with the Tax Act.

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Cash

Duke Energy relies primarily upon cash flows from operations, debt and equity issuances and its existing cash and cash equivalents to fund its liquidity and capital requirements. Duke Energy's capital requirements arise primarily from capital and investment expenditures, repaying long-term debt and paying dividends to shareholders. Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019, included a summary and detailed discussion of projected primary sources and uses of cash for 2020 to 2022.

During March 2020, in response to market volatility and the ongoing economic uncertainty related to COVID-19, Duke Energy took several actions to enhance the company's liquidity position including:

- Duke Energy drew down the remaining $500 million of availability under the existing $1 billion Three-Year Revolving Credit Facility, which was subsequently repaid during the second quarter of 2020; and
- Duke Energy entered into and borrowed the full amount under a $1.5 billion, 364-day Term Loan Credit Agreement. The Term Loan Credit Agreement contains a provision for additional borrowing capacity of $500 million. Duke Energy exercised the provision and borrowed an additional $188 million, for a total borrowing of approximately $1.7 billion.

Following March 2020, access to credit and equity markets has normalized. In addition to the financings to address the company's liquidity position, for the six months ended June 30, 2020, Duke Energy issued approximately $3.3 billion in debt, raised $111 million of common equity through its dividend reinvestment program, and paid down $500 million on the Three-Year Revolving Credit Facility. Despite the recovery in capital markets, Duke Energy continues to monitor access to credit and equity markets amid the ongoing economic uncertainty related to COVID-19.

As of June 30, 2020, Duke Energy had approximately $341 million of cash on hand, $5.4 billion available under its $8 billion Master Credit Facility and $500 million available under the $1 billion Three-Year Revolving Credit Facility. Duke Energy has additional liquidity available totaling approximately $2.6 billion under outstanding equity forward agreements. Duke Energy expects to have sufficient liquidity in the form of cash on hand, cash from operations and available credit capacity to support its funding needs. Duke Energy continues to monitor access to credit and equity markets. Refer to Notes 5 and 13 to the Condensed Consolidated Financial Statements, "Debt and Credit Facilities" and "Stockholders' Equity," respectively, for information regarding Duke Energy's debt and equity issuances, debt maturities and available credit facilities including the Master Credit Facility.

In light of the COVID-19 pandemic and cancellation of the ACP pipeline, Duke Energy currently does not expect significant changes to the total projected capital and investment expenditures provided in the Form 10-K for the year ended December 31, 2019. However, Duke Energy will continue to reassess capital projects depending on the duration and severity of economic impacts caused by the pandemic.

Cash Flow Information

The following table summarizes Duke Energy's cash flows.

	Six Months Ended June 30,	
(in millions)	**2020**	**2019**
Cash flows provided by (used in):		
Operating activities	**$ 3,357**	$ 3,056
Investing activities	**(5,471)**	(5,788)
Financing activities	**2,182**	2,622
Net increase (decrease) in cash, cash equivalents and restricted cash	**68**	(110)
Cash, cash equivalents and restricted cash at beginning of period	**573**	591
Cash, cash equivalents and restricted cash at end of period	**$ 641**	$ 481

OPERATING CASH FLOWS

The following table summarizes key components of Duke Energy's operating cash flows.

	Six Months Ended June 30,		
(in millions)	2020	2019	Variance
Net (loss) income	$ (2)	$ 1,641	$ (1,643)
Non-cash adjustments to net income	4,592	2,917	1,675
Payments for asset retirement obligations	(287)	(336)	49
Working capital	(946)	(1,166)	220
Net cash provided by operating activities	$ 3,357	$ 3,056	$ 301

The variance was primarily due to timing of payments of property taxes, higher Nuclear Electric Insurance Limited (NEIL) refunds in the current year and lower storm costs in the current year.

INVESTING CASH FLOWS

The following table summarizes key components of Duke Energy's investing cash flows.

	Six Months Ended June 30,		
(in millions)	2020	2019	Variance
Capital, investment and acquisition expenditures	$ (5,267)	$ (5,627)	$ 360
Other investing items	(204)	(161)	(43)
Net cash used in investing activities	$ (5,471)	$ (5,788)	$ 317

The variance relates to lower capital expenditures in the current year for plants now in service.

FINANCING CASH FLOWS

The following table summarizes key components of Duke Energy's financing cash flows.

	Six Months Ended June 30,		
(in millions)	2020	2019	Variance
Issuances of long-term debt, net	$ 1,837	$ 2,467	$ (630)
Issuances of common stock	57	27	30
Issuances of preferred stock	—	973	(973)
Notes payable, commercial paper and other short-term borrowings	1,624	324	1,300
Dividends paid	(1,391)	(1,312)	(79)
Contributions from noncontrolling interests	163	193	(30)
Other financing items	(108)	(50)	(58)
Net cash provided by financing activities	$ 2,182	$ 2,622	$ (440)

The variance was primarily due to:

- a $1.3 billion increase in net proceeds from issuances of notes payable and commercial paper primarily due to borrowings of $1.7 billion under the 364-day Term Loan Credit Agreement.

Partially offset by:

- a $973 million decrease in proceeds from the issuance of preferred stock; and
- a $630 million decrease in proceeds from net issuances of long-term debt primarily due to the timing of issuances and redemptions of long-term debt.

OTHER MATTERS

Environmental Regulations

The Duke Energy Registrants are subject to federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal, coal ash and other environmental matters. These regulations can be changed from time to time and result in new obligations of the Duke Energy Registrants. Refer to Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for further information regarding potential plant retirements and regulatory filings related to the Duke Energy Registrants.

On May 14, 2020, the five-year probation period following the Dan River coal ash spill ended. The court appointed monitor confirmed in U.S. District Court for the Eastern District of North Carolina that Duke Energy met or exceeded every obligation throughout the process. Separately, in a final report to the EPA, it was noted that the company made significant enhancements to its Ethics and Compliance Program and its environmental compliance programs.

Section 126 Petitions

On November 16, 2016, the state of Maryland filed a petition with EPA under Section 126 of the Clean Air Act alleging that 19 power plants, including two plants (three units) that Duke Energy Registrants own and operate, contribute to violations of EPA's National Ambient Air Quality Standards (NAAQS) for ozone in the state of Maryland. On March 12, 2018, the state of New York filed a petition with EPA, also under Section 126 of the Clean Air Act alleging that over 60 power plants, including six that Duke Energy Registrants own and operate, contribute to violations of EPA's ozone NAAQS in the state of New York. Both Maryland and New York sought EPA orders requiring the states in which the named power plants operate to impose more stringent NOx emission limitations on the plants. On October 5, 2018, EPA denied the Maryland petition. That same day, Maryland appealed EPA's denial. On October 18, 2019, EPA denied the New York petition, and New York appealed that decision on October 29, 2019. On May 19, 2020, the U.S. Court of Appeals for the D.C. Circuit issued its decision, finding, with one exception, that EPA reasonably denied the Maryland petition. The court remanded one issue to EPA regarding target sources lacking catalytic controls. All of the Duke Energy units targeted have selective catalytic reduction so the decision is favorable for these units. A different panel of the same court heard oral argument in New York's appeal of EPA's denial of its Section 126 Petition on May 7, 2020, and on July 14, 2020, the panel issued its decision remanding the Petition to EPA for further review. The Duke Energy Registrants cannot predict the outcome of this matter.

Off-Balance Sheet Arrangements

During the three and six months ended June 30, 2020, there were no material changes to Duke Energy's off-balance sheet arrangements. See Notes 1, 3, 4 and 11 to the Condensed Consolidated Financial Statements, "Organization and Basis of Presentation," "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information on ACP. See Note 13 to the Condensed Consolidated Financial Statements, "Stockholders' Equity," for information regarding equity forward sales agreements. For additional information on Duke Energy's off-balance sheet arrangements, see "Off-Balance Sheet Arrangements" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

Contractual Obligations

Duke Energy enters into contracts that require payment of cash at certain specified periods, based on certain specified minimum quantities and prices. During the three and six months ended June 30, 2020, there were no material changes in Duke Energy's contractual obligations. For an in-depth discussion of Duke Energy's contractual obligations, see "Contractual Obligations" and "Quantitative and Qualitative Disclosures about Market Risk" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For an in-depth discussion of the Duke Energy Registrants' market risks, see "Quantitative and Qualitative Disclosures about Market Risk" in Item 7 of the Annual Report on Form 10-K for the Duke Energy Registrants. During the three and six months ended June 30, 2020, there were no material changes to the Duke Energy Registrants' disclosures about market risk, other than as described below.

Credit Risk

In response to the COVID-19 pandemic, in March 2020, the Duke Energy Subsidiary Registrants announced a suspension of disconnections for nonpayment to be effective throughout the national emergency. This has resulted in an increase in charge-offs over historical levels. In addition, the Registrants are monitoring the effects of the resultant economic slowdown on counterparties' abilities to perform under their contractual obligations.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified by the SEC rules and forms.

Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated the effectiveness of their disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of June 30, 2020, and, based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are effective in providing reasonable assurance of compliance.

Changes in Internal Control over Financial Reporting

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated changes in internal control over financial reporting (as such term is defined in Rules 13a-15 and 15d-15 under the Exchange Act) that occurred during the fiscal quarter ended June 30, 2020, and have concluded no change has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

ITEM 1. LEGAL PROCEEDINGS

For information regarding material legal proceedings, including regulatory and environmental matters, see Note 3, "Regulatory Matters," and Note 4, "Commitments and Contingencies," to the Condensed Consolidated Financial Statements. For additional information, see Item 3, "Legal Proceedings," in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, careful consideration should be given to the factors discussed in Part I, "Item 1A. Risk Factors" in the Duke Energy Registrants' Annual Report on Form 10-K for the year ended December 31, 2019, which could materially affect the Duke Energy Registrants' financial condition or future results. The information presented below updates, and should be read in conjunction with, the risk factors and information disclosed in the Annual Report on Form 10-K for the year ended December 31, 2019.

The Duke Energy Registrants' operations have been and may be affected by COVID-19 in ways listed below and in ways the registrants cannot predict at this time.

The COVID-19 pandemic has begun to impact the Duke Energy Registrants' business strategy, results of operations, financial position and cash flows, albeit not materially as of this filing date, from specific activities listed below:

- Decreased demand for electricity and natural gas;
- Delays in rate cases and other legal proceedings;
- The health and availability of our critical personnel and their ability to perform business functions; and
- Actions of state utility commissions or federal or state governments to allow customers to suspend or delay payment of bills related to the provision of electric or gas services.

Furthermore, due to the unpredictability of the COVID-19 pandemic's ongoing impact on global health and economic stability as of this filing date, the Duke Energy Registrants expect that the activities listed below could negatively impact their business strategy, results of operations, financial position and cash flows:

- An inability to procure satisfactory levels of fuels or other necessary equipment to continue production of electricity and delivery of natural gas;
- An inability to obtain labor or equipment necessary for the construction of generation projects or pipeline expansion;
- An inability to maintain information technology systems and protections from cyberattack;
- An inability to obtain financing in volatile financial markets;
- Additional federal regulation tied to stimulus and other aid packages; and
- Impairment charges, which could include real estate as options for working remotely are evaluated and goodwill.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 6. EXHIBITS

Exhibits filed herein are designated by an asterisk (*). All exhibits not so designated are incorporated by reference to a prior filing, as indicated. Items constituting management contracts or compensatory plans or arrangements are designated by a double asterisk (**). The company agrees to furnish upon request to the commission a copy of any omitted schedules or exhibits upon request on all items designated by a triple asterisk (***).

**CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Lynn J. Good, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Duke Energy Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of Duke Energy Corporation (“Duke Energy”) on Form 10-Q for the period ending June 30, 2020, as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, Steven K. Young, Executive Vice President and Chief Financial Officer of Duke Energy, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of Duke Energy.

Registrant	Description	Shares
Duke Energy	Common stock, $0.001 par value	735,958,560

This combined Form 10-Q is filed separately by eight registrants: Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont (collectively the Duke Energy Registrants). Information contained herein relating to any individual registrant is filed by such registrant solely on its own behalf. Each registrant makes no representation as to information relating exclusively to the other registrants.

Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont meet the conditions set forth in General Instructions H(1)(a) and (b) of Form 10-Q and are therefore filing this form with the reduced disclosure format specified in General Instructions H(2) of Form 10-Q.

TABLE OF CONTENTS

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are based on management's beliefs and assumptions and can often be identified by terms and phrases that include "anticipate," "believe," "intend," "estimate," "expect," "continue," "should," "could," "may," "plan," "project," "predict," "will," "potential," "forecast," "target," "guidance," "outlook" or other similar terminology. Various factors may cause actual results to be materially different than the suggested outcomes within forward-looking statements; accordingly, there is no assurance that such results will be realized. These factors include, but are not limited to:

- The impact of the COVID-19 pandemic;
- State, federal and foreign legislative and regulatory initiatives, including costs of compliance with existing and future environmental requirements, including those related to climate change, as well as rulings that affect cost and investment recovery or have an impact on rate structures or market prices;
- The extent and timing of costs and liabilities to comply with federal and state laws, regulations and legal requirements related to coal ash remediation, including amounts for required closure of certain ash impoundments, are uncertain and difficult to estimate;
- The ability to recover eligible costs, including amounts associated with coal ash impoundment retirement obligations and costs related to significant weather events, and to earn an adequate return on investment through rate case proceedings and the regulatory process;
- The costs of decommissioning nuclear facilities could prove to be more extensive than amounts estimated and all costs may not be fully recoverable through the regulatory process;
- Costs and effects of legal and administrative proceedings, settlements, investigations and claims;
- Industrial, commercial and residential growth or decline in service territories or customer bases resulting from sustained downturns of the economy and the economic health of our service territories or variations in customer usage patterns, including energy efficiency efforts and use of alternative energy sources, such as self-generation and distributed generation technologies;
- Federal and state regulations, laws and other efforts designed to promote and expand the use of energy efficiency measures and distributed generation technologies, such as private solar and battery storage, in Duke Energy service territories could result in customers leaving the electric distribution system, excess generation resources as well as stranded costs;
- Advancements in technology;
- Additional competition in electric and natural gas markets and continued industry consolidation;
- The influence of weather and other natural phenomena on operations, including the economic, operational and other effects of severe storms, hurricanes, droughts, earthquakes and tornadoes, including extreme weather associated with climate change;
- The ability to successfully operate electric generating facilities and deliver electricity to customers including direct or indirect effects to the company resulting from an incident that affects the United States electric grid or generating resources;
- The ability to obtain the necessary permits and approvals and to complete necessary or desirable pipeline expansion or infrastructure projects in our natural gas business;
- Operational interruptions to our natural gas distribution and transmission activities;
- The availability of adequate interstate pipeline transportation capacity and natural gas supply;
- The impact on facilities and business from a terrorist attack, cybersecurity threats, data security breaches, operational accidents, information technology failures or other catastrophic events, such as fires, explosions, pandemic health events or other similar occurrences;
- The inherent risks associated with the operation of nuclear facilities, including environmental, health, safety, regulatory and financial risks, including the financial stability of third-party service providers;
- The timing and extent of changes in commodity prices and interest rates and the ability to recover such costs through the regulatory process, where appropriate, and their impact on liquidity positions and the value of underlying assets;
- The results of financing efforts, including the ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings, interest rate fluctuations, compliance with debt covenants and conditions and general market and economic conditions;
- Credit ratings of the Duke Energy Registrants may be different from what is expected;
- Declines in the market prices of equity and fixed-income securities and resultant cash funding requirements for defined benefit pension plans, other post-retirement benefit plans and nuclear decommissioning trust funds;
- Construction and development risks associated with the completion of the Duke Energy Registrants' capital investment projects, including risks related to financing, obtaining and complying with terms of permits, meeting construction budgets and schedules and satisfying operating and environmental performance standards, as well as the ability to recover costs from customers in a timely manner, or at all;
- Changes in rules for regional transmission organizations, including changes in rate designs and new and evolving capacity markets, and risks related to obligations created by the default of other participants;
- The ability to control operation and maintenance costs;
- The level of creditworthiness of counterparties to transactions;
- The ability to obtain adequate insurance at acceptable costs;
- Employee workforce factors, including the potential inability to attract and retain key personnel;

- The ability of subsidiaries to pay dividends or distributions to Duke Energy Corporation holding company (the Parent);
- The performance of projects undertaken by our nonregulated businesses and the success of efforts to invest in and develop new opportunities;
- The effect of accounting pronouncements issued periodically by accounting standard-setting bodies;
- The impact of United States tax legislation to our financial condition, results of operations or cash flows and our credit ratings;
- The impacts from potential impairments of goodwill or equity method investment carrying values; and
- The ability to implement our business strategy, including enhancing existing technology systems.

Additional risks and uncertainties are identified and discussed in the Duke Energy Registrants' reports filed with the SEC and available at the SEC's website at sec.gov. In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than described. Forward-looking statements speak only as of the date they are made and the Duke Energy Registrants expressly disclaim an obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Glossary of Terms

The following terms or acronyms used in this Form 10-Q are defined below:

Term or Acronym	Definition
2013 Settlement	Revised and Restated Stipulation and Settlement Agreement approved in November 2013 among Duke Energy Florida, the Florida Office of Public Counsel and other customer representatives
2017 Settlement	Second Revised and Restated Settlement Agreement in 2017 among Duke Energy Florida, the Florida Office of Public Counsel and other customer representatives, which replaces and supplants the 2013 Settlement
ACP	Atlantic Coast Pipeline, LLC, a limited liability company owned by Dominion Energy, Inc. and Duke Energy
ACP pipeline	The approximately 600-mile canceled interstate natural gas pipeline
AFS	Available for Sale
AFUDC	Allowance for funds used during construction
AMT	Alternative Minimum Tax
ARO	Asset retirement obligations
Bison	Bison Insurance Company Limited
CC	Combined Cycle
CCR	Coal Combustion Residuals
CARES Act	Coronavirus Aid, Relief and Economic Security Act
Coal Ash Act	North Carolina Coal Ash Management Act of 2014
the company	Duke Energy Corporation and its subsidiaries
Constitution	Constitution Pipeline Company, LLC
COVID-19	Coronavirus Disease 2019
CRC	Cinergy Receivables Company, LLC
Crystal River Unit 3	Crystal River Unit 3 Nuclear Plant
DEFPF	Duke Energy Florida Project Finance, LLC
DEFR	Duke Energy Florida Receivables, LLC
DEPR	Duke Energy Progress Receivables, LLC
DERF	Duke Energy Receivables Finance Company, LLC
Duke Energy	Duke Energy Corporation (collectively with its subsidiaries)
Duke Energy Ohio	Duke Energy Ohio, Inc.
Duke Energy Progress	Duke Energy Progress, LLC
Duke Energy Carolinas	Duke Energy Carolinas, LLC
Duke Energy Florida	Duke Energy Florida, LLC
Duke Energy Indiana	Duke Energy Indiana, LLC
Duke Energy Kentucky	Duke Energy Kentucky, Inc.
Duke Energy Registrants	Duke Energy, Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont

Tables within the notes may not sum across due to (i) Progress Energy's consolidation of Duke Energy Progress, Duke Energy Florida and other subsidiaries that are not registrants and (ii) subsidiaries that are not registrants but included in the consolidated Duke Energy balances.

1. ORGANIZATION AND BASIS OF PRESENTATION

BASIS OF PRESENTATION

These Condensed Consolidated Financial Statements have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, these Condensed Consolidated Financial Statements do not include all information and notes required by GAAP for annual financial statements and should be read in conjunction with the Consolidated Financial Statements in the Duke Energy Registrants' combined Annual Report on Form 10-K for the year ended December 31, 2019.

The information in these combined notes relates to each of the Duke Energy Registrants as noted in the Index to Combined Notes to Condensed Consolidated Financial Statements. However, none of the registrants make any representations as to information related solely to Duke Energy or the subsidiaries of Duke Energy other than itself.

These Condensed Consolidated Financial Statements, in the opinion of the respective companies' management, reflect all normal recurring adjustments necessary to fairly present the financial position and results of operations of each of the Duke Energy Registrants. Amounts reported in Duke Energy's interim Condensed Consolidated Statements of Operations and each of the Subsidiary Registrants' interim Condensed Consolidated Statements of Operations and Comprehensive Income are not necessarily indicative of amounts expected for the respective annual periods due to effects of seasonal temperature variations on energy consumption, regulatory rulings, timing of maintenance on electric generating units, changes in mark-to-market valuations, changing commodity prices and other factors.

In preparing financial statements that conform to GAAP, management must make estimates and assumptions that affect the reported amounts of assets and liabilities, the reported amounts of revenues and expenses and the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

BASIS OF CONSOLIDATION

These Condensed Consolidated Financial Statements include, after eliminating intercompany transactions and balances, the accounts of the Duke Energy Registrants and subsidiaries or VIEs where the respective Duke Energy Registrants have control. See Note 12 for additional information on VIEs. These Condensed Consolidated Financial Statements also reflect the Duke Energy Registrants' proportionate share of certain jointly owned generation and transmission facilities.

COVID-19

The COVID-19 pandemic is having a significant impact on global health and economic environments. In March 2020, the World Health Organization declared COVID-19 a global pandemic, and President Trump proclaimed that the COVID-19 outbreak in the United States constitutes a national emergency. The Duke Energy Registrants are monitoring developments closely and responding appropriately. The company incurred approximately $39 million and $91 million of incremental COVID-19 costs before deferral for the three and nine months ended September 30, 2020, respectively, included in Operation, maintenance and other on the Condensed Consolidated Statements of Operations. For the nine months ended September 30, 2020, the company has deferred approximately $56 million of these incremental costs, which were primarily bad debt expense, personal protective equipment and cleaning supplies. Further, the company waived approximately $29 million and $54 million of late payment fees for the three and nine months ended September 30, 2020, respectively. See Notes 3, 5, 12, 13 and 16 for additional information as well as steps taken to mitigate the impacts to our business and customers from the COVID-19 pandemic.

OTHER CURRENT ASSETS

Included in Other within Current Assets on the Piedmont Condensed Consolidated Balance Sheets are prepaid assets of $23 million and $3 million as of September 30, 2020, and December 31, 2019, respectively. The prepaid assets relate to natural gas storage injections and inventory transfers classified as prepaid assets until winter season when the natural gas is moved to Inventory on the Piedmont Condensed Consolidated Balance Sheets under certain agreements.

OTHER CURRENT LIABILITIES

Included in Other within Current Liabilities on the Duke Energy Condensed Consolidated Balance Sheet is a current liability of $935 million and $0 as of September 30, 2020, and December 31, 2019, respectively. The current liability, initially recorded in the second quarter and increased during the third quarter, primarily represents Duke Energy's share of ACP's obligations of outstanding debt and to satisfy ARO requirements to restore construction sites. See Notes 3, 4 and 12 for further information.

NONCONTROLLING INTEREST

Duke Energy maintains a controlling financial interest in certain less than wholly owned nonregulated subsidiaries. As a result, Duke Energy consolidates these subsidiaries and presents the third-party investors' portion of Duke Energy's net income (loss), net assets and comprehensive income (loss) as noncontrolling interest. Noncontrolling interest is included as a component of equity on the Condensed Consolidated Balance Sheet.

Several operating agreements of Duke Energy's subsidiaries with noncontrolling interest are subject to allocations of earnings, tax attributes and cash flows in accordance with contractual agreements that vary throughout the lives of the subsidiaries. Therefore, Duke Energy and the other investors' (the owners) interests in the subsidiaries are not fixed, and the subsidiaries apply the Hypothetical Liquidation at Book Value (HLBV) method in allocating income or loss and other comprehensive income or loss (all measured on a pretax basis) to the owners. The HLBV method measures the amounts that each owner would hypothetically claim at each balance sheet reporting date, including tax benefits realized by the owners over the IRS recapture period, upon a hypothetical liquidation of the subsidiary at the net book value of its underlying assets. The change in the amount that each owner would hypothetically receive at the reporting date compared to the amount it would have received on the previous reporting date represents the amount of income or loss allocated to each owner for the reporting period.

Other operating agreements of Duke Energy's subsidiaries with noncontrolling interest allocate profit and loss based on their pro rata shares of the ownership interest in the respective subsidiary. Therefore, Duke Energy allocates net income or loss and other comprehensive income or loss of these subsidiaries to the owners based on their pro rata shares.

The following table presents cash received for the sale of noncontrolling interest and allocated losses to noncontrolling interest for the three and nine months ended September 30, 2020, and 2019.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	**2020**	**2019**	**2020**	**2019**
Noncontrolling Interest Capital Contributions				
Cash received for the sale of noncontrolling interest to tax equity members	**$ 239**	$ 7	**$ 402**	$ 200
Cash received for the sale of noncontrolling interest to pro rata share members	**—**	—	**—**	415
Total Noncontrolling Interest Capital Contributions	**239**	7	**402**	615
Noncontrolling Interest Allocation of Income				
Allocated losses to noncontrolling tax equity members utilizing the HLBV method	**59**	15	**187**	105
Allocated losses to noncontrolling members based on pro rata shares of ownership	**11**	4	**21**	5
Total Noncontrolling Interest Allocated Losses	**$ 70**	$ 19	**$ 208**	$ 110

CASH, CASH EQUIVALENTS AND RESTRICTED CASH

Duke Energy, Progress Energy and Duke Energy Florida have restricted cash balances related primarily to collateral assets, escrow deposits and VIEs. See Notes 10 and 12 for additional information. Restricted cash amounts are included in Other within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets. The following table presents the components of cash, cash equivalents and restricted cash included in the Condensed Consolidated Balance Sheets.

	September 30, 2020			December 31, 2019		
	Duke Energy	**Progress Energy**	**Duke Energy Florida**	**Duke Energy**	**Progress Energy**	**Duke Energy Florida**
Current Assets						
Cash and cash equivalents	**$ 308**	**$ 70**	**$ 19**	$ 311	$ 48	$ 17
Other	**187**	**16**	**16**	222	39	39
Other Noncurrent Assets						
Other	**105**	**102**	**—**	40	39	—
Total cash, cash equivalents and restricted cash	**$ 600**	**$ 188**	**$ 35**	$ 573	$ 126	$ 56

INVENTORY

Provisions for inventory write-offs were not material at September 30, 2020, and December 31, 2019. The components of inventory are presented in the tables below.

	September 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Materials and supplies	$ 2,341	$ 779	$ 1,021	$ 682	$ 340	$ 79	$ 314	$ 13
Coal	546	173	168	120	48	12	192	—
Natural gas, oil and other fuel	303	40	189	108	80	39	1	34
Total inventory	$ 3,190	$ 992	$ 1,378	$ 910	$ 468	$ 130	$ 507	$ 47

	December 31, 2019							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Materials and supplies	$ 2,297	$ 768	$ 1,038	$ 686	$ 351	$ 79	$ 318	$ 5
Coal	586	187	186	138	48	15	198	—
Natural gas, oil and other fuel	349	41	199	110	90	41	1	67
Total inventory	$ 3,232	$ 996	$ 1,423	$ 934	$ 489	$ 135	$ 517	$ 72

NEW ACCOUNTING STANDARDS

The following new accounting standard was adopted by the Duke Energy Registrants in 2020.

Current Expected Credit Losses. In June 2016, the Financial Accounting Standards Board (FASB) issued new accounting guidance for credit losses. Duke Energy adopted the new accounting guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year results. Duke Energy did not adopt any practical expedients.

Duke Energy recognizes allowances for credit losses based on management's estimate of losses expected to be incurred over the lives of certain assets or guarantees. Management monitors credit quality, changes in expected credit losses and the appropriateness of the allowance for credit losses on a forward-looking basis. Management reviews the risk of loss periodically as part of the existing assessment of collectability of receivables.

Duke Energy reviews the credit quality of its counterparties as part of its regular risk management process and requires credit enhancements, such as deposits or letters of credit, as appropriate and as allowed by regulators.

Duke Energy recorded cumulative effects of changes in accounting principles related to the adoption of new credit loss standard, for allowances for credit losses of trade and other receivables, insurance receivables and financial guarantees. These amounts are included in the Condensed Consolidated Balance Sheets in Receivables, Receivables of VIEs, Other Noncurrent Assets and Other Noncurrent Liabilities. See Notes 4 and 13 for more information.

Duke Energy recorded an adjustment for the cumulative effect of a change in accounting principle due to the adoption of this standard on January 1, 2020, as shown in the table below:

	January 1, 2020					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Piedmont
Total pretax impact to Retained Earnings	$ 120	$ 16	$ 2	$ 1	$ 1	$ 1

The following new accounting standard has been issued but not yet adopted by the Duke Energy Registrants as of September 30, 2020.

Reference Rate Reform. In March 2020, the FASB issued new accounting guidance for reference rate reform. This guidance is elective and provides expedients to facilitate financial reporting for the anticipated transition away from the London Inter-bank Offered Rate (LIBOR) and other interbank reference rates by the end of 2021. The optional expedients are effective for modification of existing contracts or new arrangements executed between March 12, 2020, through December 31, 2022.

Duke Energy has variable-rate debt and manages interest rate risk by entering into financial contracts including interest rate swaps that are generally indexed to LIBOR. Impacted financial arrangements extending beyond 2021 may require contractual amendment or termination to fully adapt to a post-LIBOR environment. Duke Energy is assessing these financial arrangements and is evaluating the use of optional expedients outlined in the new accounting guidance. Alternative index provisions are also being assessed and incorporated into new financial arrangements that extend beyond 2021. The full outcome of the transition away from LIBOR cannot be determined at this time, but is not expected to have a material impact on the financial statements.

2. BUSINESS SEGMENTS

Duke Energy

Duke Energy's segment structure includes the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables. The Electric Utilities and Infrastructure segment primarily includes Duke Energy's regulated electric utilities in the Carolinas, Florida and the Midwest. The Gas Utilities and Infrastructure segment includes Piedmont, Duke Energy's natural gas local distribution companies in Ohio and Kentucky, and Duke Energy's natural gas storage and midstream pipeline investments.

The Commercial Renewables segment is primarily comprised of nonregulated utility-scale wind and solar generation assets located throughout the U.S. In 2020, Duke Energy continues to evaluate recoverability of a renewable merchant plant located in the Electric Reliability Council of Texas West market due to declining market pricing and declining long-term forecasted energy prices, primarily driven by lower forecasted natural gas prices. Duke Energy determined that the asset was not impaired as of September 30, 2020, because the carrying value of approximately $150 million approximates the aggregate estimated future undiscounted cash flows. A continued decline in energy market pricing would likely result in a future impairment. Duke Energy retained 51% ownership interest in this facility following the 2019 transaction to sell a minority interest in certain renewable assets.

The remainder of Duke Energy's operations is presented as Other, which is primarily comprised of interest expense on holding company debt, unallocated corporate costs, Duke Energy's wholly owned captive insurance company, Bison, and Duke Energy's ownership interest in National Methanol Company.

Business segment information is presented in the following tables. Segment assets presented exclude intercompany assets.

	Three Months Ended September 30, 2020						
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total Reportable Segments	Other	Eliminations	Total
Unaffiliated revenues	$ 6,371	$ 217	$ 126	$ 6,714	$ 7	$ —	$ 6,721
Intersegment revenues	8	24	—	32	17	(49)	—
Total revenues	$ 6,379	$ 241	$ 126	$ 6,746	$ 24	$ (49)	$ 6,721

Less: Noncontrolling interests							70
Add: Preferred stock dividend							39
Net Income							$ 1,234
Segment assets	$ 138,142	$ 13,343	$ 6,541	$ 158,026	$ 3,387	$ (4)	$ 161,409

	Three Months Ended September 30, 2019						
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total Reportable Segments	Other	Eliminations	Total
Unaffiliated revenues	$ 6,569	$ 225	$ 138	$ 6,932	$ 8	$ —	$ 6,940
Intersegment revenues	8	24	—	32	17	(49)	—
Total revenues	$ 6,577	$ 249	$ 138	$ 6,964	$ 25	$ (49)	$ 6,940
Segment income (loss)[(c)]	$ 1,385	$ 26	$ 40	$ 1,451	$ (124)	$ —	$ 1,327
Less: Noncontrolling interests							19
Add: Preferred stock dividend							15
Net Income							$ 1,323

(a) Electric Utilities and Infrastructure includes $19 million recorded within Impairment charges and $8 million recorded within Operations, maintenance and other on the Duke Energy Carolinas' Condensed Consolidated Statements of Operations related to a partial settlement in the Duke Energy Carolinas' 2019 North Carolina rate case and $8 million recorded within Operations, maintenance and other on Duke Energy Progress' Condensed Consolidated Statements of Operation related to a partial settlement in the Duke Energy Progress' 2019 North Carolina rate case. See Note 3 for more information. Additionally, Electric Utilities and Infrastructure includes $5 million of Impairment charges related to gas pipeline assets recorded on Duke Energy Progress' Condensed Consolidated Statements of Operations.

(b) Gas Utilities and Infrastructure includes $78 million recorded within Equity in (losses) earnings of unconsolidated affiliates on the Condensed Consolidated Statements of Operations and $7 million in Impairment charges recorded on the Piedmont Condensed Consolidated Statements of Operations related to gas pipeline investments.

(c) Electric Utilities and Infrastructure includes a $25 million reduction of a prior year impairment recorded at Citrus County CC related to the plant's cost cap and is recorded within Impairment charges on Duke Energy Florida's Condensed Consolidated Statements of Operations.

	Nine Months Ended September 30, 2020						
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total Reportable Segments	Other	Eliminations	Total
Unaffiliated revenues	**$ 16,571**	**$ 1,122**	**$ 378**	**$ 18,071**	**$ 20**	**$ —**	**$ 18,091**

Less: Noncontrolling interests							**208**
Add: Preferred stock dividend							**93**
Net Income							**$ 1,232**

	Nine Months Ended September 30, 2019						
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total Reportable Segments	Other	Eliminations	Total
Unaffiliated revenues	$ 17,357	$ 1,239	$ 362	$ 18,958	$ 18	$ —	$ 18,976
Intersegment revenues	24	72	—	96	53	(149)	—
Total revenues	$ 17,381	$ 1,311	$ 362	$ 19,054	$ 71	$ (149)	$ 18,976
Segment income (loss)[d]	$ 2,944	$ 292	$ 139	$ 3,375	$ (328)	$ —	$ 3,047
Less: Noncontrolling interests							110
Add: Preferred stock dividend							27
Net Income							$ 2,964

(a) Electric Utilities and Infrastructure includes $19 million recorded within Impairment charges and $8 million recorded within Operations, maintenance and other on the Duke Energy Carolinas' Condensed Consolidated Statements of Operations related to a partial settlement in the Duke Energy Carolinas' 2019 North Carolina rate case and $8 million recorded within Operations, maintenance and other on Duke Energy Progress' Condensed Consolidated Statements of Operation related to a partial settlement in the Duke Energy Progress' 2019 North Carolina rate case. See Note 3 for more information. Additionally, Electric Utilities and Infrastructure includes $5 million of Impairment charges related to gas pipeline assets recorded on Duke Energy Progress' Condensed Consolidated Statements of Operations.

(b) Gas Utilities and Infrastructure includes $2.1 billion recorded within Equity in (losses) earnings of unconsolidated affiliates on the Condensed Consolidated Statements of Operations and $7 million of Impairment charges recorded on the Piedmont Condensed Consolidated Statements of Operations related to gas pipeline investments. See Notes 3 and 12 for additional information.

(c) Other includes a $98 million reversal, included in Operations, maintenance and other on the Condensed Consolidated Statements of Operations, of 2018 severance costs due to a partial settlement in the Duke Energy Carolinas' 2019 North Carolina rate case. See Note 3 for additional information.

(d) Electric Utilities and Infrastructure includes a $25 million reduction of a prior year impairment recorded at Citrus County CC related to the plant's costs cap and is recorded within Impairment charges on Duke Energy Florida's Condensed Consolidated Statements of Operations.

Duke Energy Ohio

Duke Energy Ohio has two reportable segments, Electric Utilities and Infrastructure and Gas Utilities and Infrastructure. The remainder of Duke Energy Ohio's operations is presented as Other.

	Three Months Ended September 30, 2020					
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Total Reportable Segments	Other	Eliminations	Total
Total revenues	$ 394	$ 79	$ 473	$ —	$ —	$ 473
Segment income/Net income	$ 63	$ 9	$ 72	$ (2)	$ —	$ 70
Segment assets	$ 6,448	$ 3,297	$ 9,745	$ 27	$ (23)	$ 9,749

	Three Months Ended September 30, 2019				
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Total Reportable Segments	Other	Total
Total revenues	$ 408	$ 81	$ 489	$ —	$ 489
Segment income/Net income	$ 62	$ 13	$ 75	$ (1)	$ 74

	Nine Months Ended September 30, 2020				
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Total Reportable Segments	Other	Total
Total revenues	$ 1,070	$ 324	$ 1,394	$ —	$ 1,394
Segment income/Net (loss) income	$ 137	$ 68	$ 205	$ (4)	$ 201

	Nine Months Ended September 30, 2019				
(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Total Reportable Segments	Other	Total
Total revenues	$ 1,099	$ 354	$ 1,453	$ —	$ 1,453
Segment income/Net (loss) income	$ 129	$ 65	$ 194	$ (4)	$ 190

3. REGULATORY MATTERS

RATE-RELATED INFORMATION

The NCUC, PSCSC, FPSC, IURC, PUCO, TPUC and KPSC approve rates for retail electric and natural gas services within their states. The FERC approves rates for electric sales to wholesale customers served under cost-based rates (excluding Ohio and Indiana), as well as sales of transmission service. The FERC also regulates certification and siting of new interstate natural gas pipeline projects.

Duke Energy Carolinas and Duke Energy Progress

COVID-19 Filings

<u>North Carolina</u>

On March 10, 2020, Governor Roy Cooper declared a state of emergency due to the COVID-19 pandemic. On March 19, 2020, the NCUC issued an order directing that utilities under its jurisdiction suspend disconnections for nonpayment of utility bills during the state of emergency and allow for customers to enter into payment arrangements to pay off arrearages accumulated during the state of emergency after the end of the state of emergency. Additionally, to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 19, 2020, Duke Energy Carolinas and Duke Energy Progress filed a request with the NCUC seeking authorization to waive: (1) any late payment charges incurred by a residential or nonresidential customer, effective March 21, 2020; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit; and (4) the fees and charges associated with the use of credit cards or debit cards to pay residential electric utility bills, effective March 21, 2020. The NCUC granted the companies' request on March 20, 2020.

On July 29, 2020, the NCUC issued its Order Lifting Disconnection Moratorium and Allowing Collection of Arrearages Pursuant to Special Repayment Plans. The order contained the following: (1) public utilities may resume customer disconnections due to nonpayment for bills first rendered on or after September 1, 2020, after appropriate notice; (2) the late fee moratorium will continue through the end of the state of emergency or until further order of the commission; (3) Duke Energy utilities may reinstate fees for checks returned for insufficient funds as well as transaction fees for use of credit cards or debit cards for bills first rendered on or after September 1, 2020; and (4) no sooner than September 1, 2020, the collection of past-due or delinquent accounts accrued up to and including August 31, 2020, may proceed subject to conditions. Duke Energy Carolinas and Duke Energy Progress resumed normal billing practices as of October 1, 2020, with the exception of the billing of late payment charges. Customers were notified of the resumption of normal billing practices, the option of deferred payment arrangements and where to find assistance, if necessary. Service disconnections for nonpayment for residential customers resumed on November 2, 2020.

Duke Energy Carolinas and Duke Energy Progress filed a joint petition on August 7, 2020, with the NCUC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic. On October 30, 2020, the NCUC issued an order extending deadlines to file comments on the joint petition to November 5, 2020, and reply comments to November 30, 2020. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

South Carolina

On March 13, 2020, Governor Henry McMaster declared a state of emergency due to the COVID-19 pandemic. The governor also issued a letter on March 14, 2020, to the ORS Executive Director regarding the suspension of disconnection of essential utility services for nonpayment. On March 18, 2020, the PSCSC issued an order approving such waivers, and also approved waivers for regulations related to late fees and reconnect fees. The PSCSC's order also required utilities to track the financial impacts of actions taken pursuant to such waivers for possible reporting to the PSCSC.

On May 13, 2020, the ORS filed a letter with the PSCSC that included a request from Governor McMaster that utilities proceed with developing and implementing plans for phasing in normal business operations. On May 14, 2020, the PSCSC conditionally vacated the regulation waivers regarding termination of service and suspension of disconnect fees. Prior to termination, utilities are to refer past-due customers to local organizations for assistance and/or deferred payment arrangements. Duke Energy Carolinas and Duke Energy Progress filed a report on June 30, 2020, as required by PSCSC order, reporting revenue impact, costs and savings related to COVID-19 to date. On August 14, 2020, Duke Energy Carolinas and Duke Energy Progress filed a joint petition with the PSCSC for approval of an accounting order to defer incremental COVID-19 related costs incurred through June 30, 2020, and for the ongoing months during the duration of the COVID-19 pandemic. The deferral request did not include lost revenues. Updates on cost impacts were filed on September 30, 2020, and included financial impacts through the end of August 2020. On October 16, 2020, the ORS requested the PSCSC delay taking formal action on the deferral request until the ORS and any intervenors complete discovery. The PSCSC issued an order on October 21, 2020, to grant additional time to complete discovery until January 20, 2021, and to establish a procedural schedule.

On August 17, 2020, Duke Energy Carolinas and Duke Energy Progress filed an update on their planned return to normal operations during the COVID-19 pandemic. Normal billing practices resumed in South Carolina as of October 1, 2020, and service disconnections for nonpayment resumed on October 12, 2020. Customers were notified of the resumption of normal billing practices, the option of payment arrangements and where to find assistance, if necessary. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

2020 North Carolina Storm Securitization Filings

On October 26, 2020, Duke Energy Carolinas and Duke Energy Progress filed a joint petition with the NCUC, as agreed to in partial settlements reached in the 2019 North Carolina Rate Cases for Duke Energy Carolinas and Duke Energy Progress, seeking authorization for the financing of each utilities' storm recovery activities required as a result of Hurricane Florence, Hurricane Michael, Hurricane Dorian and Winter Storm Diego. Specifically, Duke Energy Carolinas and Duke Energy Progress requested that the NCUC find that their storm recovery costs and related financing costs are appropriately financed by debt secured by storm recovery property, and that the commission issue financing orders by which each utility may accomplish such financing using a securitization structure. The total revenue requirement over the proposed 15-year bond period for the storm recovery charges is approximately $262 million for Duke Energy Carolinas and $842 million for Duke Energy Progress. The NCUC has until March 10, 2021, to issue financing orders. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Carolinas

2017 North Carolina Rate Case

On August 25, 2017, Duke Energy Carolinas filed an application with the NCUC for a rate increase for retail customers of approximately $647 million. On February 28, 2018, Duke Energy Carolinas and the North Carolina Public Staff (Public Staff) filed an Agreement and Stipulation of Partial Settlement resolving certain portions of the proceeding. Terms of the settlement included a return on equity of 9.9% and a capital structure of 52% equity and 48% debt. On June 22, 2018, the NCUC issued an order approving the Stipulation of Partial Settlement and requiring a revenue reduction.

The North Carolina Attorney General and other parties separately filed Notices of Appeal to the North Carolina Supreme Court. On August 8, 2018, the Public Staff filed a Notice of Cross Appeal to the North Carolina Supreme Court. On November 29, 2018, the North Carolina Attorney General's Office filed a motion with the North Carolina Supreme Court requesting the court consolidate the Duke Energy Carolinas and Duke Energy Progress appeals and enter an order adopting the parties' proposed briefing schedule as set out in the filing. On November 29, 2018, the North Carolina Supreme Court adopted a schedule for briefing set forth in the motion to consolidate the Duke Energy Carolinas and Duke Energy Progress appeals. Appellant briefs were filed on April 26, 2019. The Appellee response briefs were filed on September 25, 2019. Oral arguments before the North Carolina Supreme Court were held on March 11, 2020. Duke Energy Carolinas cannot predict the outcome of this matter.

2019 North Carolina Rate Case

On September 30, 2019, Duke Energy Carolinas filed an application with the NCUC for a net rate increase for retail customers of approximately $291 million, which represented an approximate 6% increase in annual base revenues. The gross rate case revenue increase request was $445 million, which was offset by an EDIT rider of $154 million to return to customers North Carolina and federal EDIT resulting from recent reductions in corporate tax rates. The request for a rate increase was driven by major capital investments subsequent to the previous base rate case, coal ash pond closure costs, accelerated coal plant depreciation and deferred 2018 storm costs. Duke Energy Carolinas requested rates be effective no later than August 1, 2020. The NCUC established a procedural schedule with an evidentiary hearing to begin on March 23, 2020. On March 16, 2020, in consideration of public health and safety as a result of the COVID-19 pandemic, Duke Energy Carolinas filed a motion with the NCUC seeking a suspension of the procedural schedule in the rate case, including issuing discovery requests, and postponement of the evidentiary hearing for 60 days. Also on March 16, 2020, the NCUC issued an Order Postponing Hearing and Addressing Procedural Matters, which postponed the evidentiary hearing until further order by the commission.

On March 25, 2020, Duke Energy Carolinas and the Public Staff filed an Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain issues in the base rate proceeding. Major components of the settlement included:

- Removal of deferred storm costs from the rate case;
- Filing a petition seeking to securitize the deferred storm costs within 120 days of a commission order in this rate case regarding the reasonableness and prudency of the storm costs;
- Agreement of certain assumptions to demonstrate the quantifiable benefits to customers of a securitization financing; and
- Agreement on certain accounting matters, including recovery of employee incentives, severance, aviation costs and executive compensation.

On May 6, 2020, Duke Energy Carolinas, Duke Energy Progress and the Public Staff filed a joint motion requesting that the NCUC issue an order scheduling one consolidated evidentiary hearing to consider the companies' applications for net rate increases. On June 17, 2020, the NCUC issued an order adopting procedures for the expert witness hearings to take place in three phases: (1) a hearing on issues common to both rate cases conducted remotely; (2) a hearing on Duke Energy Carolinas specific rate case issues, followed immediately by; (3) a hearing on Duke Energy Progress specific rate case issues. On July 24, 2020, Duke Energy Carolinas filed its request for approval of its notice to customers required to implement temporary rates. On July 27, 2020, Duke Energy Carolinas filed a joint motion with Duke Energy Progress and the Public Staff notifying the commission that the parties reached a joint partial settlement with the Public Staff. Also on July 27, 2020, Duke Energy Carolinas filed a letter stating that it intended to update its temporary rates calculation to reflect the terms of the partial settlement.

On July 31, 2020, Duke Energy Carolinas and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement (Second Partial Settlement), which is subject to review and approval of the NCUC, resolving certain remaining issues in the base rate proceeding. Major components of the Second Partial Settlement included:

- A return on equity of 9.6% and a capital structure of 52% equity and 48% debt;
- Agreement on amortization over a five-year period for unprotected federal EDIT flowbacks to customers;
- Agreement on the inclusion of plant in service and other revenue requirement updates through May 31, 2020, subject to Public Staff review. Annual revenue requirement associated with the May 31 update is estimated at $45 million; and
- Settlement to allow the deferral of costs for certain grid projects placed in service between June 1, 2020, and December 31, 2022, totaling $0.8 billion.

The remaining items litigated at hearing included recovery of deferred coal ash compliance costs that are subject to asset retirement obligation accounting, implementation of new depreciation rates and the amortization period of the loss on the hydro station sale.

On August 4, 2020, Duke Energy Carolinas filed an amended motion for approval of its amended notice to customers, seeking to exercise its statutory right to implement temporary rates subject to refund on or after August 24, 2020. The revenue requirement to be recovered, subject to refund, through the temporary rates is based on and consistent with the base rate component of the Second Partial Settlement with the Public Staff and excludes the items to be litigated noted above. Duke Energy Carolinas will not begin the amortization or implementation of these items until a final order is issued in the rate case and new base rates are implemented. These items will also be excluded when determining whether a refund of amounts collected through these temporary rates is needed. In addition, Duke Energy Carolinas also seeks authorization to place a temporary decrement EDIT Rider into effect, concurrent with the temporary base rate change. The temporary rate changes are not final rates and remain subject to the NCUC's determination of the just and reasonable rates to be charged by Duke Energy Carolinas on a permanent basis. The NCUC approved the August 4, 2020 amended temporary rates motion on August 6, 2020, and temporary rates went into effect on August 24, 2020.

The Duke Energy Carolinas evidentiary hearing concluded on September 18, 2020, and post-hearing filings were filed with the NCUC from all parties by November 4, 2020. Duke Energy Carolinas expects the NCUC to issue an order on its net rate increase before the end of the first quarter of 2021. Duke Energy Carolinas cannot predict the outcome of this matter.

2018 South Carolina Rate Case

On November 8, 2018, Duke Energy Carolinas filed an application with the PSCSC for a rate increase for retail customers of approximately $168 million.

After hearings in March 2019, the PSCSC issued an order on May 21, 2019, which included a return on equity of 9.5% and a capital structure of 53% equity and 47% debt. The order also included the following material components:

- Approval of cancellation of the Lee Nuclear Project, with Duke Energy Carolinas maintaining the Combined Operating License;
- Approval of recovery of $125 million (South Carolina retail portion) of Lee Nuclear Project development costs (including AFUDC through December 2017) over a 12-year period, but denial of a return on the deferred balance of costs;
- Approval of recovery of $96 million of coal ash costs over a five-year period with a return at Duke Energy Carolinas' WACC;
- Denial of recovery of $115 million of certain coal ash costs deemed to be related to the Coal Ash Act and incremental to the federal CCR rule;
- Approval of a $66 million decrease to base rates to reflect the change in ongoing tax expense, primarily the reduction in the federal income tax rate from 35% to 21%;
- Approval of a $45 million decrease through the EDIT Rider to return EDIT resulting from the federal tax rate change and deferred revenues since January 2018 related to the change, to be returned in accordance with the Average Rate Assumption Method (ARAM) for protected EDIT, over a 20-year period for unprotected EDIT associated with Property, Plant and Equipment, over a five-year period for unprotected EDIT not associated with Property, Plant and Equipment and over a five-year period for the deferred revenues; and
- Approval of a $17 million decrease through the EDIT Rider related to reductions in the North Carolina state income tax rate from 6.9% to 2.5% to be returned over a five-year period.

As a result of the order, revised customer rates were effective June 1, 2019. On May 31, 2019, Duke Energy Carolinas filed a Petition for Rehearing or Reconsideration of that order contending substantial rights of Duke Energy Carolinas were prejudiced by unlawful, arbitrary and capricious rulings by the PSCSC on certain issues presented in the proceeding. On June 19, 2019, the PSCSC issued a Directive denying Duke Energy Carolinas' request to rehear or reconsider the commission's rulings on certain issues presented in the proceeding including coal ash remediation and disposal costs, return on equity and the recovery of a return on deferred operation and maintenance expenses. An order detailing the commission's decision in the Directive was issued on October 18, 2019. Duke Energy Carolinas filed a notice of appeal on November 15, 2019, with the Supreme Court of South Carolina. On November 20, 2019, the South Carolina Energy Users Committee filed a Notice of Appeal and the ORS filed a Notice of Cross Appeal with the Supreme Court of South Carolina. On February 12, 2020, Duke Energy Carolinas and the ORS filed a joint motion to extend briefing schedule deadlines, which was approved by the Supreme Court of South Carolina on February 20, 2020. On March 10, 2020, the ORS filed a consent motion requesting withdrawal of their appeal, which was granted by the Supreme Court of South Carolina on April 30, 2020. Initial briefs were filed on April 21, 2020, which included the South Carolina Energy User's Committee brief arguing that the PSCSC erred in allowing Duke Energy Carolinas' recovery of costs related to the Lee Nuclear Station. Response briefs were filed on July 6, 2020, and reply briefs were filed on August 11, 2020. Oral arguments have not yet been scheduled by the Supreme Court of South Carolina. Based on legal analysis and the filing of the appeal, Duke Energy Carolinas has not recorded an adjustment for its deferred coal ash costs. Duke Energy Carolinas cannot predict the outcome of this matter.

Duke Energy Progress

2017 North Carolina Rate Case

On June 1, 2017, Duke Energy Progress filed an application with the NCUC for a rate increase for retail customers of approximately $477 million, which was subsequently adjusted to $420 million. On November 22, 2017, Duke Energy Progress and the Public Staff filed an Agreement and Stipulation of Partial Settlement resolving certain portions of the proceeding. Terms of the settlement included a return on equity of 9.9% and a capital structure of 52% equity and 48% debt. On February 23, 2018, the NCUC issued an order approving the stipulation. The Public Staff, the North Carolina Attorney General and the Sierra Club filed notices of appeal to the North Carolina Supreme Court.

On November 29, 2018, the North Carolina Attorney General's Office filed a motion with the North Carolina Supreme Court requesting the court consolidate the Duke Energy Progress and Duke Energy Carolinas appeals and enter an order adopting the parties' proposed briefing schedule as set out in the filing. Appellant briefs were filed on April 26, 2019. The Appellee response briefs were filed on September 25, 2019. Oral arguments before the North Carolina Supreme Court were held on March 11, 2020. Duke Energy Progress cannot predict the outcome of this matter.

2019 North Carolina Rate Case

On October 30, 2019, Duke Energy Progress filed an application with the NCUC for a net rate increase for retail customers of approximately $464 million, which represented an approximate 12.3% increase in annual base revenues. The gross rate case revenue increase request was $586 million, which was offset by riders of $122 million, primarily an EDIT rider of $120 million to return to customers North Carolina and federal EDIT resulting from recent reductions in corporate tax rates. The request for rate increase was driven by major capital investments subsequent to the previous base rate case, coal ash pond closure costs, accelerated coal plant depreciation and deferred 2018 storm costs. Duke Energy Progress seeks to defer and recover incremental Hurricane Dorian storm costs in this proceeding and requests rates be effective no later than September 1, 2020. As a result of the COVID-19 pandemic, on March 24, 2020, the NCUC suspended the procedural schedule and postponed the previously scheduled evidentiary hearing on this matter indefinitely. On April 7, 2020, the NCUC issued an order partially resuming the procedural schedule requiring intervenors to file direct testimony on April 13, 2020. Public Staff filed supplemental direct testimony on April 23, 2020. Duke Energy Progress filed rebuttal testimony on May 4, 2020.

On June 2, 2020, Duke Energy Progress and the Public Staff filed an Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain issues in the base rate proceeding. Major components of the settlement included:

- Removal of deferred storm costs from the rate case;
- Filing a petition seeking to securitize the deferred storm costs within 120 days of a commission order in this rate case regarding the reasonableness and prudency of the storm costs;
- Agreement of certain assumptions to demonstrate the quantifiable benefits to customers of a securitization financing;
- Agreement that the Asheville CC project is complete and in service and agreement on the amount to be included in rate base; and
- Agreement on certain accounting matters, including recovery of employee incentives, severance, aviation costs and executive compensation.

On May 6, 2020, Duke Energy Progress, Duke Energy Carolinas and the Public Staff filed a joint motion requesting that the NCUC issue an order scheduling one consolidated evidentiary hearing to consider the companies' applications for net rate increases. On June 17, 2020, the NCUC issued an order adopting procedures for the expert witness hearings to take place in three phases: (1) a hearing on issues common to both rate cases conducted remotely; (2) a hearing on Duke Energy Carolinas specific rate case issues, followed immediately by; (3) a hearing on Duke Energy Progress specific rate case issues. On July 27, 2020, Duke Energy Progress filed a joint motion with Duke Energy Carolinas and the Public Staff notifying the commission that the parties reached a joint partial settlement with the Public Staff.

On July 31, 2020, Duke Energy Progress and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement (Second Partial Settlement), which is subject to review and approval of the NCUC, resolving certain remaining issues in the base rate proceeding. Major components of the Second Partial Settlement included:

- A return on equity of 9.6% and a capital structure of 52% equity and 48% debt;
- Agreement on amortization over a five-year period for unprotected federal EDIT flowbacks to customers;
- Agreement on the inclusion of plant in service and other revenue requirement updates through May 31, 2020, subject to Public Staff review. Annual revenue requirement associated with the May 31 update is estimated at $25 million; and
- Settlement to allow the deferral of costs for certain grid projects placed in service between June 1, 2020, and December 31, 2022, of $0.5 billion.

The remaining items litigated at hearing included recovery of deferred coal ash compliance costs that are subject to asset retirement obligation accounting and implementation of new depreciation rates.

On August 7, 2020, Duke Energy Progress filed a motion for approval of notice required to implement temporary rates, seeking to exercise its statutory right to implement temporary rates subject to refund on or after September 1, 2020. The revenue requirement to be recovered subject to refund through the temporary rates is based on and consistent with the terms of the base rate component of the settlement agreements with the Public Staff and excludes items to be litigated noted above. Duke Energy Progress will not begin the amortization or implementation of these items until a final determination is issued in the rate case and new base rates are implemented. These items will also be excluded when determining whether a refund of amounts collected through these temporary rates is needed. In addition, Duke Energy Progress also seeks authorization to place a temporary decrement EDIT Rider into effect, concurrent with the temporary base rate change. The temporary rate changes are not final rates and remain subject to the NCUC's determination of the just and reasonable rates to be charged by Duke Energy Progress on a permanent basis. The NCUC approved the August 7, 2020 temporary rates motion on August 11, 2020, and temporary rates went into effect on September 1, 2020.

The Duke Energy Progress evidentiary hearing concluded on October 6, 2020, and post-hearing filings are due to be filed with the NCUC from all parties by December 4, 2020. Duke Energy Progress expects the NCUC to issue an order on its net rate increase by the end of the first quarter of 2021. Duke Energy Progress cannot predict the outcome of this matter.

Hurricane Dorian

Hurricane Dorian reached the Carolinas in September 2019 as a Category 2 hurricane making landfall within Duke Energy Progress' service territory. Total estimated incremental operation and maintenance expenses incurred to repair and restore the system are approximately $168 million with an additional $4 million in capital investments made for restoration efforts. Approximately $145 million and $179 million of the operation and maintenance expenses are deferred in Regulatory assets within Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of September 30, 2020, and December 31, 2019, respectively. A request for an accounting order to defer incremental storm costs associated with Hurricane Dorian was included in Duke Energy Progress' October 30, 2019, general rate case filing with the NCUC. Terms of the June 2, 2020, Agreement and Stipulation of Partial Settlement removed incremental storm costs from the general rate case. A petition seeking to securitize these costs, along with costs from Hurricane Florence, Hurricane Michael and Winter Storm Diego, was filed on October 26, 2020, with the NCUC. The NCUC has until March 10, 2021, to issue financing orders. Duke Energy Progress cannot predict the outcome of this matter.

On February 7, 2020, a petition was filed with the PSCSC in the 2019 storm deferrals docket requesting deferral of approximately $22 million in operation and maintenance expenses to an existing storm deferral balance previously approved by the PSCSC. The PSCSC voted to approve the request on March 4, 2020, and issued a final order on April 7, 2020. On July 1, 2020, Duke Energy Progress filed a supplemental true up reducing the actual costs to $17 million.

2018 South Carolina Rate Case

On November 8, 2018, Duke Energy Progress filed an application with the PSCSC for a rate increase for retail customers of approximately $59 million.

After hearings in April 2019, the PSCSC issued an order on May 21, 2019, which included a return on equity of 9.5% and a capital structure of 53% equity and 47% debt. The order also included the following material components:

- Approval of recovery of $4 million of coal ash costs over a five-year period with a return at Duke Energy Progress' WACC;
- Denial of recovery of $65 million of certain coal ash costs deemed to be related to the Coal Ash Act and incremental to the federal CCR rule;
- Approval of a $17 million decrease to base rates to reflect the change in ongoing tax expense, primarily the reduction in the federal income tax rate from 35% to 21%;
- Approval of a $12 million decrease through the EDIT Tax Savings Rider resulting from the federal tax rate change and deferred revenues since January 2018 related to the change, to be returned in accordance with ARAM for protected EDIT, over a 20-year period for unprotected EDIT associated with Property, Plant and Equipment, over a five-year period for unprotected EDIT not associated with Property, Plant and Equipment and over a three-year period for the deferred revenues; and
- Approval of a $12 million increase due to the expiration of EDIT related to reductions in the North Carolina state income tax rate from 6.9% to 2.5%.

As a result of the order, revised customer rates were effective June 1, 2019. On May 31, 2019, Duke Energy Progress filed a Petition for Rehearing or Reconsideration of that order contending substantial rights of Duke Energy Progress were prejudiced by unlawful, arbitrary and capricious rulings by the PSCSC on certain issues presented in the proceeding. On June 19, 2019, the PSCSC issued a Directive denying Duke Energy Progress' request to rehear or reconsider the commission's rulings on certain issues presented in the proceeding including coal ash remediation and disposal costs, return on equity and the recovery of a return on deferred operation and maintenance expenses, but allowing additional litigation-related costs. As a result of the Directive allowing litigation-related costs, customer rates were revised effective July 1, 2019. An order detailing the commission's decision in the Directive was issued on October 18, 2019. Duke Energy Progress filed a notice of appeal on November 15, 2019, with the Supreme Court of South Carolina. The ORS filed a Notice of Cross Appeal on November 20, 2019. On February 12, 2020, Duke Energy Progress and the ORS filed a joint motion to extend briefing schedule deadlines, which was approved by the Supreme Court of South Carolina on February 20, 2020. On March 10, 2020, the ORS filed a consent motion requesting withdrawal of their appeal, which was granted by the Supreme Court of South Carolina on April 30, 2020. Initial briefs were filed on April 21, 2020. Response briefs were filed on July 6, 2020, and reply briefs were filed on August 11, 2020. Oral arguments have not yet been scheduled by the Supreme Court of South Carolina. Based on legal analysis and the filing of the appeal, Duke Energy Progress has not recorded an adjustment for its deferred coal ash costs. Duke Energy Progress cannot predict the outcome of this matter.

Western Carolinas Modernization Plan

Duke Energy Progress retired the 376-MW Asheville coal-fired plant on January 29, 2020, at which time the net book value, including associated ash basin closure costs, of $214 million was transferred from Generation facilities to be retired, net to Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets.

On December 27, 2019, Asheville Combined Cycle Unit 5 Combustion Turbine and Unit 6 Steam Turbine Generator and the common systems that serve combined cycle units went into commercial operation. Duke Energy Progress placed the Unit 7 Combustion Turbine into commercial operation in simple-cycle mode on January 15, 2020. The Unit 8 Steam Turbine Generator went into commercial operation on April 5, 2020. On June 2, 2020, Duke Energy Progress filed a request with the PSCSC for an accounting order for the deferral of post-in-service costs incurred in connection with the addition of the Asheville combined-cycle generating plant. The petition requested the PSCSC issue an accounting order authorizing Duke Energy Progress to defer post-in-service costs including the Asheville combined-cycle's depreciation expense, property taxes, incremental O&M and carrying costs at WACC of approximately $8 million annually. On June 17, 2020, the PSCSC voted to approve the petition and issued its final order on July 6, 2020.

On October 8, 2018, Duke Energy Progress filed an application with the NCUC for a CPCN to construct the Hot Springs Microgrid Solar and Battery Storage Facility, which was approved with certain conditions on May 10, 2019. A hearing to update the NCUC on the status of the project was held on March 5, 2020. Construction began in May 2020 with commercial operation expected to begin in October 2021.

On July 27, 2020, Duke Energy Progress filed an application with the NCUC for a CPCN to construct the Woodfin Solar Facility, a 5-MW solar generating facility to be constructed on a closed landfill in Buncombe County. The expert hearing is scheduled for November 18, 2020.

FERC Return on Equity Complaints

On October 11, 2019, North Carolina Eastern Municipal Power Agency (NCEMPA) filed a complaint at the FERC against Duke Energy Progress pursuant to Section 206 of the Federal Power Act (FPA). Duke Energy Progress provides NCEMPA with service under the Full Requirements Power Purchase Agreement (FRPPA). The complaint alleges that the 11% stated return on equity (ROE) component contained in the FRPPA's demand formula rate is unjust and unreasonable. On July 16, 2020, the FERC set this matter for hearing and settlement judge procedures and established a refund effective date of October 11, 2019. In its order setting the matter for settlement, the FERC allowed for variation to the base transmission-related ROE methodology developed in Order No. 569-A, through the introduction of "specific facts and circumstances" involving the parties to this case. The parties to this case are currently in FERC settlement procedures. It is Duke Energy Progress' view that, in consideration of the specific facts and circumstances of risks under the provisions of the FRPPA, the stated 11% ROE applied to NCEMPA's metered billing demand is just and reasonable. Duke Energy Progress cannot predict the outcome of this matter.

On October 16, 2020, North Carolina Electric Membership Corporation (NCEMC) filed a complaint at the FERC against Duke Energy Progress pursuant to Section 206 of the FPA. The complaint alleges that the ROE component in the formula rate contained within the Power Supply and Coordination Agreement (PSCA) between NCEMC and Duke Energy Progress is unjust and unreasonable. The PSCA's return on equity is 11% as applied to the Production Capacity Rate for the requirements service provided by Duke Energy Progress. Under FPA Section 206, the earliest refund effective date that the FERC can establish is the date of the filing of the complaint. Duke Energy Progress will respond to the complaint and believes the 11% ROE is just and reasonable for the service provided under the contract. Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Florida

COVID-19 Filings

In March 2020, Governor Ron DeSantis directed the State Health Officer of Florida to declare a public health emergency in Florida related to the COVID-19 pandemic. The governor also issued an Executive Order on March 9, 2020, in which he declared a state of emergency in Florida and directed the Director of the Division of Emergency Management to implement the state's Comprehensive Emergency Management Plan. On March 19, 2020, Duke Energy Florida filed a request to modify its tariff to allow it to waive late fees for customers, and on April 6, 2020, the FPSC issued an order approving the request. Duke Energy Florida had already voluntarily waived reconnect fees and credit card fees, and ceased disconnecting customers for nonpayment. On April 2, 2020, Duke Energy Florida filed a petition with the FPSC to accelerate a $78 million fuel cost refund to customers in the month of May 2020. Typically, the refund would be made over the course of 2021. The FPSC approved the petition on April 28, 2020. Duke Energy Florida resumed normal billing practices as of August 24, 2020, with the exception of the billing of late payment charges. Customers were notified of the resumption of normal billing practices, the option of deferred payment arrangements and where to find assistance, if necessary. Service disconnections for nonpayment for residential customers resumed on October 5, 2020.

Storm Restoration Cost Recovery

Duke Energy Florida filed a petition with the FPSC on April 30, 2019, to recover $223 million of estimated retail incremental storm restoration costs for Hurricane Michael, consistent with the provisions in the 2017 Settlement, and the FPSC approved the petition on June 11, 2019. The FPSC also approved allowing Duke Energy Florida to use the tax savings resulting from the Tax Act to recover these storm costs in lieu of implementing a storm surcharge. Approved storm costs are currently expected to be fully recovered by approximately year-end 2021. On November 22, 2019, Duke Energy Florida filed a petition for approval of actual retail recoverable storm restoration costs related to Hurricane Michael in the amount of $191 million plus interest. On May 19, 2020, Duke Energy Florida filed a supplemental true up reducing the actual retail recoverable storm restoration costs related to Hurricane Michael by approximately $3 million, resulting in a total request to recover $188 million actual retail recoverable storm restoration costs, plus interest. An Order Establishing Procedure was issued on January 30, 2020, and hearings are scheduled to begin December 8, 2020. Approximately $119 million and $204 million of these costs are included in Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of September 30, 2020, and December 31, 2019, respectively. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Florida filed a petition with the FPSC on December 19, 2019, to recover $169 million of estimated retail incremental storm restoration costs for Hurricane Dorian, consistent with the provisions in the 2017 Settlement and the FPSC approved the petition on February 24, 2020. Approved storm costs are being recovered over a 12-month period with rates effective in March 2020 and subject to true up. The final actual amount of $145 million was filed on September 30, 2020, and the FPSC will hold a hearing to determine the final amount of incremental costs. Approximately $38 million and $167 million of these costs are included in Regulatory assets within Current Assets and Other Noncurrent Assets on the Condensed Consolidated Balance Sheets as of September 30, 2020, and December 31, 2019, respectively, representing recoverable costs under the FPSC's storm rule and Duke Energy Florida's OATT formula rates. Duke Energy Florida cannot predict the outcome of this matter.

Clean Energy Connection

On July 1, 2020, Duke Energy Florida petitioned the FPSC for approval of a voluntary solar program. The program consists of 10 new solar generating facilities with combined capacity of approximately 750 MW. The program allows participants to support cost-effective solar development in Florida by paying a subscription fee based on per kilowatt-subscriptions and receiving a credit on their bill based on the actual generation associated with their portion of the solar portfolio. The estimated cost of the 10 new solar generation facilities is approximately $1 billion over the next four years, and this investment will be included in base rates offset by the revenue from the subscription fees. The credits will be included for recovery in the fuel cost recovery clause. A hearing on the petition is scheduled to begin on November 17, 2020. Duke Energy Florida cannot predict the outcome of this matter.

Crystal River Unit 3 Accelerated Decommissioning Filing

On May 29, 2019, Duke Energy Florida entered into a Decommissioning Services Agreement for the accelerated decommissioning of Crystal River Unit 3 located in Citrus County, Florida, with ADP CR3, LLC and ADP SF1, LLC, each of which is a wholly owned subsidiary of Accelerated Decommissioning Partners, LLC (ADP), a joint venture between NorthStar Group Services, Inc. and Orano USA LLC. The agreement will allow for completion of the decommissioning of Crystal River Unit 3 by 2027, rather than 2074 as originally planned. Duke Energy Florida will also sell and assign the spent nuclear fuel, storage canisters, high-level waste and existing dry spent fuel storage installation and certain related assets, together with certain associated liabilities and obligations to ADP SF1, LLC. Duke Energy Florida expects that the assets of the Nuclear Decommissioning Trust Fund as of September 30, 2020, will be sufficient to cover the contract price. The U.S. Nuclear Regulatory Commission approved the transaction on April 1, 2020, and the FPSC issued an order approving the transaction on August 27, 2020. The agreement closed on October 1, 2020.

Storm Protection Plan

On April 10, 2020, Duke Energy Florida filed its initial Storm Protection Plan (SPP) with the FPSC. The SPP outlines storm protection programs over a 10-year planning period intended to enhance the existing infrastructure for the purpose of reducing restoration costs and reducing outage times associated with extreme weather conditions therefore improving overall service reliability. On July 31, 2020, Duke Energy Florida entered into a settlement with certain intervenors in support of this filing. On August 28, 2020, the FPSC unanimously approved the settlement agreement, which effectively approves the 2020-2029 SPP as-filed, without modification.

Duke Energy Ohio

Duke Energy Ohio COVID-19 Filings

In response to the COVID-19 pandemic, on March 9, 2020, Governor Mike DeWine declared a state of emergency in the state of Ohio. The PUCO issued an order directing utilities to cease disconnections for nonpayment and waive late payment and reconnection fees and to minimize direct customer contact. The PUCO also directed utilities to maintain flexible payment plans and tariff interpretations to assist customers during this crisis and to seek any regulatory waivers, if necessary. In response, Duke Energy Ohio ceased all disconnections except for safety-related concerns and waived late payment and reconnection fees. On March 19, 2020, Duke Energy Ohio filed its compliance plan with the PUCO and sought waiver of several regulations to minimize direct customer contact. On May 4, 2020, Duke Energy Ohio filed a motion to suspend payment rules to enable proactive outreach to residential customers offering additional options for managing their utility bills. PUCO found the proposal to address the state of emergency and the accompanying waivers reasonable and directed Duke Energy Ohio to work with the PUCO Staff on a comprehensive plan for resumption of activities and operations, to be filed 45 days before resumption of activities. The transition plan to resume normal operations to pre-COVID-19 levels was filed on June 26, 2020, and approved by the PUCO on July 29, 2020. It included resuming suspended work and activities beginning August 10, 2020, and resuming disconnections in September 2020.

On April 16, 2020, Duke Energy Ohio filed an application for a Reasonable Arrangement to temporarily lower the minimum bill for demand-metered commercial and industrial customers. On June 17, 2020, the PUCO denied Duke Energy Ohio's application for a reasonable arrangement and ordered Duke Energy Ohio to work with the PUCO Staff on payment arrangements for impacted nonresidential customers.

On May 11, 2020, Duke Energy Ohio filed with the PUCO a request seeking deferral of incremental costs incurred, as well as specific miscellaneous lost revenues using existing bad debts and uncollectible riders already in place for both electric and natural gas operations. Duke Energy Ohio would subsequently file for rider recovery at a later date. On June 17, 2020, the PUCO approved Duke Energy Ohio's deferral application. The commission denied the accrual of carrying costs and ordered Duke Energy Ohio to also track potential savings experienced as a result of COVID-19.

Duke Energy Kentucky COVID-19

In response to the COVID-19 pandemic, on March 6, 2020, Governor Andy Beshear declared a state of emergency in the commonwealth of Kentucky. The KPSC issued an order directing utilities to cease disconnections for nonpayment and waive late payment fees. The KPSC also directed utilities to maintain flexible payment plans and tariff interpretations to assist customers during this crisis and to seek any regulatory waivers, if necessary. In response, Duke Energy Kentucky ceased all disconnections except for safety-related concerns and waived late payment and reconnection fees. On September 21, 2020, the KPSC issued an order ending the disconnection moratorium for residential and nonresidential customers effective no earlier than October 20, 2020. Utilities are required to offer residential customers a default payment plan for any arrearages accumulated through the October 2020 billing cycle. Utilities are permitted to resume assessment of late payment charges for nonresidential customers beginning October 20, 2020, and for residential customers after December 31, 2020. Duke Energy Kentucky will follow the order, as clarified on September 30, 2020, by the KPSC.

2017 Electric Security Plan Filing

On June 1, 2017, Duke Energy Ohio filed with the PUCO a request for a standard service offer in the form of an ESP. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed a Stipulation and Recommendation (Stipulation) with the PUCO resolving that the term of the ESP would be from June 1, 2018, to May 31, 2025, and included continuation of market-based customer rates through competitive procurement processes for generation, continuation and expansion of existing rider mechanisms and approved new rider mechanisms relating to costs incurred to enhance the customer experience and transform the grid and a service reliability rider for vegetation management. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the Ohio Consumers' Counsel (OCC), respectively, filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the Stipulation. The case has been resolved.

Electric Base Rate Case

Duke Energy Ohio filed with the PUCO an electric distribution base rate case application and supporting testimony in March 2017. Duke Energy Ohio requested an estimated annual increase of approximately $15 million and a return on equity of 10.4%. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed the Stipulation with the PUCO including a $19 million decrease in annual base distribution revenue with a return on equity unchanged from the current rate of 9.84% based upon a capital structure of 50.75% equity and 49.25% debt. Upon approval of new rates, Duke Energy Ohio's rider for recovering its initial SmartGrid implementation ended as these costs would be recovered through base rates. The Stipulation also renewed 14 existing riders, some of which were included in Duke Energy Ohio's ESP, and added two new riders including the Enhanced Service Reliability Rider to recover vegetation management costs not included in base rates, up to $10 million per year (operation and maintenance only) and the Power Future Initiatives Rider (formerly PowerForward Rider) to recover costs incurred to enhance the customer experience and further transform the grid (operation and maintenance and capital). In addition to the changes in revenue attributable to the Stipulation, Duke Energy Ohio's capital-related riders, including the Distribution Capital Investments Rider, began to reflect the lower federal income tax rate associated with the Tax Act with updates to customers' bills beginning April 1, 2018. This change reduced electric revenue by approximately $20 million on an annualized basis. On December 19, 2018, the PUCO approved the Stipulation without material modification. New base rates were implemented effective January 2, 2019. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the OCC, respectively, filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the Stipulation. The case has been resolved.

Ohio Valley Electric Corporation

On March 31, 2017, Duke Energy Ohio filed for approval to adjust its existing Rider PSR to pass through net costs related to its contractual entitlement to capacity and energy from the generating assets owned by OVEC. Duke Energy Ohio sought deferral authority for net costs incurred from April 1, 2017, until the new rates under Rider PSR were put into effect. On April 13, 2018, Duke Energy Ohio, along with certain intervenors, filed a Stipulation with the PUCO resolving numerous issues including those related to Rider PSR. The Stipulation activated Rider PSR for recovery of net costs incurred from January 1, 2018, through May 2025. On December 19, 2018, the PUCO approved the Stipulation without material modification. The PSR rider became effective April 1, 2019. On September 13, 2019, and September 16, 2019, Interstate Gas Supply/Retail Supply Association and the OCC filed appeals to the Supreme Court of Ohio claiming the PUCO's order was in error. On March 13, 2020, the Supreme Court of Ohio dismissed OCC's appeal. On April 22, 2020, the Supreme Court of Ohio dismissed all remaining appeals of the PUCO's December 19, 2018 order approving the Stipulation. The case has been resolved.

On July 23, 2019, House Bill 6 (HB 6) was signed into law that became effective January 1, 2020. Among other things, the bill allows for funding of two nuclear generating facilities located in Northern Ohio through a charge on utility bills owned by Energy Harbor (f/k/a FirstEnergy Solutions), repeal of energy efficiency mandates, and recovery of prudently incurred costs, net of any revenues, for Ohio investor-owned utilities that are participants under the OVEC power agreement. The recovery shall be through a non-bypassable rider that is to replace any existing recovery mechanism approved by the PUCO and will remain in place through 2030. The amounts recoverable from customers will be subject to an annual cap, with incremental costs that exceed such cap eligible for deferral and recovery subject to review. See Note 12 for additional discussion of Duke Energy Ohio's ownership interest in OVEC. In July 2020, legislation to repeal HB 6 was proposed in both the Ohio House and Senate, with subsequent hearings to receive witness testimony. Duke Energy Ohio cannot predict the outcome of this matter.

Energy Efficiency Cost Recovery

On February 26, 2020, the PUCO issued an order directing utilities to wind down their demand-side management programs by September 30, 2020, and to terminate the programs by December 31, 2020, in response to changes in Ohio law that eliminated Ohio's energy efficiency mandates. On March 27, 2020, Duke Energy Ohio filed an Application for Rehearing seeking clarification on the final true up and reconciliation process after 2020. On April 22, 2020, the PUCO granted rehearing for further consideration.

On June 8, 2020, Duke Energy Ohio filed an application to implement a voluntary energy efficiency program portfolio to commence on January 1, 2021. The application proposes a mechanism for recovery of program costs, lost margins and a shared savings incentive mechanism similar to those previously approved by the PUCO. On June 17, 2020, the PUCO, on its own motion, struck Duke Energy Ohio's proposal to include a shared savings mechanism in its plan finding such incentives are not permissible or supportable under Ohio law. On June 26, 2020, Duke Energy Ohio withdrew its application. On October 9, 2020, Duke Energy Ohio filed an application to implement a voluntary efficiency program portfolio to commence on January 1, 2021. The application proposes a mechanism for recovery of program costs and a benefit associated with avoided transmission and distribution costs. Duke Energy Ohio cannot predict the outcome of this matter.

Natural Gas Pipeline Extension

Duke Energy Ohio is proposing to install a new natural gas pipeline (the Central Corridor Project) in its Ohio service territory to increase system reliability and enable the retirement of older infrastructure. Duke Energy Ohio currently estimates the pipeline development costs and construction activities will range from $163 million to $245 million in direct costs (excluding overheads and AFUDC) and that construction of the pipeline extension is expected to be completed before the 2021/2022 winter season. An evidentiary hearing for a Certificate of Environmental Compatibility and Public Need concluded on April 11, 2019. Briefs were filed on May 13, 2019, and reply briefs were filed on June 10, 2019. On November 21, 2019, the Ohio Power Siting Board (OPSB) approved Duke Energy Ohio's application subject to 41 conditions on construction. Applications for rehearing were filed by several stakeholders on December 23, 2019, arguing that the OPSB approval was incorrect. On February 20, 2020, the OPSB denied the rehearing requests. On April 15, 2020, Joint Appellants filed a notice of appeal at the Supreme Court of Ohio of the OPSB's decision approving Duke Energy Ohio's Central Corridor application. On June 4, 2020, the OPSB filed a motion to dismiss claims raised by one of the Joint Appellants and on August 5, 2020, the Supreme Court of Ohio dismissed one of the Joint Appellants from the appeal. Joint Appellants filed their merit briefs on August 26, 2020. Appellee briefs were filed October 15, 2020. On September 22, 2020, Duke Energy Ohio filed an application with OPSB for approval to amend the certificated pipeline route. Duke Energy Ohio cannot predict the outcome of this matter.

MGP Cost Recovery

As part of its 2012 natural gas base rate case, Duke Energy Ohio has approval to defer and recover costs related to environmental remediation at two sites (East End and West End) that housed former MGP operations. Duke Energy Ohio has made annual applications for recovery of these deferred costs. Duke Energy Ohio has collected approximately $55 million in environmental remediation costs between 2009 through 2012 through Rider MGP, which is currently suspended. Duke Energy Ohio has made annual applications with the PUCO to recover its incremental remediation costs consistent with the PUCO's directive in Duke Energy Ohio's 2012 natural gas rate case. To date, the PUCO has not ruled on Duke Energy Ohio's annual applications for the calendar years 2013 through 2017. On September 28, 2018, the staff of the PUCO issued a report recommending a disallowance of approximately $12 million of the $26 million in MGP remediation costs incurred between 2013 through 2017 that staff believes are not eligible for recovery. Staff interprets the PUCO's 2012 Order granting Duke Energy Ohio recovery of MGP remediation as limiting the recovery to work directly on the East End and West End sites. On October 30, 2018, Duke Energy Ohio filed reply comments objecting to the staff's recommendations and explaining, among other things, the obligation Duke Energy Ohio has under Ohio law to remediate all areas impacted by the former MGPs and not just physical property that housed the former plants and equipment. On March 29, 2019, Duke Energy Ohio filed its annual application to recover incremental remediation expense for the calendar year 2018 seeking recovery of approximately $20 million in remediation costs. On July 12, 2019, the staff recommended a disallowance of approximately $11 million for work that staff believes occurred in areas not authorized for recovery. Additionally, staff recommended that any discussion pertaining to Duke Energy Ohio's recovery of ongoing MGP costs should be directly tied to or netted against insurance proceeds collected by Duke Energy Ohio. An evidentiary hearing concluded on November 21, 2019. Initial briefs were filed on January 17, 2020, and reply briefs were filed on February 14, 2020. Duke Energy Ohio cannot predict the outcome of this matter.

On March 31, 2020, Duke Energy Ohio filed its annual application to recover incremental remediation expense for the calendar year 2019 seeking recovery of approximately $39 million in remediation costs incurred during 2019. On July 23, 2020, the staff recommended a disallowance of approximately $4 million for work the staff believes occurred in areas not authorized for recovery. Additionally, the staff recommended insurance proceeds, net of litigation costs and attorney fees, should be reimbursed to customers and not be held by Duke Energy Ohio until all investigation and remediation is complete. Duke Energy Ohio filed comments in response to the staff report on August 21, 2020. Duke Energy Ohio cannot predict the outcome of this matter.

The 2012 PUCO order also contained conditional deadlines for completing the MGP environmental investigation and the deferral of remediation costs at the MGP sites. Subsequent to the order, the deadline was extended to December 31, 2019. On May 10, 2019, Duke Energy Ohio filed an application requesting a continuation of its existing deferral authority for MGP remediation and investigation that must occur after December 31, 2019. On September 13, 2019, intervenor comments were filed opposing Duke Energy Ohio's request for continuation of existing deferral authority and on October 2, 2019, Duke Energy Ohio filed reply comments. Duke Energy Ohio cannot predict the outcome of this matter.

Duke Energy Kentucky Electric Base Rate Case

On September 3, 2019, Duke Energy Kentucky filed a rate case with the KPSC requesting an increase in electric base rates of approximately $46 million. On January 31, 2020, Duke Energy Kentucky filed rebuttal testimony updating its rate increase calculations to approximately $44 million. Hearings concluded on February 20, 2020, and briefing was completed March 20, 2020. On April 27, 2020, the KPSC issued its decision approving a $24 million increase for Duke Energy Kentucky with a 9.25% return on equity. The KPSC denied Duke Energy Kentucky's major storm deferral mechanism and EV and battery storage pilots. The KPSC approved Duke Energy Kentucky's Green Source Advantage tariff. New customer rates were effective on May 1, 2020. On May 18, 2020, Duke Energy Kentucky filed its motion for rehearing and on June 4, 2020, the motion was granted in part and denied in part by the KPSC. On October 16, 2020, the KPSC issued an Order on Rehearing authorizing an additional $4 million increase in revenue requirement bringing the total authorized revenue requirement increase to $28 million. Revised customer rates will take effect in November 2020.

Duke Energy Indiana

COVID-19 Filing

In response to the COVID-19 pandemic, on March 6, 2020, Governor Eric Holcomb declared a public health disaster emergency in the state of Indiana, which is currently extended through December 1, 2020. Duke Energy Indiana had already voluntarily suspended all disconnections and waived late payment fees and check return fees. The utility also waived credit card fees for residential customers. The Executive Order requiring utilities in the state to suspend disconnection of utility service expired July 1, 2020.

On May 8, 2020, Duke Energy Indiana, along with other Indiana utilities, filed a request with the IURC for approval of deferral treatment for costs and revenue reductions associated with the COVID-19 pandemic. The utilities requested initial deferral approval in July 2020, with individual subdockets for each utility to be established for consideration of utility-specific cost and revenue impacts, cost recovery timing and customer payment plans. On June 29, 2020, the IURC issued an order in Phase 1 wherein it extended the disconnection moratorium for jurisdictional utilities until August 14, 2020, along with requiring six-month payment arrangements, waiver of late fees, reconnection fees, convenience fees and deposits. The IURC permitted jurisdictional utilities to use regulatory accounting for any impacts associated with the prohibition on utility disconnections, waiver or exclusion of certain utility fees (i.e., late fees, convenience fees, deposits, and reconnection fees), the use of expanded payment arrangements to aid customers, and for COVID-19 related uncollectible and incremental bad debt expense. The IURC did not permit recovery of lost revenues due to load reduction or carrying costs. In Phase 2 filings, individual utilities may choose to request regulatory accounting for other COVID-19 related operation and maintenance costs wherein evidence of the impact of any costs or offsetting savings can be presented and considered in an evidentiary hearing. On August 12, 2020, the IURC issued a supplemental order extending the requirement for six-month payment arrangements and waiver of certain customer fees for another 60 days, but did not extend the disconnect moratorium. As such, Duke Energy Indiana resumed service disconnections for nonpayment in mid-September 2020. Normal billing practices resumed in mid-October 2020, except that Duke Energy Indiana has committed to provide extended payment arrangements and waive credit card and pay station fees for residential customers through the end of 2020. Customers were notified of the resumption of normal billing practices, the option of deferred payment arrangements and where to find assistance, if necessary. Duke Energy Indiana cannot predict the outcome of this matter.

2019 Indiana Rate Case

On July 2, 2019, Duke Energy Indiana filed a general rate case with the IURC for a rate increase for retail customers of approximately $395 million. The rebuttal case, filed on December 4, 2019, updated the requested revenue requirement to result in a 15.6% or $396 million average retail rate increase, including the impacts of the Utility Receipts Tax. Hearings concluded on February 7, 2020. On June 29, 2020, the IURC issued the order in the rate case approving a revenue increase of $146 million before certain adjustments and ratemaking refinements. The order provided for an overall cost of capital of 5.7% based on a 9.7% return on equity and a 53% equity component of the capital structure, and approved Duke Energy Indiana's requested forecasted rate base of $10.2 billion as of December 31, 2020, including the Edwardsport IGCC Plant. The IURC reduced Duke Energy Indiana's request by slightly more than $200 million, when accounting for the utility receipts tax and other adjustments. Approximately 50% of the reduction is due to a prospective change in depreciation and use of regulatory asset for the end-of-life inventory at retired generating plants, approximately 20% is due to the approved 9.7% return on equity versus requested 10.4% and approximately 20% is related to miscellaneous earnings neutral adjustments. Step one rates are estimated to be approximately 75% of the total and became effective on July 30, 2020. Step two rates are estimated to be the remaining 25% of the total rate increase and will be effective in the first quarter of 2021. Several groups filed notices of appeal of the IURC order on July 29, 2020. Appellate briefs were filed on October 14, 2020, focusing on three issues: wholesale sales allocations, coal ash basin cost recovery and the Edwardsport IGCC operating and maintenance expense level approved. The case will be fully briefed by year-end, with a decision expected in the first quarter of 2021. Duke Energy Indiana cannot predict the outcome of this matter.

2020 Indiana Coal Ash Recovery Case

In Duke Energy Indiana's rate case, the IURC approved coal ash basin closure costs expended through 2018 including financing costs as a regulatory asset and included in rate base. The IURC opened a subdocket to deal with the post-2018 coal ash related expenditures. Duke Energy Indiana filed testimony on April 15, 2020, in the coal ash subdocket requesting recovery for the post-2018 coal ash basin closure costs for plans that have been approved by the Indiana Department of Environmental Management as well as continuing deferral, with carrying costs, on the balance. An evidentiary hearing was held on September 14, 2020, and the parties have agreed on a delayed briefing schedule that allows for the Indiana Rate Case appeal to proceed. Briefing will be completed by mid-May 2021. Duke Energy Indiana cannot predict the outcome of this matter.

Piedmont

COVID-19 Filings

North Carolina

On March 10, 2020, Governor Roy Cooper issued Executive Order No. 116 declaring a state of emergency due to the COVID-19 pandemic. On March 19, 2020, the NCUC issued on order directing that utilities under its jurisdiction suspend disconnections for nonpayment of utility bills during the state of emergency (as defined by Executive Order No. 116) and allow for customers to enter into payment arrangements to pay off arrearages accumulated during the state of emergency after the end of the state of emergency. Additionally, to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 19, 2020, Piedmont filed a request with the NCUC seeking authorization to waive: (1) any late payment charges incurred by a residential or nonresidential customer, effective March 21, 2020; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit; and (4) the fees and charges associated with the use of credit cards or debit cards to pay residential electric utility bills, effective March 21, 2020. The NCUC granted Piedmont's request on March 20, 2020.

On July 29, 2020, the NCUC issued its Order Lifting Disconnection Moratorium and Allowing Collection of Arrearages Pursuant to Special Repayment Plans. The order contained the following: (1) public utilities may resume customer disconnections due to nonpayment for bills first rendered on or after September 1, 2020, after appropriate notice; (2) the late fee moratorium will continue through the end of the state of emergency or until further order of the commission; (3) Duke Energy utilities may reinstate fees for checks returned for insufficient funds as well as transaction fees for use of credit cards or debit cards for bills first rendered on or after September 1, 2020; and (4) no sooner than September 1, 2020, the collection of past-due or delinquent accounts accrued up to and including August 31, 2020, may proceed subject to conditions.

Normal billing practices resumed as of October 1, 2020, with the exception of billing of late payment charges. Service disconnections for nonpayment resumed on November 4, 2020. Customers were notified of the resumption of normal billing practices, the option of payment arrangements and where to find assistance, if necessary. The NCUC's moratorium for the billing of late payment charges is still in effect until further order from the NCUC. Piedmont cannot predict the outcome of this matter.

South Carolina

On March 13, 2020, Governor Henry McMaster issued Executive Order No. 2020-08 declaring a state of emergency due to the COVID-19 pandemic. The governor also issued a letter on March 14, 2020, to the ORS Executive Director regarding the suspension of disconnection of essential utility services for nonpayment. On March 18, 2020, the PSCSC issued an order approving such waivers, and also approved waivers for regulations related to late fees and reconnect fees. The PSCSC's order also required utilities to track the financial impacts of actions taken pursuant to such waivers for possible reporting to the PSCSC.

On May 13, 2020, the ORS filed a letter with the PSCSC that included a request from Governor McMaster that utilities proceed with developing and implementing plans for phasing in normal business operations. On May 14, 2020, the PSCSC conditionally vacated the regulation waivers regarding termination of service and suspension of disconnect fees. Prior to termination, utilities are to refer past-due customers to local organizations for assistance and/or deferred payment arrangements. Piedmont filed a report on June 30, 2020, as required by PSCSC order, reporting revenue impact, costs and savings related to COVID-19 to date. Updates on cost impacts were filed on September 30, 2020, and included financial impacts through the end of August 2020.

On September 30, 2020, Piedmont filed an update on their planned return to normal operations during the COVID-19 pandemic. Normal billing practices resumed as of October 1, 2020, and service disconnections for nonpayment resumed on November 4, 2020. Customers were notified of the resumption of normal billing practices, the option of payment arrangements and where to find assistance, if necessary.

Tennessee

On March 12, 2020, Governor Bill Lee issued Executive Order No. 14 declaring a state of emergency due to the COVID-19 pandemic. In an effort to help mitigate the financial impacts of the COVID-19 pandemic on their customers, on March 20, 2020, Piedmont filed a request with the TPUC seeking authorization to waive, effective March 21, 2020: (1) any late payment charges incurred by a residential or nonresidential customer; (2) the application of fees for checks returned for insufficient funds for residential and nonresidential customers; and (3) the reconnection charge when a residential or nonresidential customer seeks to have service restored for those customers whose service was recently disconnected for nonpayment and to work with customers regarding the other requirements to restore service, including re-establishment of credit. The TPUC granted Piedmont’s request by Order issued March 31,2020. The Order also stated that customers were not relieved of their obligation to pay for utility services received.

The TPUC held its regularly scheduled Commission Conference electronically on August 10, 2020, and on September 16, 2020, issued an Order Lifting Suspension of Disconnections of Service for Lack of Payment with Conditions, effective August 29, 2020. The conditions relate to required customer communications, payment plan options for past-due amounts and ongoing reporting to the TPUC. Potential recovery of costs related to the COVID-19 pandemic may be considered in future, individual docketed proceedings.

On October 15, 2020, Piedmont filed a report on their planned return to normal operations during the COVID-19 pandemic. Normal billing practices resumed as of October 1, 2020, and service disconnections for nonpayment resumed on November 4, 2020. Customers were notified of the resumption of normal billing practices, the option of payment arrangements and where to find assistance, if necessary.

2020 Tennessee Rate Case

On July 2, 2020, Piedmont filed an application with the TPUC, its first general rate case in Tennessee in nine years, for a rate increase for retail customers of approximately $30 million, which represents an approximate 15% increase in annual revenues. The rate increase is driven by significant infrastructure upgrade investments since its previous rate case. Approximately half of the plant additions being added to rate base are categories of capital investment not covered under the IMR mechanism, which was approved in 2013. On August 25, 2020, the TPUC issued the procedural schedule for this case, targeting the hearing to begin on January 11, 2021. The TPUC is required to render a decision on this matter on or before April 1, 2021. Piedmont cannot predict the outcome of this matter.

OTHER REGULATORY MATTERS

Atlantic Coast Pipeline, LLC

Atlantic Coast Pipeline (ACP pipeline) is an approximately 600-mile interstate natural gas pipeline running from West Virginia to North Carolina. Duke Energy indirectly owns a 47% interest, which is accounted for as an equity method investment through its Gas Utilities and Infrastructure segment.

On April 15, 2020, the United States District Court for the District of Montana granted partial summary judgment in favor of the plaintiffs in Northern Plains Resource Council v. U.S. Army Corps of Engineers (USACE) (Northern Plains), vacating USACE’s Nationwide Permit 12 (NWP 12) and remanding it to USACE for consultation under the Endangered Species Act (ESA) of 1973. In Northern Plains, the court ruled that NWP 12 was unlawful because USACE did not consult under the ESA with the U.S. Fish and Wildlife Service and/or National Marine Fisheries Service prior to NWP 12’s reissuance in 2017. Because NWP 12 has been vacated and its application enjoined, USACE currently has suspended verification of any new or pending applications under NWP 12 until further court action clarifies the situation.

On May 28, 2020, the U.S. Court of Appeals for the Ninth Circuit issued a ruling that limited the NWP 12 vacatur to energy infrastructure projects. In July 2020, the Supreme Court of the United States issued an order allowing other new oil and gas pipeline projects to use the NWP 12 process pending appeal to the U.S. Court of Appeals for the Ninth Circuit; however, that did not decrease the uncertainty associated with an eventual ruling. Together, these rulings indicated that the timeline to reinstate the necessary water crossing permits for ACP would likely cause further delays and cost increases.

On July 5, 2020, Dominion Energy, Inc. announced a sale of substantially all of its gas transmission and storage segment assets, operations core to the ACP pipeline project.

As a result of the uncertainty created by the NWP 12 rulings, the potential impact on the cost and schedule for the project, the ongoing legal challenges and the risk of additional legal challenges and delays through the construction period and Dominion’s decision to sell substantially all of its gas transmission and storage segment assets, Duke Energy's Board of Directors and management decided that it was not prudent to continue to invest in the project. On July 5, 2020, Duke Energy and Dominion announced the cancellation of the ACP pipeline project.

As a result, Duke Energy recorded pretax charges to earnings of approximately $2.1 billion for the nine months ended September 30, 2020, within Equity in (losses) earnings of unconsolidated affiliates on the Duke Energy Condensed Consolidated Statements of Operations. The tax benefit associated with this cancellation was $389 million and is recorded in Income Tax Expense (Benefit) on the Duke Energy Condensed Consolidated Statements of Operations. Additional charges of less than $50 million are expected to be recorded within the next 12 months as ACP incurs obligations to exit operations.

As part of the pretax charges to earnings of approximately $2.1 billion, Duke Energy established liabilities related to the cancellation of the ACP pipeline project of $927 million and $19 million within Other Current Liabilities and Other Noncurrent Liabilities, respectively, in the Gas Utilities and Infrastructure segment. The liability represents Duke Energy's obligation of approximately $860 million to fund ACP's outstanding debt and approximately $86 million to satisfy ARO requirements to restore construction sites.

See Notes 1, 4 and 12 for additional information regarding this transaction.

Potential Coal Plant Retirements

The Subsidiary Registrants periodically file integrated resource plans (IRPs) with their state regulatory commissions. The IRPs provide a view of forecasted energy needs over a long term (10 to 20 years) and options being considered to meet those needs. IRPs filed by the Subsidiary Registrants included planning assumptions to potentially retire certain coal-fired generating facilities in North Carolina and Indiana earlier than their current estimated useful lives. Duke Energy continues to evaluate the potential need to retire these coal-fired generating facilities earlier than the current estimated useful lives and plans to seek regulatory recovery for amounts that would not be otherwise recovered when any of these assets are retired.

The table below contains the net carrying value of generating facilities planned for retirement or included in recent IRPs as evaluated for potential retirement. Dollar amounts in the table below are included in Net property, plant and equipment on the Condensed Consolidated Balance Sheets as of September 30, 2020, and exclude capitalized asset retirement costs.

	Capacity (in MW)		Remaining Net Book Value (in millions)
Duke Energy Carolinas			
Allen Steam Station Units 1-3[(a)]	**582**	**$**	**141**
Allen Steam Station Units 4-5[(b)]	**516**		**321**
Cliffside Unit 5[(b)]	**544**		**355**
Duke Energy Progress			
Mayo Unit 1[(b)]	**727**		**673**
Roxboro Units 3-4[(b)]	**1,392**		**486**
Duke Energy Indiana			
Gallagher Units 2 and 4[(c)]	**280**		**112**
Gibson Units 1-5[(d)]	**3,132**		**1,683**
Cayuga Units 1-2[(d)]	**1,005**		**935**
Total Duke Energy	**8,178**	**$**	**4,706**

(a) As part of the 2015 resolution of a lawsuit involving alleged New Source Review violations, Duke Energy Carolinas must retire Allen Steam Station Units 1 through 3 by December 31, 2024. The long-term energy options considered in the IRP could result in retirement of these units earlier than their current estimated useful lives.
(b) These units are included in the IRP filed by Duke Energy Carolinas and Duke Energy Progress in North Carolina and South Carolina on September 1, 2020. The long-term energy options considered in the IRP could result in retirement of these units earlier than their current estimated useful lives. In 2019, Duke Energy Carolinas and Duke Energy Progress filed North Carolina rate cases that included depreciation studies that accelerate end of life dates for these plants. A decision by NCUC is expected by the end of the first quarter 2021.
(c) Duke Energy Indiana committed to either retire or stop burning coal at Gallagher units 2 and 4 by December 31, 2022, as part of the 2016 settlement of Edwardsport IGCC matters.
(d) On July 1, 2019, Duke Energy Indiana filed its 2018 IRP with the IURC. The 2018 IRP included scenarios evaluating the potential retirement of coal-fired generating units at Gibson and Cayuga. The rate case filed July 2, 2019, included proposed depreciation rates reflecting retirement dates from 2026 to 2038. The depreciation rates reflecting these updated retirement dates were approved by the IURC as part of the rate case order issued on June 29, 2020.

4. COMMITMENTS AND CONTINGENCIES

ENVIRONMENTAL

The Duke Energy Registrants are subject to federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal, coal ash and other environmental matters. These regulations can be changed from time to time, imposing new obligations on the Duke Energy Registrants. The following environmental matters impact all Duke Energy Registrants.

Remediation Activities

In addition to AROs recorded as a result of various environmental regulations, the Duke Energy Registrants are responsible for environmental remediation at various sites. These include certain properties that are part of ongoing operations and sites formerly owned or used by Duke Energy entities. These sites are in various stages of investigation, remediation and monitoring. Managed in conjunction with relevant federal, state and local agencies, remediation activities vary based upon site conditions and location, remediation requirements, complexity and sharing of responsibility. If remediation activities involve joint and several liability provisions, strict liability, or cost recovery or contribution actions, the Duke Energy Registrants could potentially be held responsible for environmental impacts caused by other potentially responsible parties and may also benefit from insurance policies or contractual indemnities that cover some or all cleanup costs. Liabilities are recorded when losses become probable and are reasonably estimable. The total costs that may be incurred cannot be estimated because the extent of environmental impact, allocation among potentially responsible parties, remediation alternatives and/or regulatory decisions have not yet been determined at all sites. Additional costs associated with remediation activities are likely to be incurred in the future and could be significant. Costs are typically expensed as Operation, maintenance and other on the Condensed Consolidated Statements of Operations unless regulatory recovery of the costs is deemed probable.

The following table contains information regarding reserves for probable and estimable costs related to the various environmental sites. These reserves are recorded in Accounts Payable within Current Liabilities and Other within Other Noncurrent Liabilities on the Condensed Consolidated Balance Sheets.

(in millions)	September 30, 2020	December 31, 2019
Reserves for Environmental Remediation		
Duke Energy	**$ 66**	$ 58
Duke Energy Carolinas	**16**	11
Progress Energy	**15**	16
Duke Energy Progress	**5**	4
Duke Energy Florida	**8**	9
Duke Energy Ohio	**22**	19
Duke Energy Indiana	**5**	4
Piedmont	**8**	8

Additional losses in excess of recorded reserves that could be incurred for the stages of investigation, remediation and monitoring for environmental sites that have been evaluated at this time are not material except as presented in the table below.

(in millions)	
Duke Energy	$ 56
Duke Energy Carolinas	12
Duke Energy Ohio	38

LITIGATION

Duke Energy Carolinas and Duke Energy Progress

Coal Ash Insurance Coverage Litigation

In March 2017, Duke Energy Carolinas and Duke Energy Progress filed a civil action in North Carolina Business Court against various insurance providers. The lawsuit seeks payment for coal ash-related liabilities covered by third-party liability insurance policies. The insurance policies were issued between 1971 and 1986 and provide third-party liability insurance for property damage. The civil action seeks damages for breach of contract and indemnification for costs arising from the Coal Ash Act and the EPA CCR rule at 15 coal-fired plants in North Carolina and South Carolina. Due to COVID-19, the court has issued a new scheduling order and the trial is now scheduled for January 2022. Fact and expert discovery is scheduled to be completed by mid-November 2020. The parties are required to file all dispositive pre-trial motions by December 4, 2020. Duke Energy Carolinas and Duke Energy Progress cannot predict the outcome of this matter.

Duke Energy Carolinas

NTE Carolinas II, LLC Litigation

In November 2017, Duke Energy Carolinas entered into a standard FERC interconnection agreement with NTE Carolinas II, LLC (NTE), a company that intended to build a combined-cycle natural gas plant in Rockingham County, North Carolina. On September 6, 2019, Duke Energy Carolinas filed a lawsuit in Mecklenburg County Superior Court against NTE for breach of contract and alleging that NTE's failure to pay benchmark payments for Duke Energy Carolinas' transmission system upgrades required under the interconnection agreement constituted a termination of the interconnection agreement. Duke Energy Carolinas is seeking a monetary judgment against NTE because NTE failed to make multiple milestone payments. The lawsuit was moved to federal court in North Carolina. NTE filed a motion to dismiss Duke Energy Carolinas' complaint and brought counterclaims alleging anti-competitive conduct and violations of state and federal statutes. Duke Energy Carolinas filed a motion to dismiss NTE's counterclaims.

On May 21, 2020, FERC issued a decision, in response to an NTE petition, ruling (i) that it has exclusive jurisdiction to determine whether a transmission provider may terminate a Large Generator Interconnection Agreement (LGIA), (ii) FERC approval is required to terminate a conforming LGIA if objected to by the interconnection customer, and (iii) Duke Energy may not announce the termination of a conforming LGIA unless FERC has approved the termination. On May 27, 2020, NTE filed FERC's May 21, 2020, Order as a notice of supplemental authority with the federal district court where its Motion to Dismiss is pending. On June 1, 2020, Duke Energy Carolinas filed a response to NTE's notice of supplemental authority noting that FERC declined to address the merits of any breach of contract claim relating to the LGIA and that the federal court then necessarily retains exclusive authority to award damages for NTE's breach.

On August 17, 2020, the court denied both NTE's and Duke Energy Carolinas' Motion to Dismiss. The parties are now preparing to commence discovery. Duke Energy Carolinas cannot predict the outcome of this matter.

Asbestos-related Injuries and Damages Claims

Duke Energy Carolinas has experienced numerous claims for indemnification and medical cost reimbursement related to asbestos exposure. These claims relate to damages for bodily injuries alleged to have arisen from exposure to or use of asbestos in connection with construction and maintenance activities conducted on its electric generation plants prior to 1985. As of September 30, 2020, there were 159 asserted claims for non-malignant cases with cumulative relief sought of up to $41 million, and 68 asserted claims for malignant cases with cumulative relief sought of up to $23 million. Based on Duke Energy Carolinas' experience, it is expected that the ultimate resolution of most of these claims likely will be less than the amount claimed.

Duke Energy Carolinas has recognized asbestos-related reserves of $578 million at September 30, 2020, and $604 million at December 31, 2019. These reserves are classified in Other within Other Noncurrent Liabilities and Other within Current Liabilities on the Condensed Consolidated Balance Sheets. These reserves are based upon Duke Energy Carolinas' best estimate for current and future asbestos claims through 2040 and are recorded on an undiscounted basis. In light of the uncertainties inherent in a longer-term forecast, management does not believe they can reasonably estimate the indemnity and medical costs that might be incurred after 2040 related to such potential claims. It is possible Duke Energy Carolinas may incur asbestos liabilities in excess of the recorded reserves.

Duke Energy Carolinas has third-party insurance to cover certain losses related to asbestos-related injuries and damages above an aggregate self-insured retention. Duke Energy Carolinas' cumulative payments began to exceed the self-insured retention in 2008. Future payments up to the policy limit will be reimbursed by the third-party insurance carrier. The insurance policy limit for potential future insurance recoveries indemnification and medical cost claim payments is $714 million in excess of the self-insured retention. Receivables for insurance recoveries were $704 million at September 30, 2020, and $742 million at December 31, 2019. These amounts are classified in Other within Other Noncurrent Assets and Receivables within Current Assets on the Condensed Consolidated Balance Sheets. Duke Energy Carolinas is not aware of any uncertainties regarding the legal sufficiency of insurance claims. Duke Energy Carolinas believes the insurance recovery asset is probable of recovery as the insurance carrier continues to have a strong financial strength rating.

Duke Energy Progress and Duke Energy Florida

Spent Nuclear Fuel Matters

On June 18, 2018, Duke Energy Progress and Duke Energy Florida sued the U.S. in the U.S. Court of Federal Claims for damages incurred for the period 2014 through 2018. The lawsuit claimed the Department of Energy breached a contract in failing to accept spent nuclear fuel under the Nuclear Waste Policy Act of 1982 and asserted damages for the cost of on-site storage in the amount of $100 million and $203 million for Duke Energy Progress and Duke Energy Florida, respectively. Discovery is ongoing and a trial is expected to occur in 2021.

Duke Energy Florida

Power Purchase Dispute Arbitration

Duke Energy Florida, on behalf of its customers, entered into a PPA for the purchase of firm capacity and energy from a qualifying facility under the Public Utilities Regulatory Policies Act of 1978. Duke Energy Florida determined the qualifying facility did not perform in accordance with the PPA, and Duke Energy Florida terminated the PPA. The qualifying facility counterparty filed a confidential American Arbitration Association (AAA) arbitration demand, challenging the termination of the PPA and seeking damages. Duke Energy Florida denies liability and is vigorously defending the arbitration claim. The final arbitration hearing is scheduled for December 2020. Duke Energy Florida cannot predict the outcome of this matter.

Duke Energy Indiana

Coal Ash Basin Closure Plan Appeal

On January 27, 2020, Hoosier Environmental Council filed a Petition for Administrative Review with the Indiana Office of Environmental Adjudication (the court) challenging the Indiana Department of Environmental Management's December 10, 2019, partial approval of Duke Energy Indiana's ash pond closure plan. On March 11, 2020, Duke Energy Indiana filed a Motion to Dismiss. On May 5, 2020, the court denied the motion. The parties are completing discovery and have until December 22, 2020, to file dispositive motions. If these claims survive dispositive motions, a hearing is scheduled for April 2021. Duke Energy Indiana cannot predict the outcome of this matter. See Note 6 for additional information.

Other Litigation and Legal Proceedings

The Duke Energy Registrants are involved in other legal, tax and regulatory proceedings arising in the ordinary course of business, some of which involve significant amounts. The Duke Energy Registrants believe the final disposition of these proceedings will not have a material effect on their results of operations, cash flows or financial position.

The table below presents recorded reserves based on management's best estimate of probable loss for legal matters, excluding asbestos-related reserves discussed above. Reserves are classified on the Condensed Consolidated Balance Sheets in Other within Other Noncurrent Liabilities and Other within Current Liabilities. The reasonably possible range of loss in excess of recorded reserves is not material, other than as described above.

(in millions)	September 30, 2020	December 31, 2019
Reserves for Legal Matters		
Duke Energy	**$ 60**	$ 62
Duke Energy Carolinas	**2**	2
Progress Energy	**52**	55
Duke Energy Progress	**9**	12
Duke Energy Florida	**23**	22
Piedmont	**1**	1

OTHER COMMITMENTS AND CONTINGENCIES

General

As part of their normal business, the Duke Energy Registrants are party to various financial guarantees, performance guarantees and other contractual commitments to extend guarantees of credit and other assistance to various subsidiaries, investees and other third parties. These guarantees involve elements of performance and credit risk, which are not fully recognized on the Condensed Consolidated Balance Sheets and have uncapped maximum potential payments. However, the Duke Energy Registrants do not believe these guarantees will have a material effect on their results of operations, cash flows or financial position.

In addition, the Duke Energy Registrants enter into various fixed-price, noncancelable commitments to purchase or sell power or natural gas, take-or-pay arrangements, transportation, or throughput agreements and other contracts that may or may not be recognized on their respective Condensed Consolidated Balance Sheets. Some of these arrangements may be recognized at fair value on their respective Condensed Consolidated Balance Sheets if such contracts meet the definition of a derivative and the NPNS exception does not apply. In most cases, the Duke Energy Registrants' purchase obligation contracts contain provisions for price adjustments, minimum purchase levels and other financial commitments.

As described in Note 1, Duke Energy adopted the new guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year reported results. The reserve for credit losses for insurance receivables based on adoption of the new standard is $15 million for Duke Energy and Duke Energy Carolinas as of September 30, 2020. Insurance receivables are evaluated based on the risk of default and the historical losses, current conditions and expected conditions around collectability. Management evaluates the risk of default annually based on payment history, credit rating and changes in the risk of default from credit agencies.

Duke Energy has recognized $860 million related to the guarantees of its portion of ACP's outstanding debt of which $95 million was previously recognized due the adoption of new guidance for credit losses effective January 1, 2020. This reserve is included within Other current liabilities on the Condensed Consolidated Balance Sheets at September 30, 2020. See Notes 1, 3 and 12 for more information. The remaining reserve for credit losses for financial guarantees of $4 million at September 30, 2020, is included within Other noncurrent liabilities on the Duke Energy's Condensed Consolidated Balance Sheets. Management considers financial guarantees for evaluation under this standard based on the anticipated amount outstanding at the time of default. The reserve for credit losses is based on the evaluation of the contingent components of financial guarantees. Management evaluates the risk of default, exposure and length of time remaining in the period for each contract.

5. DEBT AND CREDIT FACILITIES

SUMMARY OF SIGNIFICANT DEBT ISSUANCES

The following table summarizes significant debt issuances (in millions).

			Nine Months Ended September 30, 2020							
Issuance Date	Maturity Date	Interest Rate	Duke Energy	Duke Energy (Parent)	Duke Energy Carolinas	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Unsecured Debt										
May 2020[a]	Jun 2030	2.450%	$ 500	$ 500	$ —	$ —	$ —	$ —	$ —	$ —
May 2020[b]	Jun 2050	3.350%	400	—	—		—	—	—	400
August 2020[c]	Feb 2022	0.430% [d]	700	—	—	700	—	—	—	—
September 2020[e]	Sep 2025	0.900%	650	650	—	—	—	—	—	—
September 2020[e]	Jun 2030	2.450%	350	350	—	—	—	—	—	—
First Mortgage Bonds										
January 2020[f]	Feb 2030	2.450%	500	—	500	—	—	—	—	—
January 2020[f]	Aug 2049	3.200%	400	—	400	—	—	—	—	—
March 2020[g]	Apr 2050	2.750%	550	—	—	—	—	—	550	—
May 2020[b]	Jun 2030	2.125%	400	—	—	—	—	400	—	—
June 2020[b]	Jun 2030	1.750%	500	—	—	—	500	—	—	—
August 2020[h]	Aug 2050	2.500%	600	—	—	600	—	—	—	—
Total issuances			$ 5,550	$ 1,500	$ 900	$ 1,300	$ 500	$ 400	$ 550	$ 400

(a) Debt issued to repay $500 million borrowing made under Duke Energy (Parent) revolving credit facility in March 2020, and for general corporate purposes.
(b) Debt issued to repay short-term debt and for general corporate purposes.
(c) Debt issued to repay $700 million two-year term loan facility expiring in December 2020.
(d) Debt issuance has a floating interest rate.
(e) Debt issued to repay a portion of outstanding commercial paper, to repay a portion of Duke Energy (Parent)'s outstanding $1.7 billion term loan due March 2021 and for general corporate purposes.
(f) Debt issued to repay at maturity $450 million first mortgage bonds due June 2020 and for general corporate purposes.
(g) Debt issued to repay at maturity $500 million first mortgage bonds due July 2020 and to pay down short-term debt.
(h) Debt issued to repay at maturity $300 million first mortgage bonds due September 2020 and for general corporate purposes.

CURRENT MATURITIES OF LONG-TERM DEBT

The following table shows the significant components of Current maturities of long-term debt on the Condensed Consolidated Balance Sheets. The Duke Energy Registrants currently anticipate satisfying these obligations with cash on hand and proceeds from additional borrowings.

(in millions)	Maturity Date	Interest Rate	September 30, 2020
Unsecured Debt			
Progress Energy, Inc	January 2021	4.400%	$ 500
Duke Energy (Parent)	May 2021	0.765% [a]	500
Piedmont	June 2021	4.240%	160
Duke Energy (Parent)	September 2021	3.550%	500
Duke Energy (Parent)	September 2021	1.800%	750
Secured Debt			
Duke Energy Florida	April 2021	1.035% [a]	250
First Mortgage Bonds			
Duke Energy Carolinas	June 2021	3.900%	500
Duke Energy Florida	August 2021	3.100%	300
Duke Energy Progress	September 2021	3.000%	500
Duke Energy Progress	September 2021	8.625%	100
Other[b]			609
Current maturities of long-term debt			$ 4,669

(a) Debt has a floating interest rate.
(b) Includes finance lease obligations, amortizing debt and small bullet maturities.

AVAILABLE CREDIT FACILITIES

Master Credit Facility

In March 2020, Duke Energy amended its existing $8 billion Master Credit Facility to extend the termination date to March 2025. The Duke Energy Registrants, excluding Progress Energy, have borrowing capacity under the Master Credit Facility up to a specified sublimit for each borrower. Duke Energy has the unilateral ability at any time to increase or decrease the borrowing sublimits of each borrower, subject to a maximum sublimit for each borrower. The amount available under the Master Credit Facility has been reduced to backstop issuances of commercial paper, certain letters of credit and variable-rate demand tax-exempt bonds that may be put to the Duke Energy Registrants at the option of the holder.

The table below includes the current borrowing sublimits and available capacity under these credit facilities.

	September 30, 2020							
(in millions)	Duke Energy	Duke Energy (Parent)	Duke Energy Carolinas	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Facility size[(a)]	$ 8,000	$ 2,650	$ 1,475	$ 1,250	$ 800	$ 625	$ 600	$ 600
Reduction to backstop issuances								
Commercial paper[(b)]	(2,007)	(693)	(300)	(308)	(62)	(106)	(229)	(309)
Outstanding letters of credit	(40)	(34)	(4)	(2)	—	—	—	—
Tax-exempt bonds	(81)	—	—	—	—	—	(81)	—
Available capacity under the Master Credit Facility	$ 5,872	$ 1,923	$ 1,171	$ 940	$ 738	$ 519	$ 290	$ 291

(a) Represents the sublimit of each borrower.
(b) Duke Energy issued $625 million of commercial paper and loaned the proceeds through the money pool to Duke Energy Carolinas, Duke Energy Progress, Duke Energy Ohio and Duke Energy Indiana. The balances are classified as Long-Term Debt Payable to Affiliated Companies on the Condensed Consolidated Balance Sheets.

Term Loan Facility

In response to market volatility and ongoing liquidity impacts from COVID-19, in March 2020, Duke Energy (Parent) entered into a $1.5 billion, 364-day Term Loan Credit Agreement, borrowing the full $1.5 billion available on March 19, 2020. The term loan contains a provision for increasing the amount available for borrowing by up to $500 million. Duke Energy (Parent) exercised this provision on March 27, 2020, borrowing an additional $188 million. Proceeds were used to reduce outstanding commercial paper and for general corporate purposes. In the third quarter of 2020, Duke Energy (Parent) repaid $844 million of the loan. Refer to Note 1 for additional information on the COVID-19 pandemic.

Other Credit Facilities

	September 30, 2020	
(in millions)	Facility size	Amount drawn
Duke Energy (Parent) Three-Year Revolving Credit Facility	$ 1,000	$ 500

In August 2020, Duke Energy Progress repaid its $700 million two-year term loan facility.

6. ASSET RETIREMENT OBLIGATIONS

The Duke Energy Registrants record AROs when there is a legal obligation to incur retirement costs associated with the retirement of a long-lived asset and the obligation can be reasonably estimated. Actual costs incurred could be materially different from current estimates that form the basis of the recorded AROs.

The following table presents the AROs recorded on the Condensed Consolidated Balance Sheets.

	September 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Decommissioning of nuclear power facilities[(a)]	$ 6,815	$ 2,658	$ 4,107	$ 3,606	$ 501	$ —	$ —	$ —
Closure of ash impoundments	6,458	3,049	2,172	2,150	22	51	1,186	—
Other	381	67	76	44	32	40	28	17
Total ARO	$ 13,654	$ 5,774	$ 6,355	$ 5,800	$ 555	$ 91	$ 1,214	$ 17
Less: Current portion	742	267	297	297	—	7	170	—
Total noncurrent ARO	$ 12,912	$ 5,507	$ 6,058	$ 5,503	$ 555	$ 84	$ 1,044	$ 17

(a) Duke Energy amount includes purchase accounting adjustments related to the merger with Progress Energy.

ARO Liability Rollforward

The following table presents the change in liability associated with AROs for the Duke Energy Registrants.

(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Balance at December 31, 2019[(a)]	$ 13,318	$ 5,734	$ 6,471	$ 5,893	$ 578	$ 80	$ 832	$ 17
Accretion expense[(b)]	408	195	187	171	16	3	22	—
Liabilities settled[(c)]	(540)	(151)	(333)	(293)	(40)	(1)	(56)	—
Liabilities incurred in the current year	17	—	—	—	—	—	—	—
Revisions in estimates of cash flows[(d)]	451	(4)	30	29	1	9	416	—
Balance at September 30, 2020	$ 13,654	$ 5,774	$ 6,355	$ 5,800	$ 555	$ 91	$ 1,214	$ 17

(a) Primarily relates to decommissioning nuclear power facilities, closure of ash impoundments, asbestos removal, closure of landfills at fossil generation facilities, retirement of natural gas mains and removal of renewable energy generation assets.
(b) For the nine months ended September 30, 2020, substantially all accretion expense relates to Duke Energy's regulated operations and has been deferred in accordance with regulatory accounting treatment.
(c) Primarily relates to ash impoundment closures.
(d) Primarily relates to increases in closure estimates for certain ash impoundments as a result of certain changes in estimates and the impact of Hoosier Environmental Council's petition filed with the court challenging the Indiana Department of Environmental Management's partial approval of Duke Energy Indiana's ash pond closure plan, new closure plan approvals, as well as increased post closure maintenance, landfill and beneficiation costs. See Note 4 for more information on Hoosier Environmental Council's petition. The incremental amount recorded represents the discounted cash flows for estimated closure costs based upon the probability weightings of the potential closure methods as evaluated on a site-by-site basis.

Asset retirement costs associated with the AROs for operating plants and retired plants are included in Net property, plant and equipment and Regulatory assets within Other Noncurrent Assets, respectively, on the Condensed Consolidated Balance Sheets.

7. GOODWILL

Duke Energy

The following table presents the goodwill by reportable segment included on Duke Energy's Condensed Consolidated Balance Sheets at September 30, 2020, and December 31, 2019.

(in millions)	Electric Utilities and Infrastructure	Gas Utilities and Infrastructure	Commercial Renewables	Total
Goodwill balance	$ 17,379	$ 1,924	$ 122	$ 19,425
Accumulated impairment charges	—	—	(122)	(122)
Goodwill, adjusted for accumulated impairment charges	$ 17,379	$ 1,924	$ —	$ 19,303

Duke Energy Ohio

Duke Energy Ohio's Goodwill balance of $920 million, allocated $596 million to Electric Utilities and Infrastructure and $324 million to Gas Utilities and Infrastructure, is presented net of accumulated impairment charges of $216 million on the Condensed Consolidated Balance Sheets at September 30, 2020, and December 31, 2019.

Progress Energy

Progress Energy's Goodwill is included in the Electric Utilities and Infrastructure segment and there are no accumulated impairment charges.

Piedmont

Piedmont's Goodwill is included in the Gas Utilities and Infrastructure segment and there are no accumulated impairment charges.

Impairment Testing

Duke Energy, Progress Energy, Duke Energy Ohio and Piedmont are required to perform an annual goodwill impairment test as of the same date each year and, accordingly, perform their annual impairment testing of goodwill as of August 31. Duke Energy, Progress Energy, Duke Energy Ohio and Piedmont update their test between annual tests if events or circumstances occur that would more likely than not reduce the fair value of a reporting unit below its carrying value. As the fair value for Duke Energy, Progress Energy, Duke Energy Ohio and Piedmont exceeded their respective carrying values at the date of the annual impairment analysis, no goodwill impairment charges were recorded in the third quarter of 2020.

8. RELATED PARTY TRANSACTIONS

The Subsidiary Registrants engage in related party transactions in accordance with applicable state and federal commission regulations. Refer to the Condensed Consolidated Balance Sheets of the Subsidiary Registrants for balances due to or due from related parties. Material amounts related to transactions with related parties included on the Condensed Consolidated Statements of Operations and Comprehensive Income are presented in the following table.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2020	2019	2020	2019

Natural gas storage and transportation costs[e]	**6**	6	**17**	17

(a) The Subsidiary Registrants are charged their proportionate share of corporate governance and other shared services costs, primarily related to human resources, employee benefits, information technology, legal and accounting fees, as well as other third-party costs. These amounts are primarily recorded in Operation, maintenance and other on the Condensed Consolidated Statements of Operations and Comprehensive Income.
(b) The Subsidiary Registrants incur expenses related to certain indemnification coverages through Bison, Duke Energy's wholly owned captive insurance subsidiary. These expenses are recorded in Operation, maintenance and other on the Condensed Consolidated Statements of Operations and Comprehensive Income.
(c) Duke Energy Carolinas and Duke Energy Progress participate in a JDA, which allows the collective dispatch of power plants between the service territories to reduce customer rates. Revenues from the sale of power and expenses from the purchase of power pursuant to the JDA are recorded in Operating Revenues and Fuel used in electric generation and purchased power, respectively, on the Condensed Consolidated Statements of Operations and Comprehensive Income.
(d) Piedmont provides long-term natural gas delivery service to certain Duke Energy Carolinas and Duke Energy Progress natural gas-fired generation facilities. Piedmont records the sales in Operating revenues, and Duke Energy Carolinas and Duke Energy Progress record the related purchases as a component of Fuel used in electric generation and purchased power on their respective Condensed Consolidated Statements of Operations and Comprehensive Income.
(e) Piedmont has related party transactions as a customer of its equity method investments in Pine Needle LNG Company, LLC, Hardy Storage Company, LLC and Cardinal Pipeline Company, LLC natural gas storage and transportation facilities. These expenses are included in Cost of natural gas on Piedmont's Condensed Consolidated Statements of Operations and Comprehensive Income.

In addition to the amounts presented above, the Subsidiary Registrants have other affiliate transactions, including rental of office space, participation in a money pool arrangement, other operational transactions, such as pipeline lease arrangements, and their proportionate share of certain charged expenses. These transactions of the Subsidiary Registrants are incurred in the ordinary course of business and are eliminated in consolidation.

As discussed in Note 12, certain trade receivables have been sold by Duke Energy Ohio and Duke Energy Indiana to CRC, an affiliate formed by a subsidiary of Duke Energy. The proceeds obtained from the sales of receivables are largely cash but do include a subordinated note from CRC for a portion of the purchase price.

Intercompany Income Taxes

Duke Energy and the Subsidiary Registrants file a consolidated federal income tax return and other state and jurisdictional returns. The Subsidiary Registrants have a tax sharing agreement with Duke Energy for the allocation of consolidated tax liabilities and benefits. Income taxes recorded represent amounts the Subsidiary Registrants would incur as separate C-Corporations. The following table includes the balance of intercompany income tax receivables and payables for the Subsidiary Registrants.

(in millions)	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
September 30, 2020

Intercompany income tax payable	5	—	—	2	—	—	—

9. DERIVATIVES AND HEDGING

The Duke Energy Registrants use commodity and interest rate contracts to manage commodity price risk and interest rate risk. The primary use of commodity derivatives is to hedge the generation portfolio against changes in the prices of electricity and natural gas. Piedmont enters into natural gas supply contracts to provide diversification, reliability and natural gas cost benefits to its customers. Interest rate derivatives are used to manage interest rate risk associated with borrowings.

All derivative instruments not identified as NPNS are recorded at fair value as assets or liabilities on the Condensed Consolidated Balance Sheets. Cash collateral related to derivative instruments executed under master netting arrangements is offset against the collateralized derivatives on the Condensed Consolidated Balance Sheets. The cash impacts of settled derivatives are recorded as operating activities on the Condensed Consolidated Statements of Cash Flows.

INTEREST RATE RISK

The Duke Energy Registrants are exposed to changes in interest rates as a result of their issuance or anticipated issuance of variable-rate and fixed-rate debt and commercial paper. Interest rate risk is managed by limiting variable-rate exposures to a percentage of total debt and by monitoring changes in interest rates. To manage risk associated with changes in interest rates, the Duke Energy Registrants may enter into interest rate swaps, U.S. Treasury lock agreements and other financial contracts. In anticipation of certain fixed-rate debt issuances, a series of forward-starting interest rate swaps or Treasury locks may be executed to lock in components of current market interest rates. These instruments are later terminated prior to or upon the issuance of the corresponding debt.

Cash Flow Hedges

For a derivative designated as hedging the exposure to variable cash flows of a future transaction, referred to as a cash flow hedge, the effective portion of the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings once the future transaction impacts earnings. Amounts for interest rate contracts are reclassified to earnings as interest expense over the term of the related debt. Gains and losses reclassified out of accumulated other comprehensive income (loss) for the three and nine months ended September 30, 2020, and 2019, were not material. Duke Energy's interest rate derivatives designated as hedges include interest rate swaps used to hedge existing debt within the Commercial Renewables segment and forward-starting interest rate swaps not accounted for under regulatory accounting.

Undesignated Contracts

Undesignated contracts primarily include contracts not designated as a hedge because they are accounted for under regulatory accounting or contracts that do not qualify for hedge accounting.

Duke Energy's interest rate swaps for its regulated operations employ regulatory accounting. With regulatory accounting, the mark-to-market gains or losses on the swaps are deferred as regulatory liabilities or regulatory assets, respectively. Regulatory assets and liabilities are amortized consistent with the treatment of the related costs in the ratemaking process. The accrual of interest on the swaps is recorded as Interest Expense on the Duke Energy Registrant's Condensed Consolidated Statements of Operations and Comprehensive Income.

The following table shows notional amounts of outstanding derivatives related to interest rate risk.

	September 30, 2020					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio
Cash flow hedges	$ 653	$ —	$ —	$ —	$ —	$ —
Undesignated contracts	1,177	400	750	750	—	27
Total notional amount[(a)]	$ 1,830	$ 400	$ 750	$ 750	$ —	$ 27

	December 31, 2019					
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio
Cash flow hedges	$ 993	$ —	$ —	$ —	$ —	$ —
Undesignated contracts	1,277	450	800	250	550	27
Total notional amount[(a)]	$ 2,270	$ 450	$ 800	$ 250	$ 550	$ 27

(a) Duke Energy includes amounts related to consolidated VIEs of $653 million in cash flow hedges as of September 30, 2020, and $693 million in cash flow hedges as of December 31, 2019.

COMMODITY PRICE RISK

The Duke Energy Registrants are exposed to the impact of changes in the prices of electricity purchased and sold in bulk power markets and natural gas purchases, including Piedmont's natural gas supply contracts. Exposure to commodity price risk is influenced by a number of factors including the term of contracts, the liquidity of markets and delivery locations. To manage risk associated with commodity prices, the Duke Energy Registrants may enter into long-term power purchase or sales contracts and long-term natural gas supply agreements.

Cash Flow Hedges

For derivatives designated as hedging the exposure to variable cash flows of a future transaction, referred to as a cash flow hedge, the derivative's gain or loss is initially reported as a component of other comprehensive income and subsequently reclassified into earnings once the future transaction impacts earnings. Gains and losses reclassified out of accumulated other comprehensive income (loss) for the three and nine months ended September 30, 2020, and 2019, were not material. Duke Energy's commodity derivatives designated as hedges include long-term electricity sales in the Commercial Renewables segment.

Undesignated Contracts

For the Subsidiary Registrants, bulk power electricity and natural gas purchases flow through fuel adjustment clauses, formula-based contracts or other cost-sharing mechanisms. Differences between the costs included in rates and the incurred costs, including undesignated derivative contracts, are largely deferred as regulatory assets or regulatory liabilities. Piedmont policies allow for the use of financial instruments to hedge commodity price risks. The strategy and objective of these hedging programs are to use the financial instruments to reduce natural gas costs volatility for customers.

Volumes

The tables below include volumes of outstanding commodity derivatives. Amounts disclosed represent the absolute value of notional volumes of commodity contracts excluding NPNS. The Duke Energy Registrants have netted contractual amounts where offsetting purchase and sale contracts exist with identical delivery locations and times of delivery. Where all commodity positions are perfectly offset, no quantities are shown.

	September 30, 2020						
	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Electricity (GWh)[(a)]	**32,314**	**—**	**—**	**—**	**4,126**	**17,072**	**—**

	December 31, 2019						
	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Electricity (GWh)	15,858	—	—	—	1,887	13,971	—
Natural gas (millions of dekatherms)	704	130	160	160	—	3	411

(a) Duke Energy includes 11,116 GWh that relates to cash flow hedges.

LOCATION AND FAIR VALUE OF DERIVATIVE ASSETS AND LIABILITIES RECOGNIZED ON THE CONDENSED CONSOLIDATED BALANCE SHEETS

The following tables show the fair value and balance sheet location of derivative instruments. Although derivatives subject to master netting arrangements are netted on the Condensed Consolidated Balance Sheets, the fair values presented below are shown gross and cash collateral on the derivatives has not been netted against the fair values shown.

OFFSETTING ASSETS AND LIABILITIES

The following tables present the line items on the Condensed Consolidated Balance Sheets where derivatives are reported. Substantially all of Duke Energy's outstanding derivative contracts are subject to enforceable master netting arrangements. The gross amounts offset in the tables below show the effect of these netting arrangements on financial position, and include collateral posted to offset the net position. The amounts shown are calculated by counterparty. Accounts receivable or accounts payable may also be available to offset exposures in the event of bankruptcy. These amounts are not included in the tables below.

OBJECTIVE CREDIT CONTINGENT FEATURES

Certain derivative contracts contain objective credit contingent features. These features include the requirement to post cash collateral or letters of credit if specific events occur, such as a credit rating downgrade below investment grade. The following tables show information with respect to derivative contracts that are in a net liability position and contain objective credit-risk-related payment provisions.

	September 30, 2020			
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress
Aggregate fair value of derivatives in a net liability position	**$ 20**	**$ 9**	**$ 11**	**$ 11**
Fair value of collateral already posted	**—**	**—**	**—**	**—**
Additional cash collateral or letters of credit in the event credit-risk-related contingent features were triggered	**20**	**9**	**11**	**11**

	December 31, 2019			
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress
Aggregate fair value of derivatives in a net liability position	$ 79	$ 35	$ 44	$ 44
Fair value of collateral already posted	—	—	—	—
Additional cash collateral or letters of credit in the event credit-risk-related contingent features were triggered	79	35	44	44

The Duke Energy Registrants have elected to offset cash collateral and fair values of derivatives. For amounts to be netted, the derivative and cash collateral must be executed with the same counterparty under the same master netting arrangement.

10. INVESTMENTS IN DEBT AND EQUITY SECURITIES

Duke Energy's investments in debt and equity securities are primarily comprised of investments held in (i) the NDTF at Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida, (ii) the grantor trusts at Duke Energy Progress, Duke Energy Florida and Duke Energy Indiana related to OPEB plans and (iii) Bison. The Duke Energy Registrants classify investments in debt securities as AFS and investments in equity securities as fair value through net income (FV-NI).

For investments in debt securities classified as AFS, the unrealized gains and losses are included in other comprehensive income until realized, at which time they are reported through net income. For investments in equity securities classified as FV-NI, both realized and unrealized gains and losses are reported through net income. Substantially all of Duke Energy's investments in debt and equity securities qualify for regulatory accounting, and accordingly, all associated realized and unrealized gains and losses on these investments are deferred as a regulatory asset or liability.

Duke Energy classifies the majority of investments in debt and equity securities as long term, unless otherwise noted.

Investment Trusts

The investments within the Investment Trusts are managed by independent investment managers with discretion to buy, sell and invest pursuant to the objectives set forth by the investment manager agreements and trust agreements. The Duke Energy Registrants have limited oversight of the day-to-day management of these investments. As a result, the ability to hold investments in unrealized loss positions is outside the control of the Duke Energy Registrants. Accordingly, all unrealized losses associated with debt securities within the Investment Trusts are recognized immediately and deferred to regulatory accounts where appropriate.

Other AFS Securities

Unrealized gains and losses on all other AFS securities are included in other comprehensive income until realized, unless it is determined the carrying value of an investment has a credit loss. The Duke Energy Registrants analyze all investment holdings each reporting period to determine whether a decline in fair value is related to a credit loss. If a credit loss exists, the unrealized credit loss is included in earnings. There were no material credit losses as of September 30, 2020, and December 31, 2019.

Other Investments amounts are recorded in Other within Other Noncurrent Assets on the Condensed Consolidated Balance Sheets.

DUKE ENERGY

The following table presents the estimated fair value of investments in debt and equity securities; equity investments are classified as FV-NI and debt investments are classified as AFS.

	September 30, 2020			December 31, 2019		
(in millions)	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Estimated Fair Value	Gross Unrealized Holding Gains	Gross Unrealized Holding Losses	Estimated Fair Value

Total	$ 2,532	$ 1,232	$ 1,045	$ 992	$ 53	$ 45

11. FAIR VALUE MEASUREMENTS

Fair value is the exchange price to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. The fair value definition focuses on an exit price versus the acquisition cost. Fair value measurements use market data or assumptions market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs may be readily observable, corroborated by market data or generally unobservable. Valuation techniques maximize the use of observable inputs and minimize use of unobservable inputs. A midmarket pricing convention (the midpoint price between bid and ask prices) is permitted for use as a practical expedient.

Fair value measurements are classified in three levels based on the fair value hierarchy as defined by GAAP. Certain investments are not categorized within the fair value hierarchy. These investments are measured at fair value using the net asset value (NAV) per share practical expedient. The NAV is derived based on the investment cost, less any impairment, plus or minus changes resulting from observable price changes for an identical or similar investment of the same issuer.

Fair value accounting guidance permits entities to elect to measure certain financial instruments that are not required to be accounted for at fair value, such as equity method investments or the company's own debt, at fair value. The Duke Energy Registrants have not elected to record any of these items at fair value.

Valuation methods of the primary fair value measurements disclosed below are as follows.

Investments in equity securities

The majority of investments in equity securities are valued using Level 1 measurements. Investments in equity securities are typically valued at the closing price in the principal active market as of the last business day of the quarter. Principal active markets for equity prices include published exchanges such as the New York Stock Exchange and Nasdaq Stock Market. Foreign equity prices are translated from their trading currency using the currency exchange rate in effect at the close of the principal active market. There was no after-hours market activity that was required to be reflected in the reported fair value measurements.

Investments in debt securities

Most investments in debt securities are valued using Level 2 measurements because the valuations use interest rate curves and credit spreads applied to the terms of the debt instrument (maturity and coupon interest rate) and consider the counterparty credit rating. If the market for a particular fixed-income security is relatively inactive or illiquid, the measurement is Level 3.

Commodity derivatives

Commodity derivatives with clearinghouses are classified as Level 1. If forward price curves are not observable for the full term of the contract and the unobservable period had more than an insignificant impact on the valuation, the commodity derivative is classified as Level 3. In isolation, increases (decreases) in natural gas forward prices result in favorable (unfavorable) fair value adjustments for natural gas purchase contracts; and increases (decreases) in electricity forward prices result in unfavorable (favorable) fair value adjustments for electricity sales contracts. Duke Energy regularly evaluates and validates pricing inputs used to estimate the fair value of natural gas commodity contracts by a market participant price verification procedure. This procedure provides a comparison of internal forward commodity curves to market participant generated curves.

Interest rate derivatives

Most over-the-counter interest rate contract derivatives are valued using financial models that utilize observable inputs for similar instruments and are classified as Level 2. Inputs include forward interest rate curves, notional amounts, interest rates and credit quality of the counterparties.

Other fair value considerations

See Note 12 in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019, for a discussion of the valuation of goodwill and intangible assets.

DUKE ENERGY

The following tables provide recorded balances for assets and liabilities measured at fair value on a recurring basis on the Condensed Consolidated Balance Sheets. Derivative amounts in the tables below for all Duke Energy Registrants exclude cash collateral, which is disclosed in Note 9. See Note 10 for additional information related to investments by major security type for the Duke Energy Registrants.

Duke Energy Ohio	**3,089**	**3,619**	2,619	2,964
Duke Energy Indiana	**4,104**	**5,140**	4,057	4,800
Piedmont	**2,780**	**3,276**	2,384	2,642

(a) Book value of long-term debt includes $1.4 billion at September 30, 2020, and $1.5 billion at December 31, 2019, of unamortized debt discount and premium, net of purchase accounting adjustments related to the mergers with Progress Energy and Piedmont that are excluded from fair value of long-term debt.

At both September 30, 2020, and December 31, 2019, fair value of cash and cash equivalents, accounts and notes receivable, accounts payable, notes payable and commercial paper and nonrecourse notes payable of VIEs are not materially different from their carrying amounts because of the short-term nature of these instruments and/or because the stated rates approximate market rates.

12. VARIABLE INTEREST ENTITIES

CONSOLIDATED VIEs

The obligations of the consolidated VIEs discussed in the following paragraphs are nonrecourse to the Duke Energy Registrants. The registrants have no requirement to provide liquidity to, purchase assets of or guarantee performance of these VIEs unless noted in the following paragraphs.

No financial support was provided to any of the consolidated VIEs during the nine months ended September 30, 2020, and the year ended December 31, 2019, or is expected to be provided in the future that was not previously contractually required.

Receivables Financing – DERF/DEPR/DEFR

DERF, DEPR and DEFR are bankruptcy remote, special purpose subsidiaries of Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida, respectively. DERF, DEPR and DEFR are wholly owned LLCs with separate legal existence from their parent companies, and their assets are not generally available to creditors of their parent companies. On a revolving basis, DERF, DEPR and DEFR buy certain accounts receivable arising from the sale of electricity and related services from their parent companies.

DERF, DEPR and DEFR borrow amounts under credit facilities to buy these receivables. Borrowing availability from the credit facilities is limited to the amount of qualified receivables purchased, which generally exclude receivables past due more than a predetermined number of days and reserves for expected past-due balances. The sole source of funds to satisfy the related debt obligations is cash collections from the receivables. Amounts borrowed under the credit facilities for DERF and DEPR are reflected on the Condensed Consolidated Balance Sheets as Long-Term Debt. Amounts borrowed under the credit facilities for DEFR are reflected on the Condensed Consolidated Balance Sheets as Current maturities of long-term debt.

Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. Since taking action to suspend customer disconnections for nonpayment, certain jurisdictions have now returned to normal operations and billing practices. The full impact of COVID-19 and the Duke Energy Registrant's related response on customers' ability to pay for service is uncertain. However, the level of past-due receivables at Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida have increased significantly during the COVID-19 pandemic, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates. In the second quarter of 2020, DERF, DEPR and DEFR executed amendments to their credit facilities to manage the impact of past-due receivables resulting from the suspension of customer disconnections from COVID-19. In the third quarter of 2020, DERF executed another amendment to lengthen the terms of the amendment executed in the second quarter. See Note 3 for information about COVID-19 filings with state utility commissions.

The most significant activity that impacts the economic performance of DERF, DEPR and DEFR are the decisions made to manage delinquent receivables. Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida are considered the primary beneficiaries and consolidate DERF, DEPR and DEFR, respectively, as they make those decisions.

Receivables Financing – CRC

CRC is a bankruptcy remote, special purpose entity indirectly owned by Duke Energy. On a revolving basis, CRC buys certain accounts receivable arising from the sale of electricity, natural gas and related services from Duke Energy Ohio and Duke Energy Indiana. CRC borrows amounts under a credit facility to buy the receivables from Duke Energy Ohio and Duke Energy Indiana. Borrowing availability from the credit facility is limited to the amount of qualified receivables sold to CRC, which generally exclude receivables past due more than a predetermined number of days and reserves for expected past-due balances. The sole source of funds to satisfy the related debt obligation is cash collections from the receivables. Amounts borrowed under the credit facility are reflected on Duke Energy's Condensed Consolidated Balance Sheets as Long-Term Debt.

The proceeds Duke Energy Ohio and Duke Energy Indiana receive from the sale of receivables to CRC are approximately 75% cash and 25% in the form of a subordinated note from CRC. The subordinated note is a retained interest in the receivables sold. Depending on collection experience, additional equity infusions to CRC may be required by Duke Energy to maintain a minimum equity balance of $3 million.

Due to the COVID-19 pandemic, as described in Note 1, the Duke Energy Registrants suspended customer disconnections for nonpayment. Since taking action to suspend customer disconnections for nonpayment, certain jurisdictions have now returned to normal operations and billing practices. The full impact of COVID-19 and the Duke Energy Registrant's related response on customers' ability to pay for service is uncertain. However, the level of past-due receivables at Duke Energy Ohio and Duke Energy Indiana have increased significantly during the COVID-19 pandemic, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates. In July of 2020, CRC executed an amendment to its credit facility to manage the impact of past-due receivables resulting from the suspension of customer disconnections from COVID-19. See Note 3 for information about COVID-19 filings with state utility commissions.

CRC is considered a VIE because (i) equity capitalization is insufficient to support its operations, (ii) power to direct the activities that most significantly impact the economic performance of the entity is not held by the equity holder and (iii) deficiencies in net worth of CRC are funded by Duke Energy. The most significant activities that impact the economic performance of CRC are decisions made to manage delinquent receivables. Duke Energy is considered the primary beneficiary and consolidates CRC as it makes these decisions. Neither Duke Energy Ohio nor Duke Energy Indiana consolidate CRC.

Receivables Financing – Credit Facilities

The following table summarizes the amounts and expiration dates of the credit facilities and associated restricted receivables described above.

	Duke Energy			
		Duke Energy Carolinas	Duke Energy Progress	Duke Energy Florida
(in millions)	CRC	DERF	DEPR	DEFR
Expiration date	February 2023	December 2022	April 2023	April 2021
Credit facility amount	$ 350	$ 475	$ 350	$ 250
Amounts borrowed at September 30, 2020	**350**	**475**	**350**	**250**
Amounts borrowed at December 31, 2019	350	474	325	250
Restricted Receivables at September 30, 2020	**479**	**770**	**559**	**506**
Restricted Receivables at December 31, 2019	522	642	489	336

Nuclear Asset-Recovery Bonds – DEFPF

DEFPF is a bankruptcy remote, wholly owned special purpose subsidiary of Duke Energy Florida. DEFPF was formed in 2016 for the sole purpose of issuing nuclear asset-recovery bonds to finance Duke Energy Florida's unrecovered regulatory asset related to Crystal River Unit 3.

In 2016, DEFPF issued senior secured bonds and used the proceeds to acquire nuclear asset-recovery property from Duke Energy Florida. The nuclear asset-recovery property acquired includes the right to impose, bill, collect and adjust a non-bypassable nuclear asset-recovery charge from all Duke Energy Florida retail customers until the bonds are paid in full and all financing costs have been recovered. The nuclear asset-recovery bonds are secured by the nuclear asset-recovery property and cash collections from the nuclear asset-recovery charges are the sole source of funds to satisfy the debt obligation. The bondholders have no recourse to Duke Energy Florida.

DEFPF is considered a VIE primarily because the equity capitalization is insufficient to support its operations. Duke Energy Florida has the power to direct the significant activities of the VIE as described above and therefore Duke Energy Florida is considered the primary beneficiary and consolidates DEFPF.

The following table summarizes the impact of DEFPF on Duke Energy Florida's Condensed Consolidated Balance Sheets.

(in millions)	September 30, 2020	December 31, 2019
Receivables of VIEs	**$ 6**	$ 5
Regulatory Assets: Current	**53**	52
Current Assets: Other	**16**	39
Other Noncurrent Assets: Regulatory assets	**951**	989
Current Liabilities: Other	**2**	10
Current maturities of long-term debt	**55**	54
Long-Term Debt	**1,001**	1,057

Commercial Renewables

Certain of Duke Energy's renewable energy facilities are VIEs due to Duke Energy issuing guarantees for debt service and operations and maintenance reserves in support of debt financings. Assets are restricted and cannot be pledged as collateral or sold to third parties without prior approval of debt holders. Additionally, Duke Energy has VIEs associated with tax equity arrangements entered into with third-party investors in order to finance the cost of renewable assets eligible for tax credits. The activities that most significantly impacted the economic performance of these renewable energy facilities were decisions associated with siting, negotiating PPAs and Engineering, Procurement and Construction agreements, and decisions associated with ongoing operations and maintenance-related activities. Duke Energy is considered the primary beneficiary and consolidates the entities as it is responsible for all of these decisions.

The table below presents material balances reported on Duke Energy's Condensed Consolidated Balance Sheets related to Commercial Renewables VIEs.

(in millions)	September 30, 2020	December 31, 2019
Current Assets: Other	**$ 319**	$ 203
Property, Plant and Equipment: Cost	**6,239**	5,747
Accumulated depreciation and amortization	**(1,200)**	(1,041)
Other Noncurrent Assets: Other	**79**	106
Current maturities of long-term debt	**161**	162
Long-Term Debt	**1,452**	1,541
Other Noncurrent Liabilities: AROs	**150**	127
Other Noncurrent Liabilities: Other	**342**	228

NON-CONSOLIDATED VIEs

The following tables summarize the impact of non-consolidated VIEs on the Condensed Consolidated Balance Sheets.

	September 30, 2020					
	Duke Energy				Duke	Duke
	Pipeline	Commercial	Other		Energy	Energy
(in millions)	Investments	Renewables	VIEs	Total	Ohio	Indiana

Net assets (liabilities)	$ 1,121	$ 299	$ (15)	$ 1,405	$ 64	$ 77

The Duke Energy Registrants are not aware of any situations where the maximum exposure to loss significantly exceeds the carrying values shown above except for the PPA with OVEC, which is discussed below, and future exit costs associated with the cancellation of the ACP pipeline, as discussed below.

Pipeline Investments

Duke Energy has investments in various joint ventures to construct and operate pipeline projects. These entities are considered VIEs due to having insufficient equity to finance their own activities without subordinated financial support. Duke Energy does not have the power to direct the activities that most significantly impact the economic performance, the obligation to absorb losses or the right to receive benefits of these VIEs and therefore does not consolidate these entities.

On July 5, 2020, Duke Energy determined that it would no longer invest in the construction of the ACP pipeline. See Notes 1, 3 and 4 for further information regarding this transaction.

For the three and nine months ended September 30, 2020, the ACP investment is considered a significant subsidiary because its income (loss) exceeds 10% of Duke Energy's income (loss). The table below presents unaudited summarized financial information for ACP.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2020	2019	2020	2019
Net (Loss) Income	$ (163)	$ 65	$ (4,505)	$ 178

The table below presents Duke Energy's ownership interest and investment balances in these joint ventures.

		VIE Investment Amount (in millions)	
Entity Name	Ownership Interest	September 30, 2020	December 31, 2019
ACP[(a)]	47%	**$ (927)**	$ 1,179
Constitution[(b)]	24%	**—**	—
Total		**$ (927)**	$ 1,179

(a) During the quarter ended June 30, 2020, Duke Energy determined that it would no longer continue its investment in ACP as described above. The current liability related to the cancellation of the ACP pipeline project represents Duke Energy's continuing obligation to fund its share of ACP's obligations. See Notes 1, 3 and 4 for more information.

(b) During the year ended December 31, 2019, Duke Energy recorded an other-than-temporary impairment related to Constitution. This charge resulted in the full write-down of Duke Energy's investment in Constitution.

Commercial Renewables

Duke Energy has investments in various renewable energy project entities. Some of these entities are VIEs due to Duke Energy issuing guarantees for debt service and operations and maintenance reserves in support of debt financings. Duke Energy does not consolidate these VIEs because power to direct and control key activities is shared jointly by Duke Energy and other owners.

Other

In 2019, Duke Energy acquired a majority ownership in a portfolio of distributed fuel cell projects from Bloom Energy Corporation. Duke Energy is not the primary beneficiary of the assets within the portfolio and does not consolidate the assets in the portfolio.

OVEC

Duke Energy Ohio’s 9% ownership interest in OVEC is considered a non-consolidated VIE due to OVEC having insufficient equity to finance its activities without subordinated financial support. The activities that most significantly impact OVEC's economic performance include fuel strategy and supply activities and decisions associated with ongoing operations and maintenance-related activities. Duke Energy Ohio does not have the unilateral power to direct these activities, and therefore, does not consolidate OVEC.

As a counterparty to an Inter-Company Power Agreement (ICPA), Duke Energy Ohio has a contractual arrangement to receive entitlements to capacity and energy from OVEC’s power plants through June 2040 commensurate with its power participation ratio, which is equivalent to Duke Energy Ohio's ownership interest. Costs, including fuel, operating expenses, fixed costs, debt amortization and interest expense, are allocated to counterparties to the ICPA based on their power participation ratio. The value of the ICPA is subject to variability due to fluctuation in power prices and changes in OVEC's cost of business. On March 31, 2018, FirstEnergy Solutions Corp (FES), a subsidiary of FirstEnergy Corp. and an ICPA counterparty with a power participation ratio of 4.85%, filed for Chapter 11 bankruptcy, which could increase costs allocated to the counterparties. On July 31, 2018, the bankruptcy court rejected the FES ICPA, which means OVEC is an unsecured creditor in the FES bankruptcy proceeding. In addition, certain proposed environmental rulemaking could result in future increased OVEC cost allocations. In July 2020, legislation was proposed to repeal HB 6. Duke Energy cannot predict the outcome in this matter. See Note 3 for additional information.

CRC

See discussion under Consolidated VIEs for additional information related to CRC.

Amounts included in Receivables from affiliated companies in the above table for Duke Energy Ohio and Duke Energy Indiana reflect their retained interest in receivables sold to CRC. These subordinated notes held by Duke Energy Ohio and Duke Energy Indiana are stated at fair value.

The following table shows the gross and net receivables sold.

	Duke Energy Ohio		Duke Energy Indiana	
(in millions)	September 30, 2020	December 31, 2019	September 30, 2020	December 31, 2019
Receivables sold	**$ 226**	$ 253	**$ 310**	$ 307
Less: Retained interests	**45**	64	**74**	77
Net receivables sold	**$ 181**	$ 189	**$ 236**	$ 230

The following table shows sales and cash flows related to receivables sold.

	Duke Energy Ohio				Duke Energy Indiana			
	Three Months Ended September 30,		Nine Months Ended September 30,		Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2020	2019	2020	2019	2020	2019	2020	2019
Sales								
Receivables sold	$ 462	$ 479	$ 1,428	$ 1,483	$ 717	$ 762	$ 1,947	$ 2,172
Loss recognized on sale	2	4	8	11	3	4	9	13
Cash flows								
Cash proceeds from receivables sold	$ 449	$ 471	$ 1,439	$ 1,516	$ 689	$ 762	$ 1,941	$ 2,200
Collection fees received	1	—	1	1	—	—	1	1
Return received on retained interests	1	1	3	5	1	2	4	7

Cash flows from sales of receivables are reflected within Cash Flows From Operating Activities on Duke Energy Ohio's and Duke Energy Indiana's Condensed Consolidated Statements of Cash Flows.

13. REVENUE

Duke Energy earns substantially all of its revenues through its reportable segments, Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables.

Electric Utilities and Infrastructure

Electric Utilities and Infrastructure earns the majority of its revenues through retail and wholesale electric service through the generation, transmission, distribution and sale of electricity. Duke Energy generally provides retail and wholesale electric service customers with their full electric load requirements or with supplemental load requirements when the customer has other sources of electricity.

The majority of wholesale revenues are full requirements contracts where the customers purchase the substantial majority of their energy needs and do not have a fixed quantity of contractually required energy or capacity. As such, related forecasted revenues are considered optional purchases. Supplemental requirements contracts that include contracted blocks of energy and capacity at contractually fixed prices have the following estimated remaining performance obligations:

	Remaining Performance Obligations						
(in millions)	2020	2021	2022	2023	2024	Thereafter	Total
Progress Energy	$ 30	$ 92	$ 94	$ 44	$ 45	$ 58	$ 363
Duke Energy Progress	2	8	8	8	8	—	34
Duke Energy Florida	28	84	86	36	37	58	329
Duke Energy Indiana	2	5	—	7	12	36	62

Revenues for block sales are recognized monthly as energy is delivered and stand-ready service is provided, consistent with invoiced amounts and unbilled estimates.

Gas Utilities and Infrastructure

Gas Utilities and Infrastructure earns its revenues through retail and wholesale natural gas service through the transportation, distribution and sale of natural gas. Duke Energy generally provides retail and wholesale natural gas service customers with all natural gas load requirements. Additionally, while natural gas can be stored, substantially all natural gas provided by Duke Energy is consumed by customers simultaneously with receipt of delivery.

Fixed-capacity payments under long-term contracts for the Gas Utilities and Infrastructure segment include minimum margin contracts and supply arrangements with municipalities and power generation facilities. Revenues for related sales are recognized monthly as natural gas is delivered and stand-ready service is provided, consistent with invoiced amounts and unbilled estimates. Estimated remaining performance obligations are as follows:

	Remaining Performance Obligations						
(in millions)	2020	2021	2022	2023	2024	Thereafter	Total
Piedmont	$ 17	$ 65	$ 64	$ 61	$ 58	$ 377	$ 642

Commercial Renewables

Commercial Renewables earns the majority of its revenues through long-term PPAs and generally sells all of its wind and solar facility output, electricity and Renewable Energy Certificates (RECs) to customers. The majority of these PPAs have historically been accounted for as leases. For PPAs that are not accounted for as leases, the delivery of electricity and the delivery of RECs are considered separate performance obligations.

Other

The remainder of Duke Energy's operations is presented as Other, which does not include material revenues from contracts with customers.

Disaggregated Revenues

Disaggregated revenues are presented as follows:

	Three Months Ended September 30, 2020

As described in Note 1, Duke Energy adopted the new guidance for credit losses effective January 1, 2020, using the modified retrospective method of adoption, which does not require restatement of prior year reported results. The following table presents the reserve for credit losses for trade and other receivables based on adoption of the new standard.

(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
	Three Months Ended September 30, 2020

Trade and other receivables are evaluated based on an estimate of the risk of loss over the life of the receivable and current and historical conditions using supportable assumptions. Management evaluates the risk of loss for trade and other receivables by comparing the historical write-off amounts to total revenue over a specified period. Historical loss rates are adjusted due to the impact of current conditions, including the impacts of COVID-19, as well as forecasted conditions over a reasonable time period. The calculated write-off rate can be applied to the receivable balance for which an established reserve does not already exist. Management reviews the assumptions and risk of loss periodically for trade and other receivables. Due to the COVID-19 pandemic, as described in Note 1, certain jurisdictions have resumed standard billing and credit practices, disconnections for nonpayment and late payment charges, all of which were previously suspended in the first quarter of 2020. The specific actions taken by each Duke Energy Registrant are described in Note 3. The impact of COVID-19 and Duke Energy's related response on customers' ability to pay for service is uncertain, and it is reasonably possible eventual write-offs of customer receivables may increase over current estimates.

The aging of trade receivables is presented in the table below. Duke Energy considers receivables greater than 30 days outstanding past due.

	September 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Unbilled Receivables	**$ 788**	**$ 284**	**$ 274**	**$ 139**	**$ 135**	**$ 1**	**$ 16**	**$ 5**
0-30 days	**1,800**	**475**	**847**	**439**	**406**	**44**	**23**	**66**
30-60 days	**227**	**86**	**84**	**48**	**36**	**7**	**2**	**8**
60-90 days	**94**	**39**	**31**	**20**	**11**	**3**	**1**	**3**
90+ days	**263**	**85**	**68**	**37**	**31**	**40**	**9**	**20**
Trade and Other Receivables	**$ 3,172**	**$ 969**	**$ 1,304**	**$ 683**	**$ 619**	**$ 95**	**$ 51**	**$ 102**

UNBILLED REVENUE

Unbilled revenues are recognized by applying customer billing rates to the estimated volumes of energy or natural gas delivered but not yet billed. Unbilled revenues can vary significantly from period to period as a result of seasonality, weather, customer usage patterns, customer mix, average price in effect for customer classes, timing of rendering customer bills and meter reading schedules and the impact of weather normalization or margin decoupling mechanisms.

Unbilled revenues are included within Receivables and Receivables of VIEs on the Condensed Consolidated Balance Sheets as shown in the following table.

(in millions)	September 30, 2020	December 31, 2019
Duke Energy	**$ 788**	$ 843
Duke Energy Carolinas	**284**	298
Progress Energy	**274**	217
Duke Energy Progress	**139**	122
Duke Energy Florida	**135**	95
Duke Energy Ohio	**1**	1
Duke Energy Indiana	**16**	16
Piedmont	**5**	78

Additionally, Duke Energy Ohio and Duke Energy Indiana sell, on a revolving basis, nearly all of their retail accounts receivable, including receivables for unbilled revenues, to an affiliate, CRC, and account for the transfers of receivables as sales. Accordingly, the receivables sold are not reflected on the Condensed Consolidated Balance Sheets of Duke Energy Ohio and Duke Energy Indiana. See Note 12 for further information. These receivables for unbilled revenues are shown in the table below.

(in millions)	September 30, 2020	December 31, 2019
Duke Energy Ohio	$ 66	$ 82
Duke Energy Indiana	106	115

14. STOCKHOLDERS' EQUITY

Basic EPS is computed by dividing net income available to Duke Energy common stockholders, as adjusted for distributed and undistributed earnings allocated to participating securities and accumulated preferred dividends, by the weighted average number of common shares outstanding during the period. Diluted EPS is computed by dividing net income available to Duke Energy common stockholders, as adjusted for distributed and undistributed earnings allocated to participating securities and accumulated preferred dividends, by the diluted weighted average number of common shares outstanding during the period. Diluted EPS reflects the potential dilution that could occur if securities or other agreements to issue common stock, such as stock options and equity forward sale agreements, were exercised or settled. Duke Energy's participating securities are restricted stock units that are entitled to dividends declared on Duke Energy common stock during the restricted stock unit's vesting periods. Dividends declared on preferred stock are recorded on the Condensed Consolidated Statements of Operations as a reduction of net income to arrive at net income available to Duke Energy common stockholders. Dividends accumulated on preferred stock are an adjustment to net income used in the calculation of basic and diluted EPS.

The following table presents Duke Energy's basic and diluted EPS calculations, the weighted average number of common shares outstanding and common and preferred share dividends declared.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions, except per share amounts)	2020	2019	2020	2019
Net income available to Duke Energy common stockholders	$ 1,265	$ 1,327	$ 1,347	$ 3,047
Accumulated preferred stock dividends adjustment	12	(2)	13	(2)
Less: Impact of participating securities	1	1	2	4
Income from continuing operations available to Duke Energy common stockholders	$ 1,276	$ 1,324	$ 1,358	$ 3,041
Weighted average common shares outstanding – basic	735	729	735	728
Equity forwards	—	—	—	—
Weighted average common shares outstanding – diluted	735	729	735	728
EPS available to Duke Energy common stockholders				
Basic and diluted	$ 1.74	$ 1.82	$ 1.85	$ 4.18
Potentially dilutive items excluded from the calculation[(a)]	2	2	2	2
Dividends declared per common share	$ 0.965	$ 0.945	$ 2.855	$ 2.800
Dividends declared on Series A preferred stock per depositary share[(b)]	$ 0.359	$ 0.359	$ 1.078	$ 0.667
Dividends declared on Series B preferred stock per share[(c)]	$ 24.375	$ —	$ 49.292	$ —

(a) Performance stock awards were not included in the dilutive securities calculation because the performance measures related to the awards had not been met.
(b) 5.75% Series A Cumulative Redeemable Perpetual Preferred Stock dividends are payable quarterly in arrears on the 16th day of March, June, September and December. The preferred stock has a $25 liquidation preference per depositary share.
(c) 4.875% Series B Fixed-Rate Reset Cumulative Redeemable Perpetual Preferred Stock dividends are payable semiannually in arrears on the 16th day of March and September. The preferred stock has a $1,000 liquidation preference per share.

Common Stock

In November 2019, Duke Energy filed a prospectus supplement and executed an Equity Distribution Agreement (EDA) under which it may sell up to $1.5 billion of its common stock through an at-the-market (ATM) offering program, including an equity forward sales component. Under the terms of the EDA, Duke Energy may issue and sell shares of common stock through September 2022. In March 2020, Duke Energy marketed approximately 940,000 shares of common stock through an equity forward transaction under the ATM with an initial forward price of $89.76 per share. In May 2020, Duke Energy marketed approximately 903,000 shares of common stock through an equity forward transaction under the ATM with an initial forward price of $82.44 per share. In August 2020, Duke Energy marketed approximately 936,000 shares of common stock through an equity forward transaction under the ATM with an initial forward price of $79.52 per share.

Separately, in November 2019, Duke Energy marketed an equity offering of 28.75 million shares of common stock through an Underwriting Agreement. In connection with the offering, Duke Energy entered into an equity forward sales agreement with an initial forward price of $85.99 per share.

The equity forward sales agreements require Duke Energy to either physically settle the transaction by issuing shares in exchange for net proceeds at the then-applicable forward sale price specified by the agreement, or net settle in whole or in part through the delivery or receipt of cash or shares. The initial forward sale price will be subject to adjustment based on a floating interest rate factor and other fixed amounts specified in the relevant forward sale agreements. The settlement alternatives are at Duke Energy's election and settlement of the forward sales agreements are expected to occur on or prior to December 31, 2020. If Duke Energy had elected to net share settle these contracts as of September 30, 2020, Duke Energy would have been required to deliver 1.9 million shares. No amounts have or will be recorded in Duke Energy's Condensed Consolidated Financial Statements with respect to these ATM offerings until settlements of the equity forwards occur. Until settlement of the equity forwards, EPS dilution resulting from the agreements, if any, will be determined under the treasury stock method.

15. EMPLOYEE BENEFIT PLANS

DEFINED BENEFIT RETIREMENT PLANS

Duke Energy and certain subsidiaries maintain, and the Subsidiary Registrants participate in, qualified and non-qualified, non-contributory defined benefit retirement plans. Duke Energy's policy is to fund amounts on an actuarial basis to provide assets sufficient to meet benefit payments to be paid to plan participants.

QUALIFIED PENSION PLANS

The following tables include the components of net periodic pension costs for qualified pension plans.

	Three Months Ended September 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 41	$ 12	$ 12	$ 6	$ 5	$ 1	$ 2	$ 1
Interest cost on projected benefit obligation	67	16	21	10	12	4	6	2

Amortization of prior service credit	(8)	(2)	—	—	—	—	—	(2)
Amortization of settlement charges	11	6	5	5	1	—	1	1
Net periodic pension costs	$ —	$ 3	$ —	$ 3	$ (1)	$ —	$ 1	$ (1)

	Three Months Ended September 30, 2019							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 42	$ 13	$ 13	$ 7	$ 5	$ 1	$ 2	$ 1
Interest cost on projected benefit obligation	77	17	24	10	14	5	6	2
Expected return on plan assets	(140)	(36)	(45)	(22)	(22)	(7)	(11)	(5)
Amortization of actuarial loss	28	6	10	4	6	2	3	2
Amortization of prior service credit	(8)	(2)	(1)	—	—	—	—	(2)
Net periodic pension costs	$ (1)	$ (2)	$ 1	$ (1)	$ 3	$ 1	$ —	$ (2)

	Nine Months Ended September 30, 2020							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 124	$ 38	$ 36	$ 20	$ 16	$ 3	$ 6	$ 4
Interest cost on projected benefit obligation	202	47	64	29	35	12	17	7
Expected return on plan assets	(429)	(108)	(143)	(66)	(76)	(21)	(32)	(16)
Amortization of actuarial loss	96	21	30	13	17	5	9	7
Amortization of prior service credit	(24)	(6)	(2)	(1)	(1)	—	(1)	(7)
Amortization of settlement charges	16	8	6	6	1	—	1	1
Net periodic pension costs	$ (15)	$ —	$ (9)	$ 1	$ (8)	$ (1)	$ —	$ (4)

	Nine Months Ended September 30, 2019							
(in millions)	Duke Energy	Duke Energy Carolinas	Progress Energy	Duke Energy Progress	Duke Energy Florida	Duke Energy Ohio	Duke Energy Indiana	Piedmont
Service cost	$ 116	$ 37	$ 34	$ 19	$ 15	$ 3	$ 6	$ 4
Interest cost on projected benefit obligation	242	58	76	34	41	14	19	8
Expected return on plan assets	(426)	(111)	(134)	(66)	(66)	(21)	(32)	(16)
Amortization of actuarial loss	77	17	28	10	18	3	6	5
Amortization of prior service credit	(24)	(6)	(2)	(1)	(1)	—	(1)	(7)
Net periodic pension costs	$ (15)	$ (5)	$ 2	$ (4)	$ 7	$ (1)	$ (2)	$ (6)

NON-QUALIFIED PENSION PLANS

Net periodic pension costs for non-qualified pension plans were not material for the three and nine months ended September 30, 2020, and 2019.

OTHER POST-RETIREMENT BENEFIT PLANS

Net periodic costs for OPEB plans were not material for the three and nine months ended September 30, 2020, and 2019.

16. INCOME TAXES

EFFECTIVE TAX RATES

The ETRs from continuing operations for each of the Duke Energy Registrants are included in the following table.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2020	**2019**	**2020**	**2019**
Duke Energy	**7.8%**	12.4%	**(6.4)%**	12.5%
Duke Energy Carolinas	**12.0%**	16.7%	**13.6 %**	17.7%
Progress Energy	**10.4%**	15.3%	**13.4 %**	16.2%
Duke Energy Progress	**3.1%**	14.7%	**10.0 %**	16.1%
Duke Energy Florida	**21.4%**	16.5%	**20.3 %**	18.0%
Duke Energy Ohio	**16.7%**	12.9%	**16.6 %**	15.2%
Duke Energy Indiana	**19.6%**	23.2%	**19.4 %**	23.7%
Piedmont	**16.7%**	35.7%	**3.7 %**	18.5%

The decrease in the ETR for Duke Energy for the three months ended September 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy for the nine months ended September 30, 2020, was primarily due to the impact of the cancellation of the ACP pipeline project recorded in the second quarter of 2020 and an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Carolinas for the three and nine months ended September 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Progress Energy for the three and nine months ended September 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Duke Energy Progress for the three and nine months ended September 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The increase in the ETR for Duke Energy Florida for the three and nine months ended September 30, 2020, was primarily due to favorable tax adjustments in the prior year.

The increase in the ETR for Duke Energy Ohio for the three and nine months ended September 30, 2020, was primarily due to favorable tax adjustments in the prior year.

The decrease in the ETR for Duke Energy Indiana for the three and nine months ended September 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes.

The decrease in the ETR for Piedmont for the three months ended September 30, 2020, was primarily due to a decrease in the amortization of excess deferred taxes, in relation to pretax losses.

The decrease in the ETR for Piedmont for the nine months ended September 30, 2020, was primarily due to an increase in the amortization of excess deferred taxes and an increase in AFUDC equity.

OTHER TAX MATTERS

On March 27, 2020, the CARES Act was enacted. The CARES Act is an emergency economic stimulus package in response to the COVID-19 pandemic. Among other provisions, the CARES Act accelerates the remaining AMT credit refund allowances resulting in taxpayers being able to immediately claim a refund in full for any AMT credit carryforwards. As a result, the remaining AMT credit carryforwards were reclassified in the first quarter 2020 to a current receivable included in Other within Current Assets on the Condensed Consolidated Balance Sheets. In the third quarter of 2020, Duke Energy received $572 million related to these AMT credit carryforwards and $19 million of interest income. The other provisions within the CARES Act do not materially impact Duke Energy's income tax accounting. See Note 1 for information on COVID-19.

17. SUBSEQUENT EVENTS

For information on subsequent events related to regulatory matters, see Note 3.

On October 29, 2020, Tropical Storm Zeta impacted Duke Energy Carolinas territory causing nearly 1 million customer power outages. The estimated cost of this storm has not been determined, but is expected to be less than $100 million.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following combined Management's Discussion and Analysis of Financial Condition and Results of Operations is separately filed by Duke Energy and Duke Energy Carolinas, Progress Energy, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont. However, none of the registrants make any representation as to information related solely to Duke Energy or the Subsidiary Registrants of Duke Energy other than itself.

DUKE ENERGY

Duke Energy is an energy company headquartered in Charlotte, North Carolina. Duke Energy operates in the U.S. primarily through its wholly owned subsidiaries, Duke Energy Carolinas, Duke Energy Progress, Duke Energy Florida, Duke Energy Ohio, Duke Energy Indiana and Piedmont. When discussing Duke Energy's consolidated financial information, it necessarily includes the results of the Subsidiary Registrants, which, along with Duke Energy, are collectively referred to as the Duke Energy Registrants.

Management's Discussion and Analysis should be read in conjunction with the Condensed Consolidated Financial Statements and Notes for the nine months ended September 30, 2020, and with Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

Executive Overview

Road to Net-Zero Carbon

Duke Energy has committed to net-zero carbon emissions from electric generation by 2050 in a reliable and cost-effective manner. Our commitment to address our climate is integrated into everything we do as we seek to reduce our greenhouse gas emissions and mitigate risk. We have already lowered our carbon emissions by 39% since 2005, retired over 50 coal units since 2010 and expanded our renewables portfolio by adding 8,000 MW of wind and solar onto our system through 2019.

To further support our climate strategy, Duke Energy has announced plans to convert most of its 10,000-vehicle fleet to electric by 2030. In October 2020, Duke Energy also announced its commitment to achieve net-zero methane emissions across our local gas distribution companies by 2030.

On September 1, 2020, Duke Energy Carolinas and Duke Energy Progress filed integrated resource plans with the utility commissions in North Carolina and South Carolina, presenting six potential pathways to transition the energy system to further accelerate carbon reduction over the next 15 years. These pathways were designed with extensive input from more than 200 diverse groups and will continue to be developed with engagement from policymakers and stakeholders. Each potential pathway keeps the company on a trajectory to meet carbon goals while exploring accelerated coal retirement options, increasing renewables, including offshore wind, and further developing new technologies. We expect that execution of some combination of pathways will reduce carbon emissions between approximately 55%-75% through the 2035 planning horizon and will require total incremental investment capital of between $20 billion to $50 billion.

Duke Energy Florida is investing to bring 700 MW of solar online by 2022 and has filed a $1 billion shared solar program called Clean Energy Connection, which will add another 750 MW of solar by the end of 2024. Duke Energy Indiana continues to focus on accelerating closure of coal plants, planning to add to the 1,100 MW of coal that has been retired since 2010.

We will closely monitor the impacts of these plans as they accelerate coal plant retirements and may cause us to seek specific regulatory recovery.

COVID-19

The COVID-19 pandemic is having a significant impact on global health and economic environments. Retail electric sales are down approximately 3% for the year compared to the prior year due to the pandemic. This reduction however is not as steep as expected in our revised March 2020 forecast. The company incurred approximately $39 million and $91 million of incremental COVID-19 costs before deferral for the three and nine months ended September 30, 2020, respectively. These costs are primarily bad debt expense, personal protective equipment and cleaning supplies. For the nine months ended September 30, 2020, the company has deferred approximately $56 million. Further, the company waived approximately $29 million and $54 million of late payment fees for the three and nine months ended September 30, 2020, respectively. The Duke Energy Registrants are monitoring developments closely, have taken steps to mitigate the impacts to our business, and have a pandemic response plan in place to protect our employees, customers and communities.

- Employees. The health of our employees is of paramount importance. Power plants and electricity and natural gas delivery facilities are staffed. Employees who are not involved with power generation, power delivery, customer service or certain other functions have been performing their work duties remotely from home. Employees who need to interact with customers in person are following the Centers for Disease Control and Prevention's safety guidelines, including social distancing and use of face masks. Operating procedure changes include additional cleaning and disinfection procedures at our facilities.

- Customers. The Duke Energy Subsidiary Registrants have resumed certain standard billing and credit practices, disconnections for nonpayment and late payment charges, all of which were previously suspended in the first quarter of 2020 in order to give customers experiencing financial hardship extra time to make payments. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information. The COVID-19 pandemic and stay-at-home orders caused many commercial and industrial customers to reduce or suspend operations beginning in late March and April, which has impacted the Duke Energy Registrants' volumes during the nine months ended September 30, 2020. Many of these customers have begun to restart their businesses.

- Communities. The Duke Energy Foundation announced approximately $6.5 million in donations and grants during the nine months ended September 30, 2020, to support hunger relief, local health and human services nonprofits, and education initiatives across the Duke Energy Registrants' service territories.

- Policymaker actions. The CARES Act was signed by President Trump on March 27, 2020. Duke Energy Registrants are benefiting from certain provisions such as the accelerated refund of AMT credits, which resulted in receipt of a $572 million refund and $19 million of interest income in September 2020, and deferral of certain payroll taxes through December 31, 2020. See Note 16 to the Condensed Consolidated Financial Statements, "Income Taxes," for additional information.
- Cost mitigation. Duke Energy has developed and executed a significant cost containment plan during 2020 to offset a portion of the revenue decline experienced as a result of the COVID-19 pandemic. This plan includes a variety of cost efficiency measures, including managing plant costs due to lower production, lower employee expenses and lower financing costs due to favorable market conditions.

Regulatory Activity. See Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for additional information.

- On July 31, 2020, Duke Energy Carolinas, Duke Energy Progress and the Public Staff filed a Second Agreement and Stipulation of Partial Settlement, which is subject to review and approval of the NCUC, resolving certain remaining issues in the 2019 base rate proceeding. The Duke Energy Carolinas hearing concluded on September 18, 2020 and the Duke Energy Progress hearing concluded on October 6, 2020. Duke Energy Carolinas and Duke Energy Progress expect the NCUC to issue an order on each net rate increase in early 2021. On August 4, 2020, and August 7, 2020, respectively, Duke Energy Carolinas and Duke Energy Progress filed a motion for approval of notice required to implement temporary rates, seeking to exercise its statutory right to implement temporary rates subject to refund. The NCUC approved these requests and rates were effective on August 24, 2020, and September 1, 2020, for Duke Energy Carolinas and Duke Energy Progress, respectively.
- On October 26, 2020, Duke Energy Carolinas and Duke Energy Progress filed a joint petition with the NCUC seeking authorization for the financing of each utilities' storm recovery activities as a result of Hurricane Florence, Hurricane Michael, Hurricane Dorian and Winter Storm Diego. The total revenue requirement over the proposed 15-year bond period for the storm recovery charges is approximately $262 million for Duke Energy Carolinas and $842 million for Duke Energy Progress. The utilities estimate that securitization of the respective storm recovery costs will result in expected customer savings of 32% for Duke Energy Carolinas customers and 33% for Duke Energy Progress customers.
- Duke Energy Indiana filed a general rate case with the IURC on July 2, 2019. The IURC issued its order June 29, 2020, approving a revenue increase of approximately $146 million, before utility receipt taxes. Step one rates are estimated to be approximately 75% of the total and became effective on July 30, 2020. Step two rates are estimated to be the remaining 25% of the total rate increase and will be effective in the first quarter of 2021. Several groups filed notices of appeal of the IURC order on July 29, 2020.
- COVID-19 deferral requests
    - Duke Energy Carolinas and Duke Energy Progress filed a joint petition with the NCUC for deferral treatment of incremental costs and waived customer fees due to the COVID-19 pandemic on August 7, 2020. Duke Energy Carolinas and Duke Energy Progress filed a similar request with the PSCSC on August 14, 2020.
    - Duke Energy Ohio on May 11, 2020, filed with the PUCO a request seeking deferral of incremental costs incurred due to the COVID-19 pandemic, as well as specific miscellaneous lost revenues. The request seeks to use existing bad debts and uncollectible riders already in place for both electric and natural gas operations. Duke Energy Ohio would subsequently file for rider recovery at a later date. On June 17, 2020, the PUCO approved Duke Energy Ohio's deferral application.
    - On May 8, 2020, Duke Energy Indiana, along with other Indiana utilities, filed a request with the IURC for approval of deferral treatment for costs associated with the COVID-19 pandemic. On June 29, 2020, the IURC issued its order permitting jurisdictional utilities to use regulatory accounting for any impacts associated with the prohibition on utility disconnections, waiver or exclusion of certain utility fees, the use of expanded payment arrangements to aid customers, and for COVID-19 related uncollectible and incremental bad debt expense.

Matters Impacting Future Results

The matters discussed herein could materially impact the future operating results, financial condition and cash flows of the Duke Energy Registrants and Business Segments.

COVID-19

Duke Energy cannot predict the extent to which the COVID-19 pandemic will impact its results of operations, financial position and cash flows in the future. Duke Energy will continue to actively monitor the impacts of COVID-19 including the economic slowdown caused by business closures or by reduced operations of businesses and governmental agencies. The pandemic and resultant economic slowdown will adversely affect the company's customers, suppliers and partners and could cause an increase in certain costs, such as bad debt, and a reduction in the demand for energy. It could also cause delays in construction for Commercial Renewables and availability of financing. The company also has various pending rate case proceedings that have been delayed. Duke Energy has cost mitigation plans in place to partially offset these impacts, and the ability to execute these plans is critical to preserving future financial results. Furthermore, the actions of federal, state or local authorities may impact our business operations in ways that we currently cannot anticipate. See Item 1A. Risk Factors for discussion of risks associated with COVID-19 and Liquidity and Capital Resources within this section for a discussion of liquidity impacts of COVID-19.

ACP

On July 5, 2020, Duke Energy and Dominion Energy determined that they would no longer invest in the construction of the Atlantic Coast Pipeline. Duke Energy has recorded approximately $2.1 billion of pretax charges and expects additional charges of less than $50 million to be recorded when certain exit costs related to the project are incurred by ACP. Estimates used to calculate the loss could be revised and exit obligations, which have not yet been incurred or recorded could have an adverse impact on future results. Furthermore, the loss of earnings from this project, including AFUDC, will lower Duke Energy's future expected results. See Notes 1, 3, 4 and 11 to the Condensed Consolidated Financial Statements, "Organization and Basis of Presentation," "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information.

Regulatory Matters

Coal Ash Costs

On December 31, 2019, Duke Energy Carolinas and Duke Energy Progress entered into a settlement agreement with North Carolina Department of Environmental Quality and certain community groups under which Duke Energy Carolinas and Duke Energy Progress agreed to excavate seven of the nine remaining coal ash basins in North Carolina with ash moved to on-site lined landfills. At the two remaining basins, uncapped basin ash will be excavated and moved to lined landfills. Duke Energy Carolinas and Duke Energy Progress have also received orders from the PSCSC granting the companies' requests for retail rate increases but denying recovery of certain coal ash costs. Duke Energy Carolinas and Duke Energy Progress have appealed these decisions to the South Carolina Supreme Court and those appeals are pending. Appeals of the 2017 North Carolina approved rate cases for Duke Energy Carolinas and Duke Energy Progress are still pending at the North Carolina Supreme Court. The North Carolina Attorney General and various intervenors primarily dispute the allowance of recovery of coal ash costs from customers, which was approved by the NCUC. An order from regulatory or judicial authorities disallowing recovery of costs related to closure of these ash basins could have an adverse impact on future results.

In 2015, the EPA published in the Federal Register a rule to regulate the disposal of CCR from electric utilities as solid waste. Duke Energy Indiana has interpreted the rule to identify the coal ash basin sites impacted and has assessed the amounts of coal ash subject to the rule and a method of compliance. Duke Energy Indiana's interpretation of the requirements of the CCR rule is subject to potential legal challenges and further regulatory approvals, which could result in additional ash basin closure requirements, higher costs of compliance and greater AROs. Additionally, Duke Energy Indiana has retired facilities that are not subject to the CCR rule. Duke Energy Indiana may incur costs at these facilities to comply with environmental regulations or to mitigate risks associated with on-site storage of coal ash. An order from regulatory authorities disallowing recovery of costs related to closure of ash basins could have an adverse impact.

Storm Costs

Duke Energy Carolinas, Duke Energy Progress and Duke Energy Florida's service territories were impacted by several named storms in 2018. Hurricane Florence, Hurricane Michael and Winter Storm Diego caused flooding, extensive damage and widespread power outages to the service territories of Duke Energy Carolinas and Duke Energy Progress. Duke Energy Florida's service territory was also impacted by Hurricane Michael, a Category 5 hurricane and the most powerful storm to hit the Florida Panhandle in recorded history. In September 2019, Hurricane Dorian impacted Duke Energy Progress and Duke Energy Florida's service territories. A significant portion of the incremental operation and maintenance expenses related to these storms has been deferred. An order from regulatory authorities disallowing the deferral and future recovery of storm restoration costs could have an adverse impact.

Grid Improvement Costs

Duke Energy Carolinas received an order from the NCUC in 2018, which denied the Grid Rider Stipulation and deferral treatment of grid improvement costs. Duke Energy Carolinas and Duke Energy Progress have petitioned for deferral of future grid improvement costs in their 2019 rate cases. There could be adverse impact if grid improvement costs are not ultimately approved for recovery and/or deferral treatment.

Rate Cases

In 2019, Duke Energy Carolinas and Duke Energy Progress filed general rate cases with the NCUC. The outcome of these rate cases could have a material impact.

MGP

The PUCO has issued an order authorizing recovery of MGP costs at certain sites in Ohio with a deadline to complete the MGP environmental investigation and remediation work prior to December 31, 2016. This deadline was subsequently extended to December 31, 2019. Duke Energy Ohio has filed for a request for extension of the deadline. A hearing on that request has not been scheduled. Disallowance of costs incurred, failure to complete the work by the deadline or failure to obtain an extension from the PUCO could result in an adverse impact.

For additional information, see Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters."

Commercial Renewables

Duke Energy continues to monitor recoverability of a renewable merchant plant located in the Electric Reliability Council of Texas West market, due to declining market pricing and declining long-term forecasted energy prices, primarily driven by lower forecasted natural gas prices. Based on the most recent recoverability test performed this quarter, the carrying value approximated the aggregate estimated future undiscounted cash flows for this plant. A continued decline in energy market pricing would likely result in a future impairment. Impairment of this asset could result in adverse impacts. For additional information, see Note 2 to the Condensed Consolidated Financial Statements, "Business Segments."

See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Duke Energy Registrants' Annual Reports on Form 10-K for the year ended December 31, 2019, for discussion of risks associated with the Tax Act.

Results of Operations

Non-GAAP Measures

Management's Discussion and Analysis includes financial information prepared in accordance with GAAP in the U.S., as well as certain non-GAAP financial measures such as adjusted earnings and adjusted EPS discussed below. Generally, a non-GAAP financial measure is a numerical measure of financial performance, financial position or cash flows that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. Non-GAAP financial measures should be viewed as a supplement to, and not a substitute for, financial measures presented in accordance with GAAP. Non-GAAP measures presented may not be comparable to similarly titled measures used by other companies because other companies may not calculate the measures in the same manner.

Management evaluates financial performance in part based on non-GAAP financial measures, including adjusted earnings and adjusted EPS. Adjusted earnings and adjusted EPS represent income from continuing operations available to Duke Energy Corporation common stockholders in dollar and per share amounts, adjusted for the dollar and per share impact of special items. As discussed below, special items represent certain charges and credits, which management believes are not indicative of Duke Energy's ongoing performance. The most directly comparable GAAP measures for adjusted earnings and adjusted EPS are GAAP Reported Earnings and GAAP Reported EPS, respectively.

Special items included in the periods presented below include the following, which management believes do not reflect ongoing costs:

- Gas Pipeline Investments represents costs related to the cancellation of the ACP pipeline and additional exit costs related to Constitution.
- Severance represents the reversal of 2018 costs, which were deferred as a result of a partial settlement in the Duke Energy Carolinas and the Duke Energy Progress 2019 North Carolina rate cases.
- Regulatory Settlements represents charges related to Duke Energy Carolinas' and Duke Energy Progress' partial settlements in the 2019 North Carolina rate cases.
- Impairment Charges represents a reduction of a prior year impairment at Citrus County CC.

Three Months Ended September 30, 2020, as compared to September 30, 2019

GAAP reported EPS was $1.74 for the third quarter of 2020 compared to $1.82 in the third quarter of 2019. GAAP reported earnings decreased primarily due to unfavorable weather, additional charges related to the gas pipeline investments and higher depreciation expense, partially offset by positive rate case impacts and lower operations and maintenance expense.

As discussed above, management also evaluates financial performance based on adjusted EPS. Duke Energy’s third quarter 2020 adjusted EPS was $1.87 compared to $1.79 for the third quarter of 2019. The increase in adjusted earnings was primarily due to positive rate case impacts and lower operations and maintenance expense, partially offset by unfavorable weather.

The following table reconciles non-GAAP measures, including adjusted EPS, to their most directly comparable GAAP measures.

	Three Months Ended September 30,			
	2020		**2019**	
(in millions, except per share amounts)	**Earnings**	**EPS**	**Earnings**	**EPS**
GAAP Reported Earnings/GAAP Reported EPS	**$ 1,265**	**$ 1.74**	$ 1,327	$ 1.82
Adjustments:				
Gas Pipeline Investments[a]	**69**	**0.09**	—	—
Regulatory Settlements[b]	**27**	**0.04**	—	—
Impairment Charges[c]	**—**	**—**	(19)	(0.03)
Adjusted Earnings/Adjusted EPS	**$ 1,361**	**$ 1.87**	$ 1,308	$ 1.79

(a) Net of tax benefit of $21 million.
(b) Net of tax benefit of $8 million.
(c) Net of $6 million tax expense.

Nine Months Ended September 30, 2020, as compared to September 30, 2019

GAAP Reported EPS was $1.85 for the nine months ended September 30, 2020, compared to $4.18 for the nine months ended September 30, 2019. GAAP reported earnings decreased primarily due to the cancellation of the ACP pipeline.

As discussed above, management also evaluates financial performance based on adjusted EPS. Duke Energy’s adjusted EPS was $4.09 for the nine months ended September 30, 2020, compared to $4.15 for the nine months ended September 30, 2019. The decrease in adjusted earnings was primarily due to unfavorable weather, higher depreciation expense, a prior year adjustment related to income tax recognition for equity method investments and preferred stock dividends. This was partially offset by positive rate case impacts, growth in Commercial Renewables and lower operations and maintenance expense.

The following table reconciles non-GAAP measures, including adjusted EPS, to their most directly comparable GAAP measures.

	Nine Months Ended September 30,			
	2020		2019	
(in millions, except per-share amounts)	Earnings	EPS	Earnings	EPS
GAAP Reported Earnings/GAAP Reported EPS	$ 1,347	$ 1.85	$ 3,047	$ 4.18
Adjustments:				
Gas Pipeline Investments[(a)]	1,695	2.30	—	—
Severance[(b)]	(75)	(0.10)	—	—
Regulatory Settlements[(c)]	27	0.04	—	—
Impairment Charges[(d)]	—	—	(19)	(0.03)
Adjusted Earnings/Adjusted EPS	$ 2,994	$ 4.09	$ 3,028	$ 4.15

(a) Net of tax benefit of $395 million.
(b) Net of tax expense of $23 million.
(c) Net of tax benefit of $8 million.
(d) Net of tax expense of $6 million.

SEGMENT RESULTS

The remaining information presented in this discussion of results of operations is on a GAAP basis. Management evaluates segment performance based on segment income. Segment income is defined as income from continuing operations net of income attributable to noncontrolling interests and preferred stock dividends. Segment income includes intercompany revenues and expenses that are eliminated in the Condensed Consolidated Financial Statements.

Duke Energy's segment structure includes the following segments: Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables. The remainder of Duke Energy's operations is presented as Other. See Note 2 to the Condensed Consolidated Financial Statements, “Business Segments,” for additional information on Duke Energy’s segment structure.

Electric Utilities and Infrastructure

Net proportional MW capacity in operation				50,371	49,711	660

Three Months Ended September 30, 2020, as compared to September 30, 2019

Electric Utilities and Infrastructure’s variance is due to lower fuel revenues and unfavorable weather partially offset by higher revenues resulting from the Indiana retail rate case and Duke Energy Florida base and solar rate adjustments. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $168 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs at Duke Energy Florida in response to the COVID-19 pandemic;
- a $75 million decrease in retail sales, net of fuel revenues, due to unfavorable weather compared to prior year; and
- a $62 million decrease in rider revenues primarily due to energy efficiency programs.

Partially offset by:

- a $75 million increase due to higher pricing from the Indiana retail rate case, net of rider revenues; and
- a $28 million increase in retail pricing due to Duke Energy Florida's base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment.

Operating Expenses. The variance was driven primarily by:

- a $125 million decrease in fuel used in electric generation and purchased power primarily due to lower generation demand and lower fuel costs;
- a $31 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case; and
- a $15 million decrease in property and other taxes primarily due to prior year property tax reassessments.

Partially offset by:

- a $40 million increase in impairment charges primarily due to an impairment of Duke Energy Carolina's Clemson assets and a prior year reduction of an impairment at Duke Energy Florida's Citrus County CC; and
- a $27 million increase in depreciation and amortization expense primarily due to additional plant in service and change in depreciation rates due to the Indiana retail rate case.

Other Income and Expenses, net. The variance was primarily due to lower AFUDC equity in the current year.

Interest Expense. The variance was primarily due to lower interest rates on outstanding debt.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes. The ETRs for the three months ended September 30, 2020, and 2019 were 13.0% and 17.1%, respectively. The decrease in the ETR was primarily due to an increase in the amortization of excess deferred taxes.

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Electric Utilities and Infrastructure's variance is due to unfavorable weather, lower weather-normal retail sale volumes driven by impacts from the COVID-19 pandemic and lower wholesale revenues, partially offset by higher revenues resulting from the Indiana and South Carolina retail rate cases and Duke Energy Florida base and solar rate adjustments. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $642 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs at Duke Energy Florida in response to the COVID-19 pandemic;
- a $199 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year;
- a $58 million decrease in wholesale revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress;
- a $40 million decrease in rider revenues from energy efficiency programs; and
- a $24 million decrease in weather-normal retail sale volumes due to lower nonresidential customer demand driven by impacts from the COVID-19 pandemic.

Partially offset by:

- a $75 million increase due to higher pricing from the Indiana retail rate case, net of rider revenues;
- a $67 million increase in retail pricing due to Duke Energy Florida's base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment; and
- a $32 million increase due to higher pricing from South Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $583 million decrease in fuel used in electric generation and purchased power primarily due to lower generation demand and lower fuel, coal, and natural gas costs;

- a $66 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case; and
- a $14 million decrease in property and other taxes primarily due to prior year property tax reassessments.

Partially offset by:

- a $99 million increase in depreciation and amortization expense primarily due to additional plant in service and a change in depreciation rates from the Indiana and South Carolina retail rate cases; and
- a $39 million increase in impairment charges primarily due to an impairment of Duke Energy Carolina's Clemson assets and a prior year reduction of an impairment at Duke Energy Florida's Citrus County CC.

Other Income and Expenses, net. The variance was primarily due to lower AFUDC equity in the current year.

Interest Expense. The variance was primarily due to lower interest rates on outstanding debt.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes. The ETRs for the nine months ended September 30, 2020, and 2019, were 14.8% and 18.1%, respectively. The decrease in the ETR was primarily due to an increase in the amortization of excess deferred taxes.

Gas Utilities and Infrastructure

Three Months Ended September 30, 2020, as compared to September 30, 2019

Gas Utilities and Infrastructure's results were impacted primarily by the cancellation of the ACP pipeline. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- an $8 million decrease due to lower natural gas costs passed through to customers and decreased off-system sales natural gas costs; and
- a $4 million decrease due to return of EDIT to customers.

Partially offset by:

- a $5 million increase due to North Carolina base rate case increases.

Operating Expenses. The variance was driven primarily by:

- a $7 million decrease in cost of natural gas primarily due to lower natural gas prices and decreased off-system sales natural gas costs.

Partially offset by:

- a $7 million increase in impairment charges due to Piedmont ACP project materials write-off.

Equity in (losses) earnings of unconsolidated affiliates. The variance was driven primarily by additional charges related to the cancellation of the ACP pipeline.

Income Tax Benefit. The increase in the tax benefit was primarily due to a decrease in pretax income, partially offset by a decrease in AFUDC Equity.

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Gas Utilities and Infrastructure's results were impacted primarily by the cancellation of the ACP pipeline. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was driven primarily by:

- a $151 million decrease due to lower natural gas costs passed through to customers, lower volumes, and decreased off-system sales natural gas costs; and
- a $31 million decrease due to return of EDIT to customers.

Partially offset by:

- a $65 million increase due to North Carolina base rate case increases.

Operating Expenses. The variance was driven primarily by:

- a $151 million decrease in cost of natural gas due to lower natural gas prices, lower volumes and decreased off-system sales natural gas costs; and
- a $13 million decrease in operation, maintenance and other due to deferral of previously expensed IT project costs and employee labor and benefits costs.

Partially offset by:

- a $7 million increase in impairment charges due to Piedmont ACP project materials write-off.

Equity in (losses) earnings of unconsolidated affiliates. The variance was driven primarily by the cancellation of the ACP pipeline.

Other Income and Expenses, net. The variance was driven primarily by AFUDC equity and intercompany interest related to Belews Creek and Marshall Power Generation contracts.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, offset by lower AFUDC debt income.

Income Tax Benefit. The increase in tax benefit was primarily due to a decrease in pretax income driven by the impact of the cancellation of the ACP pipeline project recorded in the second quarter of 2020. The ETRs for the nine months ended September 30, 2020, and 2019, were 20.7% and 0.0%, respectively. The increase in the ETR was primarily due to an adjustment, recorded in the first quarter of 2019, related to the income tax recognition for equity method investments. The equity method investment adjustment was immaterial and relates to prior years.

Commercial Renewables

	Three Months Ended September 30,			Nine Months Ended September 30,		
(in millions)	2020	2019	Variance	2020	2019	Variance

Add: Loss Attributable to Noncontrolling Interests	**70**	19	51	**208**	110	98
Segment Income	**$ 60**	$ 40	$ 20	**$ 207**	$ 139	$ 68
Renewable plant production, GWh	**2,563**	2,146	417	**7,660**	6,528	1,132
Net proportional MW capacity in operation[(a)]				**3,984**	3,162	822

(a) Certain projects are included in tax equity structures where investors have differing interests in the project's economic attributes. One hundred percent of the tax equity project's capacity is included in the table above.

Three Months Ended September 30, 2020, as compared to September 30, 2019

Commercial Renewables' results were favorable primarily due to the growth of new tax equity investments, which includes over 200 MW of capacity installed during the third quarter 2020. The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was primarily driven by a $10 million decrease resulting from lower wind resource and solar irradiance and a $13 million decrease within the distributed energy portfolios for lower engineering and construction costs related to project delays from COVID-19. This was partially offset by a $12 million increase from growth of new projects placed in service.

Operating Expenses. The variance was due to an $18 million increase in operating expenses driven by the growth of new projects placed in service. This was partially offset by $12 million decrease within the distributed energy portfolios for lower engineering and construction costs related to project delays from COVID-19 and $4 million of continued cost saving measures.

Other Income and Expenses, net. The decrease in other income was primarily due to a $12 million reclassification to Interest Expense in the prior year of non-qualifying hedge activity.

Interest Expense. The decrease was primarily due to a $12 million reclassification from Other Income and Expenses, net and a $3 million reclassification from Operating Expenses in the prior year of non-qualifying hedge activity as well as higher capitalized interest of $2 million in the current year for solar and wind projects in development.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by an increase in taxes associated with tax equity investments and a decrease in production tax credits generated.

Loss Attributable to Noncontrolling Interests. The increase was driven by the growth of new tax equity investments.

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Commercial Renewables' results were favorable primarily due to growth of new tax equity investments. Since the third quarter of 2019, Commercial Renewables has placed in service approximately 800 MW of capacity.

The following is a detailed discussion of the variance drivers by line item.

Operating Revenues. The variance was primarily driven by a $32 million increase associated with the growth of new projects placed in service. This was partially offset by an $18 million decrease within the distributed energy portfolios for lower engineering and construction costs related to delays from COVID-19.

Operating Expenses. The variance was primarily driven by a $45 million increase in operating expenses due to the growth of new projects placed in service and a $6 million impairment charge related to a non-contracted wind project located within the Electric Reliability Council of Texas west market. This was partially offset by a $22 million decrease within the distributed energy portfolios for lower engineering and construction costs related to delays from COVID-19.

Interest Expense. The decrease was primarily driven by $15 million of non-qualifying hedge activity in the prior year and higher capitalized interest of $11 million in the current year for solar and wind projects in development.

Income Tax Benefit. The decrease in the tax benefit was primarily driven by an increase in taxes associated with tax equity investments and a decrease in production tax credits generated.

Loss Attributable to Noncontrolling Interests. The increase was driven primarily by the growth of new tax equity investments**.**

Income Tax Benefit	**(66)**	(54)	(12)	**(149)**	(132)	(17)
Less: Preferred Dividends	**39**	15	24	**93**	27	66
Net Loss	**$ (103)**	$ (124)	$ 21	**$ (299)**	$ (328)	$ 29

Three Months Ended September 30, 2020, as compared to September 30, 2019

The variance was primarily driven by higher returns on investments that fund certain employee benefit obligations, lower state income tax expense and higher Bison investment income. The following is a detailed discussion of the variance drivers by line item.

Operating Expenses. The increase was primarily driven by higher administrative expenses and higher expenses associated with certain employee benefit obligations.

Other Income and Expenses, net. The variance was primarily due to higher returns on investments that fund certain employee benefit obligations and higher Bison investment income.

Interest Expense. The variance was primarily due to lower outstanding short-term debt and lower interest rates.

Income Tax Benefit. The increase in the tax benefit was primarily driven by the issuance of guidance impacting taxes previously recorded, partially offset by a decrease in pretax losses. The ETRs for the three months ended September 30, 2020, and 2019 were 50.8% and 33.1%, respectively. The increase in the ETR was primarily due to the issuance of guidance impacting taxes previously recorded.

Preferred Dividends. The variance was driven by the declaration of preferred stock dividends on preferred stock issued in 2019.

Nine Months Ended September 30, 2020, as compared to September 30, 2019

The variance was primarily driven by a reversal of corporate allocated severance costs and lower state income tax expense, partially offset by lower returns on investments, higher loss experience related to non-property captive insurance claims and the declaration of preferred stock dividends. The following is a detailed discussion of the variance drivers by line item.

Operating Expenses. The decrease was primarily due to the deferral of 2018 corporate allocated severance costs due to the partial settlement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, partially offset by higher loss experience related to non-property captive insurance claims.

Other Income and Expenses, net. The variance was primarily due to lower returns on investments that fund certain employee benefit obligations and lower earnings on the NMC investment.

Interest Expense. The variance was primarily due to lower outstanding short-term debt and lower interest rates.

Income Tax Benefit. The increase in the tax benefit was primarily driven by lower state income tax expense, partially offset by a decrease in pretax losses. The ETRs for the nine months ended September 30, 2020, and 2019 were 42.0% and 30.5%, respectively. The increase in the ETR was primarily due to lower state income tax expense.

Preferred Dividends. The variance was driven by the declaration of preferred stock dividends on preferred stock issued in 2019.

DUKE ENERGY CAROLINAS

Results of Operations

	Nine Months Ended September 30,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 5,416**	$ 5,619	$ (203)
Operating Expenses			
Fuel used in electric generation and purchased power	**1,326**	1,371	(45)
Operation, maintenance and other	**1,218**	1,324	(106)

Net Income	**$ 1,128**	$ 1,184	$ (56)

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	**2020**
Residential sales	(2.2)%
General service sales	(6.5)%
Industrial sales	(9.4)%
Wholesale power sales	(3.0)%
Joint dispatch sales	(56.0)%
Total sales	(7.2)%
Average number of customers	1.9 %

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $131 million decrease in retail sales due to unfavorable weather in the current year;
- an $86 million decrease in fuel revenues due to lower prices and retail sales volumes; and
- a $22 million decrease in rider revenues primarily due to energy efficiency programs.

Partially offset by:

- a $19 million increase in weather-normal retail sales volumes; and
- a $17 million increase due to higher pricing from the South Carolina and North Carolina retail rate case, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $106 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, partially offset by higher storm restoration costs; and
- a $45 million decrease in fuel used in electric generation and purchased power primarily due to lower retail sales volumes, net of a prior period true up.

Partially offset by:

- a $77 million increase in depreciation and amortization expense primarily due to additional plant in service and new depreciation rates associated with the South Carolina rate case.

Other Income and Expenses, net. The variance was primarily due to higher AFUDC equity in the current year.

Interest Expense. The variance was primarily due to higher debt outstanding in the current year.

Income Tax Expense. The decrease in tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

PROGRESS ENERGY

Results of Operations

	Nine Months Ended September 30,		
(in millions)	**2020**	**2019**	**Variance**

Net Income	**1,233**	1,098	135

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $485 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs in response to the COVID-19 pandemic at Duke Energy Florida and lower fuel prices, volumes and native load transfer sales in the current year at Duke Energy Progress;
- a $47 million decrease in wholesale power revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and lower capacity volumes at Duke Energy Progress, partially offset by increased demand at Duke Energy Florida;
- a $47 million decrease in retail sales, net of fuel revenues, due to unfavorable weather in the current year at Duke Energy Progress, partially offset by favorable weather in the current year at Duke Energy Florida;
- a $44 million decrease in rider revenues primarily due to the Crystal River 3 uprate regulatory asset being fully recovered in 2019 at Duke Energy Florida; and
- a $24 million decrease in weather-normal retail sales volume.

Partially offset by:

- a $107 million increase in storm revenues due to Hurricane Dorian collections at Duke Energy Florida;
- a $67 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment at Duke Energy Florida;
- a $15 million increase due to higher pricing from the South Carolina retail rate case, net of a return of EDIT to customers at Duke Energy Progress; and
- an $8 million increase in other revenues primarily due to increased transmission and lighting equipment revenues at Duke Energy Florida.

Operating Expenses. The variance was driven primarily by:

- a $472 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix at Duke Energy Progress and lower fuel costs at Duke Energy Florida;
- a $24 million decrease in operation, maintenance and other expense at Duke Energy Progress primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, reduced outage costs and energy efficiency program costs, partially offset by storm cost amortizations at Duke Energy Florida;

- a $21 million decrease in depreciation and amortization expense primarily driven by a decrease in coal ash amortization, partially offset by a higher depreciable base and impacts from North Carolina and the South Carolina rate cases at Duke Energy Progress; and
- a $20 million decrease in property and other taxes driven by lower gross receipts taxes due to decreased fuel revenues and lower accrued property taxes at Duke Energy Florida.

Partially offset by:

- a $26 million increase in impairment charges primarily due to the prior year's impairment reduction related to Citrus County CC at Duke Energy Florida.

Other Income and Expenses, net. The variance was primarily due to lower AFUDC equity in the current year at Duke Energy Progress.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt at Duke Energy Progress.

Income Tax Expense. The decrease in tax expense was primarily due to an increase in the amortization of excess deferred taxes, partially offset by an increase in pretax income.

DUKE ENERGY PROGRESS

Results of Operations

	Nine Months Ended September 30,		
(in millions)	**2020**	**2019**	**Variance**

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior period	**2020**
Residential sales	(2.8)%
General service sales	(7.7)%
Industrial sales	(5.4)%
Wholesale power sales	(9.5)%
Joint dispatch sales	19.9 %
Total sales	(4.9)%
Average number of customers	1.7 %

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $230 million decrease in fuel cost recovery driven by lower fuel prices and volumes as well as less native load transfer sales in the current year;
- a $73 million decrease in retail sales due to unfavorable weather in the current year;
- a $58 million decrease in wholesale power revenues, net of fuel, primarily due to higher recovery of coal ash cost in the prior year and decreased volumes, partially offset by increased capacity rates; and
- a $14 million decrease in weather-normal retail sales volumes in the current year.

Partially Offset by:

- a $15 million increase due to higher pricing from the South Carolina and North Carolina retail rate cases, net of a return of EDIT to customers.

Operating Expenses. The variance was driven primarily by:

- a $234 million decrease in fuel used in electric generation and purchased power primarily due to lower demand and changes in generation mix; and
- a $100 million decrease in operation, maintenance and other expense primarily driven by the deferral of 2018 severance costs due to the partial settlement agreement between Duke Energy Carolinas and the Public Staff of the NCUC related to the 2019 North Carolina retail rate case, reduced outage costs and energy efficiency program costs; and
- a $22 million decrease in depreciation and amortization expense primarily driven by a decrease in coal ash amortization, partially offset by a higher depreciable base and impacts from North Carolina and the South Carolina rate cases.

Other Income and Expenses, net. The variance was primarily due to lower AFUDC equity in the current year.

Interest Expense. The variance was driven primarily by lower interest rates on outstanding debt.

Income Tax Expense. The decrease in tax expense was primarily due to an increase in the amortization of excess deferred taxes, partially offset by an increase in pretax income.

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Wholesale power sales include both billed and unbilled sales. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior period	**2020**
Residential sales	2.9 %
General service sales	(6.0)%
Industrial sales	6.9 %
Wholesale and other	(6.8)%
Total sales	(0.7)%
Average number of customers	1.7 %

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $255 million decrease in fuel revenues driven by lower sales volumes as well as an accelerated refund of fuel costs in response to the COVID-19 pandemic;
- a $44 million decrease in rider revenues primarily due to full recovery of the Crystal River 3 uprate regulatory asset in 2019; and
- a $10 million decrease in weather-normal retail sales volumes.

Partially offset by:

- a $107 million increase in storm revenues due to Hurricane Dorian collections;
- a $67 million increase in retail pricing due to base rate adjustments related to annual increases from the 2017 Settlement Agreement and the Solar Base Rate Adjustment;
- a $26 million increase in retail sales, net of fuel revenues, due to favorable weather in the current year;
- an $11 million increase in wholesale power revenues, net of fuel, primarily due to increased demand; and
- an $8 million increase in other revenues primarily due to increased transmission revenues and lighting equipment rentals, partially offset by lower late payment and service charge revenues due to a moratorium during the COVID-19 pandemic.

Operating Expenses. The variance was driven primarily by:

- a $238 million decrease in fuel used in electric generation and purchased power primarily due to lower fuel costs; and
- a $19 million decrease in property and other taxes driven by lower gross receipts taxes due to decreased fuel revenues and lower accrued property taxes.

Partially offset by:

- a $76 million increase in operation, maintenance and other expense primarily due to storm cost amortizations; and
- a $21 million increase in impairment charges primarily due to the prior year's impairment reduction related to Citrus County CC.

Income Tax Expense. The increase in tax expense was primarily due to an increase in pretax income and favorable tax adjustments in the prior year.

DUKE ENERGY OHIO

The following table shows the percent changes in GWh sales of electricity, dekatherms of natural gas delivered and average number of electric and natural gas customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

	Electric	Natural Gas
Increase (Decrease) over prior year	**2020**	**2020**
Residential sales	(0.1)%	(6.6)%
General service sales	(7.8)%	(9.4)%
Industrial sales	(7.9)%	(3.9)%
Wholesale electric power sales	(37.3)%	n/a
Other natural gas sales	n/a	(1.8)%
Total sales	(6.3)%	(6.0)%
Average number of customers	1.4 %	1.1 %

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $46 million decrease in fuel related revenues primarily due to lower prices and decreased volumes;
- a $13 million decrease in revenues due to unfavorable weather in the current year;
- a $10 million decrease in other revenues due to lower OVEC sales into PJM;
- a $7 million decrease in revenues primarily due to the suspension of the Manufactured Gas Plant rider and lower energy efficiency riders, partially offset by the Distribution Capital Investment rider; and
- a $7 million decrease in bulk power marketing sales.

Partially offset by:

- a $17 million increase in retail pricing primarily due to rate case impacts in Kentucky; and
- an $11 million increase in PJM transmission revenues as a result of increased capital spend.

Operating Expenses. The variance was driven primarily by:

- a $57 million decrease in fuel expense, primarily driven by lower retail prices, decreased volumes and lower OVEC costs; and
- a $45 million decrease in operations, maintenance and other expense primarily due to Customer Connect and Network Integration Transmission Services deferrals, the timing of energy efficiency programs and outage costs, lower employee benefit expenses and lower vegetation and pole maintenance costs.

Partially offset by:

- a $15 million increase in property and other taxes primarily due to higher property taxes primarily due to increased plant in service, partially offset by lower kilowatt taxes and franchise taxes; and
- a $9 million increase in depreciation and amortization primarily driven by an increase in distribution plant, partially offset by lower amortization due to the suspension of the MGP rider in Ohio and environmental surcharge mechanism amortization of deferred coal ash pond ARO.

Other Income and Expenses, net. The decrease was primarily due to lower AFUDC equity and lower intercompany interest income, partially offset by a decrease in write-offs associated with certified supplier uncollectible amounts.

DUKE ENERGY INDIANA

Results of Operations

	Nine Months Ended September 30,		
(in millions)	**2020**	**2019**	**Variance**
Operating Revenues	**$ 2,070**	$ 2,289	$ (219)
Operating Expenses

Income Before Income Taxes	**371**	476	(105)
Income Tax Expense	**72**	113	(41)
Net Income	**$ 299**	$ 363	$ (64)

The following table shows the percent changes in GWh sales and average number of customers. The percentages for retail customer classes represent billed sales only. Total sales includes billed and unbilled retail sales and wholesale sales to incorporated municipalities, public and private utilities and power marketers. Amounts are not weather-normalized.

Increase (Decrease) over prior year	2020
Residential sales	(1.1)%
General service sales	(7.1)%
Industrial sales	(9.8)%
Wholesale power sales	3.8 %
Total sales	(5.5)%
Average number of customers	1.5 %

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $157 million decrease in fuel revenues primarily due to lower fuel cost recovery driven by customer demand and fuel prices;
- a $91 million decrease primarily due to IGCC rider revenues as a result of lower Edwardsport sales volumes and credit adjustment rider refunds related to IGCC Settlements;
- a $20 million decrease in weather-normal retail sales volumes driven by lower nonresidential customer demand;
- an $11 million decrease in retail sales due to unfavorable weather in the current year; and
- an $11 million decrease in wholesale revenues primarily related to the true up of wholesale transmission revenues and lower rates in the current year.

Partially offset by:

- a $75 million increase primarily due to higher pricing from the Indiana retail rate case, net of certain rider revenues moving to base.

Operating Expenses. The variance was driven primarily by:

- a $143 million decrease in fuel used in electric generation and purchased power expense primarily due to lower coal and natural gas costs, lower amortization of deferred fuel costs and lower purchased power expense.

Partially offset by:

- a $22 million increase in depreciation and amortization primarily due to a change in depreciation rates from the Indiana retail rate case and additional plant in service.

Other Income and Expenses, net. The decrease was primarily due to life insurance proceeds received in the prior year.

Income Tax Expense. The decrease in income tax expense was primarily due to a decrease in pretax income and an increase in the amortization of excess deferred taxes.

Secondary market volumes	(10.1)%
Average number of customers	2.1 %

Due to the margin decoupling mechanism in North Carolina and the weather normalization adjustment (WNA) mechanisms in South Carolina and Tennessee and fixed-price contracts with most power generation customers, changes in throughput deliveries do not have a material impact on Piedmont's revenues or earnings. The margin decoupling mechanism adjusts for variations in residential and commercial use per customer, including those due to weather and conservation. The WNA mechanisms mostly offset the impact of weather on bills rendered, but do not ensure full recovery of approved margin during periods when winter weather is significantly warmer or colder than normal.

Nine Months Ended September 30, 2020, as compared to September 30, 2019

Operating Revenues. The variance was driven primarily by:

- a $130 million decrease due to lower natural gas costs passed through to customers, lower volumes, and decreased off-system sales natural gas costs;
- a $31 million decrease due to return of EDIT to customers; and
- a $7 million decrease due to NCUC approval related to tax reform accounting from fixed-rate contracts in the prior year.

Partially offset by:

- a $65 million increase due to North Carolina base rate case increases; and
- a $16 million increase due to North Carolina IMR increases.

Operating Expenses. The variance was driven primarily by:

- a $130 million decrease in cost of natural gas due to lower natural gas prices, lower volumes, and decreased off-system sales natural gas costs.

Partially offset by:

- a $7 million increase in impairment charges due to Piedmont ACP project materials write-off.

Other Income and Expenses, net. The variance was driven primarily by AFUDC equity and intercompany interest related to Belews Creek and Marshall Power Generation contracts.

Interest Expense. The variance was driven primarily by interest on the EDIT balance being returned to customers and higher debt outstanding in the current year, partially offset by lower AFUDC debt income.

Income Tax Expense. The decrease in income tax expense was primarily due to an increase in the amortization of excess deferred taxes and an increase in AFUDC Equity, partially offset by an increase in pretax income.

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Cash

Duke Energy relies primarily upon cash flows from operations, debt and equity issuances and its existing cash and cash equivalents to fund its liquidity and capital requirements. Duke Energy's capital requirements arise primarily from capital and investment expenditures, repaying long-term debt and paying dividends to shareholders. Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019, included a summary and detailed discussion of projected primary sources and uses of cash for 2020 to 2022.

During March 2020, in response to market volatility and the ongoing economic uncertainty related to COVID-19, Duke Energy took several actions to enhance the company's liquidity position including:

- Duke Energy drew down the remaining $500 million of availability under the existing $1 billion Three-Year Revolving Credit Facility. That additional borrowing was subsequently repaid during the second quarter of 2020; and
- Duke Energy entered into and borrowed the full amount under a $1.5 billion, 364-day Term Loan Credit Agreement. The Term Loan Credit Agreement contained a provision for additional borrowing capacity of $500 million. Duke Energy exercised the provision and borrowed an additional $188 million, for a total borrowing of approximately $1.7 billion. In the third quarter of 2020, Duke Energy repaid $844 million of the 364-day Term Loan.

Following March 2020, access to credit and equity markets has normalized. In addition to the financings to address the company's liquidity position, for the nine months ended September 30, 2020, Duke Energy issued approximately $5.6 billion in debt, raised $157 million of common equity through its dividend reinvestment program and paid down $500 million on the Three-Year Revolving Credit Facility. Despite the recovery in capital markets, Duke Energy continues to monitor access to credit and equity markets amid the ongoing economic uncertainty related to COVID-19.

As of September 30, 2020, Duke Energy had approximately $308 million of cash on hand, $5.9 billion available under its $8 billion Master Credit Facility and $500 million available under the $1 billion Three-Year Revolving Credit Facility. Duke Energy has additional liquidity available totaling approximately $2.6 billion under outstanding equity forward agreements. Duke Energy expects to have sufficient liquidity in the form of cash on hand, cash from operations and available credit capacity to support its funding needs. Duke Energy continues to monitor access to credit and equity markets. Refer to Notes 5 and 14 to the Condensed Consolidated Financial Statements, "Debt and Credit Facilities" and "Stockholders' Equity," respectively, for information regarding Duke Energy's debt and equity issuances, debt maturities and available credit facilities including the Master Credit Facility.

In light of the COVID-19 pandemic and cancellation of the ACP pipeline, Duke Energy currently does not expect significant changes to the total projected capital and investment expenditures provided in the Form 10-K for the year ended December 31, 2019. However, Duke Energy will continue to reassess capital projects depending on the duration and severity of economic impacts caused by the pandemic.

Credit Ratings

In October 2020, Moody's Investors Services, Inc. revised the credit rating outlook for Duke Energy Corporation, Duke Energy Carolinas and Duke Energy Progress from stable to negative. The change in outlook is principally due to the company's capital and investment expenditure program and potentially adverse regulatory decisions in Duke Energy's two largest subsidiaries, specifically regarding the recovery of and return on coal ash remediation expenditures and higher costs due to severe storms. There have been no changes by any of the rating agencies to the credit ratings of any of the Duke Energy Registrants during 2020. Standard & Poors Rating Services continues to maintain a stable outlook on Duke Energy Corporation and its subsidiaries.

Cash Flow Information

The following table summarizes Duke Energy’s cash flows.

	Nine Months Ended September 30,	
(in millions)	**2020**	**2019**
Cash flows provided by (used in):		
Operating activities	**$ 6,766**	$ 5,637
Investing activities	**(7,964)**	(8,633)
Financing activities	**1,225**	2,987
Net increase (decrease) in cash, cash equivalents and restricted cash	**27**	(9)
Cash, cash equivalents and restricted cash at beginning of period	**573**	591
Cash, cash equivalents and restricted cash at end of period	**$ 600**	$ 582

OPERATING CASH FLOWS

The following table summarizes key components of Duke Energy’s operating cash flows.

	Nine Months Ended September 30,		
(in millions)	**2020**	**2019**	**Variance**
Net income	**$ 1,232**	$ 2,964	$ (1,732)
Non-cash adjustments to net income	**6,194**	4,376	1,818
Contributions to qualified pension plans	**—**	(77)	77
Payments for asset retirement obligations	**(463)**	(582)	119
Refund of AMT credit carryforwards	**572**	—	572
Working capital	**(769)**	(1,044)	275
Net cash provided by operating activities	**$ 6,766**	$ 5,637	$ 1,129

The variance was primarily due to:

- a $572 million refund of AMT credit carryforwards;
- a $119 million decrease in payments for asset retirement obligations;
- a $77 million decrease in contributions to qualified pension plans; and
- timing of payments of property taxes and higher Nuclear Electric Insurance Limited (NEIL) refunds in the current year.

INVESTING CASH FLOWS

The following table summarizes key components of Duke Energy's investing cash flows.

	Nine Months Ended September 30,		
(in millions)	2020	2019	Variance
Capital, investment and acquisition expenditures	$ (7,684)	$ (8,348)	$ 664
Other investing items	(280)	(285)	5
Net cash used in investing activities	$ (7,964)	$ (8,633)	$ 669

The variance relates primarily to decreases in capital expenditures due to lower overall investments in the Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables segments.

FINANCING CASH FLOWS

The following table summarizes key components of Duke Energy's financing cash flows.

	Nine Months Ended September 30,		
(in millions)	2020	2019	Variance
Issuances of long-term debt, net	$ 2,694	$ 3,394	$ (700)
Issuances of common stock	75	41	34
Issuances of preferred stock	—	1,963	(1,963)
Notes payable, commercial paper and other short-term borrowings	260	(1,019)	1,279
Dividends paid	(2,113)	(1,990)	(123)
Contributions from noncontrolling interests	402	615	(213)
Other financing items	(93)	(17)	(76)
Net cash provided by financing activities	$ 1,225	$ 2,987	$ (1,762)

The variance was primarily due to:

- a $1,963 million decrease in proceeds from the issuance of preferred stock;
- a $700 million decrease in proceeds from net issuances of long-term debt primarily due to the timing of issuances and redemptions of long-term debt; and
- a $415 million decrease related to the sale of a noncontrolling interest in the Commercial Renewables segment.

Partially offset by:

- a $1,279 million increase in net proceeds from issuances of notes payable and commercial paper including borrowings of $844 million under the 364-day Term Loan Credit Agreement; and
- a $200 million increase related to contributions from noncontrolling interests for tax equity financing activity in the Commercial Renewables segment.

OTHER MATTERS

Environmental Regulations

The Duke Energy Registrants are subject to federal, state and local regulations regarding air and water quality, hazardous and solid waste disposal, coal ash and other environmental matters. These regulations can be changed from time to time and result in new obligations of the Duke Energy Registrants. Refer to Note 3 to the Condensed Consolidated Financial Statements, "Regulatory Matters," for further information regarding potential plant retirements and regulatory filings related to the Duke Energy Registrants.

On May 14, 2020, the five-year probation period following the Dan River coal ash spill ended. The court-appointed monitor confirmed in U.S. District Court for the Eastern District of North Carolina that Duke Energy met or exceeded every obligation throughout the process. Separately, in a final report to the EPA, it was noted that the company made significant enhancements to its Ethics and Compliance Program and its environmental compliance programs.

Section 126 Petitions

On November 16, 2016, the state of Maryland filed a petition with EPA under Section 126 of the Clean Air Act alleging that 19 power plants, including two plants (three units) that Duke Energy Registrants own and operate, contribute to violations of EPA's National Ambient Air Quality Standards (NAAQS) for ozone in the state of Maryland. On March 12, 2018, the state of New York filed a petition with EPA, also under Section 126 of the Clean Air Act alleging that over 60 power plants, including five that Duke Energy Registrants own and operate, contribute to violations of EPA's ozone NAAQS in the state of New York. Both Maryland and New York sought EPA orders requiring the states in which the named power plants operate to impose more stringent NOx emission limitations on the plants. On October 5, 2018, EPA denied the Maryland petition. That same day, Maryland appealed EPA's denial. On October 18, 2019, EPA denied the New York petition, and New York appealed that decision on October 29, 2019. On May 19, 2020, the U.S. Court of Appeals for the D.C. Circuit issued its decision, finding, with one exception, that EPA reasonably denied the Maryland petition. The court remanded one issue to EPA regarding target sources lacking catalytic controls. All of the Duke Energy units targeted have selective catalytic reduction so the decision is favorable for these units.

A different panel of the same court heard oral argument in New York's appeal of EPA's denial of its Section 126 Petition on May 7, 2020, and on July 14, 2020, the panel issued its decision remanding the Petition to EPA for further review. The Duke Energy Registrants cannot predict the outcome of this matter.

Off-Balance Sheet Arrangements

During the three and nine months ended September 30, 2020, there were no material changes to Duke Energy's off-balance sheet arrangements. See Notes 1, 3, 4 and 11 to the Condensed Consolidated Financial Statements, "Organization and Basis of Presentation," "Regulatory Matters," "Commitments and Contingencies," and "Variable Interest Entities," respectively, for additional information on ACP. See Note 13 to the Condensed Consolidated Financial Statements, "Stockholders' Equity," for information regarding equity forward sales agreements. For additional information on Duke Energy's off-balance sheet arrangements, see "Off-Balance Sheet Arrangements" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

Contractual Obligations

Duke Energy enters into contracts that require payment of cash at certain specified periods, based on certain specified minimum quantities and prices. During the three and nine months ended September 30, 2020, there were no material changes in Duke Energy's contractual obligations. For an in-depth discussion of Duke Energy's contractual obligations, see "Contractual Obligations" and "Quantitative and Qualitative Disclosures about Market Risk" in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For an in-depth discussion of the Duke Energy Registrants' market risks, see "Quantitative and Qualitative Disclosures about Market Risk" in Item 7 of the Annual Report on Form 10-K for the Duke Energy Registrants. During the three and nine months ended September 30, 2020, there were no material changes to the Duke Energy Registrants' disclosures about market risk, other than as described below.

Credit Risk

In response to the COVID-19 pandemic, in March 2020, the Duke Energy Subsidiary Registrants announced a suspension of disconnections for nonpayment to be effective throughout the national emergency. Disconnections have resumed and there is an expectation of an increase in charge-offs in the future. In addition, the Registrants are monitoring the effects of the resultant economic slowdown on counterparties' abilities to perform under their contractual obligations.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified by the SEC rules and forms.

Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that information required to be disclosed by the Duke Energy Registrants in the reports they file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated the effectiveness of their disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of September 30, 2020, and, based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are effective in providing reasonable assurance of compliance.

Changes in Internal Control over Financial Reporting

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, the Duke Energy Registrants have evaluated changes in internal control over financial reporting (as such term is defined in Rules 13a-15 and 15d-15 under the Exchange Act) that occurred during the fiscal quarter ended September 30, 2020, and have concluded no change has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

ITEM 1. LEGAL PROCEEDINGS

For information regarding material legal proceedings, including regulatory and environmental matters, see Note 3, "Regulatory Matters," and Note 4, "Commitments and Contingencies," to the Condensed Consolidated Financial Statements. For additional information, see Item 3, "Legal Proceedings," in Duke Energy's Annual Report on Form 10-K for the year ended December 31, 2019.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, careful consideration should be given to the factors discussed in Part I, “Item 1A. Risk Factors” in the Duke Energy Registrants' Annual Report on Form 10-K for the year ended December 31, 2019, which could materially affect the Duke Energy Registrants’ financial condition or future results. The information presented below updates, and should be read in conjunction with, the risk factors and information disclosed in the Annual Report on Form 10-K for the year ended December 31, 2019.

The Duke Energy Registrants’ operations have been and may be affected by COVID-19 in ways listed below and in ways the registrants cannot predict at this time.

The COVID-19 pandemic has begun to impact the Duke Energy Registrants' business strategy, results of operations, financial position and cash flows, albeit not materially as of this filing date, from specific activities listed below:

- Decreased demand for electricity and natural gas;
- Delays in rate cases and other legal proceedings;
- The health and availability of our critical personnel and their ability to perform business functions; and
- Actions of state utility commissions or federal or state governments to allow customers to suspend or delay payment of bills related to the provision of electric or natural gas services.

Furthermore, due to the unpredictability of the COVID-19 pandemic’s ongoing impact on global health and economic stability as of this filing date, the Duke Energy Registrants expect that the activities listed below could negatively impact their business strategy, results of operations, financial position and cash flows:

- An inability to procure satisfactory levels of fuels or other necessary equipment to continue production of electricity and delivery of natural gas;
- An inability to obtain labor or equipment necessary for the construction of generation projects or pipeline expansion;
- An inability to maintain information technology systems and protections from cyberattack;
- An inability to obtain financing in volatile financial markets;
- Additional federal regulation tied to stimulus and other aid packages; and
- Impairment charges, which could include real estate as options for working remotely are evaluated and goodwill.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 6. EXHIBITS

Exhibits filed herein are designated by an asterisk (*). All exhibits not so designated are incorporated by reference to a prior filing, as indicated. Items constituting management contracts or compensatory plans or arrangements are designated by a double asterisk (**). The company agrees to furnish upon request to the commission a copy of any omitted schedules or exhibits upon request on all items designated by a triple asterisk (***).

EXHIBIT 31.1.1

CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Lynn J. Good, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Duke Energy Corporation;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5) The registrant’s other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

   a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

   b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

EXHIBIT 31.1.2

**CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Lynn J. Good, certify that:

1) I have reviewed this quarterly report on Form 10-Q of Duke Energy Carolinas, LLC;

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a–15(f) and 15d–15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5) The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4) The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Acts Rules 13a–15(f) and 15d–15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5) The registrant’s other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

THE WALL STREET JOURNAL.

Economists Got the Decade All Wrong. They're Trying to Figure Out Why.

The U.S. has enjoyed its longest economic expansion on record without triggering inflation as interest rates remain historically low

by Greg Ip

Dec. 14, 2019 1:00 pm ET

In the fall of 2009, the global financial crisis had only just ended, and interest rates were a mere 0.1%. Peering ahead, economists assumed the recovery would resemble previous recoveries, though a tad slower, and thus rates would start rising the next year and plateau at 4.2% by 2015.

But by the fall of 2010, rates hadn't budged. Like Charlie Brown taking another run at the football, economists gamely made the same forecast that year, and the year after that and the year after that. Rates remained stuck near zero until 2015, a stretch of free money unseen since the 1940s.

When rates started to rise, they didn't come close to levels once considered normal, ending the decade between 1.5% and 1.75%. Private-sector economists now expect them to average 2.4% over the long term, according to Blue Chip Economic Indicators. Judging by the bond market, they might have guessed high again: Ten-year Treasury note yields are just 1.8%—roughly zero, adjusted for inflation.

How could economists have gotten something so basic so spectacularly wrong? What was it about this past decade that made all their predictions go awry?

Fed Chairman Jerome Powell and former chairmen Janet Yellen and Ben Bernanke. The financial crisis was followed by a stretch of free money

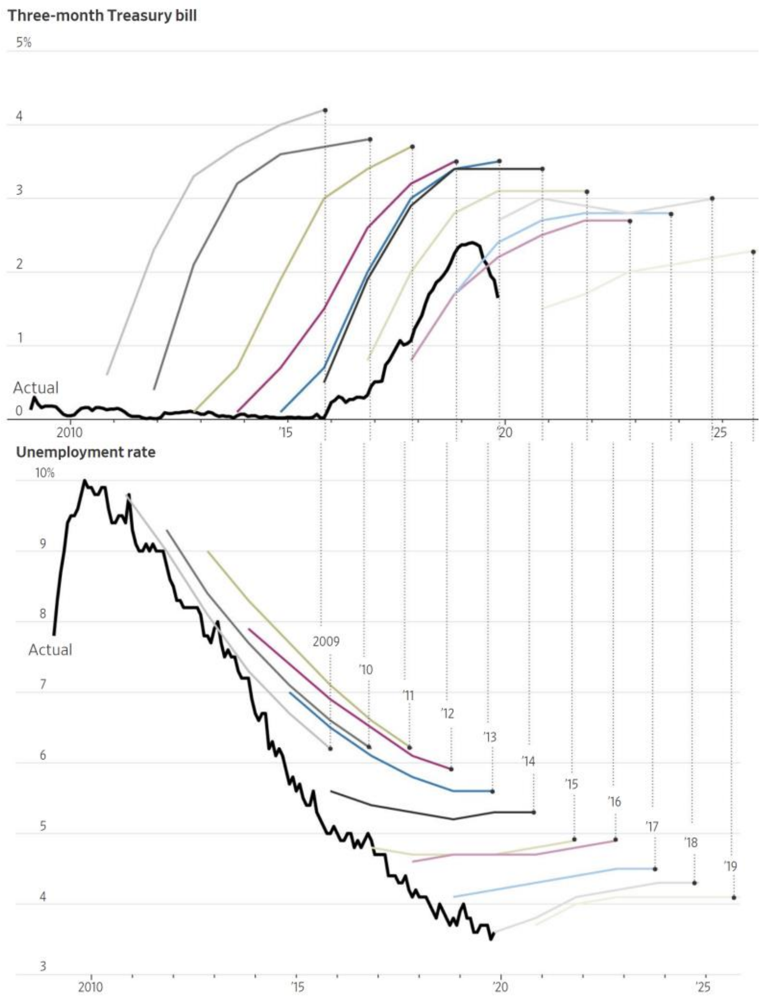
Economists have been casting around for the answer, a theory to explain their inability to peer accurately into the months ahead, let alone the years. Such a theory must do more than say “The Federal Reserve did it.” It must explain why growth was the most subdued of any expansion since the 1940s and inflation consistently ran below the Fed’s 2% target, the reasons the Fed kept rates so low.

And, no less difficult, it would have to explain why, in spite of that subdued growth, the U.S. has enjoyed its longest economic expansion on record, one marked by a record-breaking bull market in stocks and unemployment falling to a 50-year low.
One explanation is the “debt hangover”theory popularized by Carmen Reinhart and Kenneth Rogoff, whose history of financial crises, “This Time Is Different: Eight Centuries of Financial Folly,” was a sleeper hit in 2009. They found that in the wake of financial crises, households, banks, businesses and sometimes governments are fixated on paying down debts and wary that another crisis is around the corner, so they avoid borrowing and investing. This holds down growth, inflation and interest rates.

The U.S. initially tracked this model. It had barely exited its own crisis when another erupted in the eurozone, pushing Greece into default and others to the brink of it.

But as those crises faded from view, low growth, inflation and rates persisted.

A Confounding Decade
Since 2009 economists’ projections of interest rates and unemployment (shown with year made) have consistently proved too high.



Sources: Blue Chip Economic Indicators (forecasts); Federal Reserve Bank of St. Louis (actual T-bill, unemployment rates)

So in 2013 Larry Summers, a former top adviser to Presidents Bill Clinton and Barack Obama and now an economist at Harvard University, advanced an alternative explanation: "secular stagnation." He borrowed the phrase from an earlier Harvard economist, Alvin Hansen who used it in 1938 to describe the Great Depression's persistently weak growth and high unemployment. Mr. Hansen tied it to weak investment due to slow population growth: Businesses had less need to invest when there were fewer new workers and customers and when aging households bought fewer big-ticket products like houses.

Slow population growth is once again weighing on growth and interest rates, Mr. Summers noted, and he added several other factors: the fastest-growing businesses, such as social-media platforms, invest little of their rich profits. Higher inequality meant more income flows to the high-saving, low-spending rich.

Though initially skeptical of Mr. Summers's thesis, many economists have since warmed to it, at least for other parts of the world, if not the U.S. In some countries like Germany a persistent excess of savings manifests itself as a trade surplus which flows into other countries' bonds, holding down interest rates around the world.

Secular stagnation has several profound implications. First, with interest rates closer to zero, central banks are less able to combat future recessions. Second, a structural shortage of private borrowing means governments can run big deficits without pushing up interest rates. Indeed, given central banks' lack of ammunition, governments should run deficits, or the economy will stagnate. Reducing entitlements such as future Social Security benefits in the name of fiscal prudence may worsen the problem by encouraging households to save more.

Secular stagnation also increases the risk of protectionism. Any country with too little domestic demand to achieve full employment and 2% inflation will be tempted to foist the problem on its neighbors by cheapening its currency or erecting tariffs so as to export more and import less.

Yet in key respects the past decade doesn't conform to the gloomy prognosis of secular stagnation: The stock market has romped to one record after another, and job growth has remained consistently strong.

As with interest rates, economists have been surprised by unemployment, which peaked at almost 10% in 2010. Year after year, they expected it to bottom out around 5%. It's now down to 3.5%, a 50-year low, and likely headed lower.

The expansion is now the longest since records begin in the mid-1800s. It bears little resemblance to the 1930s, which Mr. Hansen described as "sick recoveries which die in their infancy and…leave a hard and seemingly immovable core of unemployment."

Job seekers and recruiters at a fair in Los Angeles. Economists have been surprised by the continued decline of unemployment.

This points to a third possible theory. The so-called natural rate of unemployment, the lowest the U.S. can sustain without running out of workers or pushing up inflation (called u* or "u-star" in economists' equations) is much lower than previously thought. So the recovery has had more ground to cover than many realized, and as a result the economy has spent much of the past decade operating well below capacity.

Jan Hatzius, chief economist at Goldman Sachs, says there isn't a lot of mystery about the behavior of inflation and interest rates: "We fell into a deep hole so we had a lot of spare capacity, and it took a long time to climb out."

The U.S. may have finally climbed out, but until Europe has as well, interest rates may remain low, he says. "How secular is it? How cyclical? Until you've seen economies really normalize from a cyclical perspective it's going to be hard to fully distinguish between those two things."

In other words, it might take the next decade to answer what really happened in the last.

Mr. Ip is The Wall Street Journal's chief economics commentator, in Washington. He can be reached at greg.ip@wsj.com.

Piedmont Natural Gas Company, Inc.

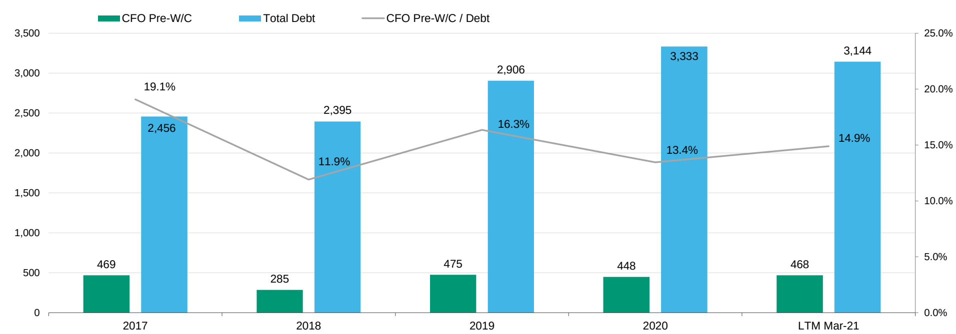
Update to credit analysis

Summary

Piedmont Natural Gas Company, Inc.'s (Piedmont) credit profile reflects its low business risk as a regulated natural gas local distribution company (LDC) operating in supportive regulatory jurisdictions in North Carolina, South Carolina and Tennessee. Our opinion recognizes that credit metrics have been impacted by the negative cash flow impact of federal tax reform and a large capital program and therefore will not return to pre-tax reform highs. We expect the company's average ratio of cash flow from operations excluding changes in working capital (CFO pre-WC) to debt will be maintained at around 15%-16% over the next two years.

Exhibit 1

Historical CFO Pre-WC, Total Debt and CFO Pre-WC to Debt ($ MM) [1]



[1] CFO pre-WC is defined as cash flow from operations excluding changes in working capital
Source: Moody's Financial Metrics

Credit strengths

» Credit supportive regulatory environments in North Carolina, South Carolina and Tennessee

» Utility growth driven by customer additions and system integrity investment

» Position as part of the Duke corporate family

Credit challenges

» Elevated capital expenditure program

» Increased leverage

» Weak credit metrics for an A3 rated LDC

Rating outlook

Piedmont's stable outlook reflects our expectation that the company will continue to receive credit supportive regulatory treatment across each of its jurisdictions. The outlook also incorporates our expectation that credit metrics, which are weak and have been adversely affected by the negative cash flow impact of federal tax reform and increased leverage due to a large capital program, will remain below pre-tax reform highs. Going forward, on average, we expect Piedmont's ratio of CFO pre-WC to debt to be between 15% and 16%.

Factors that could lead to an upgrade

» An increase in cash flow or reduction in leverage leading to a ratio of CFO pre-WC to debt that remains above 18% could put upward pressure on credit quality

Factors that could lead to a downgrade

» Piedmont's credit profile could weaken if there is a significant deterioration in the company's regulatory environments

» Or, if we expect the CFO pre-WC to debt ratio to be below 14% for an extended period, there could also be downward pressure

Profile

Headquartered in Charlotte, North Carolina, Piedmont is a local natural gas distribution company subsidiary of Duke Energy Corporation (Duke Energy, Baa2 stable) with 1.1 million customers in the southeastern U.S. Piedmont has operations in three states, North Carolina (73% of rate base), Tennessee (19%), and South Carolina (8% of rate base).

Piedmont holds indirect equity stakes in several energy related joint ventures including: Hardy Storage Company (50% ownership) in West Virginia, the Pine Needle LNG Company LLC (45% ownership) and the intrastate Cardinal Pipeline (21.5% ownership) servicing North Carolina. Piedmont also subscribes to the services of these entities.

Detailed credit considerations

Credit supportive regulatory environments

Piedmont's operations are subject to the regulatory overview of the North Carolina Utilities Commission (NCUC), the Public Service Commission of South Carolina (PSCSC), and the Tennessee Public Utility Commission (TPUC). We consider the regulatory environments to be credit supportive. The three states all provide cost recovery mechanisms and frameworks that lead to shorter regulatory lag and reasonable returns on utility investments.

Piedmont recovers its natural gas costs through a purchased gas adjustment mechanism in all three of its operating jurisdictions. In North Carolina (73% of rate base at the end of 2020), Piedmont has a full margin decoupling mechanism for residential and commercial customers, allowing the LDC to true up any over/under collection of margin regardless of customer demand through semiannual rate adjustments. This enhances cash flow predictability, a credit positive. The company also has a specific rider to recover bad debt expense.

In March 2021, Piedmont filed a general rate case in North Carolina requesting a 10.4%, or approximately $109 million, increase in retail revenues. The rate case filing request is premised on an ROE of 10.25% and a 52% equity component of the capital structure. The filing is based on a North Carolina rate base of $4.8 billion as of December 31, 2020, as adjusted for known and measurable changes through June 30, 2021. The request includes approximately $1.7 billion of plant additions related to system growth, pipeline integrity management, infrastructure investments, and safety and security upgrades. Approximately 70% of the plant additions are categories of plant investment not covered under the Integrity Management Rider (IMR) mechanism, such as Piedmont's new liquefied natural gas storage facility located in Robeson County, NC and enhancements to an existing storage facility in Huntersville, NC.

Piedmont's last North Carolina rate case was decided in November 2019 when the company was authorized a $109 million increase (before consideration of decrease riders associated with federal and state tax reform) based on a 9.7% ROE and a 52% equity layer.

In Tennessee (19% of rate base at the end of 2020), the TPUC allows Piedmont to benefit from a Weather Normalization Adjustments (WNA) clause but not from a decoupling mechanism. However, Piedmont is allowed to use a forward test year with its rate filings. Piedmont also benefits from an Integrity Management Rider (IMR) that allows the LDC to recover investments related to federal and state mandated safety and integrity programs. Piedmont has successfully implemented rate adjustments under the IMR each year since the program began. The company also has a specific rider to recover bad debt expense.

In July 2020, Piedmont filed its first general rate case in Tennessee in nine years, requesting an approximate 15%, $30 million (subsequently reduced to $26 million), increase in annual revenue. The request was driven by significant infrastructure upgrades, approximately half of which are not covered by the company's 2013 approved pipeline integrity management rider mechanism. As authorized by Tennessee, interim rates were implemented on January 2, 2021. In February 2021, the TPUC accepted a settlement granting the company a $16 million increase based on a 9.8% ROE. Rates were made effective January 2, 2021, with Piedmont to refund the difference between the interim and settled rates.

In South Carolina (8% of rate base at the end of 2020), Piedmont benefits from rate stabilization tariffs. Under the South Carolina Rate Stabilization Act, tariffs are subject to annual true-ups to support the company's allowed ROE (10.2%). In addition, a WNA mechanism offsets volume fluctuations in the winter season. The company also has a specific rider to recover bad debt expense.

In North Carolina and South Carolina, rates are set based on historical test years, which exposes the LDC to a lag in its investment cost recovery. However, similar to Tennessee, in North Carolina the NCUC has authorized the use of an IMR which allows the company to recover integrity related capital expenditures outside of general rate cases, a credit positive. Rate adjustments are now made semiannually each December and June.

Utility growth driven by customer additions and system integrity investments

Between 2015 and 2019, Piedmont's total capital expenditures increased steadily as the company invested in system integrity and to support customer growth. Annual expenditures grew from $455 million in 2015 to over $1 billion in 2019, slightly declining to $901 million in 2020. Spending is expected to decline somewhat to an average of about $800 million per year for the 2021-2025 period.

For the 2021-2025 period, Piedmont expects to deploy a total of about $4 billion of capital of which approximately 80% has been identified as growth capital. Of this, close to 60% is expected to be recovered via integrity management riders, which assures recovery will begin with minimal lag, a credit positive. Although recovery is expected to begin quickly, given the long-lived nature of these assets (which lowers the amount of depreciation included in the revenue requirement) and the loss of bonus depreciation that occurred following the enactment of federal tax reform in December of 2017, we expect credit metrics will remain below the highs demonstrated prior to 2018.

Weak credit metrics for an A3 rated LDC

Prior to 2018, Piedmont's cash flow and credit metrics were relatively strong, with the ratio of CFO pre-W/C to debt in the range of 20%. More recently, given the impact of federal tax reform, the utility's robust capital expenditure program and the associated leverage to fund these investments, credit metrics have declined significantly and are now weak for an A3 rated LDC. Going forward, in light of the company's relatively constructive regulatory environments, numerous rate adjustment mechanisms and planned rate case activity, we believe the company will demonstrate an average ratio of CFO pre-WC to debt around 15% to 16%. We note that Piedmont has not paid a dividend to parent Duke Energy since 2016 and has received capital contributions from Duke totaling $775 million since 2018, helping to limit the extent of the deterioration in credit metrics and support the utility through a period of elevated capital expenditures.

ESG considerations

Environmental considerations incorporated into our credit analysis for Piedmont are primarily related to air pollution and regulations around carbon, methane and other greenhouse gas emissions. These gases are emitted during the natural gas life cycle, including through the production of the energy that the company delivers through its own gas infrastructure.

Social risks are primarily related to health and safety, demographic and societal trends, as well as customer relations as the company works to provide reliable and affordable service to customers and safe working conditions to employees.

From a governance perspective, financial and risk management policies including a strong financial profile are important characteristics for managing environmental and social risks.

Liquidity analysis

Given its large capital expenditure program, Piedmont will continue to rely on external financing sources to maintain an adequate liquidity profile. For the last twelve months ended March 31, 2021, Piedmont generated $516 million of cash from operations (CFO), invested $870 million in capital expenditures and made no distributions to the parent which resulted in negative free cash flow (FCF) of $354 million. In 2020, Piedmont generated $481 million of CFO, invested approximately $901 million in capital expenditures and made no distributions to parent Duke Energy which resulted in negative FCF of $420 million. The shortfalls were partially funded with equity infusions from Duke Energy. We expect Piedmont to be cash flow negative for the next few years as capital expenditures remain elevated as the company spends for customer growth and system integrity. We expect shortfalls will primarily be funded with a combination of long-term and short-term debt financing.

Piedmont's additional liquidity sources include access to funding from the parent company's commercial paper program through the Duke Energy system money pool, and direct borrowings from the money pool. As of March 31, 2021, the utility had $700 million of borrowing capacity under Duke Energy's $8 billion multi-year (March 2026 termination) master credit facility. Duke Energy has unilateral ability to increase Piedmont's borrowing capacity, up to $850 million, which could provide significant additional liquidity as needed. As of March 31, 2021, the utility had no commercial paper outstanding, leaving $700 million available under the parent credit facility. The facility does not contain a material adverse change clause for new borrowings and has a single financial covenant requiring that Duke Energy and its utility subsidiaries each maintain a consolidated debt to capitalization ratio of no more than 65%, except for Piedmont. The debt to capital covenant for Piedmont is a maximum of 70%. As of March 31, 2021, we estimate Piedmont's ratio to be about 49%.

Piedmont's nearest long-term debt maturity is $45 million of unsecured notes due October 2023.

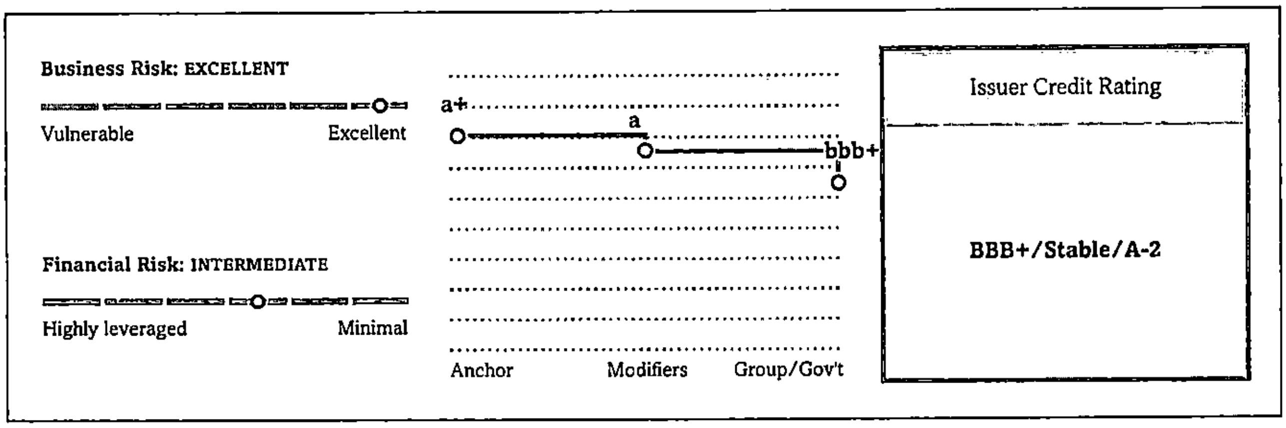
Table Of Contents (cont.)

Piedmont Natural Gas Co. Inc.



Credit Highlights

Overview

Key strengths	Key risks
Lower-risk regulated gas utility that effectively manages its regulatory risk.	Most of service territory is exposed to extreme weather events, including hurricanes.
Customer base of more than 1 million provides stability to the company's cash flows.	Forecast negative discretionary cash flow indicates external funding needs.
Diverse source of cash flows from operations spread across North Carolina, South Carolina, and Tennessee.	
Operating assets are generally of higher quality compared to gas utility peers.	

Our ratings on Piedmont Natural Gas Co. Inc. are underpinned by our ratings on its immediate parent, Duke Energy Corp. We consider Piedmont to be a strategically important subsidiary of Duke. Although Piedmont is a successful utility operator, has Duke's long-term commitment, and is important to Duke's long-term strategy, we no longer view Piedmont as a core subsidiary of Duke. This view reflects the recently announced sale of an almost 20% equity stake in another Duke subsidiary, Duke Energy Indiana to GIC that we believe because of Duke's high capital spending program, could potentially be replicated at any of Duke's relatively smaller subsidiaries. Piedmont accounts for approximately 5% of Duke's regulated EBITDA. This assessment has no effect on Piedmont's stand-alone credit profile, issuer credit rating, nor issue ratings.

We expect Piedmont to manage risks related to COVID-19. As of Oct. 1, 2020, normal billing procedures resumed in all of Piedmont's service territories, and service disconnections for nonpayment resumed on Nov. 4, 2020. Overall, we expect the company to use a combination of factors to mitigate any potential cash flow shortfalls stemming from the pandemic. This includes effective expense management and working constructively with its regulators.

Piedmont's rate case with the Tennessee Public Utility Commission (TPUC) is pending. Piedmont filed for a general rate case increase with the TPUC on July 2, 2020. Piedmont requested a rate increase of about $30 million for retail customers based on 10.3% return on equity (ROE) and 50.5% equity component of capital structure. As of February 2021, the company has reached a settlement on this rate case with several parties. Although the terms of the settlement indicate a lower overall rate increase of about $16 million premised on a 9.8% ROE, other factors, such as the 50.5% authorized equity layer are favorable for Piedmont's stand-alone credit quality. It is likely a decision on this rate case could be reached by mid-2021.

Our stand-alone credit profile for Piedmont includes a negative comparable ratings analysis modifier. This incorporates our forecast for Piedmont's financial measures, which we expect will consistently reflect the lower end of its financial risk profile category, compared to peers. Specifically, we expect Piedmont's funds from operations (FFO) to debt ratio to average about 14% over our forecast period.

Outlook

The stable outlook on Piedmont reflects our stable outlook on parent Duke Energy and our expectations that Piedmont's stand-alone financial measures will be consistent with the lower end of the range for its financial risk profile category, reflecting FFO to debt of about 14% (assessed under our low-volatility financial benchmark table).

Downside scenario

We could lower our ratings on Piedmont over the next 12-24 months if we downgrade parent Duke. We could also lower Piedmont's ratings if its stand-alone business risks increase or if its stand-alone financial measures weaken such that FFO to debt consistently weakens to below 9%.

Upside scenario

We could raise our ratings on Piedmont over the next 12-24 months if parent Duke Energy is upgraded and Piedmont's stand-alone financial measures are maintained such that FFO to debt is consistently above 9%, without incurring higher business risks.

Our Base-Case Scenario

Assumptions

- Continued use of existing regulatory cost recovery mechanisms, and periodic rate case filings.
- Capital spending of about $875 million in 2020, $725 million in 2021, and averaging slightly above $815 million annually beginning in 2022.
- No cash dividends to parent until 2023.
- Negative discretionary cash flow throughout our forecast period.

Key Metrics

	2019a	2020e	2021e
FFO to debt (%)	14.4	14-15	14-15
Debt to EBITDA (x)	5.8	5.3	5.0
Cash FFO to interest	4.7	4.6	4.8

a--Actual. e--Estimate. FFO--Funds from operations.

Company Description

Piedmont Natural Gas Co. Inc. is a regulated gas utility company. It provides gas service to about 1 million residential, commercial, and industrial customers, including power generation and municipal customers, in North Carolina, South Carolina, and Tennessee. Piedmont is a subsidiary of Duke Energy, and it contributes about 5% of Duke Energy's regulated EBITDA.

Business Risk

Our assessment of Piedmont's business risk profile largely reflects its lower-risk gas distribution utility operations, size, and effective management of regulatory risk. Piedmont's regulated utility operations provide the company with scale and some diversity in regulated cash flow sources despite concentration in North Carolina. About 70% of Piedmont's rate base is in North Carolina. The company effectively manages regulatory risk and benefits from various riders that mitigate regulatory lag and under-earning. These include the integrity management riders in North Carolina and Tennessee, which allow Piedmont to recover and earn on certain capital investments outside of the rate case process. They also include rate stabilization adjustment filings in South Carolina, which allow Piedmont to annually adjust its rates if its earnings materially deviate from its authorized returns. In addition, we view Piedmont's operating assets as generally of higher quality compared to peers, reflecting no cast iron pipes within the company's gas distribution system, and a record of delivering reliable gas service to its customers. Collectively, these factors support our overall assessment of Piedmont's business risk at the higher half of its business risk profile category, relative to peers.

Financial Risk

Financial summary

We assess Piedmont's financial measures using our low-volatility table, reflecting the company's lower-risk gas distribution operations and effective management of regulatory risk. Our base-case scenario includes capital spending of about $875 million in 2020, about $725 million in 2021, and averaging slightly above $815 million annually thereafter. In addition, our forecast incorporates equity contributions from the parent as needed to support Piedmont's capital structure, and no dividends to the parent through 2021. We expect Piedmont's financial measures will remain consistent with the lower end of the range for the intermediate financial risk profile category. Specifically, we expect FFO to debt to average about 14%-15%.

Liquidity

As of Sept. 30, 2020, we assess Piedmont's liquidity as adequate. Piedmont can more than cover its needs for the next 12 months, even if EBITDA declines by 10%. We expect the company's liquidity sources over the next 12 months will exceed uses by more than 1.1x. Our assessment of Piedmont's liquidity also reflects the company's ability to absorb high-impact, low-probability events with limited need for refinancing, well-established relationships with banks, a solid standing in the credit markets, and manageable debt maturities over the next few years. The short-term rating on Piedmont reflects our issuer credit rating on the company.

Principal liquidity sources

- Credit facility of $600 million; and
- Cash FFO of $484 million.

Principal liquidity uses

- Maintenance capital spending of about $400 million over the next 12 months; and
- Long-term debt maturities of $160 million.

Debt maturities

- 2023: $45 million
- 2024: $40 million
- 2025: $205 million

Covenant Analysis

Compliance expectations

We expect Piedmont to comply with the terms of its covenant agreements throughout our forecast period, even with a 10% decline in EBITDA.

Requirements

Piedmont is part of Duke Energy's master credit facility, which includes a covenant that requires Piedmont's total-debt-to-total-capitalization ratio to not exceed 70%.

Environmental, Social, And Governance

Piedmont's environmental exposure is in line with other regulated natural gas utility providers, including as it relates to methane emissions. This includes the potential for operational or financial risks to arise if regulation governing methane emissions become more restrictive.

Social and governance factors are neutral. Piedmont's record of service reliability could support the company's ability to maintain social cohesion. Our views of Piedmont's governance is tied to our views of its parent, Duke Energy.

Group Influence

Our rating on Piedmont incorporates our view of the company as a strategically important subsidiary of Duke Energy, meaning that we largely view Piedmont as unlikely to be sold and as important to the group's long-term strategy. Because we assess Piedmont as not sufficiently insulated from its parent, the issuer credit rating on the company is in line with Duke's group credit profile.

Issue Ratings - Subordination Risk Analysis

Capital structure

Piedmont's capital structure consists of nearly $2.9 billion of both short-term and long-term debt.

Analytical conclusions

We rate Piedmont's senior unsecured debt the same as our issuer credit rating on the company because it is unsecured debt of a qualifying investment-grade regulated utility. The A-2 short-term rating reflects our issuer credit rating on the company.

Experts Forecast Long-Term Stock and Bond Returns: 2019 Edition

Christine Benz
Jan 10, 2019

Savvy investors might view market predictions as pure folly. After all, it's next to impossible to predict what the market will return, especially over shorter time periods, so why bother?

It's certainly a mistake to try to predict the market in an effort to determine whether, when, and how much to hold in stocks and other asset classes. Even professional investors have struggled with tactical asset allocation, casting doubt on the ability of individual investors or even financial advisors to outperform strategic asset allocation with the approach.

But the fact is, even long-term, strategically minded investors need some type of market-return forecast to craft a financial plan. Without any view on how much stocks, bonds, and cash are apt to return, it's impossible to know how much you'll need to save and for how long. You can't know whether saving for retirement should be your sole financial preoccupation or whether you can hit other goals, such as college funding, along the way. To help turn your financial goals into reality, it's crucial to make assumptions about what the major asset classes, and in turn your own portfolio, are apt to return. That way you can determine how much of the heavy lifting for your plan will come from market appreciation and how much will have to come from your own contributions.

To help you arrive at an educated guess of how much the market will contribute to the success of your plan, I've been compiling annual looks at return expectations from market experts both inside and outside of Morningstar. Note that the parameters for these return estimates vary a bit; some of the return expectations are inflation-adjusted while others are not (nominal). Some of them are quite recent, while others date to earlier in 2018. In addition, some of the experts forecast returns for the next decade, while others employ slightly shorter time horizons.

Yet there were some commonalities among many of the forecasts. First, starting yields on intermediate-term bonds, historically a good predictor of future returns from bonds, suggest that bonds will give U.S. equities a run for their money over the next decade. In addition, many of the market forecasts suggest higher returns from non-U.S. stocks, especially emerging markets, than U.S. over the next decade.

Before you take those return forecasts to the bank, however, it's important to bear in mind that these return estimates are more intermediate term than they are long. As such, they're the most relevant to investors whose time horizons are in that ballpark, or to new retirees who face sequence-of-return risk in the next decade. Investors with very long time horizons of 20 to 30 years or longer can reasonably assume that market returns will run in line with their very long-term historic norms: 8% to 10% for stocks and half that amount for bonds.

BlackRock Investment Institute
Highlights: 7% nominal (non-inflation-adjusted) return for U.S. large caps over the next decade; 9% for non-U.S. large caps; 3.3% for the U.S. Aggregate Bond index(December 2018).

Bond index(December 2018).

BlackRock Investment Institute's Capital Markets Assumption report is heavy on the disclaimers, noting that the assumptions are "not intended as a recommendation to invest in any particular asset class or strategy or as a promise--or even estimate--of future performance." For each asset class, the firm provides a median expected return, as well as "uncertainty bands" depicting returns in a range. The firm provides assumptions for conventional asset classes as well as nontraditional ones such as hedge funds and private equity.

BlackRock Investment Institute's 7% median expected return for U.S. stocks put it at the high end of our sampling, but its expectation that foreign stocks would outperform (9% for foreign large caps) was a common theme across many of the firms. Notably, however, BlackRock Investment Institute is less sanguine about the prospects for emerging markets than it is for the broad universe of global non-U.S. equities, making it something of an outlier among many of the firms in our sample.

John C. Bogle, founder of Vanguard Group
Highlights: 4%-5% returns for stocks (nominal); 4% nominal returns for bonds over the next decade (October 2018).

In an interview in October (prior to the recent market volatility), the Vanguard founder was a bit more optimistic about returns from U.S. stocks over the next decade than he had been in previous years. As always, Bogle backs into his return forecast by looking at the equity market's current dividend yield, then factors in expected earnings growth and P/E multiple expansion or contraction. The S&P 500 currently yields about 2%, and Bogle expected in late October that earnings growth would run in the range of 5%. He then gave that 7% expected return (the 2% dividend yield plus 5% earnings growth) a haircut to account for his expected P/E contraction, bringing his self-described "reasonable expectation" for stocks down to between 4% and 5%. To arrive at his 4% return expectations for bonds over the next decade, Bogle uses a blend of the starting yields for Treasuries and high-quality corporates.

GMO

Highlights: negative 4.1% real (inflation-adjusted) returns for U.S. large caps over the next seven years; negative 0.2% real returns for U.S. bonds; 4.4% real returns for emerging-markets equities; 2.9% real returns for emerging-markets debt (November 2018).

As always, the return expectations from the notoriously pessimistic Grantham Mayo Van Otterloo run toward the gloomy side of our collected prognostications. The firm expects U.S. large caps and hedged international bonds to post the worst performance of all of its major asset classes over the next 7 years: It's forecasting negative 4.1% real returns for the former and negative 2.1% real returns from dollar-hedged international bonds from developed markets. The firm expects U.S. small-cap stocks to perform much better than large, but still believes that U.S. small-cap investors will sink into the red on an inflation-adjusted basis, losing 0.7%.

Consistent with its recent expectations, the firm is most sanguine about the prospects for emerging-markets equities and bonds, forecasting 4.4% real returns for emerging-markets equities and 2.9% gains for emerging-markets bonds. The firm is more optimistic still for the subset of emerging-markets equities it considers emerging markets value stocks, predicting a nearly 8% real return for the asset class.

It's worth noting that the firm's pessimism on U.S. equities and positive outlook for emerging markets has cost it on the return front over the past several years: Wells Fargo Absolute Return (WARAX), which GMO manages, has recently struggled and earns a Neutral rating from Morningstar's analyst team.

J.P. Morgan Asset Management
Highlights: 5.25% return assumption (nominal) for U.S. equities over a 10- to 15-year horizon; 4.5% nominal return assumption for U.S. investment-grade corporate bonds over 10- to 15-year holding period (October 2018).

J.P. Morgan Asset Management updates its capital return assumptions for major asset classes annually, and notes that its assumptions are little changed from 2018. One of the biggest upward revisions in the firm's return assumptions was in the realm of U.S. high-quality corporate bonds, from 3.5% to 4.5%. As with several of the other firms, J.P. Morgan Asset Management is more sanguine about the prospects for emerging markets equities than developed markets stocks; the firm's assumption is for an 8.5% return from the asset class over the next 10 to 15 years, a function of lower starting valuations.

Note that J.P. Morgan Asset Management expresses its return assumptions in nominal, rather than inflation-adjusted, terms. However, the firm describes its inflation expectations as dovish, meaning that it expects inflation to continue to be mild. Additionally, it's important to note that the firm published its report before markets took a dive at the end of 2018.

Morningstar Investment Management
Highlights: 1.8% 10-year nominal returns for U.S. stocks; 3.3% 10-year nominal returns for U.S. bonds (Sept. 30, 2018).

The headline here is that as of Sept. 30, 2018, Morningstar Investment Management expected higher gains from U.S. bonds than U.S. stocks over the next decade. As with GMO, however, the outlook is more optimistic for foreign equities: MIM expects U.S. holders of international developed equities to earn nearly 6% on a nominal (noninflation-adjusted) basis, and U.S. holders of emerging-markets equities to earn nearly 7% nominally. Morningstar Investment Management provides its latest return expectations in Morningstar Markets Observer; the latest issue will be out this month.

Research Affiliates
Highlights: 0.7% real returns for U.S. large caps during the next 10 years; 0.5% real returns for the Barclays U.S. Aggregate Bond Index (Dec. 31, 2018; valuation-dependent model).

Research Affiliates deserves plaudits for its intuitive and user-friendly scatter plot depicting the firm's expectations for 10-year returns and volatility from the major can also adjust to see return expectations based on a valuation-focused model and one focused on dividends and growth.

The firm's recent 10-year risk/return expectations suggest that U.S. investors relying strictly on U.S. stocks and bonds could be disappointed over the next decade: The firm's valuation-dependent model calls for a 0.7% real return for U.S. large-cap stocks and 0.5% inflation-adjusted gains for the U.S. Aggregate Bond Index. Real return expectations are more encouraging for those two asset classes using the firm's "yield and growth" model--3.3% for U.S. large caps and 0.6% for the U.S. Aggregate Bond Index.

Like GMO and Morningstar, the firm has higher return expectations from foreign stocks and especially emerging markets. Its valuation-dependent model suggests a nearly 6% real return over the next decade from the MSCI EAFE index (developed markets foreign stocks) and a nearly 8% return from emerging markets equities.

Vanguard
Highlights: Nominal U.S. equity-market returns in the 3% to 5% range during the next decade; 6% to 8% returns for non-U.S. equities; 2.5% to 4.5% expected returns for global fixed-income markets (December 2018).

In its 2019 Economic and Market Outlook, Vanguard's Investment Strategy Group wrote that its 10-year return assumptions for global stocks and bonds are modestly higher than this time last year. But the firm isn't forecasting blockbuster gains from any of the major asset classes. It's expecting U.S. equities to post gains in the 3% to 5% range, lower than its forecast for non-U.S. equities (6% to 8%). Thus, like other firms, it's emphasizing the importance of geographic diversification. In contrast with several of the aforementioned firms, however, Vanguard calls valuations in emerging markets "stretched." Ditto for valuations in the U.S., which Vanguard's economists expect to contract as yields rise over the next decade.

Note that Vanguard expresses its capital markets return assumptions in nominal rather than inflation-adjusted terms. However, the report's authors don't see any reason for investors to expect runaway inflation.

Why Market Returns May Be Lower and Global Diversification More Important in the Future

May 3, 2021

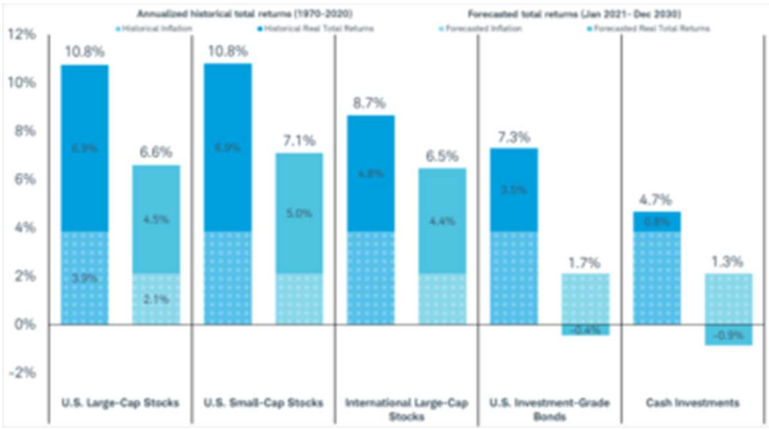
By Veeru Perianan

Market returns on stocks and bonds over the next decade are expected to fall short of historical averages, according to our 2021 estimates.[1] This article provides a broad overview of the methodology used for calculating our capital market return estimates and highlights the importance of diversification and staying focused on long-term financial objectives that are based on reasonable expectations.

The main factors behind the lower expectations for market returns are historically low interest rates, tepid long-term economic growth prospects, and elevated equity valuations.

The reduced outlook follows an extended period of double-digit returns for some asset classes, as shown in the chart below. As such, now may be a good time for investors to review, and consider resetting, long-term financial goals to ensure that they are based on projections grounded in disciplined methodology rather than on historical averages.

Curb your expectations



Total return = price growth plus dividend and interest income. The example does not reflect the effects of taxes or fees. Numbers rounded to the nearest one-tenth of a percentage point. Benchmark indexes for the asset classes: S&P 500® index (U.S. Large-Cap Stocks), Russell 2000® (U.S. Small-Cap Stocks), MSCI EAFE Index® (International Large-Cap Stocks), Bloomberg Barclays U.S. Aggregate Bond Index (U.S. Investment-Grade Bonds), and Citigroup 3-Month U.S. Treasury Bill Index (Cash Investments). Historical inflation is based on Consumer Price Index for All Urban Consumers, published by U.S. Bureau of Labor Statistics. **Past performance is no guarantee of future results.**

Source: Charles Schwab Investment Advisory, Inc. Historical data from Morningstar Direct. Data as of 12/31/2020.

Our estimates show that, over the next 10 years, stocks and bonds will likely fall short of their historical annualized returns from 1970 to December 2020. The estimated annual expected return for U.S. large-capitalization stocks from January 2021 to December 2030 is 6.6%, for example, compared with an annualized return of 10.8% during the historical period. Small-capitalization stocks, international large-capitalization stocks, core bonds, and cash investments also are projected to post lower returns through December 2030. We find the same pattern with *real* returns for these investments (i.e., returns after removing the effect of inflation). Which suggests that the reasons for this are more complex, and rest on the fundamental drivers of economic growth.

Expectations of rising inflation have been on many an investor's mind lately. The reasons are understandable, especially due to the Federal Reserve's current accommodative monetary policy as a response to the aftereffects of the pandemic on the economy. As the economy opens up and demand ramps up ahead of supply chains coming online, there could be increased inflationary pressures in the near term, but we do not believe this extends to the long term. As the economy readjusts, and we look toward the long term, we expect future inflation to remain benign at 2.1%. This is based on consensus estimates of leading economists, and is quite a bit lower than historical inflation, which has averaged 3.9% since 1970. The impact of inflation can be felt across asset classes, but most adversely in case of cash and bonds.

Cash expected returns are expected to remain low. Monetary policy, combined with investors' flight to safety, has caused bond term premiums—that is, the difference between the yields earned by locking up money over an extended period vs. rolling over a short-term instrument (like Treasury bills) for the same period—to turn negative. This suggests that bond returns are also likely to remain subdued.

Here are answers to frequently asked questions about these market estimates:

Why are long-term estimates of returns important?

A sound financial plan serves as a road map to help investors reach long-term financial goals. To get there, investors need reasonable expectations for long-term market returns.

Return expectations that are too optimistic, for example, could mislead investors to expect their investments to grow at an unrealistically high rate. This may cause them to save less, in the hope that their investments might grow large enough to fund their retirement or big expenses. But when actual returns do not match these expectations, it could lead to a delayed retirement or make it difficult to pay for a big expense, such as a college education. On the other hand, if return expectations are overly pessimistic, too much may be saved in the nest egg at the expense of everyday living.

How do you calculate your long-term forecasts?

The long-term estimates cover a 10-year time horizon. We take a forward-looking approach to forecasting returns, rather than basing our estimates on historical averages. Historical averages are less useful, as these only describe past performance. Forward-looking return estimates, however, incorporate expectations for the future, making them more useful for making investment decisions.

For U.S. and international large-cap stocks, we use analyst earnings estimates and macroeconomic forecast data to estimate two key cash-flow drivers of investment returns: recurring investment income (earnings) and capital gains generated by selling the investment at the end of the forecast horizon of 10 years. To arrive at a return estimate, we answer the question: What returns would investors make if they bought these assets at the current price level to obtain these forecasted future cash flows?

For U.S. small-capitalization stocks, we forecast the returns by analyzing and including the so-called “size risk premium.” This is the amount of money that investors in small-capitalization stocks expect to earn over and above the returns on U.S. large-capitalization stocks.

For the U.S. investment-grade bonds asset class, which includes Treasuries, investment-grade corporate bonds and securitized bonds, our forecast takes into account yield-to-maturity of a risk-free bond, roll-down return, and a credit risk premium.[2] We believe the future level of return an investor will receive is anchored to a large extent by the yield of a 10-year U.S. Treasury bond. Treasury bonds are generally considered to be default-risk-free. Aside from this, roll-down return is an additional source of return bond fund investors typically earn, as they almost always invest in a bond portfolio that is designed to maintain an average maturity. For example, a roll-down return occurs when a bond fund manager sells a bond whose maturity falls below the average maturity of the portfolio. This process typically results in a gain because yields on bonds with longer maturities are usually higher than on shorter maturities, and because bond prices rise when yields fall. Credit risk premium is the return an investor earns for taking on the risk of default, as when investing in a relatively riskier bond, such as a corporate bond.

Cash investments are very short-term in nature, typically not exceeding three months at a given time, and are reinvested at the end of each period for as long of a horizon as desired. We assume this horizon to be 10 years and estimate the returns from cash investments over this period using a term premium model.

Why do you expect long-term returns to be lower than historical averages?

Three primary factors are behind the forecast for reduced returns: low interest rates, low economic growth, and equity valuations.

- ***Low interest rates.*** Lower inflation affects yields on everything from cash to 30-year Treasury bonds. As noted earlier, inflation is low by historical standards and expected to remain so over the next 10 years. When the rate of inflation is low, *nominal* bond yields also have been low. That is because bond investors generally do not require as much yield premium to compensate for the erosion in buying power that inflation can inflict on a portfolio. Nominal bond yields are the yields that investors typically notice and does not remove the impact of inflation, as *real* yields do. Current and expected interest rates are much lower than what has transpired historically, especially compared to the high-interest-rate environment of the 1980s. The Fed has once again started following a zero-interest-rate policy in response to the economic fallout due to COVID-19. Low yields mean investors earn less from the fixed-income portion of their portfolios.
- ***Low economic growth.*** Economic growth and inflation typically go hand in hand. Strong economic growth typically causes rising inflation, as demand grows faster than supply. Inflation induced by growth is a good thing, as asset returns also tend to increase. At present, while near term economic growth is likely to be robust, as the economy opens up (post-pandemic), consensus forecasts of economic growth over the long term remain subdued. A measure of economic growth is

annual *real* gross domestic product (GDP) growth. A robust economy is fundamental to achieving healthy returns from the financial markets. Everything from monetary policy, to interest rates and company earnings are linked to this. According to consensus forecasts, economists expect 2.3% GDP growth per year, on average, over the next 10 years, even after accounting for expectations of increased economic activity post-pandemic. This compares to historical average GDP growth of 3.1% per year (since 1948).

- ***Equity valuations***. Valuations appear to be stretched compared to last March's levels. While earnings growth is expected to remain strong in the medium term—as the economy starts to get back to normal post-pandemic—the stock rally since last March has run far ahead of these expectations. High stock prices today, without a proportionate increase in future earnings, mean lower expected returns going forward. But stocks still tend to have higher expected returns than bonds, as they generally have higher risks.

What could lead to higher returns?

Returns could exceed our expectations if the U.S. economy grows more than economists anticipate. Higher-than-expected economic growth would likely lead to higher earnings growth, driving stock and bond returns higher. An example of the economy growing faster than expected occurred from 1990 to 1999. During that period, economists expected annual GDP growth of 2.4%, while the U.S. economy grew at a much higher rate of 3.4% annually on average. Corresponding returns from U.S. large-capitalization stocks were 18.2% on average and core bonds averaged 7.7% despite severe market turbulence in 1998.

What can investors do now?

Thanks to the power of compound returns, what investors do (or don't do) today can have big implications on their ability to meet their long-term goals.

Here are a few things to consider doing. First, if you don't have a long-term financial plan, now is a good time to put one together. Second, try to minimize fees and taxes, particularly in a lower-return environment. And last but not least: Build a well-diversified portfolio.

Common Equity	2,803,794,382	51.60%	9.60%	4.954%	6.468%
Total	5,547,509,849	100.00%		6.90%	8.43%

Pre-Tax Interest Coverage[2] 4.3

Note:
1. The calculation of the weighted cost rate is rounded to the thousandth place.
2. The pre-tax cost of debt and equity is grossed up by tax retention factors of 0.9944 for debt capital and 0.7659 for equity capital.

SUMMARY OF PUBLIC STAFF ADJUSTMENTS
For The Test Year Ended December 31, 2020

Line No.	Item	Public Staff Filed Amount
1	**Application Increase in Revenue Requirement filed by the Company**	**$109,025,725**
	Public Staff Adjustments:	
2	Change in Equity ratio from 52% to 50.54%	(6,702,256)
3	Change in cost of long-term debt from 4.09% to 4.08%	(236,724)
4	Change in cost of short-term debt from 0.47% to 0.20%	(85,115)
5	Change in return on equity from 10.25% to 9.42%	(26,412,817)
6	Plant in Service Updates and Related Items at May 31, 2021	(56,741,982)
7	ADIT - updated to May 31, 2021	738,514
8	Design Day Allocation Change	(4,006,615)
9	Adjust working capital - Lead Lag	52,150
10	Other working capital - May 31, 2021 updates	541,350
11	Adjustment to end of period revenue - weather and growth and COG	(64,774,757)
12	Adjustment to other operating revenues	(1,894,144)
13	Adjustment to the Cost of Gas	66,925,077
13	Robeson LNG Adjustment	(5,498,027)
14	Special Contract - remove PIS associated with facilities	(174,335)
15	Payroll and Related Expenses	(2,399,614)
16	Other Benefits	(2,782,972)
26	Pension OPEB LTD Expense	(826,603)
17	Customer Payment Fees	(843,386)
18	Board Expenses	(362,778)
19	Executive Compensation	(270,911)
20	Incentive Plans	(367,921)
21	Rate Case Expenses - 4 year amortization	(238,369)
22	Sponsorships & Donations	(63,762)
23	Uncollectibles	(820,682)
24	Inflation Adjustment - removed certain expenses and updated rate	(719,351)
25	Nonutility Adjustment - O&M and plant	(598,751)
27	Deferral: PIM Transmission Costs - update actual expenses @ May 31, 2021, 4 years	(883,412)
28	Deferral: Environmental Costs - update actual expenses @ May 31, 2021, 4 years	70,700
29	Deferral: PIM Distribution Costs - update actual expenses @ May 31, 2021, 4 years	1,354,405
30	Deferral EasternNC, 4 year amortization	(138,923)
31	Deferred Undercollection of Regulatory Fee, 4 years	(55,933)
32	COVID Expense Adjustment - non recurring	(958,480)
33	Regulatory Fee Expense	1,067
34	Advertising - remove promotional, image, competitive, & non-recurring	(384,851)
35	Aviation Expense	(192,175)
36	Interest on customer deposits	(490)
37	Lobbying Expenses	(76,553)
38	Amortization of protected EDIT, net of tax	460,637
39	Change in retention factor - Uncollectibles and Regulatory Fee changes	(114,747)
40	Adjust cash working capital for revenue impact of Public Staff adjustments	(4,995)
41	Rounding	(3)
42	**Public Staff Adjustments**	(109,488,533)
43	**Public Staff Revenue Requirement Increase**	**($462,808)**
	Rider impacts on Public Staff Revenue Requirement:	
44	Federal Unprotected EDIT Rider, 3 year remaining flow back	($22,340,624)
45	State EDIT, 1 year remaining flow back	(20,483,570)
46	**Public Staff Recommended Change in Revenue Requirement due to Riders (Sum of Lines 48-50)**	**($42,824,194)**
47	**Public Staff Recommended Change in Revenue Requirement for Year 1**	($43,287,001)
54	Public Staff Recommended Change in Revenue Requirement for Years 2- 3	($22,803,432)
55	Public Staff Recommended Change in Revenue Requirement for Year 4	($462,808)

STATE OF NORTH CAROLINA
UTILITIES COMMISSION
RALEIGH

DOCKET NO. G-9, SUB 722

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

In the Matter of Consolidated Natural Gas Construction and Redelivery Services Agreement Between Piedmont Natural Gas Company, Inc., and Duke Energy Carolinas, LLC	))))	PUBLIC STAFF RECOMMENDATIONS AND PROPOSED ORDER

NOW COMES THE PUBLIC STAFF – North Carolina Utilities Commission (Public Staff), by and through its Executive Director, Christopher J. Ayers, and respectfully submits its recommendations and proposed order in response to the Commission's Order Granting Extension of Interim Authority to Operate Under Second Revised Agreement and Requiring Public Staff Action issued in this docket on April 20, 2020 (Second Interim Order).

BACKGROUND

1. On July 26, 2004, in Docket No. G-9, Sub 491, Piedmont Natural Gas Company, Inc. (Piedmont), filed an application for approval of a multi-year Gas Redelivery Agreement (Original Agreement) between Piedmont and Duke Power Company, the predecessor of Duke Energy Carolinas, LLC (DEC). In summary, the Original Agreement set the rates and terms by which Piedmont proposed to provide natural gas redelivery service to DEC's Lincoln County Combustion Turbine Facility (Lincoln Plant). On August 30, 2004, the Public Staff presented the Original Agreement to the Commission as an agenda item during a Regular Staff

Conference and recommended that the Commission approve the Original Agreement, which was approved by the Commission on September 3, 2004.

2. On September 29, 2016, in Docket Nos. E-2, Sub 1095, E-7, Sub 1100, and G-9, Sub 682, the Commission issued an Order Approving Merger Subject to Regulatory Conditions and Code of Conduct (Merger Order), approving the merger of Piedmont and Duke Energy Corporation, the parent company of DEC. Among other things, the Merger Order resulted in DEC and Piedmont becoming affiliates of one another, with contracts between DEC and Piedmont thus being subject to the requirements of N.C. Gen. Stat. § 62-153.

3. On April 23, 2018, pursuant to N.C.G.S. § 62-153(b), Piedmont filed with the Commission in the instant docket a form of Consolidated Natural Gas Construction and Redelivery Services Agreement related to the construction of new incremental natural gas facilities (New Facilities) and the provision of additional redelivery service by Piedmont to DEC at the Lincoln Plant and Customer’s agreement to pay special contract rates and to guarantee certain margin recoveries by Piedmont to cover the costs of such service (Revised Agreement). Piedmont stated that the Revised Agreement consolidated, superseded, and expanded upon DEC’s and Piedmont’s rights and responsibilities under the Original Agreement for services at the Lincoln Plant.

4. The Public Staff reviewed the proposed Revised Agreement and raised several concerns with Piedmont, particularly with respect to the degree of system contribution provided for by the agreed rates set forth in the Revised Agreement. On November 16, 2018, Piedmont filed a revised Consolidated Natural

Gas Construction and Redelivery Services Agreement (Second Revised Agreement) between Piedmont and DEC. Piedmont stated that the Second Revised Agreement added a usage-based system support surcharge that was renegotiated with DEC in order to address the Public Staff's concerns related to system contributions by the New Facilities. Piedmont requested that the Second Revised Agreement be substituted in its entirety for the previously filed Revised Agreement and that the Commission approve the Second Revised Agreement at its earliest convenience.

5. On January 10, 2020, Piedmont filed a Request for Authorization to Commence Service. Piedmont summarized the Public Staff's investigation and stated that it engaged with the Public Staff in discussions about the utilization of usage-based system support charges for special contract arrangements as reflected in the Stipulation in Piedmont's last general rate case in Docket No. G-9, Sub 743 (2019 Rate Case), and that those discussions were continuing. Piedmont further stated that it had been advised that DEC will require service to the New Facilities beginning February 1, 2020, and that Piedmont is physically able and willing to provide such service as requested by DEC since Piedmont proceeded with construction of those facilities notwithstanding the ongoing nature of discussions with the Public Staff about the appropriate rates for service through such facilities to provide such service as requested by DEC. Piedmont requested that the Commission authorize the commencement of incremental service to the Lincoln Plant effective February 1, 2020, on an interim basis, at the rates reflected in the Second Revised Agreement, which according to Piedmont include a

volumetric usage-based system support surcharge applicable to the New Facilities that will be subject to retroactive adjustment pursuant to a final order by the Commission in this proceeding. Finally, Piedmont stated that the Public Staff did not object to the requested interim authority.

6. On January 28, 2020, the Commission issued the Order Granting Interim Authority to Operate Under Second Revised Agreement and Requiring Public Staff Action (Interim Order), which authorized Piedmont to commence service to DEC at the Lincoln Plant under the rates and other terms set forth in the Second Revised Agreement. Such interim authority was effective on February 1, 2020, and shall end at midnight on April 30, 2020, unless it is extended by order of the Commission prior to its expiration. The Interim Order also required that the rates paid by DEC and received by Piedmont should be subject to retroactive adjustment if the Commission determines such an adjustment to be appropriate when the Commission takes final action on the Second Revised Agreement. The Interim Order also required that on or before March 16, 2020, the Public Staff file its final recommendations and a proposed order with the Commission in this docket, or place this matter on a Regular Staff Conference agenda, otherwise the Public Staff shall provide the Commission with a written report on the status of its review of the Second Revised Agreement no later than March 18, 2020.

7. On March 18, 2020, the Public Staff filed a status report indicating that it was finalizing its recommendations and proposed order, and anticipated that it should be able to make the filing in the near future.

8. On April 14, 2020, Piedmont filed a Motion for Extension of Authorization to Provide Service. On April 20, 2020, the Commission issued the Second Interim Order, which authorized Piedmont to operate under the Second Revised Agreement and required the Public Staff to file its final recommendation(s) and proposed order on or before June 1, 2020.

PUBLIC STAFF'S REVIEW

9. The Public Staff has reviewed the Second Revised Agreement and other information provided by Piedmont in response to Public Staff data requests pursuant to the parameters set forth in N.C.G.S. § 62-140, N.C.G.S. § 62-142, and N.C.G.S. § 62-153(b).

10. The Public Staff believes that the purpose of the volumetric rate component included in special and electric generation contracts is to provide recovery of costs related to existing local distribution company (LDC) infrastructure and operations and to prevent subsidization of the contract customer by the LDC's other customers. The special and electric generation contracts are typically negotiated, and may be structured with (a) a demand charge that recovers the plant investment required to serve the customer, (b) margin and fixed gas cost components, (c) other negotiated volumetric components that provide system contributions, or (d) other contributions resulting from the contract terms that result in a benefit to the system. The volumetric rate component should be comparable

with the type of volumetric contribution paid by both interruptible[1] and firm[2] tariffed transportation customers on the LDC's system.

11. In the current instance, the infrastructure costs to serve the existing facilities at the Lincoln Plant (Existing Facilities) have been fully recovered through a demand charge imposed under the Original Agreement that was approved in Docket No. G-9, Sub 491. Piedmont stated that the Original Agreement would simultaneously help preserve the reliability and affordability of electric service provided by DEC to North Carolina consumers and ensure that Piedmont's natural gas customers receive the load-leveling and margin benefits of this significant natural gas customer. The Original Agreement also provided for a **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** on the Piedmont system. Contrastingly, the Revised Agreement addressed **[BEGIN CONFIDENTIAL]** [redacted]

---

[1] "Service on an interruptible basis means that the capacity used to provide the service is subject to a prior claim by another customer or another class of service and receives a lower priority than such other classes of service." 18 C.F.R. § 284.9(a)(3) (2020).

[2] "Service on a firm basis means that the service is not subject to a prior claim by another customer or another class of service and receives the same priority as any other class of firm service." 18 C.F.R. § 284.7(a)(3) (2020).

[redacted]. **[END CONFIDENTIAL]** The new pipeline facilities are designed to take delivery of **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** The Revised Agreement also provided that **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** The Public Staff had concerns and began discussions with the Company due to the fact that the Revised Agreement **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** The Public Staff and Piedmont agreed to continue to work together to determine the appropriate usage-based system support surcharges for the special contract and electric generation arrangements filed by Piedmont.

12. The Second Revised Agreement filed by Piedmont added a usage-based system support surcharge that was negotiated with DEC in order to address Public Staff concerns related to system contributions by the New Facilities. The Public Staff was not consulted regarding the specific methodology used by Piedmont to determine the usage-based system support surcharge prior to the filing of the Second Revised Agreement. Once the Second Revised Agreement was filed, and throughout 2019, the Public Staff sent data requests and reviewed the responses related to the new volumetric system support charge while discussions continued, including during the 2019 Rate Case. Based upon its investigation, the Public Staff found that the system support charge in the Second Revised Agreement **[BEGIN CONFIDENTIAL]** [redacted]

[redacted]. **[END CONFIDENTIAL]**

13. The Public Staff has concerns regarding the methodology chosen by Piedmont due to the fact that Piedmont has **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]**

14. The Public Staff has continued to research and perform analyses on the methodology needed to determine the appropriate volumetric rate components for the New Facilities based on the type of electric generator – combined cycle (CC) or combustion turbine (CT), the amount of plant investment required, the volume levels, the nature of transportation service – firm or interruptible, the location of the electric generator, prior negotiated electric generation agreements, and prior bypass agreements that were approved by the Commission when there were issues of negotiated volumetric charges. The Public Staff has come to the following conclusions:

a. A volumetric rate component should generally apply to all volumes flowing through the system to the electric generator when delivering gas on a firm or interruptible transportation basis; otherwise, the volumetric charge has a greater risk of not providing adequate system support.

b. The methodology for determining the volumetric system support charge for (i) electric generation customers and (ii) special contract customers, who tend to have contracts shorter in length and will be returning to tariff rates once the incremental plant investment is recovered, may need to be different.

c. The volumetric system support component for a CT electric generator may be different from a CC electric generator, primarily due to the fact that CT electric generators are typically utilizing interruptible transportation. In our research, the Public Staff has found that negotiated CT electric generation agreements usually include **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** This is consistent with the **[BEGIN CONFIDENTIAL]** [redacted] **[END**

[3] Docket No. G-5, Sub 517, Natural Gas Redelivery Agreement between Public Service Company of North Carolina, Inc. and Southern Company Services, Inc., d/b/a Southern Power Company - North Carolina, Article VII, Section B. Order Allowing Agreement to Become Effective issued August 25, 2010.

Docket No. G-9, Sub 491, Gas Redelivery Agreement between Piedmont Natural Gas Company, Inc. and Duke Power, Article II, Section 2.01. Order Allowing Contract to Become Effective issued September 3, 2004.

Docket No. G-5, Sub 398, Transportation Service Agreement between Public Service Company of North Carolina, Inc. and Carolina Power & Light Company, Section IV(A)(ii). Order Allowing Contract to Become Effective and Approving Accounting Treatment issued May 23, 1999.

CONFIDENTIAL] reflected in the Original Agreement, as well as the **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** reflected in the Second Revised Agreement related to what will now be **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** to the Existing Facilities.

d. Also based on our research, we have determined that the volumetric system support charge for a CC electric generator agreement may be higher due to the fact that CC electric generators are typically requiring firm transportation service, as well as creating more risk on the system with the higher volumes being delivered. The Public Staff has found that other CC electric generation agreements usually include a **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** In past dockets, CC electric generator agreements may also have produced enough system benefits to customers in a general rate case from other contract terms, such as tax rates and approved overall return components that were no longer in effect following the conclusion of a particular proceeding.

---

[4] Docket No. G-5, Sub 559, Natural Gas Pipeline Construction and Transportation Service Agreement between Public Service Company of North Carolina, Inc. and Duke Energy Progress, Inc., Order Allowing Agreement to become Effective issued October 6, 2015.

Docket No. G-5, Sub 569, Natural Gas Pipeline Construction and Transportation Service Agreement between Public Service Company of North Carolina, Inc. and Duke Energy Carolinas, LLC, Order Allowing Agreement to Become Effective issued December 20, 2016.

e. The Commission in past cases has also had to make decisions based on bypass situations when a large transportation customer was in close proximity to the interstate pipeline. In a case involving Owens-Brockway Glass Container, Inc., and Piedmont (Docket No. G-9, Sub 395), the customer did not want to pay a tariff transportation rate to Piedmont to redeliver gas when it was so close in proximity to the interstate pipeline. In that case, the Commission found that the proposed bypass was probable and, therefore, ordered the parties to continue to negotiate until they came to an agreed upon rate. The final negotiated contract included a **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]**

f. Using the filed per books Allocated Cost of Service Study and revenue data reflected in the 2019 Rate Case, as well as the contract terms of the Second Revised Agreement, the Public Staff determined the operating and maintenance expenses assigned to Rate Schedule 113 – Large General Transportation (Firm) Service customers and the assigned volumes by customer class updated for the contract O&M and volumes and calculated an O&M per dt rate for firm transportation service between $0.09 per dt to $0.05 per dt, utilizing reasonably representative load factors for the New Facilities.

g. The Public Staff notes that the Commission has approved two other negotiated electric generation agreements[5] in recent years prior to Piedmont filing the Second Revised Agreement. These electric generation agreements for **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** on the LDC's system. These **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** the Public Staff believes that electric generators on the Piedmont system are getting a better arrangement than they are getting on other LDC systems in the state.

15. The Public Staff has had discussions with Piedmont involving all of the points discussed above. Although Piedmont does not have access to the volumetric rates that electric generators are paying to other LDCs in North Carolina for firm and interruptible transportation volumes that are delivered to electric generation facilities, the Public Staff and the Commission both have access to the

---

[5] See footnote 4.

rates. In our discussions with Piedmont, the Public Staff has attempted to explain to Piedmont how other types of electric generation agreements in North Carolina are structured without divulging the confidential nature of the terms in the other electric generation agreements.

PUBLIC STAFF'S RECOMMENDATIONS

16. Based on the foregoing, the Public Staff has determined that the terms of the Second Revised Agreement are not in accordance with the requirements of N.C.G.S. § 62-140 and N.C.G.S. § 62-153. The Public Staff recommends that Piedmont renegotiate with DEC for a **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** as reflected in the Second Revised Agreement, for the following reasons:

a. The New Facilities include a **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** electric generation plant that will be utilizing **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** transportation service on Piedmont's system.

b. The **[BEGIN CONFIDENTIAL]** [redacted]

---

[6] There have been two special contracts that the Public Staff recently recommended approval of and the Commission subsequently approved that **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** The Public Staff further concluded that these special contracts were estimated to provide benefits that

[redacted] **[END CONFIDENTIAL]** does not represent a reasonable level of system contributions due to the expected **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** transportation basis to the New Facilities, which creates more risk on the system.

c. The Original Agreement for the Lincoln Plant, which has now been rolled into the Second Revised Agreement for the New Facilities, will continue to include a **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** delivered to the Existing Facilities, but will now be delivered **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]**

d. Other **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** electric generation agreements in North Carolina include a **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** while other **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** electric generation agreements that involve **[BEGIN CONFIDENTIAL]** [redacted]

---

will flow to other ratepayers as determined in a fair and reasonable manner in a general rate case proceeding.

[redacted]. **[END CONFIDENTIAL]**

e. Even in a “bypass situation” where an industrial customer was located very close to an interstate pipeline, this Commission has concluded that a customer must pay a volumetric charge for transporting all volumes on Piedmont’s system.

17. To summarize, in this docket, Piedmont is proposing to **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** and (b) is comparable to the volumetric pricing of other electric generators outside of Piedmont’s service territory, and (c) is generally a more reasonable and appropriate methodology **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** The Public Staff believes its recommendation is reasonable given the **[BEGIN CONFIDENTIAL]** [redacted]. **[END CONFIDENTIAL]** Unless Piedmont renegotiates with DEC as set out above, the Public Staff recommends that the Commission impute **[BEGIN CONFIDENTIAL]** [redacted] **[END**

CONFIDENTIAL] for the New Facilities in Piedmont's future general rate case proceedings when determining end of period and proposed revenues. In addition, the Public Staff recommends that Piedmont should be required to include the imputed revenues for the relevant period as a footnote in its GS-1 Reports.

18. The Public Staff recommends that the Commission issue the proposed order approving the Public Staff's recommendations, which is attached as Attachment A.

Respectfully submitted, this the 1st day of June, 2020.

ATTACHMENT A

STATE OF NORTH CAROLINA
UTILITIES COMMISSION
RALEIGH

DOCKET NO. G-9, SUB 722

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

In the Matter of Consolidated Natural Gas Construction and Redelivery Services Agreement Between Piedmont Natural Gas Company, Inc., and Duke Energy Carolinas, LLC	))))	ORDER ALLOWING AGREEMENT TO BECOME EFFECTIVE

BY THE COMMISSION: On July 26, 2004, in Docket No. G-9, Sub 491, Piedmont Natural Gas Company, Inc. (Piedmont), filed an application for approval of a multi-year Gas Redelivery Agreement (Original Agreement) between Piedmont and Duke Power Company, the predecessor of Duke Energy Carolinas, LLC (DEC). In summary, the Original Agreement set the rates and terms by which Piedmont proposed to provide natural gas redelivery service to DEC's Lincoln County Combustion Turbine Facility (Lincoln Plant). On August 30, 2004, the Public Staff presented the Original Agreement to the Commission as an agenda item during a Regular Staff Conference and recommended that the Commission approve the Original Agreement, which was approved by the Commission on September 3, 2004.

On September 29, 2016, in Docket Nos. E-2, Sub 1095, E-7, Sub 1100, and G-9, Sub 682, the Commission issued an Order Approving Merger Subject to Regulatory Conditions and Code of Conduct (Merger Order), approving the merger of Piedmont and Duke Energy Corporation, the parent company of DEC. Among other things, the Merger

Order resulted in DEC and Piedmont becoming affiliates of one another, with contracts between DEC and Piedmont thus being subject to the requirements of N.C. Gen. Stat. § 62-153.

On April 23, 2018, pursuant to N.C.G.S. § 62-153(b), Piedmont filed with the Commission in the instant docket a form of Consolidated Natural Gas Construction and Redelivery Services Agreement related to the construction of new incremental natural gas facilities (New Facilities) and the provision of additional redelivery service by Piedmont to DEC at the Lincoln Plant and Customer's agreement to pay special contract rates and to guarantee certain margin recoveries by Piedmont to cover the costs of such service (Revised Agreement). Piedmont stated that the Revised Agreement consolidated, superseded, and expanded upon DEC's and Piedmont's rights and responsibilities under the Original Agreement for services at the Lincoln Plant.

The Public Staff reviewed the proposed Revised Agreement and raised several concerns with Piedmont, particularly with respect to the degree of system contribution provided for by the agreed rates set forth in the Revised Agreement. On November 16, 2018, Piedmont filed a revised Consolidated Natural Gas Construction and Redelivery Services Agreement (Second Revised Agreement) between Piedmont and DEC. Piedmont stated that the Second Revised Agreement added a usage-based system support surcharge that was renegotiated with DEC in order to address the Public Staff's concerns related to system contributions by the New Facilities. Piedmont requested that the Second Revised Agreement be substituted in its entirety for the previously filed

Revised Agreement and that the Commission approve the Second Revised Agreement at its earliest convenience.

On January 10, 2020, Piedmont filed a Request for Authorization to Commence Service. Piedmont summarized the Public Staff's investigation and stated that it engaged with the Public Staff in discussions about the utilization of usage-based system support charges for special contract arrangements as reflected in the Stipulation in Piedmont's last general rate case in Docket No. G-9, Sub 743 (2019 Rate Case), and that those discussions were continuing. Piedmont further stated that it had been advised that DEC will require service to the New Facilities beginning February 1, 2020, and that Piedmont is physically able and willing to provide such service as requested by DEC since Piedmont proceeded with construction of those facilities notwithstanding the ongoing nature of discussions with the Public Staff about the appropriate rates for service through such facilities to provide such service as requested by DEC. Piedmont requested that the Commission authorize the commencement of incremental service to the Lincoln Plant effective February 1, 2020, on an interim basis, at the rates reflected in the Second Revised Agreement, which according to Piedmont include a volumetric usage-based system support surcharge applicable to the New Facilities that will be subject to retroactive adjustment pursuant to a final order by the Commission in this proceeding. Finally, Piedmont stated that the Public Staff did not object to the requested interim authority.

On January 28, 2020, the Commission issued the Order Granting Interim Authority to Operate Under Second Revised Agreement and Requiring Public Staff Action (Interim

Order), which authorized Piedmont to commence service to DEC at the Lincoln Plant under the rates and other terms set forth in the Second Revised Agreement. Such interim authority was effective on February 1, 2020, and shall end at midnight on April 30, 2020, unless it is extended by order of the Commission prior to its expiration. The Interim Order also required that the rates paid by DEC and received by Piedmont should be subject to retroactive adjustment if the Commission determines such an adjustment to be appropriate when the Commission takes final action on the Second Revised Agreement. The Interim Order also required that on or before March 16, 2020, the Public Staff file its final recommendations and a proposed order with the Commission in this docket, or place this matter on a Regular Staff Conference agenda, otherwise the Public Staff shall provide the Commission with a written report on the status of its review of the Second Revised Agreement no later than March 18, 2020.

On March 18, 2020, the Public Staff filed a status report indicating that it was finalizing its recommendations and proposed order, and anticipated that it should be able to make the filing in the near future.

On April 14, 2020, Piedmont filed a Motion for Extension of Authorization to Provide Service. On April 20, 2020, the Commission issued the Order Granting Extension of Interim Authority to Operate Under Second Revised Agreement and Requiring Public Staff Action issued in this docket on April 20, 2020 (Second Interim Order), which authorized Piedmont to operate under the Second Revised Agreement and required the Public Staff to file its final recommendation(s) and proposed order on or before June 1, 2020.

On June 1, 2020, the Public Staff filed its Recommendations and Proposed Order in accordance with the Second Interim Order (Public Staff Recommendations). The Public Staff stated that it had reviewed the Agreement and other information provided by Piedmont in response to Public Staff data requests. Based on its investigation, the Public Staff determined that the terms of the Second Revised Agreement are not in accordance with the requirements of N.C.G.S. § 62-140 and N.C.G.S. § 62-153. The Public Staff recommended that the Commission issue an order requiring Piedmont to renegotiate with DEC as set forth in the Public Staff Recommendations. The Public Staff also recommended that if Piedmont does not renegotiate with DEC, that the Commission make an appropriate imputation in Piedmont's future general rate case proceedings when determining end of period and proposed revenues. In addition, the Public Staff recommended that Piedmont should be required to include the imputed revenues for the relevant period as a footnote in its GS-1 Reports.

The Commission, having carefully reviewed the Second Revised Agreement between Piedmont and the Customer, and the Public Staff Recommendations concludes that the terms of the Second Revised Agreement are not in accordance with the requirements of N.C.G.S. § 62-140 and N.C.G.S. § 62-153. Accordingly, the Commission finds good cause to order Piedmont to either renegotiate with DEC or make an appropriate imputation in Piedmont's future general rate case proceedings when determining end of period and proposed revenues. The Commission also finds that Piedmont should be required to include the imputed revenues for the relevant period as a footnote in its GS-1 Reports.

IT IS, THEREFORE, ORDERED as follows:

1. That, Piedmont shall renegotiate with DEC or agree to make the appropriate imputation in its future general rate case proceedings when determining end of period and proposed revenues as set forth in the Public Staff Recommendations.

2. The Piedmont shall be required to include the imputed revenues for the relevant period as a footnote in its GS-1 Reports as set forth in the Public Staff Recommendations.

3. That Piedmont is hereby authorized to continue to provide natural gas service to the Customer on an interim basis pursuant to the Second Interim Order.

4. That, on or before thirty days from the date of this Order, Piedmont shall make a filing with the Commission advising whether it will renegotiate with DEC or will agree to make the appropriate imputation in its future general rate case proceedings when determining end of period and proposed revenues.

ISSUED BY ORDER OF THE COMMISSION

This the ____ day of ___________, 2020.

Re: Docket No. G-9, Sub 722

Dear Ms. Campbell:

Subsequent to the Public Staff's filing of its recommendations in this docket on June 1, 2020, the Public Staff learned that corrections needed to be made to the filing. The Public Staff is transmitting herewith for filing public and confidential versions of corrected pages 6, 7, 11, and 15, as well as a revised proposed order reflecting this filing.

By copy of this letter, I am forwarding a copy of the redacted version to all parties of record by electronic delivery. The confidential version will be provided to those parties that have entered into a confidentiality agreement.

Sincerely,

Electronically submitted

STATE OF NORTH CAROLINA
UTILITIES COMMISSION
RALEIGH

DOCKET NO. G-9, SUB 722

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

In the Matter of		
Consolidated Natural Gas Construction and	)	ORDER ALLOWING
Redelivery Services Agreement Between	)	AGREEMENT TO
Piedmont Natural Gas Company, Inc., and	)	BECOME EFFECTIVE
Duke Energy Carolinas, LLC	)	

BY THE COMMISSION: On July 26, 2004, in Docket No. G-9, Sub 491, Piedmont Natural Gas Company, Inc. (Piedmont), filed an application for approval of a multi-year Gas Redelivery Agreement (Original Agreement) between Piedmont and Duke Power Company, the predecessor of Duke Energy Carolinas, LLC (DEC). In summary, the Original Agreement set the rates and terms by which Piedmont proposed to provide natural gas redelivery service to DEC's Lincoln County Combustion Turbine Facility (Lincoln Plant). On August 30, 2004, the Public Staff presented the Original Agreement to the Commission as an agenda item during a Regular Staff Conference and recommended that the Commission approve the Original Agreement, which was approved by the Commission on September 3, 2004.

On September 29, 2016, in Docket Nos. E-2, Sub 1095, E-7, Sub 1100, and G-9, Sub 682, the Commission issued an Order Approving Merger Subject to Regulatory Conditions and Code of Conduct (Merger Order), approving the merger of Piedmont and Duke Energy Corporation, the parent company of DEC. Among other things, the Merger

Order resulted in DEC and Piedmont becoming affiliates of one another, with contracts between DEC and Piedmont thus being subject to the requirements of N.C. Gen. Stat. § 62-153.

On April 23, 2018, pursuant to N.C.G.S. § 62-153(b), Piedmont filed with the Commission in the instant docket a form of Consolidated Natural Gas Construction and Redelivery Services Agreement related to the construction of new incremental natural gas facilities (New Facilities) and the provision of additional redelivery service by Piedmont to DEC at the Lincoln Plant and Customer's agreement to pay special contract rates and to guarantee certain margin recoveries by Piedmont to cover the costs of such service (Revised Agreement). Piedmont stated that the Revised Agreement consolidated, superseded, and expanded upon DEC's and Piedmont's rights and responsibilities under the Original Agreement for services at the Lincoln Plant.

The Public Staff reviewed the proposed Revised Agreement and raised several concerns with Piedmont, particularly with respect to the degree of system contribution provided for by the agreed rates set forth in the Revised Agreement. On November 16, 2018, Piedmont filed a revised Consolidated Natural Gas Construction and Redelivery Services Agreement (Second Revised Agreement) between Piedmont and DEC. Piedmont stated that the Second Revised Agreement added a usage-based system support surcharge that was renegotiated with DEC in order to address the Public Staff's concerns related to system contributions by the New Facilities. Piedmont requested that the Second Revised Agreement be substituted in its entirety for the previously filed

Revised Agreement and that the Commission approve the Second Revised Agreement at its earliest convenience.

On January 10, 2020, Piedmont filed a Request for Authorization to Commence Service. Piedmont summarized the Public Staff's investigation and stated that it engaged with the Public Staff in discussions about the utilization of usage-based system support charges for special contract arrangements as reflected in the Stipulation in Piedmont's last general rate case in Docket No. G-9, Sub 743 (2019 Rate Case), and that those discussions were continuing. Piedmont further stated that it had been advised that DEC will require service to the New Facilities beginning February 1, 2020, and that Piedmont is physically able and willing to provide such service as requested by DEC since Piedmont proceeded with construction of those facilities notwithstanding the ongoing nature of discussions with the Public Staff about the appropriate rates for service through such facilities to provide such service as requested by DEC. Piedmont requested that the Commission authorize the commencement of incremental service to the Lincoln Plant effective February 1, 2020, on an interim basis, at the rates reflected in the Second Revised Agreement, which according to Piedmont include a volumetric usage-based system support surcharge applicable to the New Facilities that will be subject to retroactive adjustment pursuant to a final order by the Commission in this proceeding. Finally, Piedmont stated that the Public Staff did not object to the requested interim authority.

On January 28, 2020, the Commission issued the Order Granting Interim Authority to Operate Under Second Revised Agreement and Requiring Public Staff Action (Interim

Order), which authorized Piedmont to commence service to DEC at the Lincoln Plant under the rates and other terms set forth in the Second Revised Agreement. Such interim authority was effective on February 1, 2020, and shall end at midnight on April 30, 2020, unless it is extended by order of the Commission prior to its expiration. The Interim Order also required that the rates paid by DEC and received by Piedmont should be subject to retroactive adjustment if the Commission determines such an adjustment to be appropriate when the Commission takes final action on the Second Revised Agreement. The Interim Order also required that on or before March 16, 2020, the Public Staff file its final recommendations and a proposed order with the Commission in this docket, or place this matter on a Regular Staff Conference agenda, otherwise the Public Staff shall provide the Commission with a written report on the status of its review of the Second Revised Agreement no later than March 18, 2020.

On March 18, 2020, the Public Staff filed a status report indicating that it was finalizing its recommendations and proposed order, and anticipated that it should be able to make the filing in the near future.

On April 14, 2020, Piedmont filed a Motion for Extension of Authorization to Provide Service. On April 20, 2020, the Commission issued the Order Granting Extension of Interim Authority to Operate Under Second Revised Agreement and Requiring Public Staff Action issued in this docket on April 20, 2020 (Second Interim Order), which authorized Piedmont to operate under the Second Revised Agreement and required the Public Staff to file its final recommendation(s) and proposed order on or before June 1, 2020.

On June 1, 2020, the Public Staff filed its Recommendations and Proposed Order in accordance with the Second Interim Order (Public Staff Recommendations). The Public Staff stated that it had reviewed the Agreement and other information provided by Piedmont in response to Public Staff data requests. Based on its investigation, the Public Staff determined that the terms of the Second Revised Agreement are not in accordance with the requirements of N.C.G.S. § 62-140 and N.C.G.S. § 62-153. The Public Staff recommended that the Commission issue an order requiring Piedmont to renegotiate with DEC as set forth in the Public Staff Recommendations. The Public Staff also recommended that if Piedmont does not renegotiate with DEC, that the Commission make an appropriate imputation in Piedmont's future general rate case proceedings when determining end of period and proposed revenues. In addition, the Public Staff recommended that Piedmont should be required to include the imputed revenues for the relevant period as a footnote in its GS-1 Reports.

On June 24, 2020, the Public Staff filed corrections to pages 6, 7, 11, and 15 of the Public Staff Recommendations, as well as a revised proposed order.

The Commission, having carefully reviewed the Second Revised Agreement between Piedmont and the Customer, and the Public Staff Recommendations as corrected concludes that the terms of the Second Revised Agreement are not in accordance with the requirements of N.C.G.S. § 62-140 and N.C.G.S. § 62-153. Accordingly, the Commission finds good cause to order Piedmont to either renegotiate with DEC or make an appropriate imputation in Piedmont's future general rate case proceedings when determining end of period and proposed revenues. The Commission also finds that Piedmont should be required to include the imputed revenues for the relevant period as a footnote in its GS-1 Reports.

IT IS, THEREFORE, ORDERED as follows:

1. That, Piedmont shall renegotiate with DEC or agree to make the appropriate imputation in its future general rate case proceedings when determining end of period and proposed revenues as set forth in the Public Staff Recommendations as corrected.

2. The Piedmont shall be required to include the imputed revenues for the relevant period as a footnote in its GS-1 Reports as set forth in the Public Staff Recommendations as corrected.

3. That Piedmont is hereby authorized to continue to provide natural gas service to the Customer on an interim basis pursuant to the Second Interim Order.

4. That, on or before thirty days from the date of this Order, Piedmont shall make a filing with the Commission advising whether it will renegotiate with DEC or will agree to make the appropriate imputation in its future general rate case proceedings when determining end of period and proposed revenues.

ISSUED BY ORDER OF THE COMMISSION.

This the ____ day of ___________, 2020.

PERRY EXHIBIT VII

**RESPONSES TO COMMISSION QUESTIONS
IN ATTACHMENT A TO ITS
ORDER CONSOLIDATING DOCKETS AND
REQUIRING FILING OF TESTIMONY
ISSUED MARCH 16, 2021**

1. On June 1, 2020,[1] the Public Staff filed its recommendations and proposed order in the current docket. Paragraph 10 of the proposed order[2] states that the Public Staff believes that the purpose of the volumetric rate component included in special and electric generation contracts is to provide recovery of costs related to existing LDC infrastructure and operations and to prevent subsidization of the contract customer by the LDC's other customers. In light of this statement, provide:

a. Detailed information regarding the rationale that supports the purpose of the volumetric rate component as the main factor that helps in cost recovery of the existing LDC infrastructure and operations; and

Response: [BEGIN CONFIDENTIAL] [redacted] **[END CONFIDENTIAL]**

b. In the absence of a volumetric rate, provide the calculations and the assumptions used to calculate the subsidy that DEC's New Facilities would receive.

Response: [BEGIN CONFIDENTIAL] [redacted]

[redacted]

---

[1] On June 24, 2020, the Public Staff filed corrected pages 6, 7, 11, and 15 to the recommendations it filed on June 1, 2020, as well as a revised proposed order reflecting the filing.

[2] The reference to Paragraph 10 of the proposed order is incorrect. The correct reference is Paragraph 10 of the Public Staff's recommendations.

PERRY EXHIBIT VII

[redacted] **[END CONFIDENTIAL]**

2. With the data already provided by Piedmont in Docket No. G-9, Sub 722 and supplemental testimony/exhibits in Docket No. G-9 Sub 781; is it possible for Public Staff to design cost of service based fixed demand rate and volumetric rate for DEC's New Facilities?

Response: Yes.

a. If yes, calculate the cost-based volumetric rate and provide the calculations and assumptions used; and

Response: Please see calculations shown on CONFIDENTIAL Attachment A that reflect the Company's contract demand charge and the volumetric charge recommended by the Public Staff, as well as the price-out for Rate Schedule 113 using the same volumes levels.

b. If no, provide a copy of any additional data requested from Piedmont to calculate the cost-based demand and volumetric rates. Provide the calculations and the methodology used to calculate the rate.

Response: No answer required.

3. Does the Public Staff believe that it is appropriate for **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]?** Provide a detailed explanation supporting your response.

Response: [BEGIN CONFIDENTIAL] [redacted] **[END CONFIDENTIAL]**.

4. Among **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** sites that have negotiated rates, please explain why only **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]** have facilities volumetric rates.

Response: Because the **[BEGIN CONFIDENTIAL]** [redacted] **[END CONFIDENTIAL]**, the Public Staff is not currently able to respond to this question. **[BEGIN**

CONFIDENTIAL] [redacted] **[END CONFIDENTIAL]**, the Public Staff will strive to answer the question.

Perry Settlement Exhibit I

Piedmont Natural Gas Company, Inc.
Docket No. G-9, Sub 781
SUMMARY OF SETTLEMENT ADJUSTMENTS
For The Test Year Ended December 31, 2020

Line No.	Item	Settlement	
1	**Application Increase in Revenue Requirement filed by the Company**	**$109,025,725**	
2	Company Filed June Update	(12,153,620)	
3	**Increase in Margin Revenue Requested due to Company Update**	**$96,872,105**	
	Public Staff Adjustments:		
4	Change in Equity ratio from 52% to 51.60%	(1,935,965)	
5	Change in cost of long-term debt from 4.08% to 4.08%	0	
6	Change in cost of short-term debt from 0.35% to 0.20%	(46,446)	
7	Change in return on equity from 10.25% to 9.60%	(20,743,428)	
8	Plant in Service Updates and Related Items at June 30, 2021	(27,888,796)	[1]
9	ADIT - updated balance to June 30, 2021	0	
10	Design Day Allocation Change - removed adjustment	0	
11	Cash working capital - Lead Lag based on pro forma revenues and expenses	(1,046,450)	
12	Other working capital - June 30, 2021 updates	0	
13	EOP Revenues & Commodity COG - moved to line 47	0	
14	Adjustment to other operating revenues	(1,905,124)	
15	Adjustment to the Cost of Gas - moved to line 48	0	
16	Robeson LNG Plant Adjustment - Lines 456 and 457, land, and operating expenses	(5,189,068)	[1]
17	Special Contract (Original Lincoln CT) - remove plant previously recovered through lump sum payment	(111,287)	
18	Payroll and Related Expenses	(15,965)	
19	Other Benefits	(1,313,594)	
20	Pension OPEB LTD Expense	(436,672)	
21	Customer Payment Fees	0	
22	Board Expenses	(362,829)	
23	Executive Compensation	(270,949)	
24	Incentive Plans	(367,973)	
25	Rate Case Expenses - 4 year amortization, no unamortized balance from Sub 743	(175,794)	
26	Sponsorships & Donations	(63,771)	
27	Uncollectibles	(1,015,778)	
28	Inflation Adjustment	(160,589)	
29	Nonutility Adjustment - O&M and plant	(547,483)	
30	Deferral: PIM Transmission Costs - update actual expenses @ June 30, 2021, 4 years -adjusted reg asset EOP bal	(272,957)	
31	Deferral: Environmental Costs - update actual expenses @ June 30, 2021, 4 years -adjusted reg asset EOP bal	26,407	
32	Deferral: PIM Distribution Costs - update actual expenses @ June 30, 2021, 4 years-adjusted reg asset EOP bal	389,477	
33	Deferral Eastern NCNG, 4 year amortization	(138,435)	
34	Deferred Undercollection of Regulatory Fee, 4 years	(54,416)	
35	COVID Expense Adjustment	(438,384)	
36	Regulatory Fee Expense	3,797	
37	Advertising - remove promotional, image, competitive, & non-recurring	(384,905)	
38	Aviation Expense	(192,202)	
39	Interest on customer deposits	(490)	
40	Lobbying Expenses	(76,564)	
41	Amortization of Federal protected EDIT, net of tax	1,652,340	
42	Change in retention factor - Uncollectibles and Regulatory Fee changes	(88,311)	
43	Adjust cash working capital for recommended revenue increase	433,855	
44	Rounding	305	
45	**Total Settlement Adjustments to Margin Revenue**	(62,738,445)	
46	**Settlement Increase in Margin Revenue**	**$34,133,660**	
47	Decrease in Commodity Cost of Gas - update CU & LAUF factor	(2,035,207)	
48	Increase in Demand costs - update fixed gas costs	8,966,494	
49	**Settlement Increase in COG of Gas Revenues (Sum of Lines 47-48)**	6,931,287	
50	**Total Settlement Revenue Requirement Increase**	**$41,064,947**	
	EDIT Rider impacts on Revenue Requirement:		
51	Annual Federal Unprotected EDIT Rider, 3 year remaining flow back	($25,562,970)	
52	Annual State EDIT Rider, 1 year remaining flow back	(22,201,275)	
53	**Annual EDIT Rider Impact (Sum of Lines 51-52)**	**($47,764,245)**	
54	**Change in Revenue Requirement for Year 1, including EDIT Rider Impact [2]**	($6,699,298)	
55	**Change in Revenue Requirement for Years 2 & 3, including EDIT Rider Impact [2]**	$15,501,977	
56	**Change in Revenue Requirement for Year 4, including EDIT Rider Impact [2]**	$41,064,947	

[1] Excludes Robeson LNG Plant and the Pender Onslow Expansion Project

[2] Year 1 = Nov 1, 2021 thru Oct 31, 2022
Year 2 = Nov 1, 2022 thru Oct 31, 2023

Year 4 = Nov 1, 2024 thru Oct 31, 2025

BEFORE THE NORTH CAROLINA UTILITIES COMMISSION

Docket No. G-9, Sub 781

In the Matter of

Application of Piedmont Natural Gas Company, Inc. for an Adjustment of Rates, Charges, and Tariffs Applicable to Service in North Carolina	)))))	**PETITION**

Piedmont Natural Gas Company, Inc. ("Piedmont" or "the Company"), through counsel and pursuant to N.C. Gen. Stat. § 62-133 and Rule R1-17 of the Rules and Regulations of the North Carolina Utilities Commission ("Commission"), hereby respectfully requests that the Commission approve each of the following proposals described further herein and supported by the testimony of Company witnesses filed concurrent herewith: (i) a general increase in and revisions to the rates and charges for customers served by the Company; (ii) continuation of Piedmont's Integrity Management Rider ("IMR") mechanism contained in Appendix E to its approved service regulations; (iii) continued regulatory asset treatment for certain incremental Transmission Integrity Management Program ("TIMP") and Distribution Integrity Management Program ("DIMP") Operations and Maintenance ("O&M") expenses, and certain incremental environmental cleanup and remediation O&M expenses; (iv) continued utilization of the depreciation rates for the Company's North Carolina and joint property assets approved in the Company's most recent general rate case in 2019; (v) revised and updated amortizations and recovery of certain regulatory assets accrued since Piedmont's last general rate case proceeding; (vi) utilization of the lead-lag study filed by Piedmont in its most recent general rate case filing in 2019; (vii) adoption of a Rider mechanism to allow Piedmont to recover the costs of its approved energy efficiency programs from customers on a commensurate basis with the electric utilities with whom Piedmont competes or, in the alternative, authorization to defer costs associated with Piedmont's approved energy efficiency programs pending amortization at the Commission's discretion at some later date; and (viii) other updates and revisions to Piedmont's rate schedules and service regulations.

The relief requested herein, among other things, is designed to update the Company's rates, charges, and tariffs in conformance with the Company's additional investment of capital to expand its gas distribution system to better serve its current and future customers and to comply with federal pipeline safety and integrity requirements and for changes to the Company's capital structure and operating expenses. The revised rates Piedmont proposes to implement in this proceeding are set forth on Appendix I to this Petition. In support of this Petition and all of the relief sought by Piedmont in this docket, the Company respectfully shows the following:

I.

II.

Description of Applicant

Piedmont is a subsidiary of Duke Energy Corporation and is engaged in the business of transporting, distributing and selling natural gas in the states of North Carolina, South Carolina and Tennessee. Piedmont is a public utility under the laws of this State, and its public utility operations in North Carolina are subject to the jurisdiction of this Commission. The Commission has previously granted Piedmont Certificates of Public Convenience and Necessity authorizing it to acquire certain gas franchises and properties in the State of North Carolina. Piedmont currently provides natural gas service to approximately 775,000 customers in North Carolina.

III.

Additions to Natural Gas Facilities for Expansion and in Compliance with Federal Pipeline Safety and Integrity Requirements

In order to make natural gas service available to as many citizens within its certificated service area as feasible, since its last rate case, Piedmont has been adding customers and making capital investments in various system growth projects, including reinforcement of existing transmission facilities. In addition to capital investments prompted by system growth, Piedmont has also made substantial capital investments (and is continuing to make such investments) in projects designed to enable the Company to comply with federal pipeline safety and integrity management requirements. The capital investments in integrity management related projects have been included in the operation of Piedmont's IMR mechanism. While Piedmont has been allowed to begin recovering the costs and earning a return on much of its capital investment for integrity related projects under the IMR mechanism, neither its integrity-related capital investments nor its capital expended for system growth infrastructure investments are currently reflected Piedmont's base rates. This rate case filing seeks to include all such capital invested since Piedmont's last general rate case filing into its base rates.

IV.

Reasons Supporting a General Rate Increase

As shown in Exhibit ___(QPB-7), filed concurrent with this Petition, the Company's *pro forma* overall rate of return as of December 31, 2020 is 5.54% and its *pro forma* return on common equity as of that time is only 6.92%. This pro forma level of return will not permit the Company to compete for debt and equity capital on reasonable terms, and, therefore, will not enable the Company to continue to invest in new plant, add new customers and provide adequate, safe, and reliable service to existing customers. If the Company is to maintain its facilities and services in accordance with the reasonable requirements of its customers and the requirements of the Pipeline and Hazardous Material Safety Administration ("PHMSA"), compete for capital on terms that are reasonable and fair to customers and to investors, and produce a fair return for stockholders, it must be granted general rate relief. These and other reasons supporting Piedmont's request for general rate relief are explained in the concurrently filed testimonies and exhibits of Piedmont witnesses Weintraub, Weisker, Newlin, Powers, Couzens, Bowman, D'Ascendis, and Menhorn.

V.

Effective Date of General Rate Increase

The Company proposes to make the rates set forth in Appendix I hereto effective on and after April 21, 2021; however, the Company anticipates that the Commission may suspend these rates and set this application for hearing. The Company respectfully requests that the Commission establish a procedural schedule that will permit the final rates in this case to become effective as soon as reasonably possible following the completion of any evidentiary hearing process determined necessary by the Commission.

VI.

Exhibits and Schedules

Pursuant to the provisions of Rule R1-17 of the Commission's Rules and Regulations, the Company is filing with this Petition: (1) a one page summary of all proposed increases and changes affecting customers, which schedule has been identified as Appendix I (Rule R1-17(b)(9)(f); (2) N.C.U.C. Form G-1 (Rule R1-17(b)(12)); and (3) the direct testimony and exhibits that will be relied upon by Petitioner at the hearing of this Docket (Rule R1-17(b)(13)). Information relative to Piedmont's filing and responsive to the requirements of Commission Rule R1-17(b)(1) to (10) is provided and/or discussed as follows:

Rule R1-17(b)(1)	Piedmont's present rates and charges now on file with and approved by the Commission are set forth in Appendix I.
Rule R1-17(b)(2)	Piedmont's proposed rates and charges proposed to be placed into effect on April 21, 2021 are set forth in Appendix I.
Rule R1-17(b)(3)	The original cost of all Piedmont property used or useful in providing service to the public to which the proposed rates relate as of December 31, 2020 as adjusted for projected changes through June 30, 2021 is set forth in Exhibit__ (QPB-1).
Rule R1-17(b)(5)	A statement of Accrued Depreciation on all property to which the proposed rates relate as of December 31, 2020 and of the rates and methods used in computing the amount charged to depreciation are set forth on Exhibit__(QPB-3) and Exhibit__(QPB-6).
Rule R1-17(b)(6)	A statement of materials and supplies costs as of December 31, 2020 is contained on line 3 of Exhibit__(QPB-4).
Rule R1-17(b)(7)	A statement of Cash Working Capital required by Piedmont for the efficient, economic operation of its business as of December 31, 2020 is contained in Exhibit__(QPB-4).
Rule R1-17(b)(8) &(9)	A statement of gross revenues received, operating expenses and net operating income for return on investment for the twelve months ended December 31, 2020, as the same appear on Petitioner's books, together with (1) accounting and pro forma adjustments, (2) rates of return on original cost rate base and (3) return on common equity is set forth in Exhibit__(QPB-7).
Rule R1-17(b)(10)	A Balance Sheet as of December 31, 2020, and Income Statement for the twelve months ended December 31, 2020 is set forth in Exhibit__(QPB-8).

VII.

Utilization of Existing Depreciation Rates

For purposes of this proceeding, Piedmont seeks to utilize the depreciation rates approved in Docket No. G-9, Sub 743, Piedmont's 2019 general rate case, to amortize the costs of assets, net of salvage value, over the estimated useful life of the assets. These depreciation rates were approved only two years ago and are sufficiently fresh that they do not require updating in this case. Utilization of these rates will allow Piedmont to continue to properly align the Company's recovery of its invested capital with the useful life of its underlying physical plant.

VIII.

Adoption of Lead/Lag Study from Docket No. G-9, Sub 743

For purposes of this proceeding, Piedmont proposes to utilize the Lead/Lag Study results from its prior 2019 rate case for purposes of calculating Cash Working Capital requirements in this proceeding. This Lead/Lag Study was adopted as part of the settlement with the Public Staff in the last case, was approved by the Commission in that context, and underlies Piedmont's current rates. The study is also relatively recent and Piedmont is not aware of any changes to its practices that would materially alter the results of that study. As such, Piedmont respectfully submits that the cost saving benefit to customers from not conducting a new study in this case outweigh the risk of any difference in lead/lag day computations that might result from conducting a new study.

IX.

Changes in Rate Schedules, Service Regulations, and Classifications

Piedmont proposes to implement new rates as reflected on Appendix I attached hereto. Piedmont's proposed rate changes are discussed in the testimonies of Piedmont witnesses Pia Powers, Kally Couzens, and Cindy Menhorn. Piedmont also proposes to make minor changes to its Rate Schedules and Service Regulations designed to clean up administrative inconsistencies in these tariffs. These proposed changes to Piedmont's Rate Schedules and Service Regulations are discussed in the testimony of Piedmont witness Pia Powers.

X.

Amortization and Collection of Unamortized Regulatory Asset Balances

Piedmont seeks amortization and collection of certain expenses that have been deferred pursuant to prior Commission order. These costs, proposed amortizations and recovery are discussed in the testimony of Piedmont witness Quynh Bowman.

XI.

Establishment of New Energy Efficiency Program Cost Recovery Rider

Piedmont proposes to establish, as Appendix H to its North Carolina Service Regulations, a new rider mechanism to collect and recover the costs of its various approved energy efficiency programs. The rider proposed by the Company will be similar to those authorized and approved by the Commission for various electric utilities in the State who compete with Piedmont and whose energy efficiency and conservation programs, in some cases, provide incentives to adopt electricity in applications where natural gas is a competitive alternative fuel. Allowing natural gas utilities to effectuate recovery of dollars spent on energy efficiency using the same rider mechanism as competing electric utilities will ensure a level playing field when managing and operating these types of programs for the benefit of the public and will guard against unfair or destructive competition. This rider is discussed in the testimony of Piedmont witness Powers. In the alternative, Piedmont requests authorization from the Commission to defer the costs incurred under its approved Energy Efficiency programs (which have been removed from its base rates in this filing), in order to amortize such costs in a future proceeding subject to the Commission's discretion.

XII.

Intent to Update as Permitted by N. C. Gen. Stat. § 62-133(c)

This Petition, the N.C.U.C. Form G-1 and the testimony and exhibits of witnesses contain information that is now known to the Company and upon which the Company will rely to support this request. However, the Company plans to offer at or prior to hearing such additional relevant, material, and competent evidence as may be permitted by G.S. § 62-133(c) or other provision of North Carolina law as to the Company's costs, revenues, volumes, rate base, return or any other matter relevant to the Commission's determination of the matters raised herein.

XIII.

Consolidation with Docket No. G-9, Sub 722

Piedmont is aware of the Commission's March 16, 2021 Order Consolidating Dockets and Requiring Filing of Testimony issued in Docket No. G-9, Sub 722, which consolidated issues pending in that docket with this rate case proceeding and directed the filing of prefiled testimony by Piedmont in support of its positions in Sub 722 by April 19, 2021. Piedmont will comply with this Order and will prefile testimony on the issues raised in Docket No. G-9, Sub 722 on or before April 19, 2021.

WHEREFORE, the Company respectfully requests the Commission to grant a general increase in rates and charges for natural gas services, to approve the proposed rates set forth in Appendix I hereto, to adopt the depreciation rates and Lead/Lag study for Piedmont approved in its last general rate case proceeding, to approve the changes in rate design, costs, revenues, rate base, cost allocation, rate schedules, service regulations, classifications and practices requested herein, to amortize and permit recovery by Piedmont (or a return to customers) of certain deferred environmental and pipeline integrity management costs, to approve a new rider mechanism for recovery of energy efficiency program costs, and to grant all other relief requested herein and addressed in the testimony of Piedmont's witnesses filed concurrently herewith, all to be effective April 21, 2021. The Company further requests that the Commission grant a waiver of any of the Commission's Rules and Regulations as may be necessary or appropriate to provide the Company with the relief requested in this Petition.

This the 22nd day of March, 2021.
