Subject: Protect net metering and solar energy in N.C. (Docket E-100 Sub 83)

Dear North Carolina Utilities Commission:

We, the undersigned, are North Carolina electricity customers. We urge you to stand strong for North Carolinians like us against Duke Energy's attempts to weaken rooftop solar rights.

North Carolina ranks among our nation's top solar states, but unlike other leaders, that solar power is overwhelmingly in the hands of the utility rather than the rooftops of homes, schools, and businesses.

Now Duke Energy has publicly stated that it wants to weaken North Carolina's net metering program for rooftop solar. The utility is working to keep its own monopoly grip on electricity by reducing the amount of credit that its customer receive on their electricity bills for valuable solar power. North Carolinians deserve better.

Rooftop solar power delivers numerous economic and health benefits to North Carolina. Private investment in local power reduces the need for expensive and polluting conventional power plants and transmission infrastructure. Recent analysis found that these direct grid benefits outweigh the costs by 30 percent. The state's growing solar industry supports more than 2,400 local jobs throughout the state, nearly doubling last year alone. And, perhaps most importantly, rooftop solar gives North Carolinians control over their electricity bills and energy resources like never before.

As Duke Energy takes its fight against rooftop solar rights to the Utilities Commission, we hope you'll stand strong for North Carolinians and do what you can to keep rooftop solar shining with strong net metering.

Subject: RE: Docket E-100 Sub 83

I'm writing in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Recent analysis found that these direct grid benefits outweigh the costs by 30 percent. The state's growing solar industry supports more than 2,400 local jobs throughout the state, nearly doubling last year alone. And, perhaps most importantly, rooftop solar gives North Carolinians control over their electricity bills and energy resources like never before.

As Duke Energy takes its fight against rooftop solar rights to the Utilities Commission, we hope you'll stand strong for North Carolinians and do what you can to keep rooftop solar shining with strong net metering.

Subject: Protect net metering and solar energy in N.C. (Docket E-100 Sub 83)

Dear North Carolina Utilities Commission:

We, the undersigned, are North Carolina electricity customers. We urge you to stand strong for North Carolinians like us against Duke Energy's attempts to weaken rooftop solar rights.

North Carolina ranks among our nation's top solar states, but unlike other leaders, that solar power is overwhelmingly in the hands of the utility rather than the rooftops of homes, schools, and businesses.

Now Duke Energy has publicly stated that it wants to weaken North Carolina's net metering program for rooftop solar. The utility is working to keep its own monopoly grip on electricity by reducing the amount of credit that its customer receive on their electricity bills for valuable solar power. North Carolinians deserve better.

Rooftop solar power delivers numerous economic and health benefits to North Carolina. Private investment in local power reduces the need for expensive and polluting conventional power plants and transmission infrastructure. Recent analysis found that these direct grid benefits outweigh the costs by 30 percent. The state's growing solar industry supports more than 2,400 local jobs throughout the state, nearly doubling last year alone. And, perhaps most importantly, rooftop solar gives North Carolinians control over their electricity bills and energy resources like never before.

As Duke Energy takes its fight against rooftop solar rights to the Utilities Commission, we hope you'll stand strong for North Carolinians and do what you can to keep rooftop solar shining with strong net metering.

Dear North Carolina Utilities Commission:

We, the undersigned, are North Carolina electricity customers. We urge you to stand strong for North Carolinians like us against Duke Energy's attempts to weaken rooftop solar rights.

After the recent coal ash spill into the Dan River, it seems obvious that North Carolina needs to move beyond coal and avoid investments in natural gas in favor of renewable, clean energy sources, especially solar.

North Carolina ranks among our nation's top solar states, but unlike other leaders, that solar power is overwhelmingly in the hands of the utility rather than the rooftops of homes, schools, and businesses.

Now Duke Energy has publicly stated that it wants to weaken North Carolina's net metering program for rooftop solar. The utility is working to keep its own monopoly grip on electricity by reducing the amount of credit that its customer receive on their electricity bills for valuable solar power. North Carolinians deserve better.

Dear North Carolina Utilities Commission:

Maybe there is money in it for you to be pro Duke Energy. But to your children, and grandchildren there is a cleaner future with less pollutants and fresh water. And for NC this could mean more jobs for citizens to produce and install the equipment needed in homes, schools, and businesses. And people who have jobs spend money. Most of it in their own state. Will you encourage investment in solar power? We are at risk now...will you help us or hurt us...

We, the undersigned, are North Carolina electricity customers. We urge you to stand strong for North Carolinians like us against Duke Energy's attempts to weaken rooftop solar rights.
