Docket: E-100 Sub 190

Message

Let's make North Carolina a leader in Green Energy. Solar is a good start. How about it?

Docket

E 100 Sub 190 / E 100 Sub 190 CS

Message

It would be more beneficial to everyone in the long run if Duke were to transition to solar, because they would make more selling solar now, rather than later when the process to make solar becomes more refined and cheaper to sell

Docket

E-100, Sub 190CS.

Message

Please refuse Duke Power's carbon plan. It includes a huge, expensive (to consumers) and unnecessary increase in gas-fired capacity that flies in the face of all state, federal, and international goals for decreasing carbon emissions. They will never consider clean renewable energy sources until you force them to. Their only concern is profit for their shareholders. Please take seriously your duty to protect our common home.
