Clerk's Office
N.C. Utilities Commission

Dear NC utilities commissioners,

Please do all you can to protect the Terra Ceia community from Wilkinson Solar. They continue to not tell the whole truth and keep this community uninformed. Posted in the docket 8-30-17 is a confidential agreement that four land owners and the Terra Ceia school are now satisfied. At the county commissioners meeting September 5th, Mrs. Montgomery states "representative from TCCS and residents have reached an agreement". I only see four signatures and the school posted in the docket. What about other concerned citizens and the Delta City community of 300 people? Do we not matter? We live in a small community and there are a lot of rumors. According to Mrs Montgomery "Wilkinson Solar LLC will be revising its plan for locating certain components of this project" When will the citizens be made aware of these changes? When construction starts? New land owners that were not in the original plan have admitted to signing leases for solar panels and there are rumors that the substation is being moved. When will the other concerned citizens that may be affected by all the changes and not know the changes be notified. Shouldn't Wilkinson Solar have to show the Utilities Commission and the citizens of Terra Ceia an updated plan and map before this project order is approved by your department.

Thank you,

Kristina Beasley
