**RE: Verified Request to Amend CPCN**  
**NCUC Docket No. SP-5261, Sub 0**

Dear Chief Clerk:

This filing is an amendment to the Certificate of Public Convenience and Necessity ("CPCN") in the above-referenced docket pursuant to Rule R8-64(d)(3). The Recommended Order Granting a CPCN to Overman Solar, LLC ("Overman Solar") under Docket No. SP-5261 Sub 0 became effective on December 15, 2015.

The approved facility site map is being adjusted to reflect a new northern boundary for Overman Solar and alternate interconnection routes. The overall generation size and owner of the solar photovoltaic electric generating facility remains the same as previously approved by the North Carolina Utilities Commission. Due to changes in technology Overman Solar needs additional land to accommodate the size and type system originally approved. Access to the site remains unchanged. Alternate points of interconnection are included in this amendment. Only one point of interconnection will be utilized. Please see attached map which displays the additional approximately 20 acres of land and alternate routes for interconnection requested for this CPCN amendment.

Due to the fact that all primary elements of the previously submitted application and subsequent Recommended Order Granting CPCN remain unchanged, we respectfully request that the Commission amend the CPCN such that it includes the proposed additional land and interconnection routing as depicted in the attached map.

If you have any questions, please feel free to contact us.

Sincerely,

Dennis Richter
