Clerk's Office

N.C. Utilities Commission

I would like to file a complaint against the proposed solar fields in Fallston, NC. I have lived here for just over 13 years and the biggest factor in my decision to buy a home here was the beautiful farmland surrounding us. I do not want to be surrounded by an ugly, industrial landscape. I used to work in Boiling Springs, NC and first hand witnessed the large cotton fields on Beaver Dam Church Rd give way to these monstrosities. It's heartbreaking. These solar panels will not only destroy the scenic beauty, but they will be taking valuable farmland out of production for years to come. In the best case, it's going to create a solar panel wasteland where nobody's going to want to live.

Please keep me apprised of any town meetings that will occur as a result of this. I almost did not catch this advertisement in the newspaper due to the wording. It was completely unrecognizable as having anything to do with this proposed solar field. Were it not for a friend pointing it out, I would have completely missed it.
