Clerk's Office
N.C. Utilities Commission

I am writing about the new proposed Duke transmission line that is to cross my property at Elevation¹²⁹⁶ road in Four Oaks, N.C.

This is and has a family for four generations. It is a tree farm listed with the forestry service in Johnston County. At present it produces pine straw as a crop and eventually the trees will be harvested for timber and replanted in new trees as these trees were planted.

Your proposed transmission line will not benefit me in any way. I will not be able to replant the trees as was planned. Therefore my wife and I are against the proposed route across our family farm.

Also we are very concerned about the E M F from power lines.

We never received a certified letter and heard about it from neighbors middle of June 2017.

Roy Massengill
